## PREFACE.

---

By the Constitution of the Commonwealth of Australia, the Commonwealth is empowered "to make laws for the peace, order, and good government of the Commonwealth, with respect to," *inter alia*, "Census and Statistics." In exercising the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following, the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the seventh authoritative Year Book issued under the Federal Constitution.

This Year Book furnishes corrected statistics for the whole period of Australian settlement, viz., from 1788 to 1913. Wherever space has permitted, detailed statistics have been furnished for each year since Federation, viz., from 1901 to 1913. In the few instances where this has proved impracticable, reference will be necessary to Year Books Nos. 1 to 6. The inclusion, as stated, of the total available information in the more important branches of statistics enables this publication to be used wherever it is desired to make a comparative survey of the evolution of this portion of the British Empire. Not only are the results given for the Commonwealth as a whole, but also for each State therein.

The general arrangement of the publication, which has been widely commended, corresponds with that of previous issues, and is shewn in the synopsis on pp. xiii. to xxix. immediately following.

In addition, however, to what may be called purely statistical matter, each issue contains special articles dealing at length with some particular subject or subjects of more or less permanent interest. These cannot of course be repeated year after year, but usually a brief condensation is given in subsequent issues. Though many articles in Year Books Nos. 1 to 6 have been reduced to synopses or deleted, sufficient indication is given to enable the subject to be traced in previous issues.

The present issue of the Year Book contains several new features of interest. Among these may be mentioned an article on the salient features in the Geological History of Australia, with special reference to changes of climate. The section dealing with Labour and Industrial Statistics, a subject on which special and

organised investigation has been carried out by the Bureau for the last two years, has been considerably expanded, and new and valuable tables have been introduced. The chapter on Local Government has been remodelled, and a more ready comparison may now be made of the various municipal functions in the several States. In the section dealing with "Miscellaneous" matters, the official reports of the Interstate conferences which were held early in 1914, have been included. Mention may also be made of the Bibliography of recent works on Australia appearing on page 12, which has been increased by the addition of an Index of works on special subjects of Australian interest. This will be found on page 13.

The subject matter throughout is dealt with, as far as possible, from the following points of view, viz.:—

(i.) The development of the individual States. (ii.) The progress of Australia as a whole from the earliest times. (iii.) The statistical comparison of Australia with other leading countries of the world.

The full text of the Commonwealth Constitution Act and Amendments appears on pages 16 to 39.

A feature of this publication is the use made of maps and diagrams. As a rule, facts can be properly appreciated only by the use of graphs, and the progress of events, the characteristics of growth and decline, can in general be grasped much more readily graphically than numerically. The diagram or "graph" is a direct picture in which the relative magnitudes are preserved and by which instantaneous comparisons of a wide range of facts are made possible at a glance. The statistical data, however, are also given *in extenso* numerically.

The development of Australia has been in many instances very remarkable, and this could be shewn only by tables and graphs dating back to its beginning in 1788. In most cases accurate data are not available for years much before 1860. In such cases, therefore, it seems sufficient at present to give continuous results from that year onwards.

The great mass of material embodied in each Year Book is always carefully examined, but it would be idle to hope that all error has been avoided. The Commonwealth Statistician desires to express appreciation of the opportunity afforded him of perfecting the matter of the Year Book, by those who have been kind enough to point out defects or make suggestions.

The corresponding years indicated in various sections of this book do not always necessarily refer to the same period, the year ending in some cases on 31st December, 30th June, or 31st March, etc. The precise period for which returns are given is indicated where necessary.

Recent information or returns which have come to hand since the various Sections were sent to press, may be found in the Appendix, p. 1063.

In conclusion, the Commonwealth Statistician desires to express his cordial thanks to the State Statisticians, to the responsible officers of the various Commonwealth and State Departments, and to others, who have kindly, and often at considerable trouble, supplied all desired information.

G. H. KNIBBS,  
*Commonwealth Statistician.*

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS,  
29th June, 1914.

# INDEX TO SPECIAL ARTICLES, ETC., APPEARING IN PREVIOUS ISSUES.

These articles have appeared in former issues of the Commonwealth Year Book, but, owing to exigencies of space, they are not included in this publication.

NOTE.—The Roman figures indicate the number of the Year Book to which reference is made.

## SECTION VII.—PASTORAL PRODUCTION.

|  |     |  |     |
|--|-----|--|-----|
| <b>§ 1. Initiation and Growth of Pastoral Industry</b>       |     | 2. Distribution throughout C'wealth... ..                      | 287 |
| 1. Early Statistics ... ..                                   | 275 | 3. Proportion in the several States ... ..                     | 287 |
| 2. Subsequent Statistics ... ..                              | 275 | 4. Oversea Imports & Exports of Sheep ... ..                   | 288 |
| 3. Increase in Numbers ... ..                                | 275 | 5. Sheep Slaughtered ... ..                                    | 288 |
| 4. Fluctuations ... ..                                       | 276 | 6. Exports of Mutton and Lamb preserved by Cold Process ... .. | 288 |
| 5. Live Stock in Relation to Population ... ..               | 276 | 7. Comparison with other Countries ... ..                      | 289 |
| 6. Live Stock in Relation to Area ... ..                     | 276 | 8. Relation to Population... ..                                | 290 |
| 7. Minor Classes of Live Stock ... ..                        | 277 | <b>§ 5. Wool</b>   |     |
| 8. Net Exports of Principal Pastoral Products ... ..         | 277 | 1. Importance of Wool Production ... ..                        | 290 |
| <b>§ 2. Horses</b>   |     | 2. Greasy and Scoured Wool ... ..                              | 290 |
| 1. Suitability of Australia for Horse-breeding ... ..        | 278 | 3. Total Production... ..                                      | 293 |
| 2. Distribution through the C'wealth... ..                   | 278 | 4. Wool Locally Used ... ..                                    | 293 |
| 3. Proportion in the several States ... ..                   | 279 | 5. Bounties on Combed Wool or Tops Exported ... ..             | 294 |
| 4. Oversea Export Trade in Horses ... ..                     | 279 | 6. Exports of Wool ... ..                                      | 294 |
| 5. Comparison with other Countries ... ..                    | 281 | 7. Care needed in Comparing Clips ... ..                       | 295 |
| 6. Relation to Population ... ..                             | 282 | 8. Wool-producing Countries in Southern Hemisphere ... ..      | 295 |
| <b>§ 3. Cattle</b>   |     | 9. United Kingdom Importation of Wool ... ..                   | 296 |
| 1. Purposes for which Raised ... ..                          | 282 | 10. The Wool Market ... ..                                     | 296 |
| 2. Distribution throughout C'wealth... ..                    | 282 | <b>§ 6. Hides and Sheepskins</b>                               |     |
| 3. Proportion in each State ... ..                           | 283 | 1. Extent of Trade ... ..                                      | 301 |
| 4. Imports and Exports of Cattle ... ..                      | 283 | 2. Sheepskins with Wool ... ..                                 | 301 |
| 5. Cattle Slaughtered ... ..                                 | 284 | 3. Sheepskins without Wool ... ..                              | 302 |
| 6. Export of Beef preserved by Cold Process ... ..           | 284 | 4. Hides... ..   | 303 |
| 7. Comparison with other Countries... ..                     | 285 | <b>§ 7. Graphical Representation of Pastoral Production</b>    |     |
| 8. Relation to Population ... ..                             | 286 | 1. General ... ..  | 304 |
| <b>§ 4. Sheep</b>  |     | 2. Horses ... ..   | 304 |
| 1. The Founding of the Commonwealth Pastoral Industry ... .. | 286 | 3. Cattle ... ..   | 304 |
|  |     | 4. Sheep ... ..  | 304 |
|  |     | 5. Pigs ... ..   | 304 |

## SECTION VIII.—AGRICULTURAL PRODUCTION.

|   |     |   |     |
|---|-----|---|-----|
| <b>§ 1. Introductory</b>                      |     | 4. Relation to Total Area... ..   | 307 |
| 1. Early Attempts at Agriculture ... ..       | 305 | 5. Artificially-sown Grasses ... ..                                       | 307 |
| 2. The First Sowing ... ..                    | 305 | <b>§ 3. Relative Importance of Crops</b>                                  |     |
| 3. Discovery of Suitable Agricul. Land ... .. | 305 | 1. Various Crops ... ..   | 308 |
| <b>§ 2. Progress of Agriculture</b>           |     | 2. Relative Areas of Crops in States and Territories ... ..               | 308 |
| 1. Early Records ... ..                       | 305 | 3. Relative Positions of States and Territories in regard to Crops ... .. | 309 |
| 2. Progress of Cultivation since 1860 ... ..  | 306 | 4. Acreage of Principal Crops, Cwltch. ... ..                             | 310 |
| 3. Relation to Population ... ..              | 306 |   |     |

| § 4. Wheat                               | PAGE |
|--|------|
| 1. Progress of Wheat-growing ...         | 310  |
| 2. Australian & Foreign Wheat Yields ... | 312  |
| 3. Wheat Crops of the World ...          | 312  |
| 4. Prices of Wheat ...                   | 313  |
| 5. Imports, Exports of Wheat & Flour ... | 314  |
| 6. Value of the Wheat Crop ...           | 317  |

| § 5. Oats                               |     |
|---|-----|
| 1. Progress of Cultivation ...          | 317 |
| 2. Total Yield ...                      | 318 |
| 3. Average Yield ...                    | 318 |
| 4. Relation to Population ...           | 319 |
| 5. Value of Oat Crop ...                | 319 |
| 6. Imports and Exports ...              | 319 |
| 7. Oatmeal, etc. ...                    | 320 |
| 8. Comparisons with other Countries ... | 320 |
| 9. Comparison of Yields ...             | 320 |
| 10. Price of Oats ...                   | 321 |

| § 6. Maize                                     |     |
|--|-----|
| 1. States Growing Maize ...                    | 321 |
| 2. Area under Maize ...                        | 321 |
| 3. Total Yield ...                             | 322 |
| 4. Average Yield ...                           | 322 |
| 5. Value of Maize Crop ...                     | 322 |
| 6. Relation to Population ...                  | 323 |
| 7. Australian and Foreign Maize Production ... | 323 |
| 8. Comparison of Yields ...                    | 323 |
| 9. Oversea Imports and Exports ...             | 324 |
| 10. Prepared Maize ...                         | 324 |
| 11. Price of Maize ...                         | 324 |

| § 7. Barley                               |     |
|---|-----|
| 1. Area under Barley ...                  | 324 |
| 2. Malting and other Barley ...           | 325 |
| 3. Total Yield ...                        | 325 |
| 4. Value of Barley Crop ...               | 326 |
| 5. Relation to Population ...             | 326 |
| 6. Commonwealth Imports & Exports ...     | 326 |
| 7. C'wealth Imports & Exports of Malt ... | 327 |
| 8. Comparison with other Countries ...    | 327 |
| 9. Average Yield ...                      | 328 |
| 10. Price of Barley ...                   | 328 |

| § 8. Other Grain and Pulse Crops | PAGE |
|----------------------------------|------|
|                                  | 328  |

| § 9. Potatoes                          |     |
|--|-----|

| 4. Factory System ... ..                            | 373  |   |      |
| 5. Butter and Cheese Factories ... ..               | 374  | <b>§ 6. Summary of Australian Farmyard and Dairy Products</b> ... ..                        | 383  |
| <b>§ 2. Milk, Butter, and Cheese</b>                |      | <b>§ 7. Summary of Australian Farmyard and Dairy Products Exported, 1907 to 1912</b> ... .. | 384  |
| 1. Dairy Herds ... ..                               | 374  | <b>§ 8. British Imports of Dairy Products</b>   |      |
| 2. Milk ... ..                                      | 374  | 1. Value of Britain's Imports of Dairy Products ... ..                                      | 384  |
| 3. Butter and Cheese ... ..                         | 375  | 2. Butter ... ..  | 385  |
| 4. Concentrated Milk ... ..                         | 376  | 3. Cheese ... ..  | 385  |
| 5. Oversea Trade in Milk, Butter, and Cheese ... .. | 376  | 4. Bacon and Ham ... ..   | 385  |
| 6. Local Consumption of Butter and Cheese ... ..    | 377  | 5. Pork ... ..  | 385  |
| <b>§ 3. Pigs, Bacon, etc.</b>                       |      | 6. Other Products ... ..  | 385  |
| 1. Pigs ... ..                                      | 377  | <b>§ 9. Graphical Representation of Dairy Production</b> ... ..                             | 385  |
| 2. Bacon and Ham ... ..                             | 378  |   |      |
| 3. Oversea Trade in Pig Products ... ..             | 378  |   |      |
| 4. Local Consumption of Bacon and Ham ... ..        | 379  |   |      |
| 5. Total Dairy Production ... ..                    | 379  |   |      |
| <b>§ 4. Poultry Farming</b>                         |      |   |      |
| 1. Development of the Industry ... ..               | 380  |   |      |
| 2. Production of Poultry ... ..                     | 380  |   |      |
| 3. Oversea Trade in Poultry Products ... ..         | 381  |   |      |

## SECTION X.—FORESTS, FORESTRY, AND FORESTAL PRODUCTS.

|   |     |  |     |
|---|-----|--|-----|
| <b>§ 1. The Forests of Australia</b>              |     | <b>§ 3. Commercial Uses of Principal Australian Timbers</b> ... .. | 389 |
| 1. Extent of Forests ... ..                       | 386 | <b>§ 4. Forestal Industries and Production</b>                     |     |
| 2. Distribution of Timber ... ..                  | 387 | 1. Timber ... ..   | 389 |
| <b>§ 2. Forestry</b>                              |     | 2. Other Forest Produce ... ..                                     | 390 |
| 1. Objects ... ..                                 | 387 | <b>§ 5. Oversea Trade</b>  |     |
| 2. Forestry Departments ... ..                    | 387 | 1. Imports ... ..  | 390 |
| 3. Sylvicultural Nurseries and Plantations ... .. | 388 | 2. Exports ... ..  | 391 |
| 4. Instruction in Scientific Forestry ... ..      | 389 |  |     |
| 5. Forest Congresses ... ..                       | 389 |  |     |

## SECTION XI.—FISHERIES AND PISCICULTURE.

|  |     |  |     |
|--|-----|--|-----|
| <b>§ 1. Commercial Fisheries</b>         |     | <b>§ 4. Development of the Fishing Industry</b>      |     |
| 1. Fish Stocks ... ..                    | 395 | 1. Transport and Marketing ... ..                    | 400 |
| 2. Economic Fisheries ... ..             | 395 | 2. Experiment and Culture ... ..                     | 400 |
| 3. Distribution of Supplies ... ..       | 395 | <b>§ 5. The Commonwealth Department of Fisheries</b> |     |
| 4. Oyster Fisheries ... ..               | 395 | 1. The Federal Council of Australasia ... ..         | 400 |
| 5. Pearl-shelling ... ..                 | 395 | 2. Commonwealth Investigations ... ..                | 400 |
| <b>§ 2. Fisheries Statistics</b>         |     | 3. Scope of the Inquiry ... ..                       | 400 |
| 1. Estimates for the Commonwealth ... .. | 396 | 4. The F.I.S. "Endeavour" ... ..                     | 401 |
| <b>§ 3. Oversea Trade in Fish</b> ... .. | 398 | 5. Results ... ..                                    | 401 |
|  |     | 6. Treatment & Disposal of the Catch ... ..          | 402 |
|  |     | <b>§ 6. Fish Preserving</b> ... ..                   | 402 |

## SECTION XII.—MINES AND MINING.

|  |             |
|--|-------------|
| <b>§ 1. The Mineral Wealth of Australia</b>  | <b>PAGE</b> |
| 1. Place of Mining in Australian Development | 403         |
| 2. Extent of Mineral Wealth                  | 403         |
| 3. Value of Production during 1912           | 403         |
| 4. Total Production to end of 1912           | 404         |

## (A) METALS

|  |     |
|--|-----|
| <b>§ 2. Gold</b>   |     |
| 1. Discovery of Gold in various States                       | 405 |
| 2. Production of Gold at various Periods                     | 405 |
| 3. Changes in Relative Positions of States as Gold Producers | 407 |
| 4. Methods of Gold Mining adopted in each State              | 407 |
| 5. Remarkable Masses of Gold                                 | 411 |
| 6. Modes of Occurrence of Gold in Aust.                      | 411 |
| 7. Place of Commonwealth in the World's Gold Production      | 411 |
| 8. Employment in Gold Mining                                 | 412 |
| <b>§ 3. Platinum and the Platinoid Metals</b>                |     |
| 1. Platinum  | 412 |
| 2. Osmium, Iridium, etc.                                     | 413 |
| <b>§ 4. Silver</b>   |     |
| 1. Occurrence in each State                                  | 413 |
| 2. Development of Silver Mining                              | 413 |
| 3. Chief Centres of Silver Production                        | 414 |
| 4. World's Production of Silver                              | 416 |
| 5. Prices of Silver  | 416 |
| 6. Employment in Silver Mining                               | 416 |
| <b>§ 5. Copper</b>   |     |
| 1. Production of Copper                                      | 416 |
| 2. Sources of Production                                     | 417 |
| 3. Price of Copper   | 419 |
| 4. Relationship to World's Production                        | 419 |
| 5. Employment in Copper Mining                               | 419 |
| <b>§ 6. Tin</b>  |     |
| 1. Production of Tin   | 420 |
| 2. Sources of Production                                     | 420 |
| 3. World's Production of Tin                                 | 421 |
| 4. Prices of Tin   | 422 |
| 5. Employment in Tin Mining                                  | 422 |
| <b>§ 7. Zinc</b>   |     |
| 1. Production of Zinc  | 423 |
| <b>§ 8. Iron</b>   |     |
| 1. General   | 423 |
| 2. Production of Iron  | 424 |
| <b>§ 9. Other Metals</b>                                     |     |
| 1. Antimony  | 426 |
| 2. Arsenic   | 426 |
| 3. Barium  | 426 |
| 4. Bismuth   | 426 |
| 5. Chromium  | 427 |
| 6. Carnotite   | 427 |
| 7. Cobalt  | 427 |
| 8. Lead  | 427 |
| 9. Mercury   | 427 |

|                |     |
|----------------|-----|
| 10. Manganese  | 427 |
| 11. Molybdenum | 428 |
| 12. Radium     | 428 |
| 13. Tungsten   | 428 |
| 14. Tantalum   | 429 |
| 15. Uranium    | 429 |

## (B) NON-METALLIC MINERALS

|  |     |
|--|-----|
| <b>§ 10. Coal</b>                                  |     |
| 1. Production in each State                        | 429 |
| 2. Distribution and Quantity of Coal in each State | 430 |
| 3. Production of Coal various Countries            | 434 |
| 4. Export of Coal                                  | 434 |
| 5. Consumption of Coal in Australia                | 435 |
| 6. Price of Coal                                   | 436 |
| 7. Price of Coal in other Countries                | 437 |
| 8. Employment and Accidents in Coal Mining         | 438 |
| <b>§ 11. Coke</b>                                  |     |
| 1. Production of Coke                              | 438 |
| <b>§ 12. Oil Shale and Mineral Oils</b>            |     |
| 1. Production of Shale                             | 441 |
| 2. Export of Shale                                 | 442 |
| 3. Shale Oils Bounties                             | 442 |
| <b>§ 13. Other Non-metallic Minerals</b>           |     |
| 1. Alunite   | 442 |
| 2. Asbestos  | 442 |
| 3. Barytes   | 443 |
| 4. Clays and Pigments                              | 443 |
| 5. Coorongite                                      | 443 |
| 6. Fuller's Earth                                  | 443 |
| 7. Graphite  | 443 |
| 8. Gypsum  | 443 |
| 9. Tripolite or Diatomaceous Earth                 | 444 |
| 10. Salt   | 444 |
| 11. Natural Manures                                | 444 |

|                       |     |
|-----------------------|-----|
| <b>§ 11. Coke</b>     |     |
| 1. Production of Coke | 438 |

|   |     |
|---|-----|
| <b>§ 12. Oil Shale and Mineral Oils</b> |     |
| 1. Production of Shale                  | 441 |
| 2. Export of Shale                      | 442 |
| 3. Shale Oils Bounties                  | 442 |

|  |     |
|--|-----|
| <b>§ 13. Other Non-metallic Minerals</b> |     |
| 1. Alunite                               | 442 |
| 2. Asbestos                              | 442 |
| 3. Barytes                               | 443 |
| 4. Clays and Pigments                    | 443 |
| 5. Coorongite                            | 443 |
| 6. Fuller's Earth                        | 443 |
| 7. Graphite                              | 443 |
| 8. Gypsum                                | 443 |
| 9. Tripolite or Diatomaceous Earth       | 444 |
| 10. Salt                                 | 444 |
| 11. Natural Manures                      | 444 |

|                                 |     |
|---------------------------------|-----|
| <b>§ 14. Gems and Gemstones</b> |     |
| 1. Diamonds                     | 444 |
| 2. Sapphires                    | 445 |
| 3. Precious Opal                | 445 |
| 4. Other Gems                   | 445 |

## (C) GENERAL.

|   |     |
|---|-----|
| <b>§ 15. Numbers Engaged, Wages Paid, and Accidents in Mining</b> |     |
| 1. Total Employment in Mining                                     | 446 |
| 2. Wages Paid in Mining   | 447 |
| 3. Accidents in Mining, 1912                                      | 447 |
| <b>§ 16. State Aid to Mining</b>                                  |     |
| 1. Introduction   | 447 |
| 2. New South Wales  | 447 |
| 3. Victoria   | 448 |
| 4. Queensland   | 448 |
| 5. South Australia  | 448 |
| 6. Western Australia  | 448 |
| 7. Tasmania   | 449 |
| 8. Northern Territory   | 449 |

## SECTION XIII.—MANUFACTURING INDUSTRIES.

|  |     |
|--|-----|
| <b>§ 1. General</b>                            |     |
| 1. Industrial Progress                         | 450 |
| 2. Defects in Industrial Statistics            | 451 |
| 3. Classification of Manufacturing Industries  | 451 |
| <b>§ 2. Number of Manufactories</b>            |     |
| 1. General                                     | 452 |
| 2. Use of Mechanical Power                     | 454 |
| <b>§ 3. Number Employed in Aust. Factories</b> |     |
| 1. Total Number Employed                       | 455 |

|   |     |
|---|-----|
| 2. Classification of Numbers Employed in Factories in Commonwealth, 1908 to 1912          | 456 |
| 3. Classification of Numbers Employed in each State, according to Class of Industry, 1912 | 456 |
| 4. Classification of Numbers Employed according to Nature of Employment, 1912             | 457 |
| 5. Classification of Factories according to Number of Hands Employed, 1912                | 458 |
| 6. Outworkers   | 459 |

|   |             |
|---|-------------|
| <b>§ 4. Sex Distribution in Factories</b>                         | <b>PAGE</b> |
| 1. Employment of Females in Factories                             | 460         |
| 2. Distribution of Employees according to Sex, 1908 to 1912       | 460         |
| 3. Rate of Increase for each Sex                                  | 462         |
| 4. Ratio of Female Employment in Factories                        | 462         |
| 5. Employment of Females in Particular Industries, 1912           | 463         |
| <b>§ 5. Child Labour in Factories</b>                             |             |
| 1. Conditions of Child Labour                                     | 464         |
| 2. Average Number of Children Employed in Factories, 1908 to 1912 | 464         |
| 3. Percentage of Children to Total Persons Employed               | 465         |
| 4. Industries Employing Child Labour, 1912                        | 465         |
| 5. Apprenticeship   | 466         |
| <b>§ 6. Amount of Wages Paid and Value of Production</b>          |             |
| 1. Introduction   | 466         |
| 2. Amounts of Salaries and Wages Paid, 1912                       | 467         |
| 3. Value of Fuel and Light used in Factories, 1912                | 470         |
| 4. Value of Raw Material used in Factories, 1912                  | 471         |
| 5. Total Value of Output of Manufacturing Industries, 1912        | 472         |
| 6. Value of Production of Manufacturing Industries, 1912          | 474         |
| <b>§ 7. Land, Buildings, Plant and Machinery</b>                  |             |
| 1. General  | 475         |
| 2. Value of Land and Buildings                                    | 476         |
| 3. Value of Plant and Machinery                                   | 478         |

|  |             |
|--|-------------|
| <b>§ 8. Individual Industries</b>  | <b>PAGE</b> |
| 1. General   | 479         |
| 2. Tanning Industry  | 480         |
| 3. Soap and Candle Factories   | 481         |
| 4. Saw Mills, etc.   | 482         |
| 5. Agricultural Implement Factories                                      | 482         |
| 6. Engineering, Ironworks, and Foundries                                 | 483         |
| 7. Railway Carriages & Rolling Stock, Railway & Tramway Workshops        | 483         |
| 8. Smelting Works  | 484         |

# CHRONOLOGICAL TABLE.

## CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTE.—The Government was centralised in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table, the names now borne by the States serve to indicate the localities.

Year.

- 1788 N.S.W.—Arrival of "First Fleet" at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove (now Port Jackson). Formal possession of Port Jackson, taken by Captain Phillip on 26th January. Formal proclamation of colony on 7th February. Population, 1024. Branch settlement established at Norfolk Island. French navigator La Pérouse visits Botany Bay. First cultivation of wheat and barley. First grape vines planted.
- 1789 N.S.W.—First wheat harvest at Parramatta, near Sydney. Discovery of Hawkesbury River. Outbreak of small-pox amongst aborigines.
- 1790 N.S.W.—"Second Fleet" reached Port Jackson. Landing of the New South Wales Corps. Severe suffering through lack of provisions. First Circumnavigation of Australia by Lieut. Ball.
- 1791 N.S.W.—1st Exploration Map of Australia published. Arrival of "Third Fleet." Territorial seal brought by King.
- 1792 N.S.W.—Visit of *Philadelphia*, first foreign trading vessel. Population, 4203.
- 1793 N.S.W.—First free immigrants arrived in the *Bellona*. First Australian Church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.
- 1794 N.S.W.—Establishment of Settlement at Hawkesbury River.
- 1795 N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River.
- 1796 N.S.W.—First Australian Theatre opened at Sydney. Coal discovered by fishermen at Newcastle.
- 1797 N.S.W.—Introduction of merino sheep from Cape of Good Hope.
- 1798 Tas.—Tasmania proved an island by voyage of Bass and Flinders.
- 1800 N.S.W.—First export of coal. First Custom House in Australia established at Sydney. Flinders' Charts published. First issue of copper coin. Population, 5995.
- 1801 N.S.W.—First colonial manufacture of blankets and linen.
- 1802 Vic.—Discovery of Port Phillip by Lieut. Murray. S.A.—Discovery of Spencer's and St. Vincent Gulfs by Flinders. Q'land.—Discovery of Port Curtis and Port Bowen by Flinders.
- 1803 N.S.W.—First Australian wool taken to England by Capt. Macarthur. Issue of "The Sydney Gazette," first Australian newspaper. Vic.—Attempted colonisation of Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.
- 1804 N.S.W.—Insurrection of convicts at Castle Hill. Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins, and at Yorktown by Colonel Paterson.
- 1805 N.S.W.—First extensive sheep farm established at Camden by Capt. Macarthur. Portion of settlers from Norfolk Island transferred to Tasmania.
- 1806 N.S.W.—Shortage of provisions, and floods. Tas.—Settlement at Launceston.
- 1807 N.S.W.—Final shipment of convicts from Norfolk Island. First shipment of merchantable wool (245 lbs.) to England.
- 1808 N.S.W.—Deposition of Governor Bligh.
- 1810 N.S.W.—First post-office established at Sydney. First Race Meeting in Australia at Hyde Park, Sydney. Population, 11,590. Tas.—First Tasmanian newspaper printed.
- 1813 N.S.W.—Passage across Blue Mountains discovered by Wentworth, Lawson, and Blaxland. Macquarie River discovered by Evans.

- 1814 N.S.W.—Australia, previously known as “New Holland,” received present name on recommendation of Flinders. Creation of Civil Courts. Appointment of Mr. Kendall as Resident Magistrate in New Zealand.
- 1815 N.S.W.—Town of Bathurst founded by Governor Macquarie. First steam engine in Australia erected at Sydney. Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship with free settlers. First export of wheat to Sydney. Port Davey and Macquarie Harbour discovered by Captain Kelly.
- 1816 N.S.W.—Botanic Garden formed at Sydney.
- 1817 N.S.W.—Oxley’s first exploration inland. Discovery of Lakes George and Bathurst and the Goulburn Plains by Meehan and Hume. First bank in Australia opened at Sydney. Tas.—Great prosperity in wool and whaling industries.
- 1818 N.S.W.—Cessation of free immigration. Oxley discovers Liverpool Plains, and the Peel, Hastings, and Manning Rivers. Port Essington discovered by Captain King.
- 1819 N.S.W.—Opening of first Australian Savings Bank at Sydney.
- 1820 N.S.W.—Foundation of Campbelltown. Clyde River discovered by Lieut. Johnson. Tas.—First importation of pure merino sheep.
- 1821 N.S.W.—Foundation of Philosophical (now Royal) Society. Population, 35,610. Tas.—Establishment of penal settlement at Macquarie Harbour. First Circuit Court held at Hobart.
- 1822 N.S.W.—Formation of Agricultural Society of N.S.W.
- 1823 N.S.W.—First Australian Constitution. Discovery of gold at Fish River by Assistant-Surveyor McBrien. Arrival in Sydney of Dr. John Dunmore Lang. Qld.—Oxley discovers Brisbane River.
- 1824 N.S.W.—Becomes a Crown Colony. Executive Council formed. Establishment of Supreme Court at Sydney, and introduction of trial by jury. First Australian Enactment (Currency Bill) passed by the Parliament at Sydney. Proclamation of freedom of the press. First land regulations. First manufacture of sugar. Hume and Hovell’s overland expedition to the south. Vic.—Hume and Hovell, journeying overland from Sydney, arrive at Corio Bay. Qld.—Penal settlement founded at Moreton Bay (Brisbane). Fort Dundas Settlement formed at Melville Island, N. Terr.
- 1825 Tas.—Proclamation of Independence of Van Diemen’s Land (Tasmania) and appointment of a nominated Legislative Council for the new colony.
- 1826 N.S.W.—Illawarra founded by Captain Bishop. Vic.—Settlement at Corinella, Western Port, formed by Captain Wright. W.A.—Military Settlement founded at King George’s Sound, Albany, by Major Lockyer.
- 1827 N.S.W.—Colony becomes self-supporting. Feverish speculation in land and stock. Qld.—Darling Downs and the Condamine River discovered by Allan Cunningham. Fort Wellington established at Raffles Bay, N. Terr. Tas.—Copper ore discovered at Macquarie Harbour.
- 1828 N.S.W.—Second Constitution. First Census. Sturt’s expedition down Darling River. Cotton first grown in Sydney Botanical Gardens. Gas first used at Sydney. Richmond and Clarence Rivers discovered by Captain Rous. Vic.—Abandonment of settlement at Western Port. Qld.—Cunningham discovers a route from Brisbane to the Darling Downs, and explores Brisbane River to its source. Tas.—First land sales.
- 1829 N.S.W.—Sturt’s expedition down Murrumbidgee River. New South Wales Act proclaimed. All English law, so far as circumstances of the Colony allowed, came into force. W.A.—Foundation of settlement at Swan River, under command of Lieut.-Governor Stirling. Perth also founded.
- 1830 N.S.W.—Insurrection of convicts at Bathurst. Sturt, voyaging down Murrumbidgee and Murray Rivers, arrives at Lake Alexandrina. Qld.—Murder of Captain Logan by convicts at Brisbane. W.A.—First Executive Council appointed. Tas.—Trouble with natives. Black line organised to force aborigines into Tasman’s Peninsula, but failed. Between 1830 and 1835, however, George Robinson, by friendly suasion, succeeded in gathering the small remnant of aborigines (203) into settlement at Flinders Island.

- 1831 N.S.W.—Crown lands first disposed of by public competition. Mitchell's explorations north of Liverpool Plains. Arrival at Sydney of first steamer, *Sophia Jane*, from England. S.S. *Surprise*, first steamship in Australia, launched at Sydney. First coal shipped from Australian Agricultural Company's workings at Newcastle, N.S.W. First assisted immigration to N.S.W. S.A.—Adelaide District discovered by Captain Barker. Murder of Barker by aborigines at Lake Alexandrina. Wakefield's first colonisation committee. W.A.—Appointment of Executive and Legislative Council. First newspaper—"Fremantle Observer." Lord Ripon's land regulations in N.S.W., W.A., and Tas.
- 1832 N.S.W.—Savings Bank of N.S.W. established.
- 1833 N.S.W.—First School of Arts established at Sydney.
- 1834 N.S.W.—First settlement at Twofold Bay. Vic.—Settlement formed at Portland Bay by Henty Bros. Qld.—Leichhardt reached Gulf of Carpentaria. S.A.—Formation of the South Australian Association. Imperial Act Colonisation of S.A. W.A.—Severe reprisals against natives at Pinjarrah.
- 1835 N.S.W.—Establishment of depôt at Fort Bourke on the Darling River, by Mitchell. Vic.—John Batman's arrival at Port Phillip; makes treaty with the natives for 600,000 acres of land; claim afterwards disallowed by Imperial Government. John Pascoe Fawkner founds Melbourne on site previously selected by Batman.
- 1836 N.S.W.—Fall of snow in Sydney. Mitchell's overland journey from Sydney to Cape Northumberland, Vic., and discovery of "Australia Felix." "Squatting" formally recognised. Vic.—Proclamation of Port Phillip district as open for settlement. Captain Lonsdale first Resident Magistrate. S.A.—Founding of settlement at Adelaide under Governor Hindmarsh.
- 1837 N.S.W.—Appointment in London of Select Committee on Transportation. Heavy snowfall near Sydney. Vic.—Melbourne planned and named by Governor Bourke. First Victorian post-office established in Melbourne. First sale of Crown lands in Melbourne. First overlanders from Sydney arrived at Port Phillip. S.A.—Adelaide planned by Captain Light. First newspaper published at Adelaide. First sale of Crown lands in Adelaide.
- 1838 N.S.W.—Discontinuance of assignment of convicts. Drought and failure of crops. Frenzied speculation. Vic.—First Victorian paper published at Melbourne. Qld.—Settlement of German missionaries at Brisbane. S.A.—"Overlanding" of cattle from Sydney to Adelaide along the Murray route by Hawden and Bonney. Settlement at Port Essington, Northern Territory, formed by Captain Bremer. W.A.—Glenelg River discovered by Captain Grey.
- 1839 N.S.W.—Finding of gold at Vale of Clwydd by Count Strzelecki. Vic.—Appointment of Mr. C. J. LaTrobe as Superintendent Port Phillip district. S.A.—Lake Torrens discovered by Eyre. Port Darwin, Northern Territory, discovered by Captain Stokes. W.A.—Murchison River discovered by Captain Grey.
- 1840 N.S.W.—Abolition of transportation to New South Wales. Land regulations—proceeds of sales to be applied to payment for public works and expenditure on immigration. Foundation of viticultural industry. Monetary crisis. Vic.—Determination of northern boundary. Colonists desire separation from New South Wales. Qld.—Breaking up of penal settlements and throwing open of Moreton Bay district to free settlers. S.A.—Incorporation of Adelaide. Eyre begins his overland journey from Adelaide to King George's Sound. Tas.—Visit of the *Erebus* and *Terror* to Hobart. Dr. Hooker investigates the island flora.
- 1841 N.S.W.—Gold found near Hartley by Rev. W. B. Clarke. Separation of New Zealand. W.A.—Completion of Eyre's overland journey from Adelaide to King George's Sound. Tas.—Renewal of transportation.
- 1842 N.S.W.—Incorporation of Sydney. Vic.—Incorporation of Melbourne. S.A.—Discovery of copper at Kapunda.
- 1843 N.S.W.—First Representative Constitution. First manufacture of tweed. Financial crisis. Qld.—Moreton Bay granted legislative representation. Tas.—Agitation against further introduction of convicts.

- 1844 S.A.—Sturt's last expedition inland. Qld.—Leichhardt's expedition from Condamine River to Port Essington, Northern Territory. Arrived following year.
- 1845 N.S.W.—Mitchell's explorations on the Barcoo. Qld.—Explorations by Mitchell and Kennedy. S.A.—Discovery of the Burra copper deposits. Sturt discovered Cooper's Creek. W.A.—First steam vessel (*H.M.S. Driver*) visited Fremantle.
- 1846 N.S.W.—Mr. Gladstone proposed to revive transportation. Initiation of meat preserving. Qld.—Foundation of settlement at Port Curtis. S.A.—Proclamation of North Australia. W.A.—Organisation of first mining company. Foundation of New Norcia Mission.
- 1847 N.S.W.—Crown Land Leases Act. Opening of iron smelting works near Berrima. Overland mail established between Sydney and Adelaide. Vic.—Melbourne created a City by Royal Letters Patent. Qld.—Explorations by Leichhardt, Burnett and Kennedy. W.A.—Issue of regulations for leasing Crown lands. First export of guano.
- 1848 N.S.W.—Attempts to revive transportation. Influx of Chinese. Vic.—Earl Grey returned as Melbourne member of the Legislative Council. Qld.—Leichhardt's last journey. Kennedy speared by the blacks at York Peninsula. Chinese brought in as shepherds. W.A.—Copper and lead discovered in the Champion Bay district by the Messrs. Gregory.
- 1849 N.S.W.—Indignation of colonists at arrival of convict ship *Hashemy*. Exodus of population to goldfields of California. Vic.—Outburst of indignation at arrival of *Randolph* with convicts. Qld.—Assignment of convicts per *Hashemy* to squatters on Darling Downs. W.A.—Commencement of transportation to Western Australia.
- 1850 N.S.W.—Final abolition of transportation. First sod of first Australian railway turned at Sydney. Vic.—Gold discovered at Clunes by Hon. W. Campbell. Representative government granted. S.A.—Representative government granted. W.A.—Pearl oysters found by Lieut. Helpman at Saturday Island Shoal. Tas.—Representative government granted. Discovery of coal at the Don and Mersey.
- 1851 N.S.W.—Payable gold discovered by Hargraves, at Lewis Ponds and Summerhill Creeks. Telegraph first used. Vic.—Separation of Port Phillip—erected into independent colony under the name of Victoria. Discovery of gold in various localities. "Black Thursday," Feb. 6th, a day of intense heat, when several persons died and a vast amount of damage to property was occasioned by fires. Qld.—Agitation for separation from New South Wales. S.A.—Financial depression. Tas.—Serious exodus of population to goldfields on mainland. W.A.—Proclamation of Legislative Council Act.
- 1852 N.S.W.—Destruction of Gundagai by flood—77 lives lost. Arrival of the *Chusan*, first P. and O. mail steamer from England. S.A.—First steamer ascends the Murray River to the junction with the Darling. Tas.—Meeting of first elective Council protests against transportation. Payable gold discovered at The Nook, near Fingal, and at Nine Mile Springs.
- 1853 Tas.—Abolition of transportation.
- 1854 N.S.W.—Russian war-scare and volunteer movement. Vic.—Opening of first Australian railway—Flinders Street to Port Melbourne. Riots on Ballarat goldfields. Storming of the Eureka Stockade, Dec. 3rd.
- 1855 N.S.W.—Opening of railway—Sydney to Parramatta. Introduction of responsible Government. Vic.—Proclamation of Constitution. Qld.—Gregory's expedition in search of Leichhardt. Tas.—Responsible government.
- 1856 N.S.W.—First elective Parliament. Pitcairn Islanders placed on Norfolk Island, which was placed under jurisdiction of Governor of New South Wales. Vic.—First Parliament under responsible government. S.A.—Responsible government. Tas.—First Parliament under responsible government. W.A.—A. C. Gregory's expedition in search of Leichhardt.
- 1857 N.S.W.—Heavy floods. Wreck of the *Dunbar* (119 lives lost), and *Catherine Adamson* (21 lives lost), at Sydney Heads. Select Committee on Federation. Vic.—Manhood suffrage. S.A.—First Parliament under responsible government. Exploration by Babbage and Warburton. Passage of Torrens' Real Property Act.

- 1858 N.S.W.—Establishment of manhood suffrage and vote by ballot. Telegraphic communication between Sydney, Melbourne and Adelaide. S.A.—Stuart's explorations. Qld.—The Canoona gold rush.
- 1859 Qld.—Proclamation of Queensland as separate colony. Tas.—First submarine cable, via Circular Head and King Is., to Cape Otway.
- 1860 N.S.W.—Disastrous floods on the Shoalhaven and at Araluen. Vic.—Burke and Wills left Melbourne on their journey across Continent. Qld.—First Parliament under responsible government. S.A.—Copper discoveries at Wallaroo and Moonta.
- 1861 N.S.W.—Anti-Chinese riots at Lambing Flat and Burrangong goldfields. Opening of first tramway in Sydney—cars drawn by horses. Robertson's Land Acts. Messrs. Parkes and Dalley proceed to London as emigration lecturers. Regulation of Chinese immigration. Vic.—Conference of Statisticians, Melbourne. Burke and Wills perish at Cooper's Creek, near Innamincka, S.A. W.A.—Exploration of F. Gregory in the North-west.
- 1862 N.S.W.—Raid by bushrangers on the Lachlan gold escort (£14,000 taken). Abolition of State aid to religion. Real Property Act. Vic.—C. Gavan Duffy's Land Act. Qld.—McKinlay's explorations. Heavy floods on Fitzroy River. S.A.—Stuart crosses the Continent from south to north. W.A.—Severe floods—damage to property, £30,000. First export of pearl-shell.
- 1863 N.S.W.—Bathurst and Canowindra "held up" by bushranger Gilbert. Vic.—Inter-colonial conference at Melbourne. S.A.—Taking over of the Northern Territory. W.A.—Initiation of settlement in the North-west district. Establishment of Post Office (now Government) Savings Bank.
- 1864 N.S.W.—Frequent outrages by bushrangers. Qld.—First railway begun. First sugar made from Queensland cane. Opening of first railway. W.A.—Messrs. Panton, Harding and Goldwyer, murdered by natives. Tas.—First successful shipment of English salmon ova.
- 1865 N.S.W.—Destruction by fire of St. Mary's Cathedral, Sydney.
- 1866 N.S.W.—Passage of Public Schools Act of (Sir) Henry Parkes. Vic.—Political deadlock. Qld.—Financial crisis. S.A.—Introduction of camels for exploration, etc.
- 1867 Vic.—Imposition of protective tariff. Qld.—Discovery of gold at Gympie.
- 1868 N.S.W.—Attempted assassination of the Duke of Edinburgh at Clontarf, near Sydney. Qld.—Passage of Act to regulate island labour traffic. W.A.—Arrival of the *Hougomont*, last convict ship. Tas.—First sod of first railway (Launceston and Western) turned by Duke of Edinburgh.
- 1869 N.S.W.—Establishment of Eskbank Iron Company. Vic.—Reduction of property qualification for members and electors of Legislative Council. W.A.—Opening of first telegraph line, from Perth to Fremantle. Tas.—Opening of second cable.
- 1870 N.S.W.—Opening of Intercolonial Exhibition at Sydney in celebration of centenary of Cook's landing in Australia. Withdrawal of Imperial troops. Vic.—Intercolonial Congress at Melbourne. S.A.—Commencement of trans-continental telegraph. W.A.—Meeting of first Legislative Council under Responsible Government.
- 1871 N.S.W.—Permanent military force raised. Vic.—Increase of protective duties. Qld.—Foundation of Queensland National Bank. W.A.—Passage of Elementary Education Act. Forrest's explorations. Tas.—Discovery of tin at Mount Bischoff. Launceston-Western railway opened for traffic.
- 1872 N.S.W.—International Exhibition at Sydney. Death of W. C. Wentworth. Qld.—Discovery of tin at Stanthorpe, copper at Mt. Perry, coal at Wide Bay, gold at the Palmer. S.A.—Cable from Java to Port Darwin. Completion of transcontinental telegraph line. W.A.—Cyclonic storms—destruction of town of Roeburne. Tas.—Completion of direct telegraphic communication with England.
- 1873 N.S.W.—Intercolonial Conference at Sydney. First volunteer encampment. Inauguration of mail service with San Francisco. W.A.—Warburton crosses from transcontinental telegraph line to head of De Grey River.

- 1874 N.S.W.—Triennial Parliaments Act passed. Intercolonial Conference. Qld.—Dalrymple's discoveries on north-eastern seaboard. S.A.—Adelaide University founded. W.A.—Explorations by E. Giles. John and Alexander Forrest arrived at Overland Telegraph from Murchison.  
Fiji Islands ceded to Great Britain.
- 1875 Qld.—Transfer of Port Albany Settlement to Thursday Island. S.A.—Wreck of the *Gothenburg*—Judge Wearing and other well-known Adelaide citizens drowned. Education Act passed. Explorations by Giles, Gosse, and Warburton. Tas.—Conference of Statisticians, Hobart.
- 1876 N.S.W.—Completion of cable—Sydney (La Perouse) to Wellington (Wakapuaka). Vic.—Members of Legislative Assembly increased to 86. W.A.—Violent gale at Exmouth Gulf, number of pearling vessels wrecked, 69 lives lost. Giles crosses colony from east to west. Tas.—Death of Truganini, last representative of Tasmanian aborigines.
- 1877 Vic.—Deadlock on question of payment to members. W.A.—Opening of telegraphic communication with South Australia. Tas.—Discovery of rich gold-bearing quartz reef at Beaconsfield.
- 1878 N.S.W.—Seamen's strike. Vic.—Visit to England of Victorian delegation *re* alteration of Victorian Constitution. "Black Wednesday"—wholesale dismissal of civil servants. Qld.—Restriction of Chinese immigration.
- 1879 N.S.W.—First artesian bore at Killara. International Exhibition at Garden Palace, Sydney. First steam tramway. First issue of silver coin from Mint. W.A.—Celebration of 50th anniversary of foundation of colony. A. Forrest's explorations in the Kimberley district, and discovery of the Fitzroy pastoral country.
- 1880 N.S.W.—Public Instruction Act passed. Sydney streets partially wood-paved. Vic.—Opening of first Victorian International Exhibition at Melbourne. Federal Conference, at Melbourne and Sydney.
- 1881 N.S.W.—Further restrictions on Chinese immigration. Women admitted as students at University. Vic.—Reduction of property qualification for members and electors of Legislative Council, number of members increased to 42. W.A.—Cyclone near Roeburne wrecks number of pearling vessels. On the Ashburton, 1000 sheep destroyed by cyclone.  
First simultaneous Australian Census, population 2,250,194. Visit to Australia of T.R.H. Prince Albert Victor and Prince George of Wales.
- 1882 N.S.W.—Garden Palace destroyed by fire. W.A.—Nugget of gold found between Roeburne and Cossack.
- 1883 N.S.W.—Discovery of silver at Broken Hill. Completion of railway between New South Wales and Victoria. Qld.—Annexation of New Guinea—repudiated by Imperial authorities.  
Federal Conference held at Sydney. Federal Council created.
- 1884 N.S.W.—Land legislation restricting sales by auction. Vic.—Appointment of First Public Service Board. W.A.—Stockdale's explorations.  
Federation Bill passed in Victoria. Similar measure rejected in New South Wales. British protectorate declared over New Guinea.
- 1885 N.S.W.—Military contingent sent to the Soudan. Opening of the Broken Hill Proprietary Silver Mines. Qld.—Agitation for division of the colony. W.A.—Gold found by prospectors on the Margaret and Ord Rivers in the Kimberley district. Tas.—Silver-lead discovered at Mount Zeehan.
- 1886 N.S.W.—Industrial depression. Wreck of the *Ly-ee-Moon*, *Coringamite*, and *Helen Nicol*. S.A.—Celebration of jubilee of foundation of colony. W.A.—Proclamation of Kimberley goldfields. Tas.—Discovery of gold and copper at Mount Lyell.  
First session of Federal Council met at Hobart on the 26th January.
- 1887 N.S.W.—Disaster at Bulli coal mine (81 lives lost). Peat's Ferry (Hawkesbury River) railway accident. S.A.—International Exhibition at Adelaide. W.A.—Cyclone destroyed nearly the whole pearling fleet off the Ninety-Mile Beach—200 lives lost. Gold discovered at Yilgarn and Southern Cross.  
Australasian Conference in London. Australasian Naval Defence Force Act passed.

- 1888 N.S.W.—Destructive bush fires. Centennial celebrations. Restrictive legislation against Chinese. Imposition of poll-tax of £100. Strike of coal-miners at Newcastle. Vic.—Second Victorian International Exhibition held at Melbourne. Members of Legislative Council increased to 48, and of Assembly to 95. Qld.—Railway communication opened between Sydney and Brisbane. W.A.—Favenc's explorations.  
Centenary of first settlement in Australia. Conference of Australian Ministers at Sydney to consider question of Chinese immigration. First meeting of the Australasian Association for the Advancement of Science held in Sydney. Imperial Defence Act passed.
- 1889 N.S.W.—Destructive floods, Hunter River. Qld.—Direct railway communication established between Brisbane and Adelaide. W.A.—Framing of new Constitution.
- 1890 N.S.W.—Strike at Broken Hill. Maritime and shearers' strikes. Payment of members of Parliament. Destructive bush fires. Qld.—Wreck of the *Quetta*—146 lives lost. Floods and hurricanes. Industrial depression. W.A.—Granting of responsible government. Tas.—Opening of University.  
Meeting at Melbourne of Australasian Federation Conference. Pre-censal Conference of Statisticians at Hobart.
- 1891 N.S.W.—Election to Legislative Assembly of 35 Labour members. Arrival of Australian Auxiliary Squadron. Collapse of several building societies. Cessation of assisted immigration. Death of Sir John Robertson. W.A.—Discovery of gold on the Murchison.  
Federal Convention in Sydney, draft bill framed and adopted. Second simultaneous Australian census. Population, 3,174,392.
- 1892 N.S.W.—Broken Hill miners' strike. Run on Government Savings Bank. Opening of Women's College, Sydney University. Vic.—Suspension of Railway Commissioners. W.A.—Discovery of gold by Messrs. Bayley and Ford at Coolgardie.
- 1893 N.S.W.—Departure by the *Royal Tar* of colonists for "New Australia." Electoral Act—"One man one vote." Direct communication, Sydney to Vancouver, established. Financial crisis, chiefly affecting the eastern States.
- 1894 N.S.W.—Shearers' strike. S.A.—Adult Suffrage Bill assented to. Industrial depression.
- 1895 N.S.W.—Crown Lands Act of 1895. Death of Governor Sir R. Duff. Free-trade tariff. Land and income taxes.  
Conference of Premiers at Hobart *re* Federation.
- 1896 N.S.W.—Death of Sir Henry Parkes. Re-organisation of Public Service. People's Federal Convention at Bathurst. S.A.—Departure of Calvert expedition.
- 1897 S.A.—Floods and storms at Adelaide. Death of Sir Thomas Elder. Earthquake and hurricane in Northern Territory. Town of Palmerston destroyed.
- 1897-8 Sessions of Federal Convention at Adelaide, Sydney and Melbourne.
- 1898 N.S.W.—First surplus of wheat for export.  
Draft Federal Constitution Bill submitted to electors in Victoria, New South Wales, South Australia, and Tasmania. Requisite statutory number of votes not obtained in New South Wales.
- 1899 N.S.W.—First contingent of Australian troops to assist the British army in South Africa.  
Conference of Premiers in Melbourne to consider amendments in Federal Constitution Bill. Referendum—Bill accepted by New South Wales, Victoria, Queensland, South Australia, and Tasmania.
- 1900 N.S.W.—Old-age Pensions instituted. W.A.—Agitation for separation by gold-fields. Strike of railway engine drivers and firemen.  
Contingents of naval troops from N.S.W., Vic. and S.A. to assist in China.  
Commonwealth Constitution Act receives Royal Assent, 9th July. Mr. (afterwards Sir) Edmund Barton forms first Federal Ministry.
- 1901 Proclamation of the Commonwealth at Sydney, and swearing-in of Ministry. Opening of first Federal Parliament at Melbourne by the Duke of Cornwall and York, who visited each State of the Commonwealth. Simultaneous Australasian Census—population of the Commonwealth, 3,773,801.
- 1902 N.S.W.—Disastrous explosion at Mount Kembla Colliery—95 lives lost. Women's franchise. Jubilee of Sydney University. S.A.—Reduction of number of members of both Houses of Parliament. W.A.—Opening of pumping station at Northam in connection with Goldfields water supply.

- 1903 Vic.—Railway Strike (Enginemmen). W.A.—Opening of Coolgardie and Kalgoorlie water supply.  
Inauguration of the Federal High Court. Conference of Statisticians in Melbourne.
- 1904 N.S.W.—Reduction of members of Legislative Assembly from 125 to 90.
- 1905 N.S.W.—Re-introduction of assisted immigration.
- 1906 Wireless telegraphy installed between Queenscliff, Vic., and Devonport, Tas. Consummation of Commonwealth interstate Free-trade by cessation of special Western Australian tariff. Conference of Statisticians of Australian States and New Zealand, under the presidency of the Commonwealth Statistician. Papua taken over by Commonwealth.
- 1907 N.S.W.—Strike of coal-miners in Newcastle district. Vic.—Opening of first Australian Exhibition of Women's Work in Melbourne. Bakers' strike, Melbourne. Opening of telephone, Sydney to Melbourne.  
Imperial Conference in London—Australia represented by the Hon. A. Deakin, Prime Minister. Introduction of new tariff in Federal Parliament. Allowance to Federal members of Parliament increased from £400 to £600.
- 1908 N.S.W.—Tramway employees' strike, Sydney. Fire at Newcastle—damage to property £150,000. Vic.—Railway accident at Braybrook Junction (Sunshine)—44 killed, 412 injured; compensation paid, £126,000.  
Yass-Canberra chosen as site of Federal Capital. Interstate Premiers' Conference at Melbourne. Visit of American Fleet to Australia.
- 1909 N.S.W.—Miners' strikes at Broken Hill and Newcastle. Arrest of strike leaders at Newcastle. Qld.—Opening of Queensland University. S.A.—Foundering of *Clan Ranald* in St. Vincent's Gulf—40 drowned. W.A.—Cyclone at Broome.  
Imperial Defence Conference in London—Commonwealth sends three representatives. Death at Parliament House of Sir Frederick Holder, Speaker of the House of Representatives. Commonwealth orders two destroyers and one first-class cruiser for fleet unit. Visit of Lord Kitchener to report and advise on Commonwealth military defence. Loss of the *Waratah* with 300 passengers and crew.
- 1910 Vic.—Railway accident at Richmond—9 killed, over 400 injured; compensation paid £129,000. S.A.—Strike of transport workers at Adelaide. W.A.—Cyclone at Broome—several pearling vessels wrecked, 3 whites and many coloured fishermen drowned. Strike of tramway employees at Perth. Wreck of the *Pericles* off Cape Leeuwin.  
Rt. Hon. Sir G. H. Reid takes up duty as High Commissioner for the Commonwealth of Australia in London. Referendum on financial relations between the Commonwealth and the States. Proclamation taking over Yass-Canberra (in New South Wales) as site for Federal Capital. Penny postage. Visit of Scottish Agricultural Commission. Dutch squadron visits Australia. Arrival of the *Yarra* and *Parramatta*, first vessels of Australian navy. Australian Notes Act empowers Federal Treasurer to issue notes of various denominations. Admiral Sir R. Henderson visits Australia to advise on naval defence. First issue of Commonwealth notes.
- 1911 First Federal Census - population of the Commonwealth, 4,455,005. Transfer of Northern Territory to Commonwealth by South Australia. Federal referenda relating to Monopolies and Industrial Legislation—proposals rejected. Introduction of compulsory military training. Launch of Commonwealth destroyer *Warrego* at Sydney. Establishment of penny postage to all parts of British Empire.
- 1912 Opening of Commonwealth Bank. First payments of Maternity Bonus. Turning of first sod at Port Augusta of Trans-Australian Railway (Port Augusta and Kalgoorlie). Resignation of leadership of Liberal party by Mr. Alfred Deakin, and appointment of Mr. Joseph Cook in his stead. Appointment of Administrators to Northern Territory and Federal Territory. Numerous industrial disturbances: Brisbane tramway employees' and general strike; strike of miners at the Wonthaggi State coal mines.
- 1913 Arrival of battle cruiser *Australia*, and cruisers *Melbourne* and *Sydney*. Foundation stone of Commonwealth Building in London laid by the King. Federal Capital named Canberra and foundation stone laid. Appointment of Interstate Commission. Visit of Empire Trade Commission. Visit of Members of Empire Parliamentary Association.
- 1914 Visit of General Sir Ian Hamilton to report on military defence scheme. Double dissolution of Federal Parliament.

OFFICIAL YEAR BOOK  
OF THE  
COMMONWEALTH OF AUSTRALIA, 1913,  
AND EARLIER YEARS.

---

SECTION I.

STATISTICAL ORGANISATION AND SOURCES OF INFORMATION.

§ 1. Introduction.

1. **Development of Australian Statistics.**—In the first issue of the Commonwealth Official Year Book (No. 1, 1901-1907), an account was given of the origin and development of Australian Statistics; *vide* pp. 1 to 16 therein. Owing to considerations of space, however, this matter was considerably curtailed in succeeding Year Books, and appears in No. 4 on pp. 1 to 4. In Nos. 5 and 6, and in the present issue, a still further curtailment has been made in order to make room for new matter.

Briefly, it may be stated that to the "Blue Books" compiled in Australia for the Home Government, there succeeded, under Responsible Government, the statistics which each of the departments prepared for itself, State statistical departments being organised principally as collecting agencies of official and general information.

Absence of co-ordination in collection and compilation, due to the organisation, independently, of the various States bureaux, caused difficulties in so combining State statistics as to get a satisfactory statistic for Australia as a whole, and various conferences of State Statisticians did not completely rectify the divergencies that arose.

(i.) *Creation of the Commonwealth Bureau of Census and Statistics.* Constitutionally, matters relating to "Census and Statistics" belong to the Commonwealth, and in 1906, under the authority of the Census and Statistics Act of 1905, providing for the taking of the Census and the collecting of general statistics, the Commonwealth Bureau of Census and Statistics was created. A conference of statistical representatives of Australian States and New Zealand, under the presidency of the Commonwealth Statistician, met in November and December, 1906. For a more or less complete presentation of the affairs of the Commonwealth and of its constituent parts, various desiderata were recognised, and a series of resolutions adopted by the conference. Identity of categories, simultaneity and identity in methods of collection, and uniformity in compilation, were the main features desired. A resumé of the resolutions of this conference is given in Year Book No. 1, pp. 12-16.

(ii.) *Organisation of the Commonwealth Bureau of Census and Statistics.*—In the organisation of the Bureau, while all classes of work may at any time be relegated to any officer, certain fields of activity are attended to mainly by the officers mentioned

hereunder, who, subject to the general direction of the Statistician, supervise the work of the different branches:—

JOHN STONHAM, M.A. (Sydney). Chief Compiler and General Administration.  
CHARLES HENRY WICKENS, A.I.A. Supervisor of Census.

HENRY SPONDLY (Zurich University). Vital Statistics and Cognate Matters.

EDWARD TANNOCH MCPHEE. Trade and Customs Statistics and Commerce.

GERALD LIGHTFOOT, M.A. (Cambridge), B. at Law. Industrial and Social Statistics.

FREDERICK DALGLISH ROSSITER, M.A. (Melbourne). Defence, General Control of Library, etc.

F. W. BARFORD, M.A. (Oxford), A.I.A. Financial Statistics.

**2. Sources of Information.**—Statistical information is furnished (i.) by the State Statistical Bureaux, as a result of direct demand, or through the police and special collectors; (ii.) by Commonwealth and State Departments (see lists of publications in § 2 *infra*); (iii.) in respect of returns of Trade, Customs and Excise, by the Trade and Customs Department; (iv.) by scientific and technical experts, specially requisitioned to write on particular subjects; (v.) by State Statisticians, as officers duly constituted under the Commonwealth Census and Statistics Act; (vi.) and by information supplied compulsorily, on the Commonwealth Statistician's demand.

**3. Maintenance of Secrecy.**—Under no circumstance can information supplied to a statistical office be used against the individual supplying it. All statistical enquiries are strictly impersonal, and the affairs of individuals or individual businesses are never disclosed. No other Government Department can make use of the Statistical departments in order to acquire detailed information otherwise unavailable.

**4. Accuracy Essential.**—The importance of accurate statistical information is emphasised, and the making of untrue statements is heavily penalised.

## § 2. Statistical Publications of Australia.

**1. Introductory.**—The official statistical publications of Australia may be divided bibliographically into two main divisions, viz.:—(1) Commonwealth publications dealing both individually and collectively with the several States of the Commonwealth, and (2) State publications dealing with individual States only. Besides these there are a large number of publications issued regularly, which, though not wholly statistical, necessarily contain a considerable amount of statistical information. These are included in the lists given hereunder, which are revised to 30th November, 1913.

**2. Commonwealth Publications.**—Commonwealth publications may be grouped under two heads, viz.:—(i.) Publications issued by the Commonwealth Statistician, and (ii.) Departmental Reports and Papers.

(i.) *Publications issued by the Commonwealth Statistician.* The following is a list of statistical publications issued from the Commonwealth Bureau of Census and Statistics since its inauguration and up to 31st December, 1913. The annual *Demography*, *Finance*, *Production*, and *Transport and Communication Bulletins* cover statistics from 1901. The *Year Book* contains figures from earlier years.

*Census Bulletins.*—No. 1.—Population of States and Territories; No. 2.—Persons of Non-European Race; No. 3.—Ages; No. 4.—Population of Counties, Local Government Areas, etc; No. 5.—Population of Electoral Divisions, Provinces, and Districts; No. 6.—Birthplaces; No. 7.—Length of Residence in Australia; No. 8.—Religions; No. 9.—Education; No. 10.—Blindness and Deafmutism; No. 11.—Schooling; No. 12.—Conjugal Condition; No. 13.—Localities; No. 14.—Mortality Investigation; No. 15.—Families; No. 16.—Occupations; No. 17.—Occupied Dwellings.

*Finance*—Bulletins, annually, 1907 to 1912.

*Labour and Industrial Statistics*—Explanatory Memorandum on the Proposed Scheme. Report No. 1—Prices, Price-Indexes and Cost of Living in Australia. Report No. 2—Trade Unionism, Unemployment, Wages, Prices, and Cost of Living in Australia, 1891 to 1912.

*Labour Bulletins*—Quarterly, May, August, and November, 1913.

*Inquiry into the Cost of Living in Australia, 1910-11.*—Prices, Price-Indexes and Cost of Living in Australia.

*Monthly Summary of Australian Statistics*—Bulletins, monthly, since January, 1912.

*Population and Vital Statistics Bulletins*—Determination of the Population of Australia, 1901 to 1906. Commonwealth Demography, annually, 1906 to 1910. Vital Statistics, annually, 1907 to 1910. Commonwealth Demography (comprising matter previously included in two last-named Bulletins) 1911 and 1912. Vital Statistics, quarterly, 1907 to June 1911\*. The Nomenclature of Diseases and of Causes of Death, 1907. New Edition, 1910.

*Production*—Bulletins, annually, 1906 to 1911.

*Professional Papers.*—No. 1—The Classification of Diseases and Causes of Death, from the standpoint of the Statistician; Nos. 2 and 3—On the Influence of Infantile Mortality on Birthrate (2 papers); No. 4—On the Statistical Opportunities of the Medical Profession; No. 5—Tuberculosis Duration Frequency Curves, and the number of existing cases ultimately fatal; No. 6—The Problems of Statistics; No. 7—The Evolution and Significance of the Census; No. 8—Census Taking†; No. 9—Studies in Statistical Representation—On the nature of the curve  $y = Ax^m e^{nx^p}$ ; No. 10—Studies in Statistical Representation—Statistical Application of the Fourier series; No. 11—Suicide in Australia; No. 12—An Extension of the Principle Underlying Woolhouse's Method of Graduation†; No. 13—The First Commonwealth Census; No. 14—Mathematical Analysis of Climatological Physiology; No. 15—The International Nosological Classification, etc.; No. 16—Secular Progress of Pulmonary Tuberculosis and Cancer, etc.; No. 17—The Improvement in Infantile Mortality, etc.; No. 18—Secular and Annual Fluctuations of Deaths from Several Diseases, etc.

*Railway Statistics*—Report on the Desirability of Improved Statistics of Government Railways in Australia, February, 1909.

*Shipping*—Shipping and Oversea Migration, annually, 1906 to 1912.

*Social Insurance*—Report to the Hon. the Minister of Trade and Customs.

*Superannuation for the Commonwealth Public Service*—Report to the Hon. the Minister of Home Affairs.

*The Australian Commonwealth: Its Resources and Production*—Annually, 1908 to 1913.

*Trade and Customs*—Trade, and Customs and Excise Revenue, annually, 1906 to 1912.

Trade, Shipping, and Oversea Migration—Monthly, January, 1907, to December, 1911 (now discontinued; issued as part of Monthly Summary of Australian Statistics).

*Transport and Communication*—Bulletins, annually, 1906 to 1912.

*Social Statistics*—Bulletins, annually, 1907 to 1911.

*Official Year Book of the Commonwealth*—Annually, 1907 to 1912.

*Pocket Compendium of Commonwealth Statistics.*

\* The publication of quarterly Vital Statistics has been discontinued.

† By C. H. Wickens, A.I.A.

(ii.) *Commonwealth Parliamentary and Departmental Reports and Papers.* The following are the principal official reports and papers containing statistical matter which have been issued since the inauguration of the Commonwealth :—

- Arbitration Court : Returns of Awards, Conferences, Agreements, etc.
- Australia for Farmers, 1910.
- Australia : The Wheat Country.
- Australian Notes : Correspondence relating to the Gold Reserve in respect of the issue of.

## SECTION II.

### DISCOVERY, COLONISATION, AND FEDERATION OF AUSTRALIA.

#### § 1. Early Knowledge of Australia.

A brief, though fairly comprehensive, account of the discovery and early knowledge of Australia was given in Year Book No. 1 (pp. 44 to 51). This account appeared in a condensed form in Year Books Nos. 2, 3, and 4. Bibliographical references to the subject were also given in Year Book No. 1 (p. 49). Exigencies of space prevent the inclusion of any further reference to this subject in the present issue.

#### § 2. The Taking Possession of Australia.

Reference was made to the more important facts relating to the taking possession and annexation of Australia in each of the first four issues of this book: See preferably Year Book No. 4 (pp. 15 and 16). In so far as the annexation of the eastern parts is concerned, a full historical account of the period may be found in the "Historical Records of New South Wales," Vol. I., parts 1 and 2. For an account of the annexation of Western Australia, reference may be made to the West Australian Year Book 1905, Part 1.

#### § 3. The Creation of the Several Colonies.

1. **Introduction.**—A historical summary of the facts relating to the creation of the several colonies, the separation of Victoria and Queensland, and the changes in the boundaries of certain of the colonies has appeared in previous issues of this book: see Year Book No. 4 (pp. 16 to 23). The main facts in this connection may be traced by reference to the maps on pages 17 and 18.

2. **No further Creation of Colonies after 1859.**—Since the separation of Queensland in 1859 no other creation of colonies has taken place in Australia, though the boundaries of New South Wales, Queensland, and South Australia were altered later, and the control of the Northern Territory was transferred from South Australia to the Commonwealth in 1911. The dates of foundation of the Australasian colonies, and their areas at the close of 1859, were as shewn in the following table:—

**DATES OF FOUNDATION OF AUSTRALASIAN COLONIES AND AREAS AS AT  
END OF 1859.**

| Colony.                  | Date of<br>Annexation. | Date of<br>Creation. | Date of First<br>Permanent<br>Settlement. | Area.<br>Square Miles. |
|--------------------------|------------------------|----------------------|---|------------------------|
| New South Wales ... ..   | 1770                   | 1786                 | 1788                                      | 1,020,412              |
| Tasmania ... ..          | 1788                   | 1825                 | 1803                                      | 26,215                 |
| South Australia ... ..   | 1788                   | 1834                 | 1836                                      | 309,850                |
| Victoria ... ..          | 1770                   | 1851                 | 1834                                      | 87,884                 |
| Queensland ... ..        | 1770                   | 1859                 | 1824                                      | 554,300                |
| Western Australia ... .. | 1829                   | 1829                 | 1829                                      | 975,920                |
| New Zealand ... ..       | 1840                   | 1841                 | 1814                                      | 104,471 <sup>1</sup>   |

1. By proclamation dated 10th June, 1901, the area of the Dominion was increased by 280 square miles, making it now 104,751 square miles, by the inclusion of the Cook Group and other islands.

3. **Australasia, 1863 to 1900.**—The immense area generally known as Australasia had, by 1863, been divided into seven distinct colonies, the areas of which are shewn below. The areas of the Northern Territory and the Federal Capital Territory, which are now under the exclusive jurisdiction of the Commonwealth, are given separately.

On the 1st January, 1901, the colonies mentioned above, with the exception of New Zealand, were federated under the name of the "Commonwealth of Australia," the designation of "Colonies" being at the same time changed into that of "States." The total area of the Commonwealth is, therefore, 2,974,581 square miles; the dates of creation and the areas of the separate colonies and territories, as determined on the final adjustment of their boundaries, are shewn in the following table:—

**DATES OF CREATION AND AREAS OF THE SEVERAL COLONIES AND  
TERRITORIES.**

| Colony.                     | Year of For-<br>mation into<br>Separate<br>Colony. | Present<br>Area in<br>Square<br>Miles. | Colony.                 | Year of For-<br>mation into<br>Separate<br>Colony. | Present<br>Area in<br>Square<br>Miles. |
|-----------------------------|--|--|-------------------------|--|--|
| New South Wales ...         | 1786   | 309,460 <sup>1</sup>                   | New Zealand ...         | 1841   | 104,751                                |
| Tasmania ... ..             | 1825   | 26,215                                 | Victoria ... ..         | 1851   | 87,884                                 |
| Western Australia ...       | 1829   | 975,920                                | Queensland ... ..       | 1859   | 670,500                                |
| South Australia<br>(proper) | 1834   | 380,070                                | Northern Territory      | 1863   | 523,620                                |
|                             |  |  | Fed. Capital Ter't'y    | 1911   | 912 <sup>2</sup>                       |
| Commonwealth ... ..         |  |  | 2,974,581 square miles. |  |  |
| Australasia ... ..          |  |  | 3,079,332 square miles. |  |  |

1. Exclusive of Federal Capital Territory.

2. Prior to 1911 included with New South Wales.

4. **British New Guinea or Papua.**—Under the administration of the Commonwealth, but not included in it, is British New Guinea or *Papua*, finally annexed by the British Government in 1884. This territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on the 1st September, 1906, under the authority of the Papua Act (Commonwealth) of 16th November, 1905. The area of Papua is about 90,540 square miles. More extended reference to this dependency of the Commonwealth will be found in Section xxix.

5. **Transfer of the Northern Territory to the Commonwealth.**—On the 7th December, 1907, the Commonwealth and the State of South Australia entered into an agreement for the surrender to and acceptance by the Commonwealth of the Northern Territory, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under the Northern Territory

## 16 TRANSFER OF THE FEDERAL CAPITAL TERRITORY TO THE COMMONWEALTH.

Surrender Act 1907 (assented to on the 14th May, 1908), and by the Commonwealth Parliament under the Northern Territory Acceptance Act 1910 (assented to on the 16th November, 1910). The Territory accordingly was transferred by Proclamation to the Commonwealth on the 1st January, 1911. Further information may be found in the section of this book on "*The Northern Territory.*"

### 4. Transfer of the Federal Capital Territory to the Commonwealth.

On the 18th October, 1909, the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 912 square miles as the seat of Government of the Commonwealth. In December, 1909, Acts were passed by the Commonwealth and New South Wales Parliaments, approving the agreement, and on the 5th December, 1910, a proclamation was issued vesting the Territory in the Commonwealth on and from the 1st January, 1911.

### § 5. The Exploration of Australia.

A fairly complete, though brief, account of the Exploration of Australia was given in Year Book No. 2 (pp. 20 to 39). A brief summary of the more important facts relating to the subject was given in Year Books Nos. 3 and 4. Maps shewing the progress of Australian exploration may be found on page 35 hereof.

### § 6. The Constitutions of the States.

A brief and condensed statement of the constitutional history of the several States, shewing how their present Constitutions have been built up, may be found in Section II. of the second, third, and fourth issues of the Year Book. See No. 4, pp. 27-32.

### § 7. The Federal Movement in Australia.

A summary was given in Year Book No. 1 (pp. 17 to 21) of the "Federal Movement in Australia" from its inception to its consummation; a synopsis thereof was given in Year Books Nos. 2, 3, and 4. See No. 4, pp. 32 to 37.

### § 8. Creation of the Commonwealth.

1. **The Act.**—The Commonwealth of Australia Constitution Act, 63 and 64 Vic., Chapter 12, namely, an Act to constitute the Commonwealth of Australia, was shewn *in extenso* in Year Book No. 1. In the Year Books Nos. 2, 3 and 4, a summary of the Act was given. As two amending Acts, namely, the Constitution Alteration (Senate Elections) Act 1906, and the Constitution Alteration (State Debts) Act 1909, have been passed, it was thought desirable to insert the Act, as amended, in full in Year Book No. 5 and again in the present issue.

#### THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT.

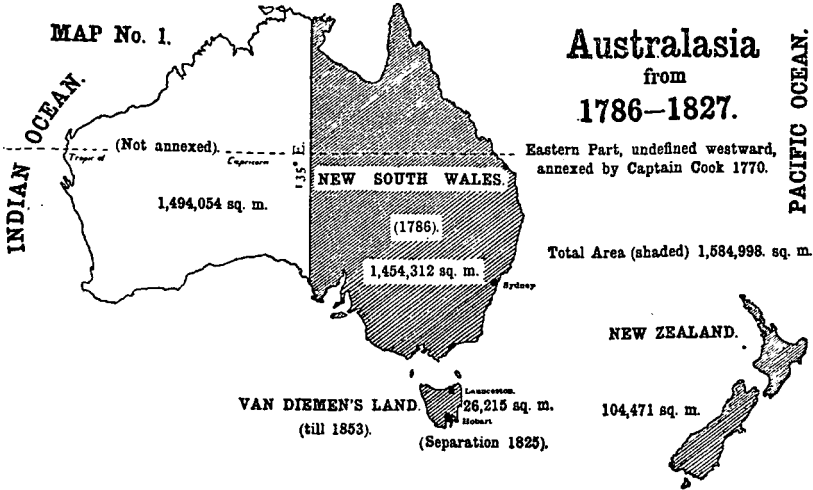

63 & 64 VICT., CHAPTER 12.

*An Act to constitute the Commonwealth of Australia. [9th July, 1900.]*

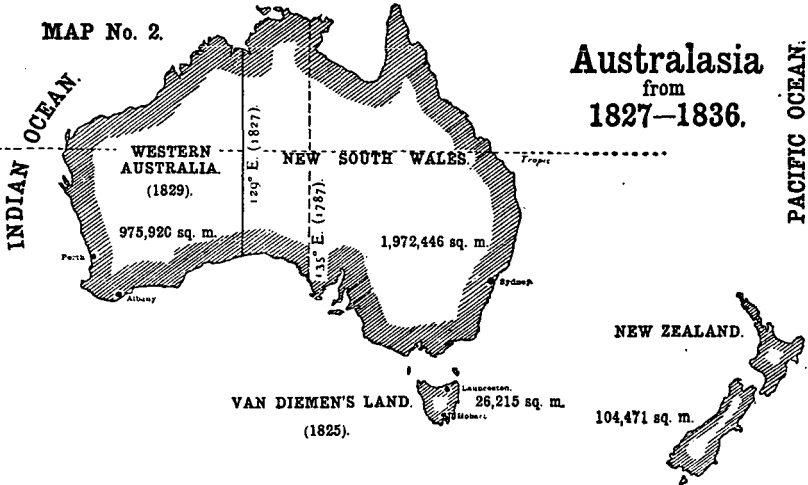

WHEREAS the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established :

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian Colonies and possessions of the Queen :

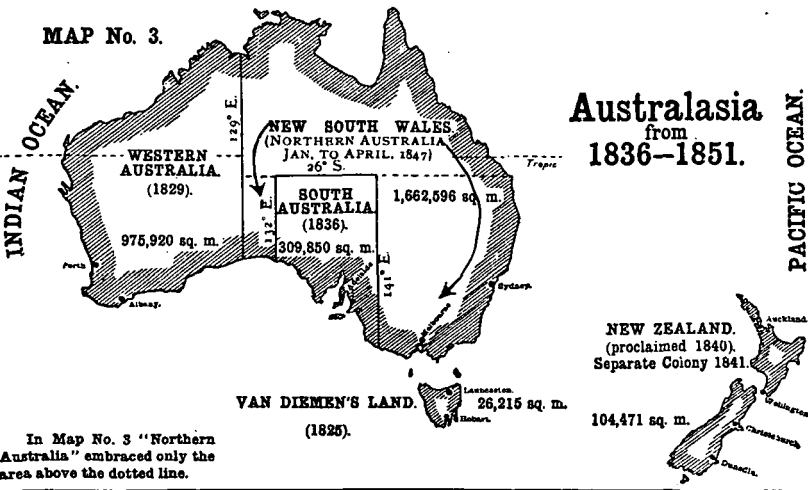

MAP No. 1.

MAP No. 3.

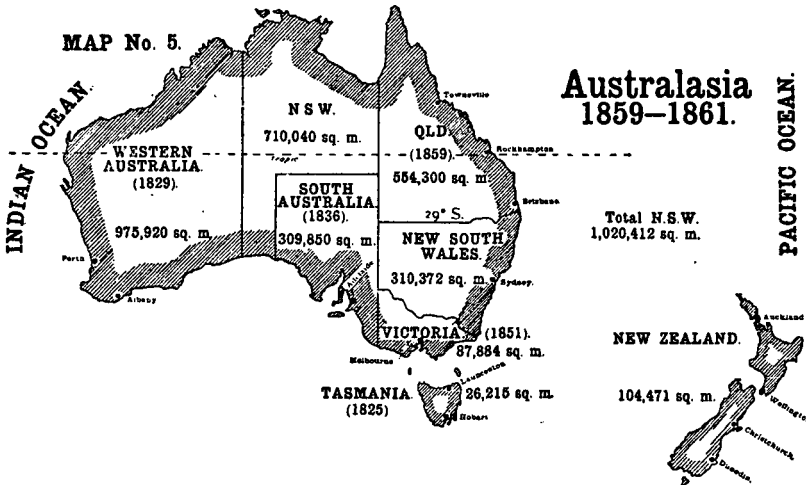

MAP No. 4.

**Australasia**  
1851-1859

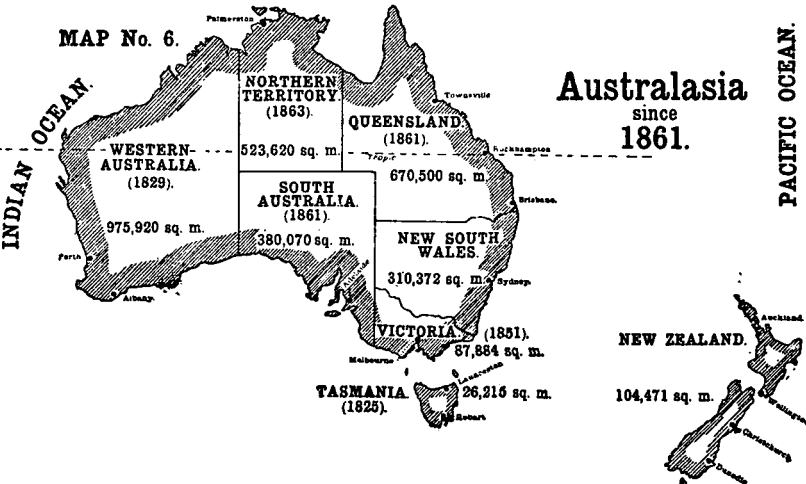

MAP No. 5.

**Australasia**  
1859-1861.

MAP No. 6.

**Australasia**  
since  
1861.

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

1. This act may be cited as the Commonwealth of Australia Constitution Act.
2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.
3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.
4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this act.
5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State; and the laws of the Commonwealth shall be in force on all British Ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.
6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.  
 "The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States: and each of such parts of the Commonwealth shall be called "a State."  
 "Original States" shall mean such States as are part of the Commonwealth at its establishment.
7. The Federal Council of Australasia Act 1885 is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.
- Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.
8. After the passing of this Act the Colonial Boundaries Act 1895 shall not apply to any colony which becomes a State of the Commonwealth: but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.
9. The Constitution of the Commonwealth shall be as follows:—

#### THE CONSTITUTION.

This Constitution is divided as follows:—

Chapter I.—The Parliament:—

Part I.—General.

Part II.—The Senate.

Part III.—The House of Representatives.

Part IV.—Both Houses of Parliament.

Part V.—Powers of the Parliament.

Chapter II.—The Executive Government.

Chapter III.—The Judicature.

Chapter IV.—Finance and Trade.

Chapter V.—The States.

Chapter VI.—New States.

Chapter VII.—Miscellaneous.

Chapter VIII.—Alteration of the Constitution.

The Schedule.

## CHAPTER I.—THE PARLIAMENT.

## PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called "The Parliament," or "The Parliament of the Commonwealth."

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such persons as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any General election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

## PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State. The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by the Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject

to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for that State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*<sup>1</sup>, and the places of those of the second class at the expiration of [the sixth year] *six years*<sup>1</sup> from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*<sup>1</sup> the places are to become vacant.

For the purpose of this section the term of service of a senator shall be taken to begin on the first day of [January] *July*<sup>1</sup> following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July*<sup>1</sup> preceding the day of his election.<sup>2</sup>

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

---

1. As amended by section 2 of the Constitution Alteration (Senate Elections) 1906. The words in square brackets have been repealed; amendments are shewn in italics.

2. Under sections 3 and 4, the Constitution Alteration (Senate Elections) 1906, it was also provided that—

(a) The terms of service of the senators whose places would, but for this Act, become vacant at the expiration of the year One thousand nine hundred and nine are extended until the thirtieth day of June One thousand nine hundred and ten.

(b) The terms of service of the senators whose places would, but for this Act, become vacant at the expiration of the year One thousand nine hundred and twelve are extended until the thirtieth day of June One thousand nine hundred and thirteen.

(c) This Act shall not be taken to alter the time of beginning of the term of service of any senator elected in the year One thousand nine hundred and six.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A Senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

### PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

- (i.) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shewn by the latest statistics of the Commonwealth, by twice the number of the senators:
- (ii.) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shewn by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section, five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows:—

|                 |        |                    |       |
|-----------------|--------|--------------------|-------|
| New South Wales | ... 23 | South Australia... | ... 6 |
| Victoria        | ... 20 | Tasmania           | ... 5 |
| Queensland      | ... 8  |                    |       |

Provided that if Western Australia is an Original State, the Number shall be as follows :—

|                 |    |    |                   |    |   |
|-----------------|----|----|-------------------|----|---|
| New South Wales | .. | 26 | South Australia   | .. | 7 |
| Victoria        | .. | 23 | Western Australia | .. | 5 |
| Queensland      | .. | 9  | Tasmania          | .. | 5 |

27. Subject to this Constitution the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provisions, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State; but in the choosing of members each elector shall vote only once.<sup>1</sup>

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no speaker, or if he is absent from the Commonwealth, the Governor-General in Council may issue the writ.

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows :—

(i.) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen :

(ii.) He must be a subject of the Queen, either natural-born or for at least five years naturalised under a law of the United Kingdom, or of a colony which has become or becomes a State, or of the Commonwealth, or of a State.

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

---

1. The franchise qualification was determined by the Commonwealth Franchise Act 1902.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

#### PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

42. Every Senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorised by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i.) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power : or
- (ii.) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of the State by imprisonment for one year or longer : or
- (iii.) Is an undischarged bankrupt or insolvent : or
- (iv.) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth : or
- (v.) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons :

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section iv. does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

- (i.) Becomes subject to any of the disabilities mentioned in the last preceding section : or
- (ii.) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to the bankrupt or insolvent debtors : or
- (iii.) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State :

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House, shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year to be reckoned from the day on which he takes his seat<sup>1</sup>.

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

- (i.) The mode in which its powers, privileges, and immunities may be exercised and upheld;
- (ii.) The order and conduct of its business and proceedings either separately or jointly with the other House.

#### PART V.—POWERS OF THE PARLIAMENT.<sup>2</sup>

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i.) Trade and commerce with other countries, and among the States;<sup>2</sup>
- (ii.) Taxation; but so as not to discriminate between States or parts of States;
- (iii.) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth:

1. By the Parliamentary Allowances Act 1907, assented to on the 28th August, the amount of the allowance was increased to £600 a year.

2. Two proposed laws for the alteration of the Constitution were submitted to the people for acceptance or rejection on the 26th April, 1911. They were (A) The Constitution Alteration (Legislative Powers) 1910, and (B) the Constitution Alteration (Monopolies) 1910.

(A) *Constitution Alteration (Legislative Powers) 1910*. The object of this proposed law was to extend the powers of the Commonwealth Government (under section 51 of the Constitution) in four directions, viz.—(a) Trade and Commerce, (b) Corporations, (c) Industrial matters, and (d) Trusts and monopolies.

(a) *Trade and Commerce*. In Section 51, para. (i.) of the Constitution, it was proposed to omit the words "with other countries, and among the States," so as to give the Commonwealth Parliament power to legislate with respect to trade and commerce, without limitation.

(b) *Corporations*. It was proposed to omit the words (para. xx.) "Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth," and to insert in lieu thereof the words—"Corporations including (a) the creation, dissolution, regulation, and control of corporations; (b) corporations formed under the law of a State (except any corporation formed solely for religious, charitable, scientific or artistic purposes, and not for the acquisition of gain by the corporation or its members), including their dissolution, regulation, and control; and (c) foreign corporations, including their regulation and control."

(c) *Industrial Matters*. In para. xxxv. it was proposed to omit the words "Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State," and to insert in lieu thereof the words "Labour and employment, including (a) the wages and conditions of labour and employment in any trade, industry, or calling; and (b) the prevention and settlement of industrial disputes, including disputes in relation to employment on or about railways, the property of any State."

(d) *Trusts and Monopolies*. It was proposed to amend Section 51 of the Constitution by adding at the end thereof the following paragraph:—"(xl.) Combinations and monopolies in relation to the production, manufacture, or supply of goods or services."

(B) *Constitution Alteration (Monopolies) 1910*. The object of this proposed law was to alter the Constitution by inserting, after Section 51 thereof, the following section:—"51A. When each House of Parliament, in the same session, has by resolution declared that the industry or business of producing, manufacturing, or supplying goods, or of supplying any specified services, is the subject of any monopoly, the Parliament shall have power to make laws for carrying on the industry or business by or under the control of the Commonwealth, and acquiring for that purpose on just terms any property used in connection with the industry or business."

Neither of the proposed laws was approved by the people.

On the 31st May, 1913, the date of the Parliamentary elections, the same proposed alterations were again submitted to the people, with an additional one whereby the conditions of employment and the settlement of disputes relating thereto in the several State railway services might be brought within the jurisdiction of the Commonwealth. All six proposed laws were negatived by the people.—See section XXV. § 2.

- (iv.) Borrowing money on the public credit of the Commonwealth :
- (v.) Postal, telegraphic, telephonic, and other like services :
- (vi.) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth :
- (vii.) Lighthouses, lightships, beacons and buoys :
- (viii.) Astronomical and meteorological observations :
- (ix.) Quarantine :
- (x.) Fisheries in Australian waters beyond territorial limits :
- (xi.) Census and statistics :
- (xii.) Currency, coinage, and legal tender :
- (xiii.) Banking, other than State banking ; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money :
- (xiv.) Insurance, other than State insurance ; also State insurance extending beyond the limits of the State concerned :
- (xv.) Weights and measures :
- (xvi.) Bills of exchange and promissory notes :
- (xvii.) Bankruptcy and insolvency :
- (xviii.) Copyrights, patents of inventions and designs, and trade marks :
- (xix.) Naturalisation and aliens :
- (xx.) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth :<sup>1</sup>
- (xxi.) Marriage :
- (xxii.) Divorce and matrimonial causes ; and in relation thereto, parental rights, and the custody and guardianship of infants :
- (xxiii.) Invalid and old-age pensions :
- (xxiv.) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the Courts of the States :
- (xxv.) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States :
- (xxvi.) The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws :
- (xxvii.) Immigration and emigration :
- (xxviii.) The influx of criminals :
- (xxix.) External affairs :
- (xxx.) The relations of the Commonwealth with the islands of the Pacific :
- (xxxi.) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws :
- (xxxii.) The control of railways with respect to transport for the naval and military purposes of the Commonwealth :
- (xxxiii.) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State :
- (xxxiv.) Railway construction and extension in any State with the consent of that State :
- (xxxv.) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State :<sup>1</sup>
- (xxxvi.) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides :
- (xxxvii.) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law :

---

1. See footnote 2 on previous page.

(xxxviii.) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia :

(xxxix.) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order and good government of the Commonwealth with respect to—

- (i.) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes :
- (ii.) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth :
- (iii.) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licenses, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriations.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provisions therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only ; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by

the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a *joint sitting of the members of the Senate and of the House of Representatives.*

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, *but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.*

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of Parliament, or by Proclamation, that it has received the Queen's assent.

## CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which, until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall be transferred to the Commonwealth:—<sup>1</sup>

|                                     |   |
|-------------------------------------|---|
| Posts, telegraphs, and telephones : | Lighthouses, lightships, beacons, and buoys : |
| Naval and military defence :        | Quarantine.                                   |

But the departments of Customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

### CHAPTER III.—THE JUDICATURE.

71. The Judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.

72. The Justices of the High Court and of the other courts created by the Parliament—

- (i.) Shall be appointed by the Governor-General in Council :
- (ii.) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity :
- (iii.) Shall receive such remuneration as the Parliament may fix : but the remuneration shall not be diminished during their continuance in office.

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

- (i.) Of any justice or justices exercising the original jurisdiction of the High Court ;
- (ii.) Of any other federal court, or court exercising federal jurisdiction ; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council :

(iii.) Of the Inter-State Commission, but as to questions of law only : and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States are applicable to appeals from them to the High Court.

1. As to departments and dates of transfer see Section XIX.—COMMONWEALTH FINANCE, § 1, hereinafter.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits *inter se* of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits *inter se* of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

75. In all matters—

- (i.) Arising under any treaty ;
  - (ii.) Affecting consuls or other representatives of other countries ;
  - (iii.) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party ;
  - (iv.) Between States, or between residents of different States, or between a State and a resident of another State ;
  - (v.) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth ;
- the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i.) Arising under this Constitution, or involving its interpretation ;
- (ii.) Arising under any laws made by the Parliament ;
- (iii.) Of Admiralty and maritime jurisdiction ;
- (iv.) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

- (i.) Defining the jurisdiction of any federal court other than the High Court ;
- (ii.) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States ;
- (iii.) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

#### CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i.) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary;
- (ii.) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth;
- (iii.) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament;
- (iv.) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied to the payment of interest on debts of the several States taken over by the Commonwealth.<sup>1</sup>

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.<sup>2</sup>

89. Until the imposition of uniform duties of customs—

(i.) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.

(ii.) The Commonwealth shall debit to each State—

(a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance as at the time of transfer, of any department transferred from the State to the Commonwealth;

(b) The proportion of the State, according to the number of its people, in other expenditure of the Commonwealth.

(iii.) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State, within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs and thereafter until the Parliament otherwise provides—

(i.) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State:

---

1. This has been known as the Braddon clause. The Surplus Revenue Act 1910 provides for the termination of this clause as from the 31st December, 1910, and for the payment to the States of twenty-five shillings per head of population until the 30th June, 1920, or thereafter, until Parliament otherwise provides, subject to certain adjustments for the year ended 30th June, 1911. For further information see Section XIX hereinafter.

2. Uniform customs duties were imposed by the Customs Tariff 1902, as from 8th October, 1901.

- (ii.) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.<sup>1</sup>

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth; and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned, whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.<sup>2</sup>

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State due regard being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

1. The Surplus Revenue Act 1908, which was amended by the Surplus Revenue Act 1910, states that the provisions of Section 93 of the Constitution shall expire on the date of the commencement of the Surplus Revenue Act 1908, that is, on 13th June, 1908, and also makes provisions in lieu of the expired provisions. The Surplus Revenue Act 1910 repeals the greater part of the provisions of the Act of 1908. See footnote to Section 87 of this Act.

2. The Commission was brought into existence in 1913, under Act No. 33 of 1912.

## 103. The members of the Inter-State Commission—

- (i.) Shall be appointed by the Governor-General in Council :
- (ii.) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity :
- (iii.) Shall receive such remuneration as the Parliament may fix ; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],<sup>1</sup> or a proportion thereof according to the respective numbers of their people as shewn by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof ; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

## CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State ; and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the Government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth ; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection of laws of the State ; but the net produce of all charges so levied shall be for the use of the Commonwealth ; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

---

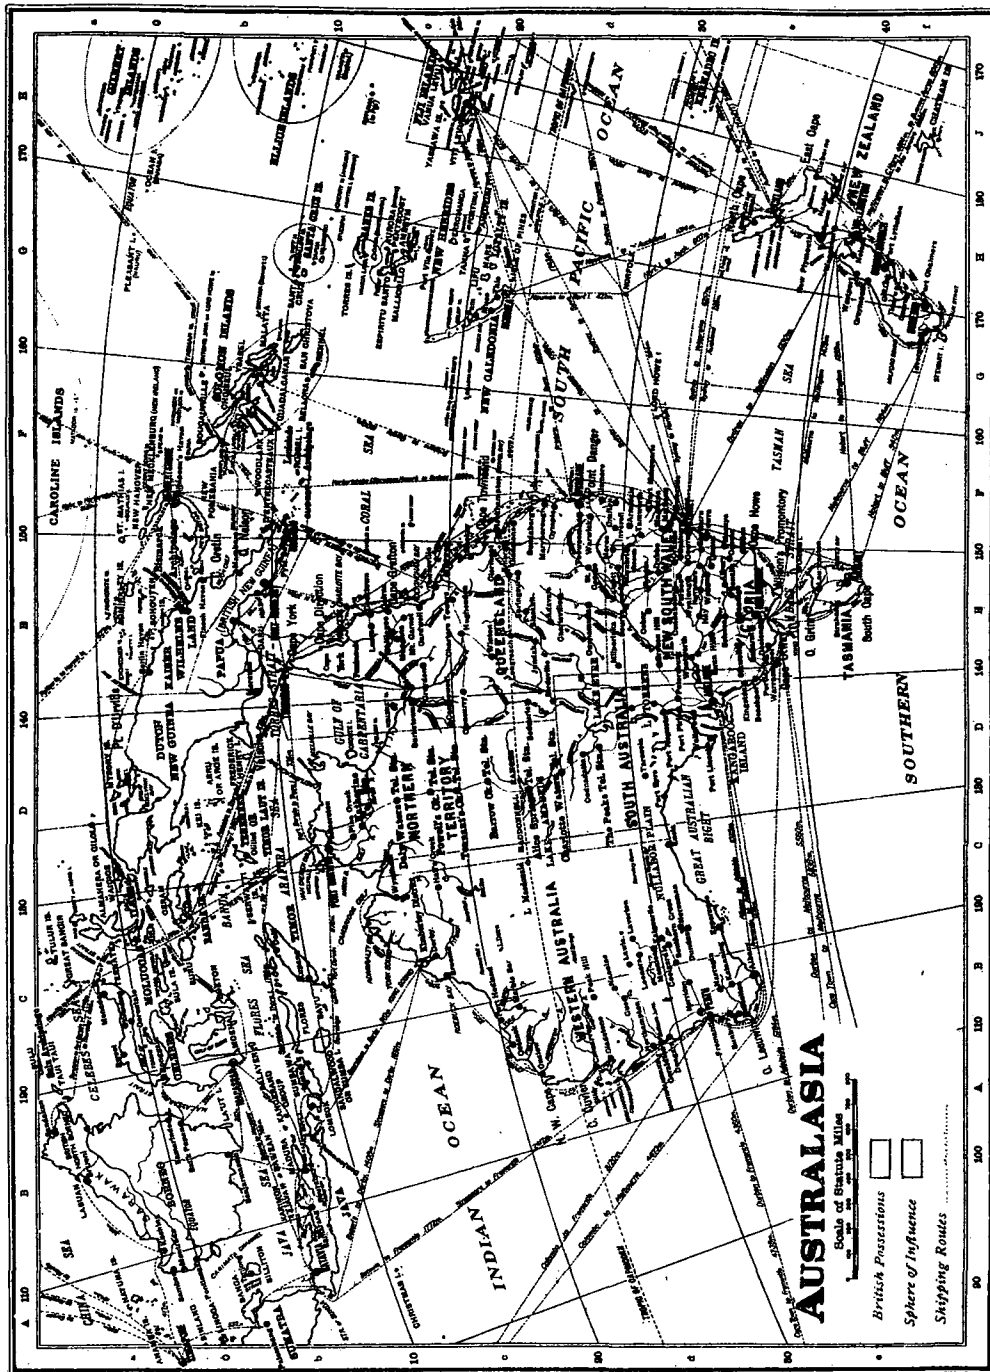

1. Under Section 2 of the Constitution Alteration (State Debts) 1909, the words in square brackets are omitted.

#### PROGRESS OF AUSTRALIAN EXPLORATION.

The above maps compiled by Mr. E. Favenc shew deceptually the progress of discovery from 1806 to 1888. The dark shade shews the area of unexplored territory.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion, and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

#### CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

---

#### CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament, and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the seat of Government.

126. The Queen may authorise the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen ; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

#### CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.<sup>1</sup>

128. This constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.<sup>2</sup>

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

#### SCHEDULE.

##### OATH.

I, A.B., do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. SO HELP ME GOD!

1. The Constitution has been altered by the following Acts:—The Constitution Alteration (Senate Elections) 1906 (No. 1 of 1907); and the Constitution Alteration (State Debts) 1909 (No. 3 of 1910).

2. The Referendum (Constitution Alteration) Act, 1906-1910, provides the necessary machinery for the submission to the electors of any proposed law for the alteration of the Constitution.

## AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

2. **The Royal Proclamation.**—The preceding Act received the Royal assent on the 9th July, 1900. This made it lawful (see Sec. 3) to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on the 17th September, 1900, constituted the Commonwealth as from the 1st January, 1901: it reads as follows:—

BY THE QUEEN.

## A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled “An Act to constitute the Commonwealth of *Australia*,” it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One Year after the passing of this Act, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, and *Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, *Tasmania*, and *Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

## § 9. Commonwealth Legislation.

1. **The Commonwealth Parliaments.**—The first Parliament of the Commonwealth was convened by proclamation dated 29th April, 1901, by His Excellency the late Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on the 9th May by H.R.H. the Duke of Cornwall and York, who had been sent to Australia for that purpose by His Majesty the King; the Rt. Hon. Sir Edmund Barton, P.C., G.C.M.G., K.C., being Prime Minister. It was dissolved on the 23rd November, 1903. The second Parliament was convened on the 2nd March, 1904, by His Excellency the Rt. Hon. Baron Northcote, P.C., G.C.M.G., G.C.I.E., C.B.; the Hon. Alfred Deakin being Prime Minister. The third session closed on the 12th October, 1906, and Parliament

was dissolved on the 8th November, 1906. The first session of the third Parliament commenced on the 20th February, 1907, and the fourth and last session on the 26th May, 1909. This Parliament expired by effluxion of time on the 19th February, 1910. The first session of the fourth Parliament dated from the 1st July, 1910, and was on the 29th November following prorogued until the 7th February, 1911, the prorogation finally extending to the 5th September, when the second session commenced. This session was prorogued on the 21st December, 1911, the third and final session commencing on the 19th June, 1912. This Parliament expired by effluxion of time on the 23rd April, 1913, and the first session of the fifth Parliament was entered upon on 9th July following, and was prorogued on the 19th December. The Debates of these Parliaments will be found in Volumes I. to LXXII. of the Parliamentary Debates, as follows:—

|                        |             |       |                               |

2. **The Several Administrations.**—The following tabular statements shew the names of the several Governors-General, and the constitution of the Ministries which have directed the administration of the affairs of the Commonwealth since its creation :

(a) GOVERNORS-GENERAL.

|  |
|--|
| Rt. Hon. EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW), P.C., K.T., G.C.M.G., G.C.V.O. Sworn 1st January, 1901; recalled 9th May, 1902, left Melbourne 2nd July, 1902. |
| Rt. Hon. HALLAM BARON TENNYSON, G.C.M.G. (Act. Governor-General). Sworn 17th July, 1902.   |
| Rt. Hon. HALLAM BARON TENNYSON, G.C.M.G. (Governor-General). Sworn 9th January, 1903; recalled 21st January, 1904.   |
| Rt. Hon. HENRY STAFFORD NORTHCOTE, P.C., G.C.M.G., G.C.I.E., C.B. Sworn 21st January, 1904; recalled 8th September, 1908.  |
| Rt. Hon. WILLIAM HUMBLE EARL OF DUDLEY, P.C., G.C.M.G., G.C.V.O., etc. Sworn 9th September, 1908; recalled 31st July, 1911.  |
| Rt. Hon. THOMAS BARON DENMAN, P.C., G.C.M.G., K.C.V.O. Sworn 31st July, 1911.  |

(b) BARTON ADMINISTRATION, 1st January, 1901, to 23rd September, 1903.

| DEPARTMENTS.                     | MINISTERS.  |

| Postmaster-General ... ..       | Hon. AGAR WYNNE   |
| Vice-President Executive C'ncil | Hon. JAMES HIERS M'COLL.                                    |
| Honorary Ministers ... ..       | { Hon. JOHN SINGLETON CLEMONS.<br>Hon. WILLIAM HENRY KELLY. |

A further list of the Ministers of State for the Commonwealth, arranged according to the respective offices occupied, is given in the section of this book dealing with the subject of *General Government* (see Section XXV.).

3. **The Course of Legislation.**—The actual legislation by the Commonwealth Parliament up to the end of the 1911 session is indicated in alphabetical order in "Vol. 10 of the Acts of the Parliament of the Commonwealth of Australia, passed in the session of 1911, with Tables, Appendices and Indexes." A "Chronological Table of Acts passed from 1901 to 1911, shewing how they are affected by subsequent legislation or lapse of time" is also given, and further "A Table of Commonwealth Legislation," for the same period, "in relation to the several provisions of the Constitution," is furnished. Reference may be made to these for complete information. The nature of Commonwealth legislation, up to October, 1913, and its relation to the several provisions of the Constitution, are set forth in the following tabular statement:—

**ANALYTIC TABLE OF COMMONWEALTH LEGISLATION  
FROM 1901 to OCTOBER, 1913, IN RELATION TO THE SEVERAL PROVISIONS  
OF THE CONSTITUTION.<sup>1</sup>**

## SECTION III.

## PHYSIOGRAPHY.

## § 1. General Description of Australia.

1. **Geographical Position.**—The Australian Commonwealth, which includes the island continent of Australia proper and the island of Tasmania, is situated in the Southern Hemisphere, and comprises in all an area of about 2,974,581 square miles, the mainland alone containing about 2,948,366 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 9' E. and 153° 39' E., while its northern and southern limits are the parallels of latitude 10° 41' S. and 39° 8' S., or including Tasmania, 43° 39' S. On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean and Bass Strait.<sup>1</sup>

(i.) *Tropical and Temperate Regions.* Of the total area of Australia the lesser portion lies within the tropics. Assuming, as is usual, that the latitude of the Tropic of Capricorn is 23° 30' S.<sup>2</sup>, the areas within the tropical and temperate zones are approximately as follows:—

**AREAS OF TROPICAL AND TEMPERATE REGIONS  
OF STATES WITHIN TROPICS.**

| Areas.                                     | Queensland. | Western<br>Australia. | Northern<br>Territory. | Total.     |
|--|-------------|-----------------------|------------------------|------------|
|  | Sq. miles.  | Sq. miles.            | Sq. miles.             | Sq. miles. |
| Within Tropical Zone ... ..                | 359,000     | 364,000               | 426,320                | 1,149,320  |
| Within Temperate Zone ... ..               | 311,500     | 611,920               | 97,300                 | 1,020,720  |
| Ratio of Tropical part to whole State ...  | 0.535       | 0.373                 | 0.814                  | 0.530      |
| Ratio of Temperate part to whole State ... | 0.465       | 0.627                 | 0.186                  | 0.470      |

Thus the tropical part is roughly about one-half (0.530) of the three territories mentioned above, or about five-thirteenths of the whole Commonwealth (0.386). See hereafter Meteorology 3.

2. **Area of Australia compared with that of other Countries.**—That the area of Australia is greater than that of the United States of America, that it is four-fifths of that of Canada, that it is more than one-fourth of the area of the whole of the British Empire, that it is nearly three-fourths of the whole area of Europe, that it is more than 25 times as large as any one of the following, viz., the United Kingdom, Hungary, Italy, the Transvaal, and Ecuador, are facts which are not always adequately realised. It is this great size, taken together with the fact of the limited population, that gives to the problems of Australian development their unique character, and its clear comprehension is essential in any attempt to understand those problems.

1. The extreme points are "Steep Point" on the west, "Cape Byron" on the east, "Cape York" on the north, "Wilson's Promontory" on the south, or, if Tasmania be included, "South East Cape." The limits, according to the 1903-4 edition of "A Statistical Account of Australia and New Zealand," p. 2, and, according to Volume XXV. of the "Encyclopædia Britannica," tenth edition, p. 787, are respectively 113° 5' E., 153° 16' E., 10° 39' S., and 39° 11½' S., but these figures are obviously defective. A similar inaccuracy appears in the XI. edition of the Encyclopædia.

2. Its correct value for 1914 is 23° 27' 1".70, and it decreases about 0".47 per annum.

The relative magnitudes may be appreciated by a reference to the following table, which shews how large Australia is compared with the countries referred to, or *vice versa*. Thus, to take line 1, we see that Europe is about  $1\frac{3}{16}$  times (1.29778) as large as Australia, or that Australia is about three-quarters (more accurately 0.77) of the area of Europe.

### SIZE OF AUSTRALIA IN COMPARISON WITH THAT OF OTHER COUNTRIES.

**3. Relative Size of Political Subdivisions.**—As already stated, Australia consists of six States and the Northern and Federal Capital Territories. The areas of these, in relation to one another and to the total of Australia, are shewn in the following table :—

RELATIVE SIZES OF STATES AND COMMONWEALTH.

| State.            | Area.      | Ratio which the Area of each State and Territory bears to that of other States, Territories and Commonwealth. |        |         |       |       |         |         |                    |

| Commonwealth      | 2,974,581  | 9.610   | 33.847 | 4.436   | 7.827 | 3.048 | 113.469 | 5.681   | 1.000              |

1. The correct decimal is 0.0003.

Thus, looking at the top line, New South Wales is seen to be over three-and-a-half times as large as Victoria (3.522) and less than one-half the size of Queensland (0.462); or again, looking at the bottom line, the Commonwealth is shewn to be more than nine-and-a-half times as large as New South Wales (9.610), and nearly thirty-four times as large as Victoria (33.847).

These relative magnitudes are shewn in the small diagram below. It may be added that Papua (or British New Guinea), with its area of 90,540 square miles, is 0.030 of the Area of the Commonwealth. The comparatively small size of the Federal Capital Territory prevents its being shewn in this diagram.

**4. Coastal Configuration.**—There are no striking features in the configuration of the coast; the most remarkable indentations are the Gulf of Carpentaria on the north and the Great Australian Bight on the south. The York Peninsula on the extreme north is the only other remarkable feature in the outline. In Year Book No. 1 an enumeration of the features of the coast-line of Australia was given (see pp. 60 to 68).

(i.) *Coast-line.* The lengths of coast-line, exclusive of minor indentations, both of each State and of the whole continent, are shewn in the following table :—

## SQUARE MILES OF TERRITORY PER MILE OF COAST LINE.

## STATES AND CONTINENT.

| State.                       | Coast-line. | Area ÷<br>Coast-line. | State.                     | Coast-line. | Area ÷<br>Coast-line. |
|------------------------------|-------------|-----------------------|----------------------------|-------------|-----------------------|
|                              | Miles.      | Sq. miles.            |                            | Miles       | Sq. miles.            |
| New South Wales <sup>1</sup> | 700         | 443                   | South Australia ...        | 1,540       | 247                   |
| Victoria ...                 | 680         | 129                   | Western Australia          | 4,350       | 224                   |
| Queensland ...               | 3,000       | 223                   | Continent <sup>2</sup> ... | 11,310      | 261                   |
| Northern Territory           | 1,040       | 503                   | Tasmania ...               | 900         | 29                    |

1. Including Federal Capital Territory.

2. Area 2,948,366 square miles.

For the entire Commonwealth this gives a coast-line of 12,210 miles, and an average of 244 square miles for one mile of coast line. According to Strelbitski, Europe has only 75 square miles of area to each mile of coast line, and, according to recent figures, England and Wales have only one-third of this, viz., 25 square miles.

(ii.) *Historical Significance of Coastal Names.* It is interesting to trace the voyages of some of the early navigators by the names bestowed by them on various coastal features—thus Dutch names are found on various points of the Western Australian coast, in Nuyt's Archipelago, in the Northern Territory and in the Gulf of Carpentaria; Captain Cook can be followed along the coasts of New South Wales and Queensland; Flinders' track is easily recognised from Sydney southwards, as far as Cape Catastrophe, by the numerous Lincolnshire names bestowed by him; and the French navigators of the end of the eighteenth and the beginning of the nineteenth century have left their names all along the Western Australian, South Australian, and Tasmanian coasts.

5. *Geographical Features of Australia.*—In each preceding issue of this Year Book, fairly complete information has been given concerning some special geographical element. Thus No. 1 Year Book, pp. 60-68, contains an enumeration of Coastal features. No. 2, pp. 66-67, deals with Hydrology, No. 3, pp. 59-72, with Orography, No. 4, pp. 59-82, with the Lakes of Australia, No. 5, pp. 51-80, with the Islands of Australia, and No. 6, pp. 55-66 with the Mineral Springs of Australia. This practically completes the description of the ordinary physical features. The present issue contains a special article dealing with the geological history of Australia, particularly as regards the climatic changes evidenced therein. An orographical or vertical relief map of Australia will be found on p. 53.

## § 2. Salient Features in the Geological History of Australia, with Special Reference to Changes of Climate.\*

(i.) *The Pre-Cambrian Age.* Rocks of definitely ascertained Pre-Cambrian age occupy a great area throughout Australia, while others, almost certainly of this age, underlie a vast extent of the surface of the continent. In South Australia and in the Northern Territory the association of fossiliferous Lower Cambrian strata with older schists defines the Pre-Cambrian age of the latter most satisfactorily. In Queensland, New South Wales, Victoria, Tasmania and Western Australia, lithological evidence points to the existence of Pre-Cambrian rocks; but stratigraphical and paleontological tests leave open the possibility of the beds belonging to some part of the Lower Palæozoic group. In South Australia three fairly well defined lithological series are represented by the rocks of Eyre's Peninsula, by those of northern Yorke's Peninsula, and by those of the Mount Lofty and Barossa Ranges respectively, which will probably be found to correspond with definite breaks in the geological sequence. The Mount Lofty and Barossa Range beds (Barossian series) are certainly altered sediments, including lime-

\* Contributed by Professor W. G. Woolnough, D.Sc., University of Perth, W.A.

stones, but they yield no information as to climatic conditions in the Pre-Cambrian time. The same may be said of the Northern Territory beds. In most of the remaining Pre-Cambrian areas the rocks are granitoid in character, or else very highly metamorphosed crystalline schists.

(ii.) *The Cambrian Age.* Evidence as to climatic conditions in the Cambrian time is much more abundant and conclusive. In the Lower Cambrian beds near Adelaide there is developed a very important and extensive glacial series (Sturt River glacial beds). Some distance higher up in the series come limestones (Brighton limestones) and higher still great reefs of limestone (Archæocyathinæ limestones). It is possible, though by no means certain, that these limestones may indicate a change of the climate. The Archæocyathinæ limestones have certainly the *habit* of coral reefs, but the organisms are of so primeval a type that it would be rash to assume that they indicate a climate similar to that required for the growth of reef corals at the present day. In the Northern Territory, Cambrian time was ushered in by great volcanic activity. Then followed the deposition of immense beds of limestone, probably unsurpassed in extent anywhere in the world. Evidences of shallow water origin are not wanting, hence the accumulation of thousands of feet of limestone may be taken to indicate long continued subsidence. The upper beds of the Cambrian system (Roper River quartzites and Mount McMinns beds) are of very shallow water origin, and the predominance of red beds may indicate aridity of the adjacent continental surface.

(iii.) *The Ordovician Age.* In Ordovician time, deep sea water stretched over Southern Australia, and very constant and characteristic *graptolite* beds are widely distributed. This deep ocean did not cover the whole of the continent, since in the "Larapintine system" of Central Australia the facies of the Ordovician system is quite different. Here were very shallow water conditions, evidenced by the occurrence of pseudomorphs of common salt crystals. In all probability Northern and Western Australia were occupied by continental land at this time.

(iv.) *The Silurian Age.* During the Silurian period conditions changed considerably, and South-eastern Australia was covered by shallow sea water. Immense limestone beds occur at intervals from Tasmania to Northern Queensland; and, as these are built up largely of true reef-building corals, the inference of a warm climate is not without justification. Evidences of volcanic activity are widespread.

(v.) *The Devonian Age.* In early Devonian time the south-eastern corner of Australia was occupied by an immense range of acid volcanoes, which built up the Snowy River porphyries. They may have attained altitudes of upwards of 15,000 feet above sea level.

Lying upon their denuded surfaces, but still of Middle Devonian age, are extensive coralline limestone, probably indicating the existence of warm shallow seas. These limestones occur at intervals from Gippsland, through New South Wales to the Burdekin and Fanning Rivers of Queensland.

Late Devonian time was marked by instability of the land surface, and by rather rapid alternations of marine and terrestrial conditions. The occurrence of red beds may indicate aridity of climate, but no deposits of salt or gypsum were produced. The earliest abundant plant remains (*Lepidodendron australe*) belong to this stage.

(vi.) *The Carboniferous Age.* In Carboniferous time the instability of level noted above continued, and became even more pronounced, so that interbedded marine and freshwater strata are a feature of this formation. Towards the close of the period, too, volcanic activity became very widespread. The organic life of the time was abundant and varied; its abrupt cessation, and the strong contrast presented by the succeeding fauna and flora, indicate that a warm climate obtained during Carboniferous time.

(vii.) *The Permo-Carboniferous Age.* Permo-Carboniferous time witnessed a return of intense glacial conditions, perhaps the most intense that have ever visited Australia. Victoria, South Australia, parts of Tasmania, and nearly the whole of Western Australia were continental land. Over this continent stretched a great, slow-moving ice sheet, wearing, polishing, and scratching the rock surfaces, and transporting fragments for hundreds of miles. From the directions of the scratches it is clear that the main centre

of ice distribution in Eastern Australia lay to the south-west of Tasmania. That is to say, high continental land existed, at that time, not far from what is now the eastern end of Jeffrey's Deep. After reaching sea level, near the border between Victoria and New South Wales, the ice sheet broke up into icebergs and "rafted" great blocks of rock far to the northward. These erratics are abundant in the Hunter River coalfield and in the Macleay River district of New South Wales, and the icebergs floated well within the limits of the tropics in Queensland, Central Australia, and Western Australia.

There is a remarkable alternation of shallow water marine beds with freshwater beds in Australia. It is in these freshwater beds that the most extensive of our productive coal measures were developed. Glacial action was not continuous throughout the whole period, but, after the first great glacial epoch, passed away for a time, and reoccurred to a much more limited extent later. The fauna and flora of the Permo-Carboniferous system offer a contrast to those of the preceding period so marked that, as above mentioned, a stupendous change of climate must have occurred in the interval indicated by the unconformity between the two formations.

(viii.) *The Lower Mesozoic Age.* The Lower Mesozoic (Triassic or Trias-Jura) beds of Australia seem, for the most part, to follow those of Permo-Carboniferous age, with very little evidence of great changes in the distribution of land and sea. In New South Wales and in Western Australia there appears to have been continuity of sedimentation. Nevertheless, there is a most striking *life-break* between the two systems, which, in absence of evidence of great land movements or long lapse of time, must be taken to indicate an extensive and relatively rapid change of climate. All the Lower Mesozoic beds of Australia are of freshwater origin, and, in Queensland, Victoria, Tasmania, and South Australia, contain workable coal measures. On the western slopes of the Main Divide of Eastern Australia and in Western Australia they contain supplies of artesian water.

(ix.) *The Upper Mesozoic Age.* In Upper Mesozoic time (Cretaceous) there was a very extensive transgression of the sea over the continental surface. In all probability, Australia was severed into two or more great continental islands lying to the east and west of a large mediterranean sea. In this latter, and in the ocean waters beyond the islands, were laid down marine beds. Those of the mediterranean sea, widely developed in Queensland, Northern Territory, and South Australia, and to a smaller extent in New South Wales and Western Australia, supply vast quantities of artesian water.

(x.) *The Early Tertiary Age.* In early Tertiary time the whole continent was subjected to a tilting movement, rising on the north and subsiding on the south. The former portion became dry land, but the sea transgressed extensively over Tasmania, Victoria, South Australia, and Western Australia, and laid down thick beds of limestone. Climatic conditions appear to have been quite mild. Extensive volcanic eruptions occurred along the borders of the old cretaceous sea.

(xi.) *The Later Tertiary Age.* In later Tertiary time came the gradual uplift, expelling the sea from the continental surface, and causing the formation of extensive plateau surfaces. Volcanic action on a large scale was widespread, and, in Western Victoria and South-eastern South Australia, continued to a very recent date. That the climate of Australia was much moister during this period than it is at the present day is shewn by evidences of former great extension of lake basins now dry or much shrunken, and by the remains of gigantic extinct animals, including crocodiles and turtles, in the now desert areas of Central Australia.

A third great glacial epoch occurred during late Tertiary time. On this occasion, continental ice-sheets were not developed, but the highlands of Tasmania and of the Australian Alps were covered by ice-caps, which descended some 3000 feet below the present summit levels.

The latest phases of the geological history of Australia are to be read from the distribution of land forms. These indicate that earth movements of a plateau-forming character are still taking place; the separation of Tasmania and New Guinea from the mainland, and the development of the Great Barrier Reef of Queensland, are important incidents in this phase of geological history.

### § 3. The Fauna of Australia.

An authoritative article describing in some detail the principal features of the Fauna of Australia was given in Year Books No. 1 (see pp. 103 to 109) and No. 2 (see pp. 111 to 117), while a synoptical statement appeared in No. 3 (see pp. 73 to 76). Considerations of space will, however, preclude the inclusion in this issue of more than a passing reference to the subject.

### § 4. The Flora of Australia.

In Year Books No. 1 (see pp. 109 to 114) and No. 2 (see pp. 117 to 122) a fairly complete though brief account was given of the Flora of Australia, and in Year Book No. 3 similar information in a greatly condensed form will be found on pp. 76 to 78. Space in this issue will not permit of more than a mere reference to preceding volumes.

A special article dealing with Australian fodder plants, contributed by J. H. Maiden, Esq., F.L.S., Government Botanist of New South Wales, and Director of the Botanic Gardens, Sydney, appeared in Official Year Book No. VI., pp. 1190-6.

### § 5. Seismology in Australia.

A brief statement regarding the position of seismology and seismological record in Australia appears in Year Book No. 4, pp. 82 and 83.

*Barisal Guns.* Reference may be made here to an interesting pamphlet published by Dr. J. Burton Cleland, in which the author sums up the available information regarding the peculiar explosive or booming noises heard at times in Australia as well as in other parts of the world. As far as inland Australia, at all events, is concerned, it seems clear that the explosions are of earth origin, and are probably due to the sudden sundering of immense rock masses, either as a result of climatic influences, or through folding movements in the earth's crust.

### § 6. The Geology of Australia.

1. **General.**—Independent and authoritative sketches of the geology of each State were given in Year Books No. 1 (see pp. 73 to 103) and No. 2 (see pp. 78 to 111). Want of space has precluded the insertion of these sketches in the present issue of the Year Book, and it has not been considered possible to give anything like a sufficient account of the geology of Australia by presenting here a mere condensation of these sketches. Reference must, therefore, be made to either Year Book No. 1 or No. 2, *ut supra*.

2. **Geological Map of Australia.**—The map of the Geology of Australia on page 54. shews the geographical distribution of the more important geological systems and formations.

### § 7. Climate and Meteorology of Australia.<sup>1</sup>

1. **Introductory.**—In preceding Year Books some account was given of the history of Australian meteorology, including reference to the development of magnetic observations and the equipment for the determination of various climatological records. (See Year Book No. 3, pp. 79, 80). In Year Book No. 4, pp. 84 and 87, will be found a short sketch of the creation and organisation of the Commonwealth Bureau of Meteorology and a resumé of the subjects dealt with at the Meteorological Conference of 1907. Space will not permit of the inclusion of this matter in the present issue.

2. **Meteorological Publications.**—The following publications are issued daily from the Meteorological Bureau, viz.:—(i.) Weather charts. (ii.) Rainfall maps. (iii.) Bulletins, Victorian and Interstate, shewing pressure, temperature, wind, rain, cloud extent, and weather.

1. Prepared from data supplied by the Commonwealth Meteorologist, H. A. Hunt, Esquire, F.R.Met.S.

The Bulletins of Climatology are as follows:—No. 1.—A general discussion of the climate and meteorology of Australia, illustrated by one map and diagrams. No. 2.—A discussion of the rainfall over Australia during the ten years (1897-1906) compared with the normal, illustrated by one map. No. 3.—Notes and statistics of the remarkable flood rains over south-eastern Australia during the winter of 1909, illustrated by five maps and diagrams. No. 4.—A discussion of the monthly and seasonal rainfall over Australia, illustrated by one map and diagram. No. 5.—An investigation into the possibility of forecasting the approximate winter rainfall for Northern Victoria, illustrated by two diagrams. No. 6.—The physiography of the proposed Federal Territory at Canberra, illustrated by a relief map and 21 plates. No. 7.—On the climate of the Yass-Canberra district, illustrated by one map. No. 8.—Physiography of Eastern Australia, with 28 text illustrations.

Commencing with January 1910, the "Australian Monthly Weather Report," containing statistical records from representative selected stations, with rain maps and diagrams, etc., is being published. Complete rainfall and other climatological data are published in annual volumes of meteorological statistics for each State separately.

**3. General Description of Australia.**—In the general description of Australia, page 48, it is pointed out that a considerable portion (0.530) of three divisions of the Australian Commonwealth is north of the tropic of Capricorn, that is to say, within the States of Queensland and Western Australia, and the Northern Territory, no less than 1,149,320<sup>1</sup> square miles belong to the tropical zone, and 1,020,720 to the temperate zone. The whole area of the Commonwealth within the temperate zone, however, is 1,825,261<sup>2</sup> square miles, thus the tropical part is about 0.386, or about five-thirteenths of the whole, or the "temperate" region is half as large again as the "tropical" (more accurately 1.591). By reason of its insular geographical position, and the absence of striking physical features, Australia is, on the whole, less subject to extremes of weather than are regions of similar area in other parts of the globe; and latitude for latitude Australia is, on the whole, more temperate.

The altitudes of the surface of Australia range up to a little over 7300 feet, hence its climate embraces a great many features, from the characteristically tropical to what is essentially alpine, a fact indicated in some measure by the name Australian Alps given to the southern portion of the great Dividing Range.

While on the coast the rainfall is often abundant and the atmosphere moist, in some portions of the interior the rainfall is very limited, and the atmosphere dry. The distribution of forest, as might be expected, and its climatic influence, is consequently very variable. In the interior there are on the one hand fine belts of trees, on the other there are large areas which are treeless, and where the air is hot and parched in summer. Again, on the coast, even as far south as latitude 35°, the vegetation is tropical in its luxuriance, and also somewhat so in character. Climatologically, therefore, Australia may be said to present a great variety of features. The various climatological characteristics will be referred to in detail.

**4. Meteorological Divisions.**—The Commonwealth Meteorologist has divided Australia, for climatological and meteorological purposes, into five divisions. The boundaries between these may be thus defined:—(a) Between divisions I. and II., the boundary between South and Western Australia, viz., the 129th meridian of east longitude; (b) between divisions II. and III., starting at the Gulf of Carpentaria, along the Norman River to Normanton, thence a straight line to Wilcannia on the Darling River, New South Wales; (c) between divisions II. and IV., from Wilcannia along the Darling River to its junction with the Murray; (d) between divisions II. and V., from

1. In the article "Australia" in the Encyclopædia Britannica, Vol. XXX., p. 796, this area is given as 1,145,000 square miles.

2. Given as 1,801,700 square miles in the work above quoted, where, however, the statistics are said "to refer only to the continental States of the Federation, not to Tasmania."

the junction of the Darling and Murray Rivers, along the latter to Encounter Bay; (e) between divisions III. and IV., starting at Wilcannia, along the Darling, Barwon, and Dumaresq Rivers to the Great Dividing Range, and along that range and along the watershed between the Clarence and Richmond Rivers to Evans Head on the east coast of Australia; (f) between divisions IV. and V., from the junction of the Darling and Murray Rivers along the latter to its junction with the Murrumbidgee, along the Murrumbidgee to the Tumut River, and along the Tumut River to Tumut, thence a straight line to Cape Howe; (g) division V. includes Tasmania.

The population included within these boundaries at the Census of the 3rd April, 1911, was approximately as follows:—

| Division   | I.      | II.     | III.    | IV.       | V.        |
|------------|---------|---------|---------|-----------|-----------|
| Population | 282,000 | 429,000 | 607,000 | 1,540,000 | 1,597,000 |

In these divisions the order in which the capitals occur is as follows:—(i.) Perth, (ii.) Adelaide, (iii.) Brisbane, (iv.) Sydney, (v.) Melbourne, (vi.) Hobart, and for that reason the climatological and meteorological statistics will be set forth in the indicated order in this publication.

(i.) *Special Climatological Stations.* The latitudes, longitudes, and altitudes of special stations, the climatological features of which are graphically represented herein-after, are as follows:—

#### SPECIAL CLIMATOLOGICAL STATIONS.

| Locality.     | Height<br>above<br>Sea<br>Level. | Latitude. |      | Longitude. |      | Locality.         | Height<br>above<br>Sea<br>Level. | Latitude. |      | Longitude. |      |
|---------------|----------------------------------|-----------|------|------------|------|-------------------|----------------------------------|-----------|------|------------|------|
|               |                                  | S.        | min. | deg.       | min. |                   |                                  | S.        | min. | deg.       | min. |
| Perth ...     | 197                              | 31        | 57   | 115        | 51   | Darwin ...        | 97                               | 12        | 28   | 130        | 51   |
| Adelaide ...  | 140                              | 34        | 56   | 138        | 35   | Daly Waters ...   | 700                              | 16        | 16   | 133        | 23   |
| Brisbane ...  | 137                              | 27        | 28   | 153        | 2    | Alice Springs ... | 1926                             | 23        | 38   | 133        | 37   |
| Sydney ...    | 146                              | 33        | 52   | 151        | 12   | Dubbo ...         | 870                              | 32        | 18   | 148        | 35   |
| Melbourne ... | 115                              | 37        | 50   | 144        | 59   | Laverton ...      | 1530                             | 28        | 40   | 122        | 23   |
| Hobart ...    | 160                              | 42        | 53   | 147        | 20   | Coolgardie ...    | 1402                             | 30        | 57   | 121        | 10   |

5. **Temperatures.**—In respect of Australian temperatures generally it may be pointed out that the isotherm for 70° Fahrenheit extends in South America and South Africa as far south as latitude 33°, while in Australia it reaches only as far south as latitude 30°, thus shewing that, on the whole, Australia has a more temperate climate when compared latitude for latitude with places in the Southern Hemisphere.

The comparison is even more favourable when the Northern Hemisphere is included in the comparison, for in the United States the 70° isotherm extends in several of the western States as far north as latitude 41°. In Europe the same isotherm reaches almost to the southern shores of Spain, passing, however, afterwards along the northern shores of Africa till it reaches the Red Sea, when it bends northward along the eastern shore of the Mediterranean till it reaches Syria. In Asia nearly the whole of the land area south of latitude 40° N. has a higher isothermal value than 70°.

The extreme range of shade temperatures in summer and winter in a very large part of Australia amounts to probably only 81°. In Siberia, in Asia, the similar range is no less than 171°, and in North America 153°, or approximately double the Australian range.

Along the northern shores of the Australian continent the temperatures are very equable. At Darwin, for example, the difference in the means for the hottest and coldest months is only 8.5°, and the extreme readings for the year, that is, the highest maximum in the hottest month and the lowest reading in the coldest month, shew a difference of under 50°.

Coming southward the extreme range of temperature increases gradually on the coast, and in a more pronounced way inland.

The detailed temperature results for the several capitals of the States of Australia are shewn in the Climatological Tables hereinafter.

*Hottest and Coldest Parts.* A comparison of the temperatures recorded at coast and inland stations shews that, in Australia as in other continents, the range increases with increasing distance from the coast.

In the interior of Australia, and during exceptionally dry summers, the temperature occasionally reaches or exceeds  $120^{\circ}$  in the shade, and during the dry winters the major portion of the country to the south of the tropics is subject to ground frosts. An exact knowledge of temperature disposition cannot be determined until the interior becomes more settled, but from data procurable, it would appear that the hottest area of the continent is situated in the northern part of Western Australia about the Marble Bar and Nullagine goldfields, where the maximum shade temperature during the summer sometimes exceeds  $100^{\circ}$  for days, and even weeks' continuously. The coldest part of the Commonwealth is the extreme south-east of New South Wales and extreme east of Victoria, namely, the region of the Australian Alps. Here the temperature seldom, if ever, reaches  $100^{\circ}$  even in the hottest of seasons.

In Tasmania also, although occasionally hot winds may cross the Straits and cause the temperature to rise to  $100^{\circ}$  in the low-lying parts, yet the island as a whole enjoys a most moderate and equable range of temperature throughout the year.

*Monthly Maximum and Minimum Temperatures.* The mean monthly maximum and minimum temperatures can be best shewn by means of graphs, which exhibit the nature of the fluctuation of each for the entire year. In the diagram (on page 71) for nine representative places in Australia, the upper heavy curves shew the mean maximum, the lower heavy curves the mean minimum temperatures based upon daily observations. On the same diagram the thin curves shew the relative humidities (see next paragraph).

**6. Relative Humidity.**—Next after temperature the degree of humidity may be regarded as of great importance as an element of climate; and the characteristic differences of relative humidity between the various capitals of Australia call for special remark. For six representative places the variations of humidity are shewn on the graph on page 71, which gives results based upon daily observations of the dry and wet bulb thermometers. Hitherto difficulties have been experienced in many parts of Australia in obtaining satisfactory observations for a continuous period of any length. For this reason it has been thought expedient to refer to the record of humidity at first order stations only, where the results are thoroughly reliable. Throughout, the degree of humidity given will be what is known as *relative humidity*, that is, the percentage of aqueous vapour actually existing to the total possible if the atmosphere were saturated.

The detailed humidity results for the several State capitals are given in the Climatological Tables hereinafter. From these, it is seen that, in respect of relative humidity, Sydney has the first place, while Melbourne, Hobart, Brisbane, Perth, and Adelaide follow in the order stated, Adelaide being the driest. The graphs on page 71 shew the annual variations in humidity. It will be observed that the *relative humidity* is ordinarily but not invariably great when the temperature is low.

**7. Evaporation.**—The rate and quantity of evaporation in any territory is influenced by the prevailing temperature, and by atmospheric humidity, pressure and movement. In Australia the question is of perhaps more than ordinary importance; since in its drier regions water has often to be conserved in "tanks"<sup>1</sup> and dams. The magnitude of the economic loss by evaporation will be appreciated from the records on pages 72 and 80 to 85, which show that the yearly amount varies from about  $32\frac{1}{2}$  inches at Hobart to 97 inches at Alice Springs in the centre of the Continent.

(i.) *Monthly Evaporation Curves.* The curves showing the mean monthly evaporation in various parts of the Commonwealth will disclose how characteristically different are the amounts for the several months in different localities. The evaporation for characteristic places is shewn on diagram shewing also rainfalls (see page 72).

1. In Australia artificial storage ponds or reservoirs are called "tanks."

(ii.) *Loss by Evaporation.* In the interior of Australia the possible evaporation is often greater than the actual rainfall. Since, therefore, the loss by evaporation depends largely on the exposed area, tanks and dams so designed that the surface shall be a minimum are advantageous. Similarly, the more protected from the direct rays of the sun and from winds, by means of suitable tree planting, the less will be the loss by evaporation: these matters are of more than ordinary concern in the drier districts of Australia.

8. **Rainfall.**—As even a casual reference to climatological maps, indicating the distribution of rainfall and prevailing direction of wind, would clearly shew, the rainfall of any region is determined mainly by the direction and route of the prevailing winds, by the varying temperatures of the earth's surface over which they blow, and by the physiographical features generally.

Australia lies within the zone of the south-east and westerly trade winds. The southern limit of the south-east trade strikes the eastern shores at about 30° south latitude. Hence, we find that, with very few exceptions, the heaviest rains of the Australian continent are precipitated along the Pacific slopes to the north of that latitude, the varying quantities being more or less regulated by the differences in elevation of the shores and of the chain of mountains, upon which the rain-laden winds blow, from the New South Wales northern border to Thursday Island. The converse effect is exemplified on the north-west coast of Western Australia from the summer south-east trade winds. Here the prevailing winds, blowing from the interior of the continent instead of from the ocean, result in the lightest coastal rain in Australia.

The westerly trade winds, which skirt the southern shores, are responsible for the very reliable, although generally light, rains enjoyed by the south-western portion of Western Australia, by the south-eastern agricultural areas of South Australia, by a great part of Victoria, and by the whole of Tasmania.

(i.) *Factors determining Distribution and Intensity of Rainfall.*

(ii.) *Time of Rainfall.*

In preceding Year Books (see No. 6 pp. 72, 73, 74) some notes were given of the various factors governing the distribution, intensity and period of Australian rainfall.

(iii.) *Wettest and Driest Regions.* The wettest known part of Australia is on the north-east coast of Queensland, between Port Douglas and Cardwell, where three stations situated on, or adjacent to, the Johnstone and Russell Rivers have an average annual rainfall of between 150 and 166 inches. The maximum and minimum falls there are:—Goondi, 241.53 in 1894 and 76.24 inches in 1902, or a range of 165.29 inches; Innisfail, 211.24 in 1894 and 69.87 inches in 1902, or a range of 141.37 inches; Harvey Creek, 238.45 in 1901 and 80.47 inches in 1902, or a range of 157.98 inches.

On three occasions more than 200 inches have been recorded at Goondi, the last of these being in 1910, when 204.82 inches were registered. The record at this station covers a period of 20 years.

Harvey Creek in the shorter period of 16 years has twice exceeded 200 inches, the total for 1910 being 201.28 inches.

The driest known part of the continent is about the Lake Eyre district in South Australia (the only part of the continent below sea level), where the annual average is but 5 inches, and where it rarely exceeds 10 inches for the twelve months.

The inland districts of Western Australia have until recent years been regarded as the driest part of Australia, but authentic observations taken during the past decade at settled districts in the east of that State shew that the annual average is from 10 to 12 inches.

(iv.) *Quantities and Distribution of Rainfall generally.* The departure from the normal rainfall increases greatly and progressively from the southern to the northern shores of the continent, and similarly also at all parts of the continent, subject to

capricious monsoonal rains, as the comparisons hereunder will shew. The general distribution is best seen from the map on page 77, shewing the areas subject to average annual rainfalls lying between certain limits. The areas enjoying varying quantities of rainfall determined from the latest available information are shewn in the following table:—

#### DISTRIBUTION OF AVERAGE RAINFALL.

| Average Annual Rainfall. | N.S.W.    | Victoria. | Queens-land. | South Aust. | Northern Territ'y. | Western Aust. | Tasmania. | Commonwealth. |
|--------------------------|-----------|-----------|--------------|-------------|--------------------|---------------|-----------|---------------|
|                          | sqr. mls. | sqr. mls. | sqr. mls.    | sqr. mls.   | sqr. mls.          | sqr. mls.     | sqr. mls. | sqr. mls.     |
| Under 10 inches          | 44,997    | nil       | 62,805       | 317,600     | 138,190            | 513,653       | nil       | 1,077,245     |
| 10—15 "                  | 77,268    | 19,912    | 97,722       | 33,405      | 141,570            | 232,815       | nil       | 602,692       |
| 15—20 "                  | 57,639    | 12,626    | 116,790      | 14,190      | 62,920             | 89,922        | 937       | 355,024       |
| 20—30 "                  | 77,202    | 29,317    | 218,528      | 13,827      | 93,470             | 95,404        | 7,559     | 535,307       |
| 30—40 "                  | 30,700    | 14,029    | 80,556       | 984         | 40,690             | 40,750        | 4,588     | 212,297       |
| Over 40 "                | 22,566    | 12,000    | 94,099       | 64          | 46,780             | 3,376         | 10,101    | 188,986       |

\* Over 3030 sqr. miles no records available.

Referring first to the capital cities, the complete records of which are given on the following page, it is seen that Sydney with a normal rainfall of 48.27 inches occupies the chief place, Brisbane, Perth, Melbourne, Hobart and Adelaide following in that order, Adelaide with 21.04 inches being the driest. The extreme range from the wettest to the driest year is greatest at Brisbane (72.09 inches) and least at Adelaide (17.44 inches).

In order to shew how the rainfall is distributed throughout the year in various parts of the continent, the figures of representative towns have been selected. (See map on page 78). Darwin, typical of the Northern Territory, shews that in that region nearly the whole of the rainfall occurs in the summer months, while little or nothing falls in the middle of the year. The figures of Perth, as representing the south-western part of the continent, are the reverse, for while the summer months are dry, the winter ones are very wet. In Melbourne and Hobart the rain is fairly well distributed throughout the twelve months, with a maximum in October in the former, and in November in the latter. The records at Alice Springs and Daly Waters indicate that in the central parts of Australia the wettest months are in the summer and autumn. In Queensland, as in the Northern Territory, the heaviest rains fall in the summer months, but good averages are also maintained during the other seasons.

On the coast of New South Wales, the first six months of the year are the wettest, with slight excesses in April and July; the averages during the last six months are fair and moderately uniform. In general it may be said that one-fourth of the area of the continent, principally in the eastern and northern parts, enjoys an annual average rainfall of from 20 to 50 inches, the remaining three-fourths receiving generally from 10 to 15 inches.

(v.) *Curves of Rainfall and Evaporation.* The relative amounts of rainfall and evaporation at different times through the year are best seen by referring to the graphs for a number of characteristic places. (See page 72). It will be recognised at once how large is the evaporation when water is fully exposed to the direct rays of the sun, and to wind, etc.

(vi.) *Tables of Rainfall.* The table of rainfall for a long period of years for each of the various Australian capitals affords information as to the variability of the fall in successive years, and the list of the more remarkable falls furnishes information as to what may be expected on particular occasions.

## RAINFALL AT THE AUSTRALIAN CAPITALS, 1840 TO 1912.

10. **Snowfall.**—Light snow has been known to fall even as far north, occasionally, as latitude 31° S., and from the western to the eastern shores of the continent. During exceptional seasons it has fallen simultaneously over two-thirds of the State of New South Wales, and has extended at times along the whole of the Great Dividing Range, from its southern extremity in Victoria as far north as Toowoomba in Queensland. During the winter snow covers the ground to a great extent on the Australian Alps for several months, where also the temperature falls below zero Fahrenheit during the night, and in the ravines around Kosciusko and similar localities the snow never entirely disappears.

The antarctic "V"-shaped disturbances are always associated with our most pronounced and extensive snowfalls. The depressions on such occasions are very steep in the vertical area, and the apexes are unusually sharp-pointed and protrude into very low latitudes, sometimes even to the tropics.

11. **Hail.**—Hail falls throughout Australia most frequently along the southern shores of the continent in the winter, and over south-eastern Australia during the summer months. The size of the hailstones generally increases with distance from the coast, a fact which lends strong support to the theory that hail is brought about by ascending currents. Rarely does a summer pass without some station experiencing a fall of stones exceeding in size an ordinary hen-egg, and many riddled sheets of light-gauge galvanised iron bear evidence of the weight and penetrating power of the stones.

Hail storms occur most frequently in Australia when the barometric readings indicate a flat and unstable condition of pressure. They are almost invariably associated with tornadoes or tornadic tendencies, and on the east coast the clouds from which the stones fall are generally of a remarkable sepia-coloured tint.

12. **Barometric Pressures.**—The mean annual barometric pressure (corrected to sea-level and standard gravity) in Australia varies from 29.80 inches on the north coast to 29.92 inches over the central and 30.03 inches in the southern parts of the continent. In January the mean pressure ranges from 29.70 inches in the northern and central areas to 29.91 inches in the southern. The July mean pressure ranges from 29.90 inches at Darwin to 30.13 at Alice Springs. Barometer readings, corrected to mean sea-level, have, under anticyclonic conditions in the interior of the continent, ranged from 30.81 inches to as low as 28.44 inches. This lowest record was registered at Townsville during a hurricane on the 9th March, 1903. The mean annual fluctuations of barometric pressure for the capitals of Australia are shewn on page 73.

13. **Wind.**—Notes on the distinctive wind currents in Australia were given in preceding Year Books (see No. 6, page 83) and are here omitted to save space.

14. **Cyclones and Storms.**—The "elements" in Australia are ordinarily peaceful, and although severe cyclones have visited various parts, more especially coastal areas, such visitations are rare, and may be properly described as erratic.

During the winter months the southern shores of the continent are subject to cyclonic storms, evolved from the V-shaped depressions of the southern low-pressure belt. They are felt most severely over the south-western parts of Western Australia, to the south-east of South Australia, in Bass Straits, including the coast line of Victoria, and on the west coast of Tasmania. Apparently the more violent wind pressures from these cyclones are experienced in their northern half, that is, in that part of them which has a north-westerly to a south-westerly circulation.

Occasionally the north-east coast of Queensland is visited by hurricanes from the north-east tropics. During the first three months of the year these hurricanes appear to have their origin in the neighbourhood of the South Pacific Islands, their path being a parabolic curve of south-westerly direction. Only a small percentage, however, reach Australia, the majority recurving in their path to the east of New Caledonia.

Very severe cyclones, popularly known as "Willy Willies," are peculiar to the north-west coast of Western Australia from the months of December to March inclusive. They apparently originate in the ocean, in the vicinity of Cambridge Gulf, and travel in a south-westerly direction with continually increasing force, displaying their greatest energy near Cossack and Onslow, between latitudes 20° and 22° South. The winds in these storms, like those from the north-east tropics, are very violent and destructive, causing great havoc amongst the pearl-fishers. The greatest velocities are usually to be found in the south-eastern quadrant of the cyclones, with north-east to east winds. After leaving the north-west coast, these storms either travel southwards, following the coast-line, or cross the continent to the Great Australian Bight. When they take the latter course their track is marked by torrential rains, as much as 29.41 inches, for example, being recorded at Whim Creek from one such occurrence. Falls of 10 inches

and over have frequently been recorded in the interior of Western Australia from similar storms.

Some further notes on severe cyclones and on "Southerly Bursters," a characteristic feature of the eastern part of Australia, will be found in previous issues of the Year Book (see No. 6, pp. 84, 85, 86).

**15. Influences affecting Australian Climate.**—Australian history does not cover a sufficient period, nor is the country sufficiently occupied, to ascertain whether or not the advance of settlement has materially affected the climate as a whole. Local changes therein, however, have taken place, a fact which suggests that settlement and the treatment of the land have a distinct effect on local conditions. For example, the mean temperature of Sydney shews a rise of two-tenths of a degree during the last twenty years, a change probably brought about by the great growth of residential and manufacturing buildings within the city and in the surrounding suburbs during that period. Again, low-lying lands on the north coast of New South Wales, that originally were seldom subject to frosts, have with the denudation of the surrounding hills from forests experienced annual visitations, the probable explanation being that, through the absence of trees, the cold air of the high lands now flows, unchecked and untempered, down the sides of the hills to the valleys and lower lands.

(i.) *Influences of Forests on Climate.* As already indicated, forests doubtless exercise a great influence on local climate, and hence, to the extent that forestal undertakings will allow, the weather can be controlled by human agency. The direct action of forests is an equalising one; thus, especially in equatorial regions and during the warmest portion of the year, they considerably reduce the mean temperature of the air. They also reduce the diurnal extremes of their shade temperatures, by altering the extent of radiating surface, by evaporation, and by checking the movement of air. While decreasing evaporation from the ground, they increase the relative humidity. Vegetation greatly diminishes the rate of flow-off of rain, and the washing away of surface soil. Thus, when a region is protected by trees, steadier water supply is ensured, and the rainfall is better conserved. In regions of snowfall the supply of water to rivers is similarly regulated, and without this and the sheltering influence of ravines and "gullies," watercourses supplied mainly by melting snow would be subject to alternate periods of flooding and dryness. This is borne out in the inland rivers. Thus, the River Murray, which has never been known to run dry, derives its steadiness of flow mainly through the causes above indicated.

(ii.) *Direct Influences of Forest on Rainfall.* Whether forests have a direct influence on rainfall is a debatable question, some authorities alleging that precipitation is undoubtedly induced by forests, while others contend the opposite.

Sufficient evidence exists, however, to establish that, even if the rainfall has not increased, the beneficial effect of forest lands in tempering the effects of the climate is more than sufficient to disclose the importance of their protection and extension.

It is the rapid rate of evaporation, induced by both hot and cold winds, which injures crops and makes life uncomfortable on the plains. Whether the forest aids in increasing precipitation there may be doubt, but nobody can say that it does not check the winds and the rapid evaporation due to them.

Trees as wind-breaks have been successfully planted in central parts of the United States, and there is no reason why similar experiments should not be successful in many parts of our treeless interior. The belts should be planted at right angles to the direction of the prevailing parching winds, and if not more than half a mile apart will afford shelter to the enclosed areas.

In previous issues some notes on observations made in other countries were added (see Year Book No. 6, pp. 86 to 95).

**16. Comparison of Rainfalls and Temperatures.**—For the purpose of comparison the following lists of rainfalls and temperatures are given for various important cities throughout the world, for the site of the federal capital, and for the capitals of the Australian States :—

GRAPHS SHEWING ANNUAL FLUCTUATIONS OF MEAN MAXIMUM AND MINIMUM TEMPERATURE AND HUMIDITY IN SEVERAL PARTS OF THE COMMONWEALTH OF AUSTRALIA.

EXPLANATION OF THE GRAPHS OF TEMPERATURE AND HUMIDITY.—In the above graphs, in which the heavy lines denote 'temperature' and the thin lines 'humidity,' the fluctuations of mean temperature and mean humidity are shewn throughout the year. These curves are plotted from the data given in the Climatological Tables hereinafter. The temperatures are shewn in degrees Fahrenheit, the inner columns giving the corresponding values in Centigrade degrees. Humidities have not been obtained for Darwin, Daly Waters, and Alice Springs.

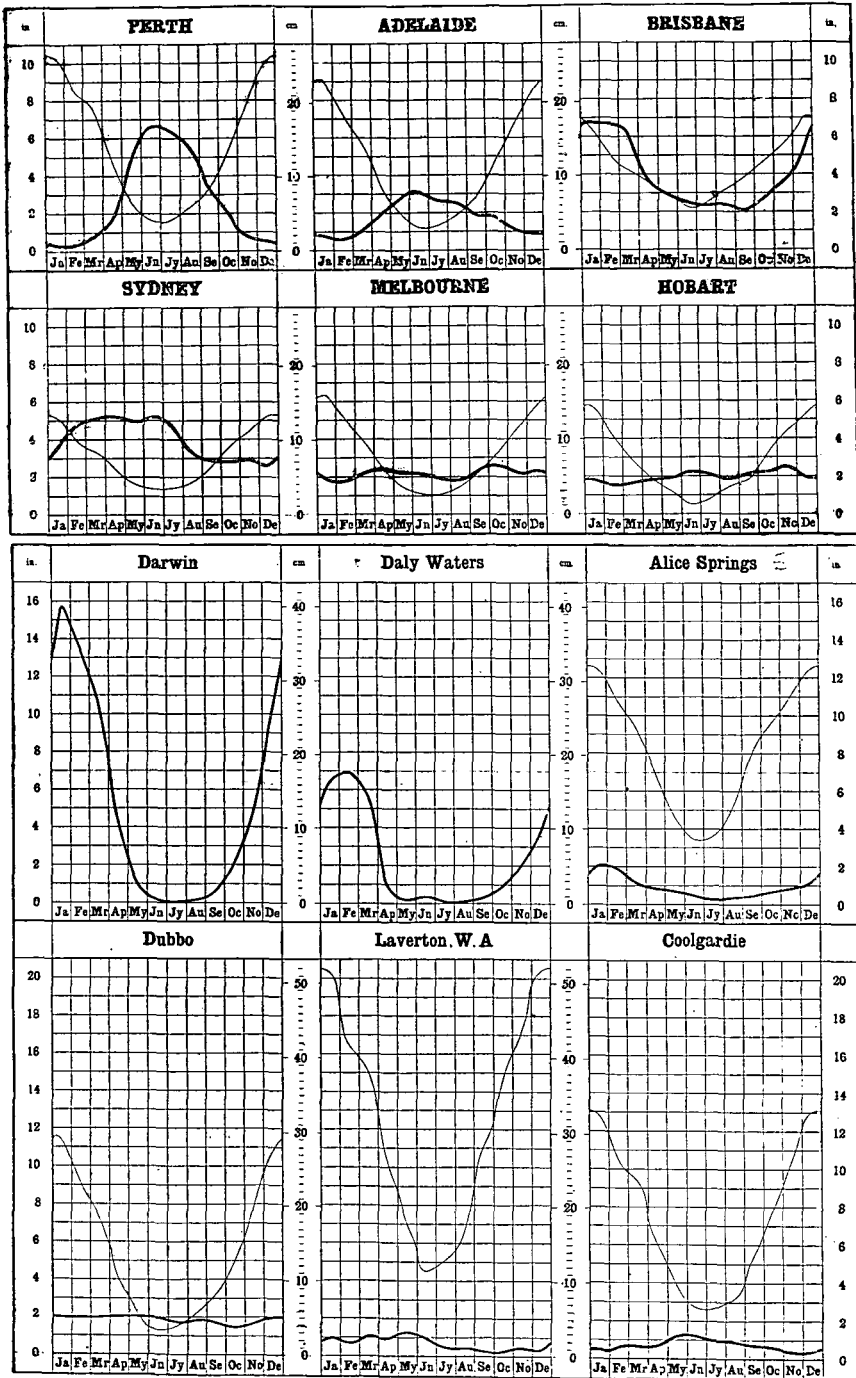

For the thin lines the degree numbers represent relative humidities, or the percentages of actual saturation on the total for the respective temperatures.

The upper temperature line represents the mean of the maximum, and the lower line the mean of the minimum results; thus the curves also shew the progression of the range between maximum and minimum temperatures throughout the year. The humidity curves shew the highest and lowest values of the mean monthly humidity at 9 a.m. recorded during a series of years.

INTERPRETATION OF THE GRAPHS.—The curves denote mean monthly values. Thus, taking for example, the temperature graphs for Perth, the mean readings of the maximum and minimum temperatures for a number of years on 1st January would give respectively about 83° Fahr. and 62° Fahr. Thus the mean range of temperature on that date is the difference, viz., 21°. Similarly, observations about 1st June would give respectively about 66° Fahr. and 51° Fahr., or a range of 15°.

In a similar manner it will be seen that the greatest mean humidity, say for March, is about 66° and the least mean humidity for the month 48°; in other words, at Perth, the degree of saturation of the atmosphere by aqueous vapour for the month of March ranges between 66 % and 48 %.

GRAPHS SHEWING ANNUAL FLUCTUATIONS OF MEAN RAINFALL AND MEAN EVAPORATION IN SEVERAL PARTS OF THE COMMONWEALTH OF AUSTRALIA.

(For Explanation see next page.)

**EXPLANATION OF THE GRAPHS OF RAINFALL AND EVAPORATION.**—On the preceding graphs thick lines denote rainfall and thin lines evaporation, and shew the fluctuation of the mean rate of fall *per month* throughout the year. The results, plotted from the Climatological Tables hereinafter, are shewn in inches (see the outer columns), and the corresponding metric scale (centimetres) is shewn in the two inner columns. The evaporation is not given for Darwin and Daly Waters.

**INTERPRETATION OF THE GRAPHS.**—The distance for any date from the zero line to the curve, represents the average number of inches, reckoned as per month, of rainfall at that date. Thus, taking the curves for Adelaide, on the 1st January the rain falls on the average at the rate of about four-fifths of an inch per month, or, say, at the rate of about  $9\frac{1}{2}$  inches per year. In the middle of June it falls at the rate of nearly 3 inches per month, or, say, at the rate of about 36 inches per year. At Dubbo the evaporation is at the rate of nearly  $11\frac{1}{2}$  inches per month about the middle of January, and only about  $1\frac{1}{2}$  inches at the middle of June.

TABLE SHEWING MEAN ANNUAL RAINFALL AND EVAPORATION IN INCHES OF THE PLACES SHEWN ON PRECEDING PAGE, AND REPRESENTED BY THE GRAPHS.

| —             | Rainfall. | Evapora-<br>tion. | —                | Rainfall. | Evapora-<br>tion. |
|---------------|-----------|-------------------|------------------|-----------|-------------------|
| Perth ...     | 33.11     | 66.13             | Darwin... ..     | 61.72     | —                 |
| Adelaide ...  | 21.04     | 54.21             | Daly Waters ...  | 27.95     | —                 |
| Brisbane ...  | 46.95     | 51.19             | Alice Springs... | 10.93     | 97.10             |
| Sydney ...    | 47.99     | 36.92             | Dubbo ...        | 22.30     | 66.37             |
| Melbourne ... | 25.51     | 38.38             | Laverton, W.A.   | 9.24      | —                 |
| Hobart ...    | 23.57     | 32.42             | Coolgardie ...   | 9.09      | 57.74             |

GRAPHS SHEWING ANNUAL FLUCTUATIONS OF MEAN BAROMETRIC PRESSURE FOR THE CAPITALS OF THE SEVERAL STATES OF THE COMMONWEALTH OF AUSTRALIA.

**EXPLANATION OF THE GRAPHS OF BAROMETRIC PRESSURE.**—On the above graphs the lines representing the yearly fluctuation of barometric pressure at the State capital cities are means for long periods, and are plotted from the Climatological Tables given hereinafter. The pressures are shewn in inches on about  $2\frac{1}{2}$  times the natural scale, and the corresponding pressures in centimetres are also shewn in the two inner columns, in which each division represents one millimetre.

**INTERPRETATION OF THE BAROMETRIC GRAPHS.**—Taking the Brisbane graph for purposes of illustration, it will be seen that the mean pressure on 1st January is about 29.87 inches, and there are maxima in the middle of May and August of about 30.10 and 30.08 respectively. The double maxima appear clearly on each graph.

Chart indicating the area affected and period of duration of the Longest Heat Waves when the Maximum Temperature for consecutive 24 hours reached or exceeded 90° Fah.

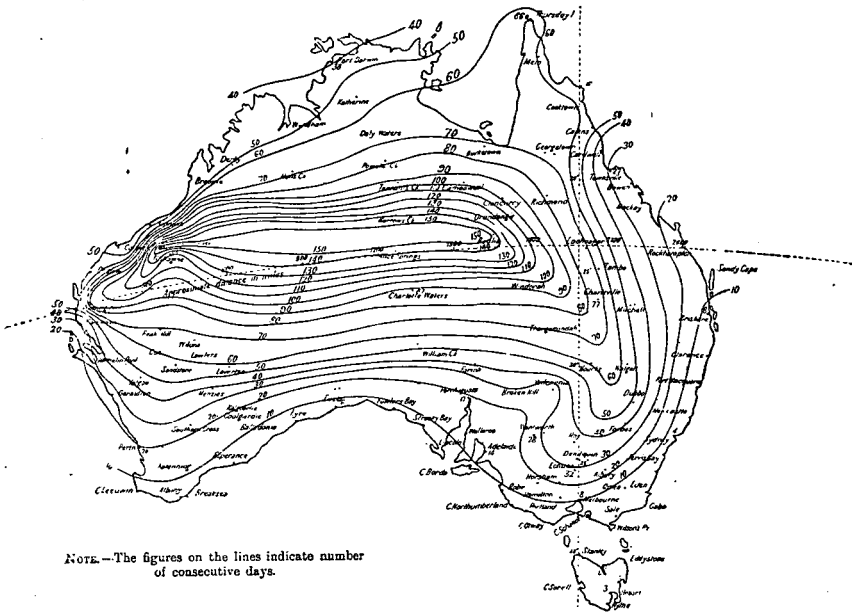

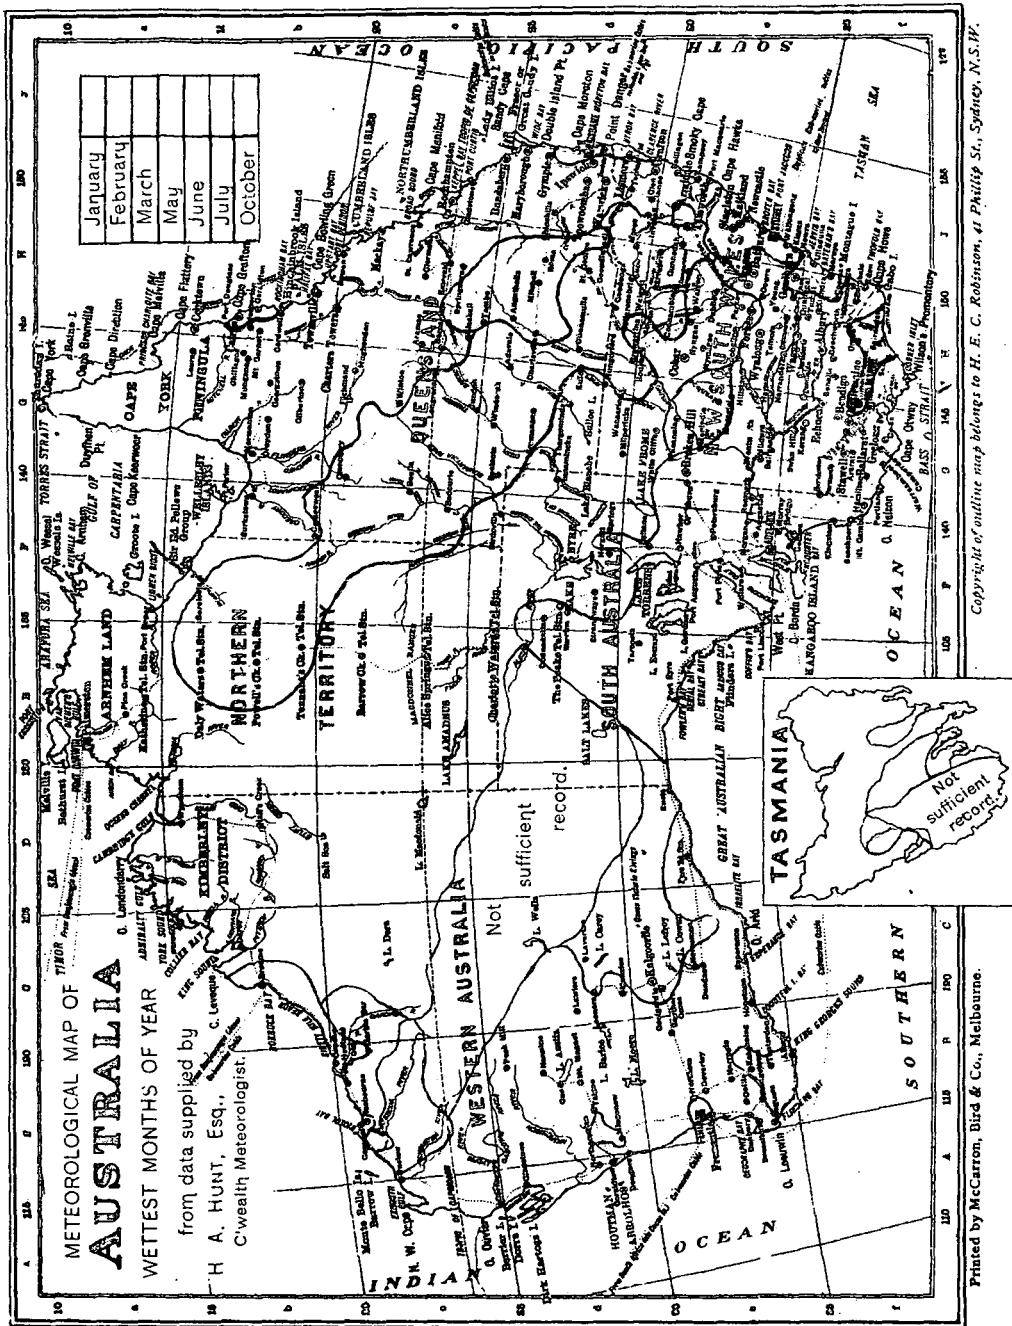

Diagram showing the greatest number of consecutive days on which the Temperature in the shade was over 100° and also over 90° at the places indicated.

The above are the meteorological sub-divisions adopted by H. A. HUNT, Esq., C'wealth Meteorologist.

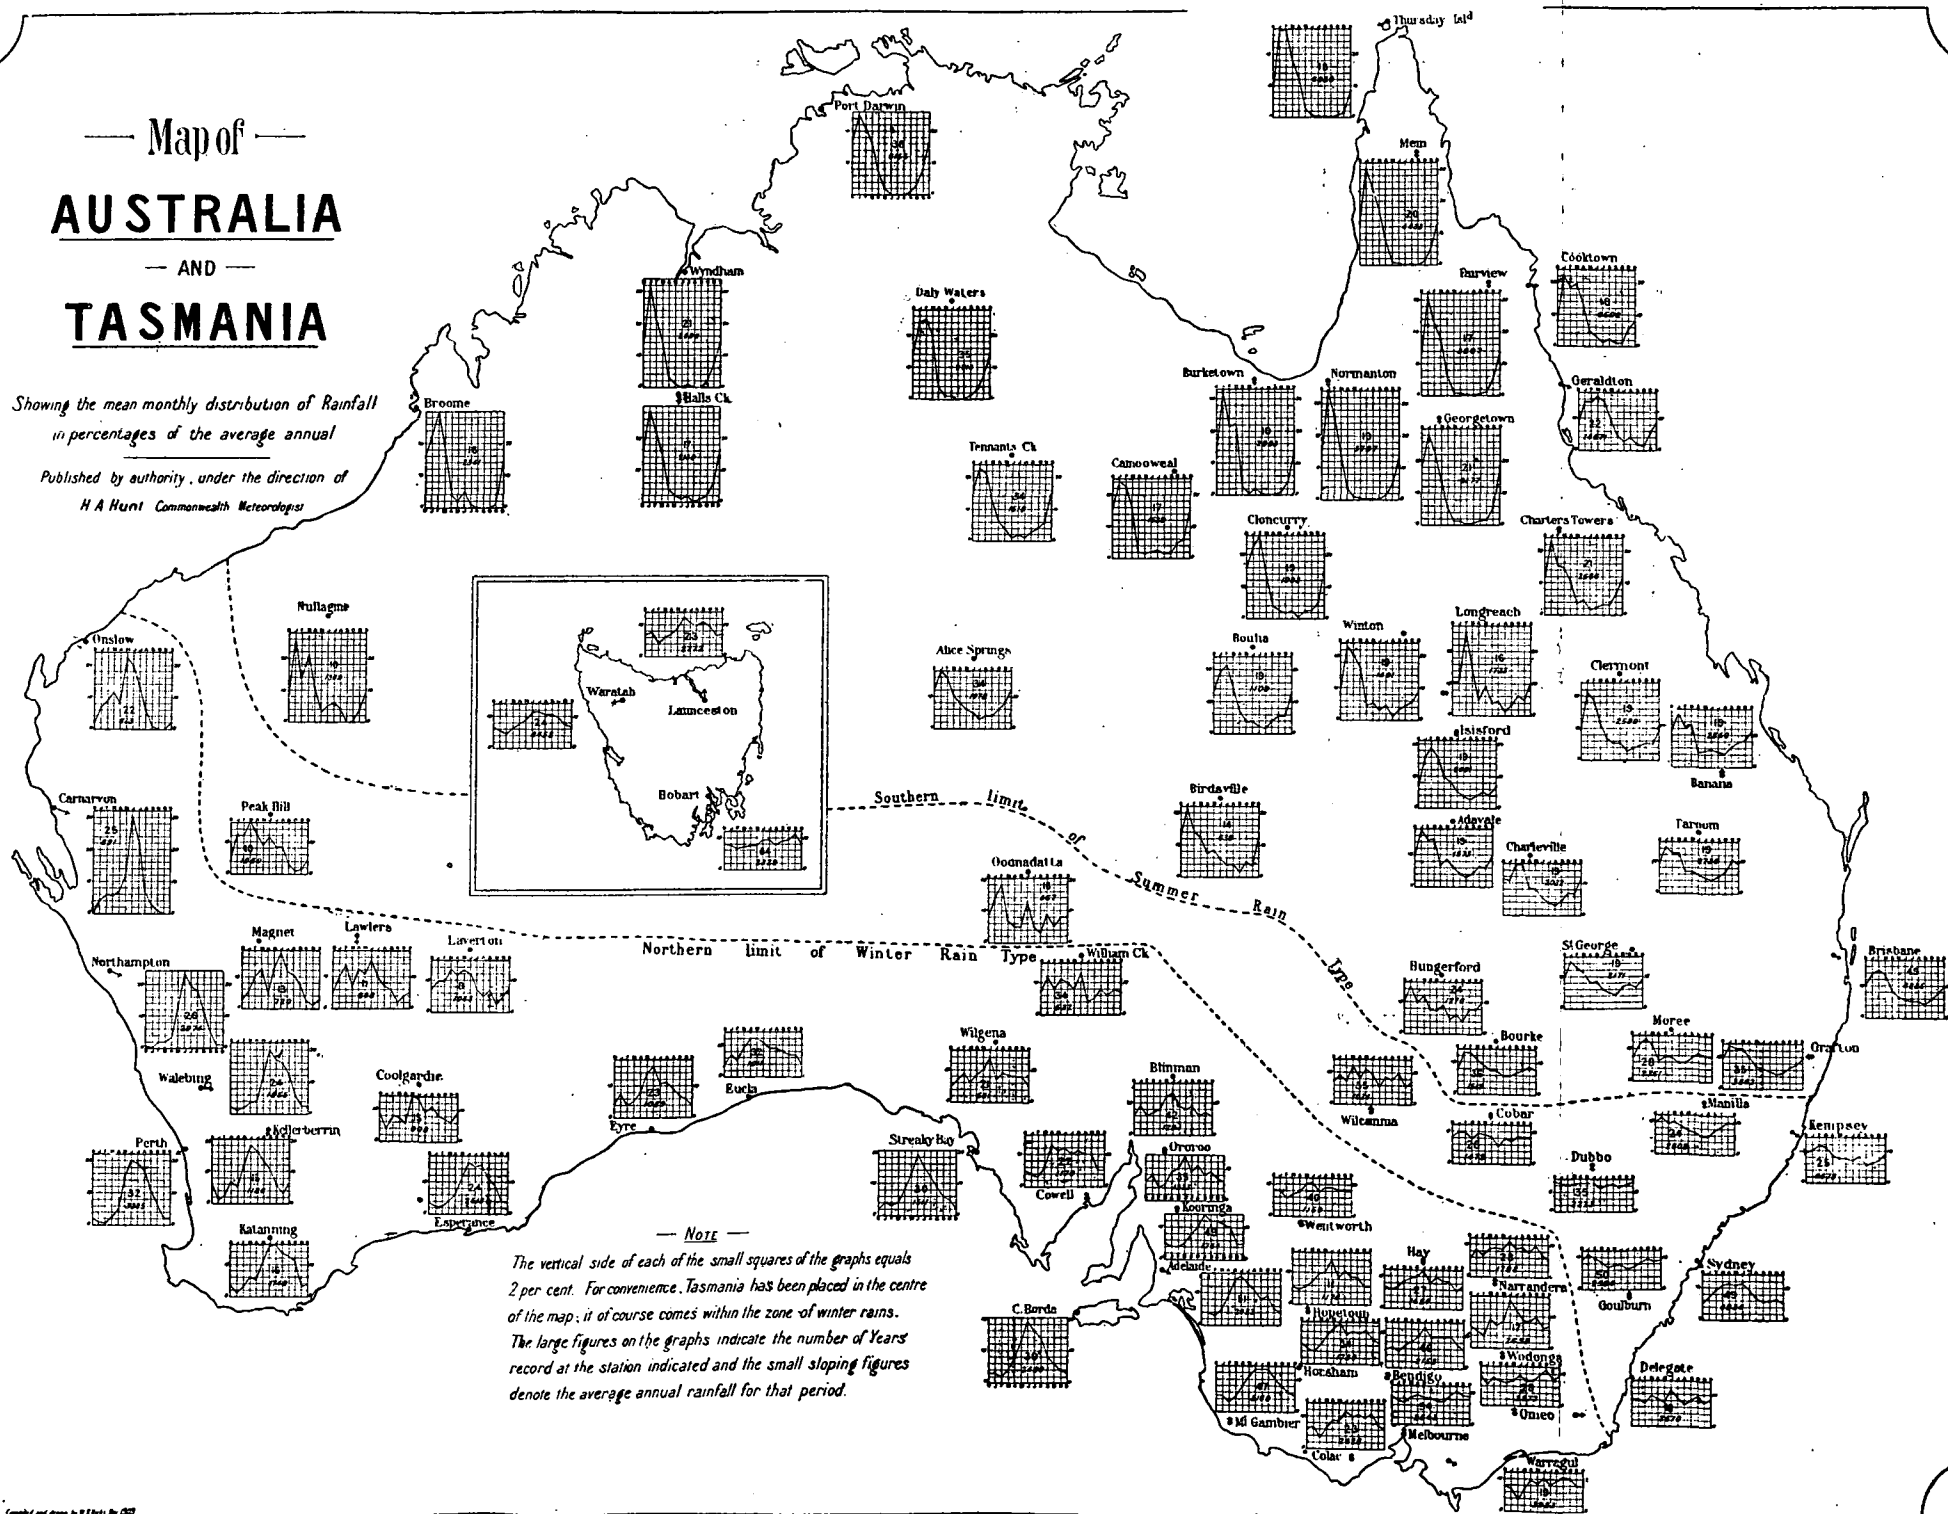

#### EXPLANATION OF GRAPH.

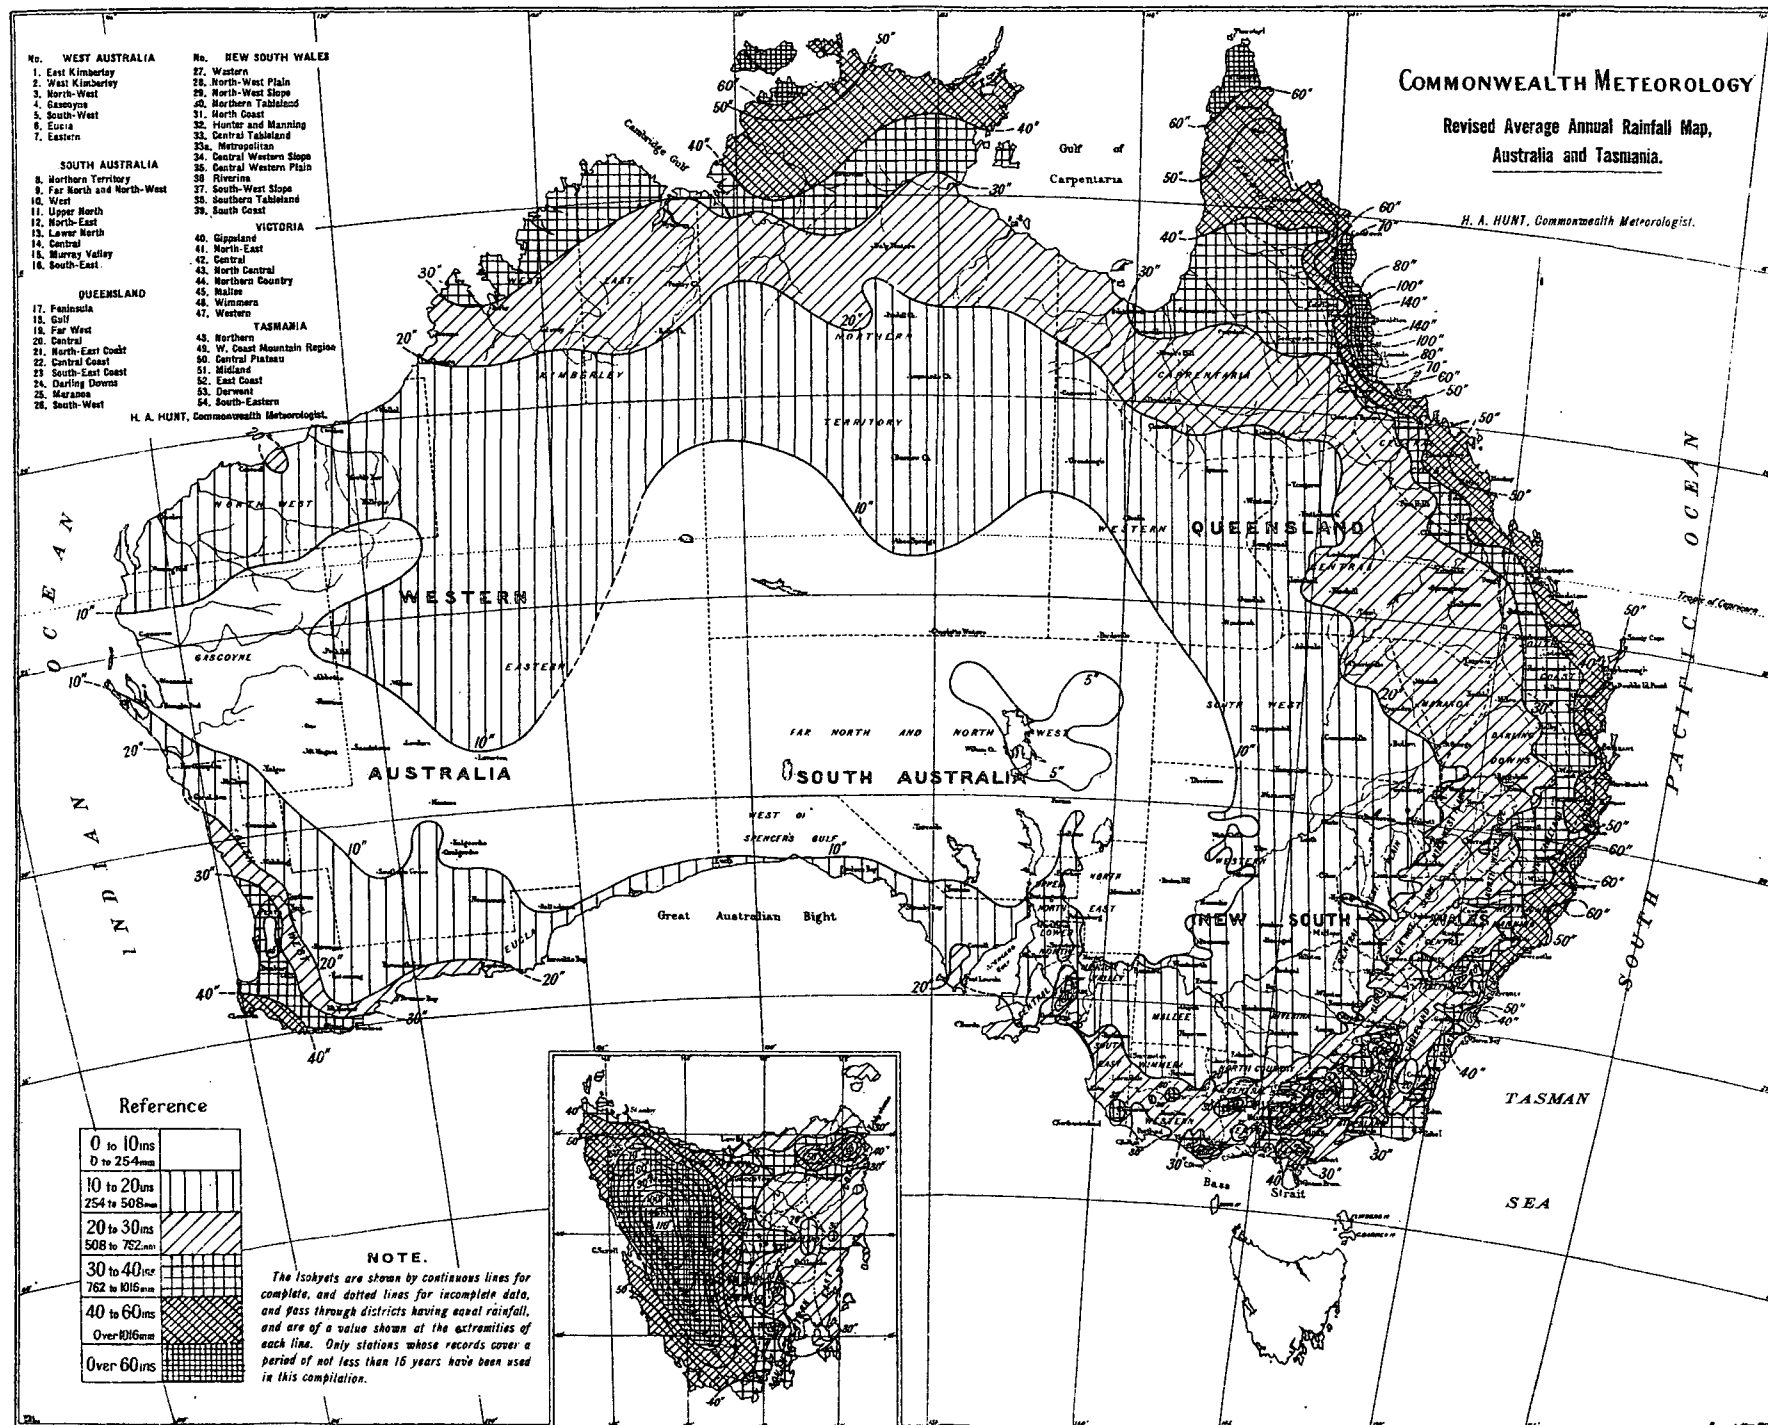

The six continuous curves on the upper part of the diagram shew the fluctuations of mean monthly temperatures of the Australian capitals from 1901 to 1909. The base of each small square denotes one month, and the vertical side 2° Centigrade or 3.6° Fahrenheit.

The six curves in lower portion of the diagram similarly shew the fluctuations of the mean annual temperatures, from 1871 in the case of Adelaide, Sydney and Melbourne, from 1883, 1887 and 1897 in the case respectively of Hobart, Brisbane and Perth. The base of each rectangle represents one year, and the vertical side 0.3° Centigrade or 0.54° Fahrenheit.

The map shews the areas affected by given amounts of annual rainfall, and is elsewhere given.

Published by authority, under the direction of  
H A Hunt Commonwealth Meteorologist

## SECTION IV. POPULATION.

### § 1. Commonwealth Population—Its Distribution and Fluctuation.

1. **Present Population.**—The estimated population of the several States of the Commonwealth at the end of 1901 and of each of the last five years is as shewn in the following table. These estimates have been amended on the basis of the results disclosed by the Census of 3rd April, 1911, as described on pp. 112-118 of Year Book No. 6.

#### POPULATION OF COMMONWEALTH, on 31st DECEMBER 1901 and 1908-12.

| Year.    | States.          |           |              |                  |                    |            | Territories. |               | Common-wealth. |

(a) Part of New South Wales prior to 1911.

2. **Growth of Population.**—(i.) *1788 to 1824.* From 1788, when settlement first took place in Australia, until December 1825, when Van Diemen's Land (now Tasmania) became a separate colony, the whole of the British Possessions in Australia were regarded as one colony, viz., that of New South Wales. The population during this period increased very slowly, and at the end of 1824 had reached only 48,072.

The population with which settlement in Australia was inaugurated, and that at the end of each year until 1824, are as follows:—

POPULATION OF COMMONWEALTH ON 31st DECEMBER, 1788 to 1824.

| Year.             | Males. | Females. | Total. | Year. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|-------|--------|----------|--------|
| 1788 <sup>a</sup> | ...    | ...      | 1,035  | 1806  | 5,389  | 2,521    | 7,910  |

| 1805              | 5,395  | 2,312    | 7,707  | 1824  | 36,871 | 11,201   | 48,072 |

a. On 26th January. Recent research by Dr. J. F. Watson, now Editor of the Historical Records of Australia, goes to shew that the original nucleus was 1024 persons.

(ii.) 1825 to 1858. The period extending from 1825 to 1859 witnessed the birth of the colonies of Tasmania (then known as Van Diemen's Land), Western Australia, South Australia, Victoria, and Queensland. The years in which these came into existence as separate colonies were as follows:—Tasmania, 1825; Western Australia, 1829; South Australia, 1834; Victoria, 1851; Queensland, 1859.

The estimated population of the Commonwealth during each year of this transition period is as follows:—

POPULATION OF COMMONWEALTH ON 31st DECEMBER, 1825 to 1858.

| Year. | Males.  | Females. | Total.  | Year. | Males.  | Females. | Total.    |
|-------|---------|----------|---------|-------|---------|----------|-----------|
| 1825  | 40,288  | 12,217   | 52,505  | 1842  | 153,758 | 87,226   | 240,984   |
| 1826  | 41,289  | 12,593   | 53,882  | 1843  | 158,846 | 92,002   | 250,848   |
| 1827  | 43,053  | 13,247   | 56,300  | 1844  | 165,034 | 99,253   | 264,287   |
| 1828  | 44,778  | 13,419   | 58,197  | 1845  | 173,159 | 105,989  | 279,148   |
| 1829  | 46,946  | 14,938   | 61,934  | 1846  | 181,342 | 111,907  | 293,249   |
| 1830  | 52,885  | 17,154   | 70,039  | 1847  | 190,265 | 118,532  | 308,797   |
| 1831  | 57,037  | 18,944   | 75,981  | 1848  | 201,612 | 130,716  | 332,328   |
| 1832  | 62,254  | 21,633   | 83,937  | 1849  | 221,978 | 151,384  | 373,362   |
| 1833  | 71,669  | 26,426   | 98,095  | 1850  | 238,683 | 166,673  | 405,356   |
| 1834  | 76,259  | 29,297   | 105,556 | 1851  | 256,975 | 180,690  | 437,665   |
| 1835  | 81,929  | 31,425   | 113,354 | 1852  | 304,126 | 209,670  | 513,796   |
| 1836  | 89,417  | 35,703   | 125,120 | 1853  | 358,203 | 242,789  | 600,992   |
| 1837  | 94,881  | 39,607   | 134,488 | 1854  | 414,337 | 280,580  | 694,917   |
| 1838  | 105,271 | 46,597   | 151,868 | 1855  | 470,118 | 323,142  | 793,260   |
| 1839  | 115,480 | 54,459   | 169,939 | 1856  | 522,144 | 354,585  | 876,729   |
| 1840  | 127,306 | 63,102   | 190,408 | 1857  | 574,800 | 395,487  | 970,287   |
| 1841  | 144,114 | 76,854   | 220,968 | 1858  | 624,380 | 426,448  | 1,050,828 |

(iii.) *1859 to 1912.* From 1859, the year in which Queensland came into existence as a separate colony, until the beginning of 1901, when the Commonwealth of Australia was inaugurated under the provisions of the Commonwealth Constitution Act, Australia consisted of six States, practically independent of each other in all matters of government. During this period, the population of the Commonwealth increased from 1,050,828 at the end of 1858 to 3,765,339 on the 31st December, 1900. The particulars for this period are given in the table hereunder.

During the twelve years that have elapsed since the federation of the States was effected the population of the Commonwealth has increased by 968,020, from 3,765,339 on 31st December, 1900, to 4,733,359 on 31st December, 1912. See table hereunder:—

**POPULATION OF COMMONWEALTH ON 31st DECEMBER, 1859 to 1912.**

| Year. | Males.    | Females.  | Total.    | Year. | Males.    | Females.  | Total.    |

| 1878  | 1,132,573 | 959,591   | 2,092,164 | 1905  | 2,100,118 | 1,932,859 | 4,032,977 |
| 1879  | 1,168,781 | 993,562   | 2,162,343 | 1906  | 2,126,730 | 1,964,755 | 4,091,485 |
| 1880  | 1,204,514 | 1,027,017 | 2,231,531 | 1907  | 2,160,213 | 2,001,509 | 4,161,722 |
| 1881  | 1,247,059 | 1,059,677 | 2,306,736 | 1908  | 2,193,981 | 2,038,297 | 4,232,278 |
| 1882  | 1,289,892 | 1,098,190 | 2,388,082 | 1909  | 2,242,215 | 2,081,745 | 4,323,960 |
| 1883  | 1,357,423 | 1,148,313 | 2,505,736 | 1910  | 2,296,308 | 2,128,775 | 4,425,083 |
| 1884  | 1,411,996 | 1,193,729 | 2,605,725 | 1911  | 2,377,920 | 2,190,787 | 4,568,707 |
| 1885  | 1,460,394 | 1,234,124 | 2,694,518 | 1912  | 2,466,968 | 2,266,391 | 4,733,359 |

It will be seen from the foregoing tables that the population of Australia attained its first million in 1858, seventy years after settlement was first effected; its second million nineteen years later, in 1877; its third million twelve years later, in 1889; and its fourth million sixteen years later, in 1905, while it appears probable that its fifth million will be reached during 1914.

The growth of the total population of the Commonwealth generally, and of each State therein, is graphically shewn on page 127, and of each sex considered separately on pages 128 and 129.

**3. Variations in Masculinity.**—In the second issue of this publication, on pages 163 to 165, an extended table was published shewing the masculinity of the population of each of the States for each year from 1796 to 1907. In the fifth issue, on page 123, the figures in this table for the years 1901-7 were modified to agree with the corrected estimates of the population, consequent on the Census of April 3rd, 1911. The following table gives similar particulars for every fifth year from 1800 to 1910 and for the years 1911 and 1912. The graphs corresponding to these figures will be found on page 133:—

## MASCULINITY OF COMMONWEALTH POPULATION, 1800 to 1912.

| Year. | States.  |           |         |           |          |          | Territories.     |                 | C'wealth. |

(a) Including Northern Territory prior to 1900. (b) Included in South Australia prior to 1900.

(c) Part of New South Wales prior to 1911.

## § 2. Influences affecting Growth and Distribution of Population.

1. **Mineral Discoveries.**—The discovery of gold in Australia in 1851 was undoubtedly one of the most influential factors in bringing about a rapid settlement of the country. Its effect may be gauged by a comparison of the increase during the ten years preceding, with that during the ten years succeeding the discovery. From 31st December, 1840, to 31st December, 1850, the increase was only 214,948 (viz., from 190,408 to 405,356). The rush of people to the newly-discovered goldfields during the succeeding decennium caused an increase of no less than 740,229, the population advancing to 1,145,585 on 31st December, 1860. In 1861, owing to the opening up in that year of the New Zealand goldfields, a rush of population from Australia set in, the result being that the net increase of population of the Commonwealth, which in 1855 amounted to 98,343, and even in 1860 was as much as 48,280, fell in 1861 to 22,564. In fact, during the year 1861 the departures from Australia exceeded the arrivals by 5958, the gain of 22,564 being due to the births exceeding the deaths by 28,522.

In more recent years the gold discoveries of Western Australia in 1886 and subsequent years, led to such extensive migration to that State, that its population, which on 31st December, 1885, amounted to only 35,959, increased in 27 years by no less than 270,170, totalling 306,129 on 31st December, 1912. In this case, however, the additions to the population of the western State were largely drawn for some years from those of the eastern States, so that the actual gain of population to the Commonwealth was but slight.

2. **Pastoral Development.**—Very early in the colonisation of Australia it was recognised that many portions were well adapted for pastoral pursuits, and pastoral developments have led to a considerable distribution of population in various directions.

As the numbers engaged in connection therewith, compared with the value of the interests involved, are relatively small, and as pastoral occupancy tends to segregation rather than aggregation of population, the growth of the pastoral industry is but slightly reflected in the population statistics of the Commonwealth.

**3. Agricultural Expansion.**—At the present time the area annually devoted to crops in the Commonwealth is over 13 millions of acres. Although considerable in itself, this area, viewed in relation to the total area of the Commonwealth, is relatively small, and represents considerably less than 1 per cent. of the total area. Per head of population of the Commonwealth the area under crop, however, is  $2\frac{1}{2}$  acres, a fairly high amount when allowance is made for the recency of Australian settlement. Over 80 per cent. of the area under crop is devoted to the production of wheat and hay, which require for the profitable production in Australia a considerable area in the one holding. Thus on the whole the agricultural districts of Australia are somewhat sparsely populated, though in a less marked degree than is the case in the pastoral areas.

**4. Progress of Manufacturing Industries.**—One direct effect of the development of manufacturing industries is the concentration of population in places offering the greatest facilities for the production of the particular commodities. In Australia, where manufacturing industries are as yet in their infancy, the tendency throughout has been to concentrate the manufacturing establishments in each metropolis. This has accentuated the growth of the capital cities, which growth, when compared with that of the rest of the country, appears somewhat abnormal.

**5. Influence of Droughts.**—The droughts, which at times so seriously affect the agricultural and pastoral prospects of Australia, have a marked influence on the distribution of population. Districts, which in favourable seasons were fairly populous, have in times of drought, temporarily become more or less depopulated until the return of better conditions. This movement, however, ordinarily affects only the internal distribution of the population and not the total, but severe drought may even make its influence felt in the statistics of the total population of Australia. Thus in the case of the drought of 1902-3, the departures from the Commonwealth exceeded the arrivals for the two years 1903 and 1904 by 12,859. It may be noted also, that for the former of these years, the natural increase of population by excess of births over deaths was abnormally low, being only 51,150, as compared with 54,698 in the preceding and 60,541 in the succeeding year. As the solution of the problem of dealing with droughts is advanced, their influence will be less marked.

**6. Other Influences.**—(i.) *Commercial Crises.* The effect on population of a commercial crisis, such as that which occurred in Australia in the early years of the final decade of the last century, is clearly indicated on comparing the migration statistics of the Commonwealth for the five years 1887-91 with those for the five years 1892-96. During the former period, the arrivals in the Commonwealth exceeded the departures by no less than 146,872. In the latter period, the corresponding excess amounted to only 2064.

(ii.) *South African War.* The war in South Africa has apparently also left its impress on the population statistics of the Commonwealth, the departures during 1899 and 1900 exceeding the arrivals for the same period by no less than 10,546.

A reference to the graphs of population on pages 127 to 132 will illustrate the preceding observations.

### § 3. Special Characteristics of Commonwealth Population.

**1. Sex Distribution.**—In respect of the relative proportions of the sexes in its population, Australia has, since the first settlement of the continent in 1788, differed materially from the older countries of the world. In the latter, the populations have, in general, grown by natural increase, and their composition usually reflects that fact, the numbers of males and females being in most countries approximately equal, with a more or less marked tendency, however, for the females to slightly exceed the males. The

excess of females arises from a variety of causes, amongst which may be mentioned—(a) higher rate of mortality amongst males; (b) greater propensity on the part of males to travel; (c) the effects of war; (d) employment of males in the army, navy, and mercantile marine; (e) preponderance of males amongst emigrants. On the other hand, the last-mentioned cause has tended naturally to produce an excess of males in Australia, since the majority of those emigrating to Australia have been males. The circumstances under which the colonisation of Australia was first undertaken, and the remoteness of this country from Europe, have combined to accentuate this feature.

There is little doubt that the continent presented few attractions to the explorers who visited its shores, mainly on the west and north, during the sixteenth, seventeenth, and early part of the eighteenth centuries, and it was only when the Declaration of Independence of the United States, in 1776, closed to the British prison authorities the North American plantations, which had previously been used as receptacles for the deportation of convicts, that the overcrowding of the gaols caused them to consider the advisability of converting the great southern continent into a convict settlement. This idea was put into practice in 1787, when the first consignment left England, arriving in Sydney Cove on the 26th January, 1788. Reports concerning the number of persons actually landed are conflicting, but it appears that the total may be set down approximately at 1035, including the military. Details as to the sexes are not available, but the males must have largely preponderated. Indeed, nearly nine years later, on the 31st December, 1796, in a total population of 4100, there were 257 males to every 100 females.

The subsequent progress of Australia resulting from extensive mineral discoveries and the development of its great natural resources, pastoral, agricultural, forestal, etc., have tended to attract male rather than female immigrants, particularly in view of the distance from the principal centres of European population. Even at the Census of 3rd April, 1911, after more than 123 years of settlement, there were 108 males to each 100 females, and this notwithstanding the equalising tendency due to additions to the population by means of births and to deductions therefrom by the deaths of immigrants.

The terms "masculinity" and "femininity" have been used to express the proportion of the sexes in any group, the former indicating the ratio of males to females, the latter the reciprocal of this, viz., the ratio of females to males. The term "masculinity" is that which has been adopted by the Commonwealth Bureau of Census and Statistics, and the masculinity of any group is usually expressed numerically as the number of males to each 100 females. The masculinity of the population of the Commonwealth at intervals of five years from 1800 to 1910 and for the year 1912 is as follows:—

#### MASCULINITY OF THE COMMONWEALTH POPULATION, 1800 to 1912.

| Year. | Number of Males<br>to each 100<br>Females. | Year. | Number of Males<br>to each 100<br>Females. | Year. | Number of Males<br>to each 100<br>Females. |
|-------|--|-------|--|-------|--|
| 1800  | 263.05                                     | 1840  | 201.75                                     | 1880  | 117.28                                     |
| 1805  | 233.35                                     | 1845  | 163.38                                     | 1885  | 118.33                                     |
| 1810  | 190.53                                     | 1850  | 143.20                                     | 1890  | 116.06                                     |
| 1815  | 188.84                                     | 1855  | 145.48                                     | 1895  | 113.41                                     |
| 1820  | 243.71                                     | 1860  | 140.15                                     | 1900  | 110.55                                     |
| 1825  | 329.77                                     | 1865  | 125.38                                     | 1905  | 108.65                                     |
| 1830  | 308.30                                     | 1870  | 121.10                                     | 1910  | 107.87                                     |
| 1835  | 260.71                                     | 1875  | 118.25                                     | 1912  | 108.85                                     |

The curious inequalities of the increases in the number of males and in the number of females for the Commonwealth as a whole, and for the individual States respectively, will be seen by referring to the graphs on pages 128 and 129.

The significance of the rates of masculinity shewn in the above table will perhaps be better understood by a comparison with the corresponding information for other countries. This has been made in the next table, which shews, for some of the principal countries of the world for which such particulars are available, the masculinity of the population according to the most recent statistics :—

#### MASCULINITY OF THE POPULATION OF VARIOUS COUNTRIES.

| Country.                 | Year.       | No. of Males to each 100 Females. | Country.          | Year. | No. of Males to each 100 Females. |
|--------------------------|-------------|-----------------------------------|-------------------|-------|-----------------------------------|
| Canada ...               | 1911        | 112.93                            | Belgium ...       | 1910  | 98.34                             |
| New Zealand ...          | 1912        | 110.81                            | Netherlands ...   | 1911  | 98.17                             |

**2. Age Distribution.**—The causes which operated to bring about an excess of males in the population of the Commonwealth were equally effective in rendering the age distribution essentially different from that of older countries. The majority of the immigrants, whether male or female, were in the prime of life, and as the Australian birth-rate in earlier years was a comparatively high one, the effect produced was a population in which the proportion of young middle-aged persons was somewhat above, and the proportion for advanced ages somewhat below the normal. With the progress of time, however, the age distribution for Australia has fallen more and more into line with that for the older countries, and now, except in shewing a lower proportion at old age and a slightly higher at young ages, does not differ essentially therefrom.

Thus in the Commonwealth at the Census of 3rd April, 1911, the age distribution of the population was as shewn in the table hereunder; that for England and Wales for the same Census, is given also for the sake of comparison :—

#### AGE DISTRIBUTION OF POPULATION.

##### COMMONWEALTH, AND ENGLAND AND WALES.

| Age Group.          | Population of COMMONWEALTH, 3rd April, 1911. | Percentage on Total Population. | Population of ENGLAND and WALES, 3rd April, 1911. | Percentage on Total Population. |
|---------------------|--|---------------------------------|---|---------------------------------|
| Under 15 ...        | 1,409,823                                    | 31.65                           | 11,050,867  | 30.63                           |
| 15 and under 65 ... | 2,854,753                                    | 64.08                           | 23,141,109  | 64.16                           |
| 65 and upwards ...  | 190,429                                      | 4.27                            | 1,878,516   | 5.21                            |
| Total ...           | 4,455,005                                    | 100.00                          | 36,070,492  | 100.00                          |

During the past 50 years, the age distribution of the Australian population has varied considerably, as will be seen from the following table, which gives for each sex the proportion per cent. of the total population in the age groups "under 15," "15 and under 65," and "65 and over." The figures upon which these percentages have been computed

are those furnished by the Censuses of the several States and the Commonwealth Census of 1911. Those for 1861 include the results of the Western Australian Census of 1859, while those for 1871 include the results of the Western Australian and Tasmanian Censuses of 1870:—

## AGE DISTRIBUTION OF COMMONWEALTH POPULATION, 1861 to 1911.

| Census Year. | Males.          |                  |              |        | Females.        |                  |              |        | Persons.        |                  |              |        |

|              | Under 15 Years. | 15 and under 65. | 65 and over. | Total. | Under 15 Years. | 15 and under 65. | 65 and over. | Total. | Under 15 Years. | 15 and under 65. | 65 and over. | Total. |
|              | %               | %                | %            | %      | %               | %                | %            | %      | %               | %                | %            | %      |
| 1861         | 31.41           | 67.42            | 1.17         | 100    | 43.03           | 56.20            | 0.77         | 100    | 36.28           | 62.72            | 1.00         | 100    |
| 1871         | 38.84           | 59.11            | 2.05         | 100    | 46.02           | 52.60            | 1.38         | 100    | 42.09           | 56.17            | 1.74         | 100    |
| 1881         | 36.37           | 60.85            | 2.78         | 100    | 41.89           | 56.07            | 2.04         | 100    | 38.91           | 58.65            | 2.44         | 100    |
| 1891         | 34.77           | 62.02            | 3.21         | 100    | 39.36           | 58.08            | 2.56         | 100    | 36.90           | 60.20            | 2.90         | 100    |
| 1901         | 33.87           | 61.82            | 4.31         | 100    | 36.50           | 59.85            | 3.65         | 100    | 35.12           | 60.88            | 4.00         | 100    |
| 1911         | 30.84           | 64.82            | 4.34         | 100    | 32.52           | 63.28            | 4.20         | 100    | 31.65           | 64.08            | 4.27         | 100    |

The excess of males over females, previously referred to, is found mainly in ages of 21 and upwards. In the total population under the age of 21 there were, at the date of the last Census, less than 103 males to each 100 females, while in that aged 21 and upwards there were more than 112 males to each 100 females. In the absence of a large immigration of males in excess of females, therefore, the disparity between the sexes in Australia would soon be eliminated.

**3. Race and Nationality.**—(i.) *Constitution of Australia's Population.* As regards race, the population of the Commonwealth may be conveniently divided into two main groups, one comprising the aboriginal natives of Australia, and the other the various immigrant races which, since the foundation of settlement in 1788, have made the Commonwealth their home. Under the head of "immigrant races" would, of course, be included not only those residents of Australia who had been born in other countries, but also their descendants born in Australia.

(a) *The Aborigines.* It would appear that the aboriginal population of Australia was never large, and that the life led by them was, in many parts of the country, a most precarious one. With the continued advance of settlement the numbers have shrunk to such an extent that in the more densely populated States they are practically negligible. Thus, at the Census of 1911 the number of full-blooded aboriginals who were employed by whites or were living in proximity to settlements of whites was stated to be only 19,939. In some of the States, however, more particularly in Queensland, South Australia, Western Australia, and the Northern Territory, there are, in addition, considerable numbers of natives still in the "savage" state, numerical information concerning whom is of a most unreliable nature, and can be regarded as little more than the result of mere guessing.

Ethnologically interesting as is this remarkable and rapidly-disappearing race, practically all that has been done to increase our knowledge of them, their laws, habits, customs, and languages, has been the result of more or less spasmodic and intermittent effort on the part of enthusiasts either in private life or the public service. An enumeration of them has never been seriously undertaken in connection with any Australian Census, though a record of the numbers who were in the employ of whites, or living in contiguity to the settlements of whites, has on the occasion of the recent Censuses usually been made. As stated above, various guesses at the number of aboriginal natives at present in Australia have been made, and the general opinion appears to have prevailed that 150,000 might be taken as a rough approximation to the total. More recent estimates, however, have given results considerably below this total. Thus, in his report of June, 1910, the Queensland Chief Protector of Aborigines estimates the total at 74,753, distributed as follows:—New

South Wales, 6897; Victoria, 256; Queensland, 20,000; South Australia (including the Northern Territory), 20,600; Western Australia, 27,000. A somewhat similar estimate made at an earlier date by Dr. Roth, formerly Chief Protector of Aborigines in Queensland, gave Queensland at least 18,000; Western Australia at least 24,000, and the Northern Territory from 20,000 to 22,000. In view of these figures it would appear that the number of aboriginal natives in Australia may be said to be not more than 100,000. The whole matter, however, is involved in considerable doubt.

The number of aboriginal natives enumerated in the several States and Territories of the Commonwealth at the Census of 1911 was as shewn hereunder, the figures given relating as before stated only to those in a civilised or semi-civilised condition.

#### ABORIGINAL NATIVES ENUMERATED AT CENSUS OF 1911.

| Persons, etc.      | N.S.W | Victoria. | Queens-land. | South Australia. | Western Australia | Tasmania. | Northern Territory. | Federal Territory | C'wlth. |
|--------------------|-------|-----------|--------------|------------------|-------------------|-----------|---------------------|-------------------|---------|
| Males ...          | 1,152 | 103       | 5,145        | 802              | 3,433             | 2         | 743                 | 5                 | 11,385  |
| Females ...        | 860   | 93        | 3,542        | 637              | 2,936             | 1         | 480                 | 5                 | 8,554   |
| Total              | 2,012 | 196       | 8,687        | 1,439            | 6,369             | 3         | 1,223               | 10                | 19,939  |
| Masculinity<br>(a) | 133.9 | 110.8     | 145.3        | 125.9            | 116.9             | 200.0     | 154.9               | 100.0             | 133.1   |

(a) Number of males per hundred females.

These figures, as noted above, refer only to those natives who were, at the date of the Census, in the employ of whites or were living in contiguity to the settlements of whites.

In the Commonwealth Constitution Act provision is made for aboriginal natives to be excluded for all purposes for which statistics of population are made use of under the Act, but the opinion has been given by the Commonwealth Attorney-General that, "in reckoning the population of the Commonwealth, half-castes are not aboriginal natives within the meaning of section 127 of the Commonwealth of Australia Constitution Act, and should therefore be included." It may be added, however, that as "half-castes," living in the nomadic state, are practically undistinguishable from aborigines, it has not always been found practicable to make the distinction, and further, that no authoritative definition of "half-caste" has yet been given.<sup>1</sup>

(b) *Immigrant Races.* As regards the immigrant races, it may be said that they consist mainly of natives of the three divisions of the United Kingdom and their descendants. The proportion of Australian-born contained in the population of the Commonwealth has, in recent years, increased rapidly, and at the Census of 3rd April, 1911, out of a total population of 4,424,537 persons whose birthplaces were specified, no fewer than 3,667,670, or 82.90 per cent., were Australian born, while of the remainder, 591,729, or 13.37 per cent., were natives of the United Kingdom, and 31,868, or 0.72 per cent., were natives of New Zealand, that is, 96.99 per cent. of the total population at the date of the Census had been born in either Australasia or the United Kingdom. The other birthplaces most largely represented in the Commonwealth were Germany, 32,990 (0.75 per cent.); China, 20,775 (0.47 per cent.); Scandinavia (comprising Sweden, Norway and Denmark), 14,700 (0.33 per cent.); Polynesia, 3410 (0.08 per cent.); British India, 6644 (0.15 per cent.); United States of America, 6642 (0.15 per cent.); and Italy, 6719 (0.15 per cent.). The total population of Asiatic birth was 36,442 (0.82 per cent.), of whom 3474 were born in Japan.

(c) *Non-European Races.* The Census taken on the 3rd April, 1911, was the first occasion on which a systematic attempt had been made to ascertain the number of persons of non-European races in Australia. On former occasions the inquiry did not usually

1. An article on the Aborigines of Australia, specially written for the Year Book by W. Ramsay Smith, D.Sc., M.B., C.M., F.R.S.E., Permanent Head of the Department of Public Health of South Australia, will be found in Year Book No. 3, Section IV., § 12, page 158.

extend further than a request that in all cases in which the person enumerated was an Aboriginal or a Chinese, whether of the full-blood or of the half-blood, the fact should be specially noted in the column on the Census schedule relating to birthplace. At the recent Census the inquiry as to race was made one of the leading items, and all persons of non-European race were required to have their race specified. From the figures so obtained the following table has been compiled:—

**PERSONS OF NON-EUROPEAN RACE IN THE COMMONWEALTH, 3rd APRIL, 1911**  
(EXCLUSIVE OF FULL-BLOODED ABORIGINALS).

| States and Territories. | Aust-<br>ralian                    | Asiatic.        |                | African.       |                | American.      |                | Polynesian.    |                | Indefinite.    |                | Total.          |                |

(ii.) *Biological and Sociological Significance.* As regards race and nationality, therefore, the population of Australia is fundamentally British, and thus furnishes an example of the transplanting of a race into conditions greatly differing from those in which it had been developed. The biological and sociological significance of this will ultimately appear in the effects on the physical and moral constitution produced by the

complete change of climatic and social environment, for the new conditions are likely to considerably modify both the physical characteristics and the social instincts of the constituents of the population. At present the characteristics of the Australian population, whether physical, mental, moral, or social, are only in the making, and probably it will not be possible to point to a distinct Australian type until three or four generations more have passed. Even then it is hardly likely that with the great extent of territory and varying conditions presented by the Commonwealth there will be but one type; on the contrary, a variety of types may be expected. The Australian at present is little other than a transplanted Briton, with the essential characteristics of his British forbears, the desire for freedom from restraint, however, being perhaps somewhat accentuated. The greater opportunity for an open-air existence, and the absence of the restrictions of older civilisations, may be held to be in the main responsible for this.

**4. Differences among the States and Territories.**—(i.) *Sex Distribution.* The varying circumstances under which the settlement of the several States has been effected, and the essentially different conditions experienced in the due development of their respective resources, have naturally led to somewhat marked differences in the constitution of their populations. In the matter of sex distribution the States in which the normal condition of older countries is most nearly represented are those of Victoria, South Australia, and Tasmania, in the first-mentioned of which the females have, for some years until recently, exceeded the males. In Western Australia and Queensland, on the other hand, the position of affairs is somewhat abnormal, the numbers of males to each 100 females being respectively 132 and 118.

In the Northern Territory, owing to lack of settlement, the masculinity has always been largely predominant, the figures for 1912 giving no less than 460 males to each 100 females.

The variation in the masculinity of the estimated population of the several States and Territories and of the Commonwealth as a whole for the year 1901 and for the past five years will be seen from the following table:—

**MASCULINITY (a) OF THE POPULATION, 31st DECEMBER, 1901 and 1908-12.**  
(COMMONWEALTH.)

| Year. | Masculinity of the Population on 31st December. (a.) |        |        |          |          |        |                |                |        |

| 1912  | 110.94   | 99.87  | 117.74 | 103.37   | 131.79   | 106.19 | 459.58         | 124.02         | 108.85 |

(a) Number of males to each 100 females. (b) Part of New South Wales prior to 1911.

(ii.) *Age Distribution.* The disparity in sex distribution exhibited by the several States is accompanied by a corresponding inequality in the matter of age distribution. The number of persons in each State at the Census of 3rd April, 1911, at what are commonly known as the "dependent," "supporting," and "old" ages, and the proportion of same to total of each State and Commonwealth, were as follows:—

**NUMBER AND PROPORTION OF PERSONS IN THE COMMONWEALTH OF  
DEPENDENT, SUPPORTING, AND OLD AGE, 3rd APRIL, 1911.**

| State or Territory.     | Number of Persons of      |                                   |                           |                  | Proportion of Population of |                                   |                           |

| Tasmania ...            | 66,708                    | 116,604                           | 7,899                     | 191,211          | 34.89                       | 60.98                             | 4.13                      |
| <b>Territories—</b>     |                           |                                   |                           |                  |                             |                                   |                           |
| Northern ...            | 485                       | 2,703                             | 117                       | 3,310            | 14.65                       | 81.81                             | 3.54                      |
| Federal ...             | 551                       | 1,081                             | 82                        | 1,714            | 32.15                       | 63.07                             | 4.78                      |
| <b>Commonwealth ...</b> | <b>1,409,823</b>          | <b>2,854,753</b>                  | <b>190,429</b>            | <b>4,455,005</b> | <b>31.65</b>                | <b>64.08</b>                      | <b>4.27</b>               |

In Western Australia a larger proportion of its population was of supporting age than in any other State, whilst in Tasmania the proportion was the lowest. On the other hand, in Tasmania the proportion of dependent age was the highest for the Commonwealth, while the Victorian proportion was the lowest. Victoria had the highest and Western Australia the lowest proportion of persons aged 65 years and upwards.

In the Northern Territory the proportions are quite exceptional, the percentage of those of dependent age being much lower, and that of those of supporting age being much higher, than in any other part of the Commonwealth.

(iii.) *Birthplaces.* The following table exhibits, in a very condensed form, the distribution of the population of the several States and Territories according to birthplace:—

**BIRTHPLACE OF POPULATION AT CENSUS OF 3rd APRIL, 1911.**

(COMMONWEALTH.)

As regards distribution in the States according to birthplace, the population of New South Wales is very similar to that of Victoria, the proportions born in the United Kingdom and Asia being slightly higher, and that born in Australia slightly lower, in the case of New South Wales. There is also a rough similarity between the population distributions of Queensland and Western Australia. In both, the Australian-born represent a much smaller, and those born in the United Kingdom, in "Other European Countries" and in Asia, a much larger proportion than is the case with the remaining States. Polynesians were, however, more numerous represented in Queensland at the date of the Census than in any other State. Natives of New Zealand were, proportionately, most numerous in Western Australia. Tasmania had the largest proportion of Australian-born population, viz., 91 per cent., while Queensland, with 74 per cent., had the smallest. On the other hand, nearly 20 per cent. of Queensland's population consisted of natives of the United Kingdom, while only 7 per cent. of the population of Tasmania had been born there. For the Commonwealth as a whole, over 98½ per cent. of the population were from Australasian or European birthplaces.

In the case of the Northern Territory, about 46 per cent. of the population were Australian born, while 43 per cent. were of Asiatic birth.

#### § 4. Elements of Growth of Population.

1. **Natural Increase.**—The two factors which contribute to the growth of a population are the "natural increase" by excess of births over deaths, and the "net immigration," i.e., the excess of arrivals over departures. While the relative potency of these factors depends upon a variety of causes, it may be said that, in general, in the case of a new country "net immigration" occupies an important position as a source of increase of population, while in an old country "natural increase," modified more or less by "net emigration," or excess of departures over arrivals, is the principal element causing growth of population. The table hereunder gives the total natural increase, as well as that of males and females:—

**NATURAL INCREASE (a) OF THE POPULATION**  
OF STATES, TERRITORIES, AND COMMONWEALTH, FROM 1861 TO 1912.  
**MALES.**

(a) Excess of Births over Deaths. (b) Including Northern Territory prior to 1901. (c) Included in South Australia prior to 1901. (d) Part of New South Wales prior to 1911.

NOTE.—Minus sign (—) denotes excess of Deaths over Births.

With one exception, viz., Tasmania, for the period 1906 to 1910, the natural increase of females exceeded that of males throughout the years referred to in the foregoing table. The quinquennial period in which the largest natural increase of population took place was that of 1906-10 with a total for the Commonwealth of 334,828. For the individual States the quinquennia of maximum natural increase were as follows:—New South Wales, Queensland, Western Australia and Tasmania, 1906-10; Victoria, 1891-5, and South Australia, 1881-5.

**2. Comparison with other Countries.**—Notwithstanding its comparatively low birth-rate, Australia has a high rate of natural increase, owing to the fact that its death-rate is a very low one. The following table furnishes a comparison between the average rates of natural increase for some of the principal countries of the world for which such information is available, and those for the several States of the Commonwealth and the Dominion of New Zealand:—

**NATURAL INCREASE PER 1000 OF MEAN POPULATION (VARIOUS COUNTRIES).**

| Country.                     | Increase. | Country.                 | Increase. | Country.                  | Increase. |

(a) 1905-9. (b) 1906-10.

The graphs of natural increase for each of the States, as well as for the Commonwealth, are shewn on page 132.

**3. Net Immigration.**—The other factor of increase in the population, viz., the excess of arrivals over departures, known as “net immigration,” is, from its nature, much more subject to marked and extensive variation than is the factor of “natural increase.” These variations are due to numerous causes, many of which have already been referred to in dealing with the influences which affect the growth of population. An important cause not yet referred to, is that of assisted immigration. The number of persons so introduced varies considerably in different years.

Throughout, the minus sign (—) signifies that the number of departures was in excess of arrivals.  
 (a) Including Northern Territory up to 1900. (b) Included in South Australia up to 1900.  
 (c) Part of New South Wales prior to 1911.

During the period 1861-1912, viz., 52 years, the gain to the Commonwealth population by excess of arrivals over departures was 959,515 persons, while the gain by excess of births over deaths for the same period was 2,628,259. That is, 26.74 per cent. of the increase for the Commonwealth during the past 52 years has been due to "net immigration" and 73.26 per cent. to "natural increase." In regard to the contribution by individual States to the total net immigration of 959,515, all showed a gain with the exception of Tasmania, which in the period under review had an excess of departures over arrivals of 17,532. In the case of Victoria and South Australia, the gain was small, viz., 19,592 and 22,160 respectively. In New South Wales, Queensland, and Western Australia, on the other hand, the additions due to net immigration during the 52 years were respectively 440,684; 289,729, and 205,524.

The quinquennial period in which the greatest net immigration to the Commonwealth occurred was that of 1881-5 with a total of 224,040, whilst in the period 1901-5, the departures exceeded the arrivals by 16,793. The quinquennial periods

in which maximum net immigration occurred in the several States were as follows:—New South Wales and Queensland 1881-5, Victoria 1886-90, South Australia 1876-80, Western Australia and Tasmania 1896-1900. In all the States quinquennial periods have occurred in which the departures for the five years have exceeded the arrivals. The periods in which such net emigration from the several States was greatest were as follows:—New South Wales and Victoria 1896-1900, Queensland 1901-5, South Australia 1886-90, Western Australia 1871-5 and Tasmania 1906-10. For the first two years (1911 and 1912) of the current quinquennium the gain by immigration has been heavy, the net immigration for the two years being 153,041 or slightly less than the migration gain for the whole of the quinquennium 1886-90.

4. **Net Increase.**—The net increase of the population is found by the combination of the natural increase with the net immigration.

In the following table are set out the figures shewing the net increase in each quinquennium from 1861 onwards, and for the years 1911 and 1912:—

**NET INCREASE OF THE POPULATION OF THE STATES, TERRITORIES AND  
COMMONWEALTH FROM 1861 to 1912.**

**MALES.**

| 1906 to 1910 | 155,971   | 90,987  | 67,534  | 44,247          | 26,694   | 7,418   | 745                   | ...             | 392,106       |
| 1911 to 1912 | 135,324   | 79,153  | 37,409  | 23,222          | 29,297   | 3,402   | 174                   | 295             | 308,276       |
| 1861 to 1912 | 1,430,633 | 842,327 | 608,369 | 309,365         | 290,783  | 107,384 | 1,382                 | 295             | 3,587,774     |

(a) Including Northern Territory up to 1900. (b) Included in South Australia up to 1900.  
(c) Part of New South Wales prior to 1911.

Note.—The minus sign (—) denotes decrease.

As regards the Commonwealth as a whole, the greatest increase in any quinquennium was that for the years 1881-5, viz., 462,987. These figures were, however, closely approached in the following quinquennium, viz., 456,837. The rate of increase fell off in succeeding quinquennia, the increase for the years 1901-5 being 267,638. Since then an improvement has set in, and the increases for the years 1911 and 1912, viz., 143,624 in the former year and 164,652 in the latter, are the best yet experienced by the Commonwealth. The previous best for any single year, viz., 117,654, was experienced in the year 1883.

As regards the individual States the maximum increases in any quinquennium are as follows:—New South Wales, 202,725, in 1881-5; Victoria, 173,890, in 1886-90; Queensland, 105,641, in 1881-5; South Australia (including the Northern Territory), 66,317, in 1876-80; Western Australia, 79,452, in 1896-1900; Tasmania, 18,005, in 1896-1900.

As regards the minimum increases, it will be seen that they have occurred as under:—New South Wales, 59,960, in 1861-5; Victoria, 10,537, in 1896-1900; Queensland, 28,351, in 1866-70; South Australia, 5371, in 1901-5; Western Australia, 1867, in 1871-5; Tasmania, 2853, in 1871-5.

For the years 1911 and 1912 all the States show a satisfactory rate of increase. As regards the Northern Territory, the figures show a gain of population for that period, being the first time since federation.

The graphs shewing net increase, both for the Commonwealth as a whole and for each of the States, will be found on pages 130 and 131.

**5. Total Increase.**—(i.) *Rates for various Countries.* The table hereunder furnishes particulars concerning rates of increase in population for the Commonwealth, its component States, and other countries:—

## RATES OF INCREASE IN POPULATION, 1881 to 1912 (VARIOUS COUNTRIES).

| Countries.            | Mean Annual Rate of Increase in Population during period— |                  |                  |                  |                  |                  |                  |

— Decrease. (a) 1906 to 1910.

(ii.) *Variations in the Commonwealth Rate.* During the thirty-one years 1881-1912, the annual rate of increase in the population of the Commonwealth has exhibited a marked decline, falling from an average of 3.86 per cent. for the five years 1881-6 to an average of 1.38 for 1901-6. During the succeeding quinquennium, however, an improvement took place, the rate of increase being 2.03 per cent. As regards the separate States of the Commonwealth, the rates of increase in all cases except that of South Australia were lower, and in most instances considerably lower, for the period 1906-11 than for 1881-6.

(iii.) *Comparison of Rates of Increase.* It may be noted that the highest rates of increase for the period 1906-11 are those for Canada, New Zealand, and the Commonwealth of Australia in the order named. The United States, Chile and Servia rank next order.

6. **Density of Population.**—From one aspect population may be less significant in respect of its absolute amount than in respect of the density of its distribution. The Commonwealth of Australia, with an area of 2,974,581 square miles, and a population on 31st December, 1912, of 4,833,359 including aboriginals, has a density of only 1.62 persons to the square mile, and is therefore the most sparsely populated of the civilised countries of the world. For the other continents the densities are approximately as follows:—Europe, 118; Asia, 58; Africa, 12; North and Central America, 15; and South America, 7. The population of the Commonwealth has thus about 10½ per cent. of the density of that of North and Central America, about 23 per cent. of South America, about 13½ per cent. of that of Africa, about 2½ per cent. of that of Asia, and about 1½ per cent. of that of Europe.

Particulars concerning the number and density of the population of the various countries of the world for the latest dates for which such information is available are given in the following table. These figures have in the main been derived from the 1913 issue of the "Statesman's Year Book," and in some instances, more particularly in the case of Africa, must be considered as rough approximations only, complete data not being obtainable:—

**NUMBER AND DENSITY OF THE POPULATION OF THE VARIOUS COUNTRIES  
OF THE WORLD.**

(a) Number of persons per square mile. (b) Inclusive of an allowance of 100,000 for Aboriginal Natives. (c) Inclusive of Maoris and population of Cook and other Pacific Islands.

## § 5. Seasonal Variations of Population.

1. **Natural Increase.**—For the Commonwealth as a whole the natural increase of the population was greatest in the quarter ending 30th September, and least in that ending 31st March. The birth rate is usually at its highest, and the death rate at its lowest, in the September quarter, and *vice versa* in the March quarter. The average natural increase in population of the several States for each of the quarters, based upon the experience of the ten years 1903 to 1912, is given in the following table, from which it will be seen that the quarter in which the rate of natural increase was highest in that ended 30th June for Victoria and Queensland, that ended 30th September for New South Wales and Western Australia, that ended 31st December for Tasmania, while for South Australia the rate for the quarters ending 30th June and 30th September was almost identical. The rate of natural increase was lowest in the quarter ended 31st March in all the States except Western Australia, in which the lowest rate occurred in the quarter ended 31st December.

### AVERAGE QUARTERLY NATURAL INCREASE, STATES AND COMMONWEALTH, 1903 to 1912.

| State.           | (a) Average Natural Increase for Quarter ended on last day of— |       |         |       |            |       |           |       | Average Natural Increase per annum, 1903-12. |       |
|------------------|--|-------|---------|-------|------------|-------|-----------|-------|--|-------|
|                  | March.   |       | June.   |       | September. |       | December. |       |  |       |
|                  | Persons  | °/oo. | Persons | °/oo. | Persons    | °/oo. | Persons   | °/oo. | Persons                                      | °/oo. |
| New S. Wales (b) | 6,304  | 4.10  | 8,511   | 4.20  | 6,914      | 4.44  | 6,887     | 4.39  | 26,616                                       | 17.29 |
| Victoria ...     | 3,814  | 3.06  | 4,190   | 3.36  | 4,168      | 3.33  | 4,165     | 3.32  | 16,337                                       | 13.12 |
| Queensland ...   | 2,121  | 3.84  | 2,414   | 4.35  | 2,420      | 4.30  | 2,340     | 4.14  | 9,295  | 16.82 |
| S. Australia (c) | 1,308  | 3.43  | 1,555   | 4.07  | 1,568      | 4.09  | 1,438     | 3.74  | 5,869  | 15.37 |
| W. Australia ... | 1,105  | 4.36  | 1,171   | 4.57  | 1,383      | 5.33  | 1,119     | 4.27  | 4,778  | 18.87 |
| Tasmania ...     | 790  | 4.20  | 822     | 4.39  | 839        | 4.52  | 972       | 5.22  | 3,423  | 18.19 |
| Commonwealth     | 15,442   | 3.71  | 16,663  | 3.99  | 17,292     | 4.12  | 16,921    | 4.01  | 66,318                                       | 15.94 |

(a) The symbol ‰ denotes "per thousand." (b) Including Federal Territory.  
(c) Including Northern Territory.

2. **Net Immigration.**—For the Commonwealth as a whole the excess of arrivals over departures for the years 1903 to 1912 was greatest in the December quarter. In New South Wales the September quarter gave the greatest excess of arrivals over departures. In Western Australia the largest excess was in the June quarter. In Tasmania the arrivals largely exceeded the departures in the December quarter, but in all the other quarters the departures were in excess. In Queensland, the December quarter shewed an excess of departures over arrivals. In Victoria and South Australia the arrivals were greatest in the December quarter, and the departures exceeded the arrivals in the first two quarters. Particulars concerning the average net immigration of the several States are as follows:—

### AVERAGE QUARTERLY NET IMMIGRATION, STATES AND COMMONWEALTH, 1903 to 1912.

| W. Aust.          | 1,776                         | 7.01 | 2,421   | 9.45  | 1,124      | 4.33 | 684       | 2.61  | 4,637                                       | 18.31 |
| Tas. ...          | 1,847                         | 9.82 | 2,318   | 12.40 | 444        | 2.39 | 2,962     | 15.93 | 1,647                                       | 8.76  |
| C'wealth          | 1,676                         | 0.40 | 3,551   | 0.85  | 6,157      | 1.47 | 8,102     | 1.92  | 19,486                                      | 4.68  |

Throughout, the minus sign (—) denotes that the departures were in excess of arrivals, and ‰ denotes per thousand of population.

(a) Including Federal Territory. (b) Including Northern Territory.

## § 6. Urban Population.

1. **The Metropolitan Towns.**—A feature of the distribution of population in Australia is the tendency to accumulate in the capital cities. To such an extent is this metropolitan aggregation carried, that in every State the population of the capital far outnumbers that of any other town therein, and ranges between 20 and 46 per cent. of the entire population of the State. The estimated populations of the several capitals on 31st December, 1912, and the percentages of such populations on the totals for the respective States, are shewn in the table hereunder. That this metropolitan concentration is phenomenal, may be readily seen by comparing the percentage on the total population with the similar figures for the principal countries of Europe, also given in the table hereunder:—

### METROPOLITAN POPULATION.

(VARIOUS COUNTRIES.)

| State or Country.     | Metropolis.        | Year.            | Population. | Percentage on total of State or Country. |
|-----------------------|--------------------|------------------|-------------|--|
|                       |                    |                  |             | %  |
| New South Wales ...   | Sydney ...         | 31st Dec., 1912. | 598,800     | 39.27                                    |

(a) Population of Greater London 1911, 7,251,358.

2. **Urban Population Generally.**—In connection with the particulars shewing the tendency in Australia to concentrate population in the metropolis, it should be borne in mind that in most of the European States the capital is but one of many populous cities, and in some instances is by no means the most populous. In Australia, on the other hand, the metropolis is in every instance the most populous city, and, in some of the States, is also the only town of considerable magnitude.

In the following table will be found particulars of all localities in the Commonwealth returned at the date of the Census, on 3rd April, 1911, as having a population of over 3000. From this it will be seen that there were, in all, 29 localities in the Commonwealth returned as having a population upwards of 20,000. Of these 11 were in New South Wales, 13 in Victoria, 1 in Queensland, 1 in South Australia, 1 in Western Australia and 2 in Tasmania.

The figures given in this table relate to the localities specified as defined by the residents therein. It must be understood that no clearly defined boundaries exist in these cases, and the population given for any locality represents the number of persons who returned themselves as belonging to that locality. For the population within the boundaries of the principal Local Government Areas in the States, reference should be made to paragraph 3 below.

### POPULATION OF PRINCIPAL TOWNS IN THE COMMONWEALTH, 3rd APRIL, 1911.

| Town.                            | State in which Situated. | Approx. Population. | Town.                                | State in which Situated. | Approx. Population. |

### § 7. Assisted Immigration.

In the earlier days of settlement in Australia, State-assisted immigration played an important part. Such assistance practically ceased in Tasmania in 1891, and for the time being, in Victoria in 1873, and in South Australia in 1886. In New South Wales general State-aided immigration was discontinued in the year 1887, but those who arrived under that system and were still residing in New South Wales might, under special regulations, send for their wives and families. A certain amount of passage money, graduated according to the age of the immigrant, was required to be paid in each case. Under the provisions of these regulations, immigrants to the number of 1994 received State assistance during the years 1888 to 1899 inclusive. From 1900 to 1905 no assistance of any kind was given, but from 1906 onwards assistance has again been afforded. In Queensland and Western Australia, such assistance, although varying considerably in volume from year to year, has been accorded for many years past. Assistance to immigrants, which in the case of Victoria, had practically ceased in 1873, has recently been again afforded; and in South Australia the principle of State assistance was again introduced in 1911.

The number of assisted immigrants for the years 1911 and 1912, and also the total from the earliest times up to the end of 1912, is given in following table:—

#### ASSISTED IMMIGRANTS DURING 1911 AND 1912, AND UP TO END OF 1912.

##### STATES AND COMMONWEALTH.

| State ...                | N.S.W.  | Victoria. | Qld.    | S. Aust. | W.A.   | Tas.   | C'wlth. |

## § 8. Enumerations and Estimates.

1. **Musters.**—Actual enumerations of Australia's population, of varying accuracy, have been made from the earliest times onward. Originally known as "Musters," these were first undertaken with a view to estimating the food and other requirements of the settlements. These musters, the results of which are said to have been very unreliable, appear to have been carried out at least annually from 1788 to 1825, when they were discontinued.

2. **Census-taking.**—The first regular Census in Australia was that of New South Wales, in November, 1828. The dates on which Censuses have been taken in the several States, and the populations enumerated thereat, are as shewn in the table on the next page.

3. **The Census of 1901.**—A conference of the Government Statisticians of Australia and New Zealand, held in Sydney in February and March, 1900, aimed at securing uniformity in the collection and compilation of the Census of 1901. The householder's schedule which it drafted made provision for the collection of information in all the States under the following heads, viz.:—Name, Sex, Age, Conjugal Condition, Relation to Head of Household, Occupation, Sickness and Infirmary, Birthplace, Length of Residence in Colony, Religion, Education, Materials of Houses and Number of Rooms. In addition to these, it was agreed that States so desiring might include further inquiries relating to Land, Live Stock, Crops, and certain other matters.

Provision was made for uniformity in the classification and compilation of the data by formulating rules for dealing with cases in which differences of opinion as to methods of treatment might exist. Thus, although conducted by six different States, the Census of the Commonwealth, as taken in 1901, was carried out on a fairly uniform plan, and consequently furnished data in many ways suitable for purposes of aggregation or comparison. A detailed examination of the results, however, gives many indications of departure from a common line of action, which, in the absence of a central authority, can hardly be avoided in an undertaking of this nature.

4. **The Census of 1911.**—Under Section 51, sub-section (xi.) of the Constitution Act, power is given to the Parliament of the Commonwealth to make laws with respect to "Census and Statistics." This power was brought into requisition in 1905, when the Census and Statistics Act of 1905 became law, being assented to on 8th December, 1905. Under this Act provision is made for the appointment of a Commonwealth Statistician, and amongst other duties that officer is charged with the taking of a Census in the year 1911 and in every tenth year thereafter.

The particulars which the Act requires to be included in the Census schedule are almost identical with those which were contained in the 1901 schedule, the principal alterations being that "Length of Residence in Australia" is specified instead of "Length of Residence in the Colony of Enumeration," that "Duration of Marriage" was to be asked in all cases, and that nationality was to be ascertained in addition to birthplace. As already stated in § 1 of the present section, the Census was taken as at 3rd April, 1911.

In each State a Census supervisor was appointed to control the collection within that State under the direction of the Commonwealth Statistician. Each State was then divided into Census districts, each of which was placed in the charge of an enumerator, and each Census district was further subdivided into collectors' districts, one collector for each district.

It should be noted, in connection with the Census of 1911, that a slight change in defining the date of reference has been made in order to accord with the English practice. In previous Australian censuses the date of the Census has been taken to be that of the day preceding the midnight which is adopted as the determining point. Thus, at the Census of 1901, where the figures given relate approximately to midnight between the 31st March and the 1st April, the Australian Census was stated to be that of the 31st March, while in a precisely similar case in England it was stated to be that of 1st April.

At the Census of 1911, taken as at midnight between the 2nd and 3rd April, the date of the Census has, in accordance with the English practice, been stated to be the 3rd April, and that day was gazetted as the day of the Census.

The total populations enumerated at the several Australian Censuses are shewn in the following table:—

### AUSTRALIAN CENSUSES.

| Census Year. | Population Enumerated (exclusive of Aborigines). |                            |                           |                        |                        |                        |                       |

(a) Including Port Phillip District, which afterwards became the Colony of Victoria. (b) Previously included with New South Wales. (c) 3rd April. (d) 5th April. (e) 31st March. (f) 3rd April. (g) Federal Territory, previously included with New South Wales. (h) Northern Territory, previously included with South Australia.

5. **Estimates of Population.**—In the absence of an annual enumeration of the population, it becomes necessary to adopt some method of estimating it for intercensal periods, basing such estimates on the results of the most recent Censuses. The manner in which

this is effected varies, however, in different parts of the world. In England, for example, the assumption made is that the rate of increase of the preceding intercensal period will continue unchanged during the current period. Again, in the United States, it has been assumed, in certain cases, that the numerical increase per annum ascertained for the preceding intercensal period will hold good for the current period. From the earliest times in Australia, "statistics of fluctuation" have been obtained from the records of births, deaths, arrivals and departures. With reasonable thoroughness in the collection of such statistics, the deduced estimates possess much greater weight than those based on the mere assumption of a continuation of the increase experienced in the preceding period. In most cases, however, estimates of population, based on statistics of fluctuation, are found to be in excess at the Census, thus indicating a uniform tendency to over-estimation, and the necessity for a correction. In the population figures given in the earlier portion of the present section, the estimates of the population of the several States have been carefully revised, the results of the various Censuses being taken in conjunction with the records of births, deaths, arrivals and departures. It is believed that by this means the population of the Commonwealth from the date of settlement onwards has been obtained with a high degree of accuracy, and that the figures supplied represent a reasonably close approximation to the actual numbers. A detailed account of the adjustment for the decennium 1901-10 will be found on pp. 112-118 of Year Book No. 6. Particulars for the several States from the date of settlement onwards are given in the following tables, and are shewn by graphs on pages 127 to 129 :—

COMMONWEALTH POPULATION FROM EARLIEST DATE.

‡ Previously included with South Australia.

The tables on the two preceding pages, shewing the quinquennial and other figures for the male, female, and total population of each State and the Commonwealth, give sufficient indication, for general purposes, of its progress. A reference to the diagrams given hereinafter (pp. 127 to 129), on which the graphs shew the particulars for *each* year, is also desirable. The characteristics of the fluctuations of each element, or of the totals, will be more readily perceived by reference to the graphs than they possibly can by reference to these numerical tables. The earliest date for which particulars as to sex were available is 1796. The figures from 1788 to 1825 inclusive are based upon the results of the musters taken in those years; those for subsequent years are founded upon estimates made on the basis of the Census results and the annual returns of births and deaths and immigration and emigration.

The following table furnishes particulars relative to the increase of population of the Commonwealth during each decade, and the percentage of such increase on the population to the commencement of the decade:—

#### INCREASE OF COMMONWEALTH POPULATION.

| Decade ended<br>31st December. | Increase during Decade— |          |          |             |          |          |
|--------------------------------|-------------------------|----------|----------|-------------|----------|----------|

### § 9. Census of 3rd April, 1911.

1. **Numbers Enumerated.**—As already mentioned, the Census for the whole of the Australian Commonwealth was taken as for the night between the 2nd and the 3rd of April, 1911, and was the first Census under the provisions of the Commonwealth Census and Statistics Act 1905, which provides for the enumeration of the whole of Australia being dealt with from one centre instead of each State being responsible for its own count as on previous occasions. The numbers recorded in the several States and Territories of the Commonwealth were as follows:—

#### POPULATION OF THE COMMONWEALTH, 3rd APRIL, 1911

(EXCLUSIVE OF FULL-BLOODED ABORIGINES).

| States and Territories.       | Males.           | Females.         | Persons.         |
|-------------------------------|------------------|------------------|------------------|
| <b>States—</b>                |                  |                  |                  |
| New South Wales ...           | 857,698          | 789,036          | 1,646,734        |
| Victoria ...                  | 655,591          | 659,960          | 1,315,551        |
| Queensland ...                | 329,506          | 276,307          | 605,813          |
| South Australia ...           | 207,358          | 201,200          | 408,558          |
| Western Australia ...         | 161,565          | 120,549          | 282,114          |
| Tasmania ...                  | 97,591           | 93,620           | 191,211          |
| <b>Territories—</b>           |                  |                  |                  |
| Northern ...                  | 2,734            | 576              | 3,310            |
| Federal ...                   | 992              | 722              | 1,714            |
| <b>Total Commonwealth ...</b> | <b>2,313,035</b> | <b>2,141,970</b> | <b>4,455,005</b> |

2. **Growth during Last Three Decennia.**—The total increase of population of the Commonwealth between the Census of 31st March, 1901, and that of 3rd April, 1911, was 681,204, of which 335,107 were males and 346,097 were females, as compared with a total increase of 599,409, comprising 273,889 males and 325,520 females, for the preceding ten years. The population of each sex enumerated at the Censuses of 3rd April, 1881, 5th April, 1891, 31st March, 1901, and 3rd April, 1911, was as follows:—

### POPULATION OF COMMONWEALTH AT LAST FOUR CENSUSES

(EXCLUSIVE OF FULL-BLOODED ABORIGINALS).

| Date of Census.         | Males.    | Females.  | Persons.  | (a) Masculinity |
|-------------------------|-----------|-----------|-----------|-----------------|
| 3rd April, 1881 ... ..  | 1,214,913 | 1,035,281 | 2,250,194 | 117.35          |
| 5th April, 1891 ... ..  | 1,704,039 | 1,470,353 | 3,174,392 | 115.89          |
| 31st March, 1901 ... .. | 1,977,928 | 1,795,873 | 3,773,801 | 110.14          |
| 3rd April, 1911 ... ..  | 2,313,035 | 2,141,970 | 4,455,005 | 107.99          |

(a) Number of males per 100 females.

The increases in the populations of the several States during the past three decennia have been as follow:—

### DECENNIAL INCREASES IN THE TOTAL POPULATION.

| State.              | 1881-1891. |           | 1891-1901. |            | 1901-1911.  |             |

| Victoria ...        | 278,274    | 32.30     | 61,230     | 5.37       | 114,481     | 9.53        |
| Queensland ...      | 180,193    | 84.39     | 104,411    | 26.52      | 107,684     | 21.62       |
| South Australia ... | 39,119     | 14.15     | 42,813     | 13.57      | 50,212      | 14.01       |
| West. Australia ... | 20,074     | 67.57     | 134,342    | 269.86     | 97,990      | 53.22       |
| Tasmania ...        | 30,962     | 26.76     | 25,808     | 17.60      | 18,736      | 10.86       |
| N. Territory ...    | 1,447      | 41.93     | (b) — 87   | (b) — 1.78 | (b) — 1,501 | (b) — 31.20 |
| Commonwealth ...    | 924,198    | 41.07     | 599,409    | 18.88      | 681,204     | 18.05       |

(a) Including Federal Capital Territory. (b) Decrease.

For the Commonwealth as a whole the increase in population during the decennium 1901-11 was greater by 81,795 than that for the decennium 1891-1901. The rate of increase per cent. was, however, not so great, being 18.05 per cent. for 1901-11, as against 18.88 for 1891-1901. The former corresponds to an increase of 1.67 per cent. per annum, the latter to an increase of 1.74 per cent. per annum.

As regards the separate States, the numerical increases in the case of New South Wales, Victoria, Queensland and South Australia were greater for 1901-11 than for 1891-1901. On the other hand, Western Australia and Tasmania experienced greater numerical increases in the earlier than in the later decennium, while the Northern Territory, which exhibited an actual loss of population in both decennia, experienced a much heavier loss in 1901-11 than in 1891-1901. In the matter of rates of increase per cent. New South Wales, Victoria and South Australia were higher in 1901-11 than in 1891-1901, while Queensland, Western Australia and Tasmania were lower, and the rate of decrease in the Northern Territory was much heavier.

# § 10. Principal Results of Census of 1911.

1. **Census Results.**—In the first issue of the Official Year Book tables are given shewing in some detail particulars concerning the Census of 1901 for the several States under the headings of Ages, Birthplaces, Occupations, Religions, and Conjugal Condition. (See Year Book No. 1, pp. 164 to 179.) In the official Year Book No. 6, pp. 143 to 171, similar and a few additional particulars appeared as to the Census of 3rd April, 1911. In the following tables this information is given in a condensed form.

2. **Ages.**—The numbers of persons of each sex at each age enumerated in the several States of the Commonwealth at the Census of 3rd April, 1911, are as follows:—

## AUSTRALIAN POPULATION AT 3rd APRIL, 1911, CLASSIFIED ACCORDING TO AGE (EXCLUSIVE OF FULL-BLOODED ABORIGINALS).

**4. Occupations.**—In the compilation of the results of the Census of 3rd April, 1911, the populations of the several States and Territories were tabulated according to occupation in the following classes:—

(i.) *Professional.* Embracing all persons not otherwise classed, mainly engaged in the government and defence of the country, and in satisfying the moral, intellectual, and social wants of its inhabitants.

(ii.) *Domestic.* Embracing all persons engaged in the supply of board and lodging, and in rendering personal services for which remuneration is usually paid.

(iii.) *Commercial.* Embracing all persons directly connected with the hire, sale, transfer, distribution, storage, and security of property and materials.

(iv.) *Transport and Communication.* Embracing all persons engaged in the transport of persons or goods, or in effecting communication.

(v.) *Industrial.* Embracing all persons not otherwise classed who are principally engaged in various works of utility, or in specialties connected with the manufacture, construction, modification, or alteration of materials so as to render them more available

for the various uses of man, but excluding, as far as possible, all who are mainly or solely engaged in the service of commercial interchange.

(vi.) *Agricultural, Pastoral, Mineral, and other Primary Producers.* Embracing all persons mainly engaged in the cultivation or acquisition of food products, and in obtaining other raw materials from natural sources.

(vii.) *Independent.* Embracing all persons of independent means having no specific occupation.

(viii.) *Dependents.* Embracing all persons dependent upon relatives or natural guardians, including wives, children, and others, not otherwise engaged in pursuits for which remuneration is paid, and all persons depending upon private charity, or whose support is a burthen on the public revenue.

Particulars concerning the number contained in each of these classes are given in the table hereunder:—

**AUSTRALIAN POPULATION AT 3rd APRIL, 1911, CLASSIFIED ACCORDING TO

5. **Religions.**—In the Act under which the Census of 1911 was taken in the several States, persons enumerated were required under penalty to furnish replies to all the inquiries contained in the schedule, with the exception of that relating to religion. In this case, any person objecting to give such particulars was allowed to insert the words "Object to state" in the space provided for religion. Of the total population of 4,455,005 there were 83,003, or 1.86 per cent., who availed themselves of this option. There were also 36,114, or 0.81 per cent., concerning whom no particulars as to religion were obtained.

Of the remainder, 4,274,414, or 95.95 per cent., were members of the various Christian denominations, 36,785 were members of non-Christian religions, 14,673 were of indefinite religious belief, and 10,016 stated that they were of no religion.

Amongst the Christian denominations, that most numerously represented was the Church of England, with 1,710,443 adherents, the next in order being the Roman Catholic (921,425), the Presbyterian (558,336), the Methodist (547,806), the Baptist (97,074), the Congregational (74,046), the Lutheran (72,395), the Church of Christ (38,748), and the Salvation Army (26,665).

The principal non-Christian religions represented in Australia were the Hebrew, Confucian, Mohammedan and Buddhist, the members of the Hebrew congregation totalling 17,287.

Those included under the head of "Indefinite" in the attached table consist mainly of persons who stated that they were "Freethinkers" or "Agnostics," or returned themselves as being of "No Denomination," while under the head of "No Religion" are given those who were so returned on the schedules as well as a small number who stated that they were "Atheists."

**AUSTRALIAN POPULATION AT 3rd APRIL, 1911, CLASSIFIED ACCORDING TO RELIGION**  
(EXCLUSIVE OF FULL-BLOODED ABORIGINALS).

GRAPHS OF TOTAL POPULATION OF THE COMMONWEALTH OF AUSTRALIA  
AND EACH STATE THEREIN, 1788-1912.

(See Tables pages 86 to 88.)

**EXPLANATION OF GRAPHS.**—The base of each small square represents two years' interval for both States and Commonwealth; and the vertical height 80,000 persons for Commonwealth or 20,000 for States. The zero line for the States is the bottom line; for the Commonwealth it is the line marked "Commonwealth." The scale on the left above the Commonwealth zero line relates to the Commonwealth, and that on the right relates to the States.

Where the population falls suddenly the fall denotes the creation of a new colony, e.g., New South Wales 1825, loses the whole population of Tasmania, then erected into a separate colony.

The curves are as follows:—Commonwealth, an unbroken line; New South Wales, — — — — —; Victoria, — — — — —; Queensland, — — — — —; South Australia, — — — — —; Western Australia, — — — — —; Tasmania, — — — — —; the names on the curves also shew which State each represents.

The manner in which the population of the Commonwealth would have grown from 1860 to 1912 if, during that period, there had been in operation the rate of increase actually experienced in the United States from 1790 to 1860, is shewn for purposes of comparison.

120  
 GRAPHS OF MALE AND FEMALE POPULATION OF THE STATES OF  
 AUSTRALIA 1796-1912.

(See Tables pages 86 to 88.)

**EXPLANATION OF GRAPHS.**—The base of each small square represents two years' interval, and the vertical height 20,000 persons. The distances upward from the zero line represent the number of males, and downward the number of females.

The sudden falls denote the creation of new colonies.

The names on the curves denote the States to which they refer, and the curves are as follows:—  
 New South Wales, ———; Victoria, - - - - -; Queensland, . . . . .; South Australia, - . . . .;  
 Western Australia, ————; Tasmania, ————.

The asymmetry of the two series of graphs reveals the want of uniformity in the increase of the two sexes.

GRAPHS SHEWING NET INCREASE OF POPULATION OF THE COMMONWEALTH OF AUSTRALIA AND THE STATES OF NEW SOUTH WALES AND VICTORIA, 1860-1912.

(For explanation see foot of next page.)

GRAPHS SHEWING NET INCREASE OF POPULATION OF THE STATES OF QUEENSLAND, SOUTH AUSTRALIA, WESTERN AUSTRALIA, AND TASMANIA, 1860-1912.

EXPLANATION OF GRAPHS SHEWING NET INCREASE.—The base of each small square represents an interval of a year for both States and Commonwealth; the vertical height represents 2000 for the Commonwealth and 1000 for the States. In the first graph two zero lines are taken (i.) for the Commonwealth and (ii.) for New South Wales and Victoria. The scale on the left relates to the Commonwealth and that on the right relates to New South Wales and Victoria. In the second graph two zero lines are taken (i.) for Queensland and South Australia, and (ii.) for Tasmania and Western Australia. The scale on the left relates to Queensland and South Australia, and that on the right relates to Western Australia and Tasmania.

NET DECREASES in population are shown by carrying the graph in such cases below the zero line, the distance of the graph below the zero line indicating the extent of the decrease.

The lines used are as follows:—Commonwealth, an unbroken line; New South Wales, — — — — —; Victoria, — — — — —; Queensland, — — — — —; South Australia, — — — — —; Western Australia, — — — — —; Tasmania, — — — — —.

The names on the curves denote the States to which they refer.

GRAPHS OF NATURAL INCREASE OF THE POPULATION OF THE COMMONWEALTH  
AND STATES OF AUSTRALIA, 1860-1912.

EXPLANATION OF GRAPHS.—The base of each small square represents one year for both States and Commonwealth, and the vertical height 1000 persons for the States and 2000 persons for the Commonwealth.

The distances upward from the zero line, marked 0 for both Commonwealth and States, denote the excess of births over deaths. The scale on the left relates to the Commonwealth, and that on the right to the States. The names shew the States to which the curves refer, they are as follows:—Commonwealth —; New South Wales, —; Victoria, —; Queensland, —; South Australia, —; Western Australia, —; Tasmania, —.

GRAPHS SHEWING MASCULINITY OF THE POPULATION OF THE  
COMMONWEALTH AND STATES OF AUSTRALIA, 1796-1912.

Year 1800 1810 1820 1830 1840 1850 1860 1870 1880 1890 1900 1910 1920

(See Tables pages 91 and 96.)

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year and the vertical height an excess of eight per cent. of males over females. The basic lines (shewn thickened) for Commonwealth and all the States are at 100 per cent., equivalent to a numerical equality of the sexes.

# DISTRIBUTION OF POPULATION THROUGHOUT THE COMMONWEALTH OF AUSTRALIA, ACCORDING TO CENSUS OF 1911.

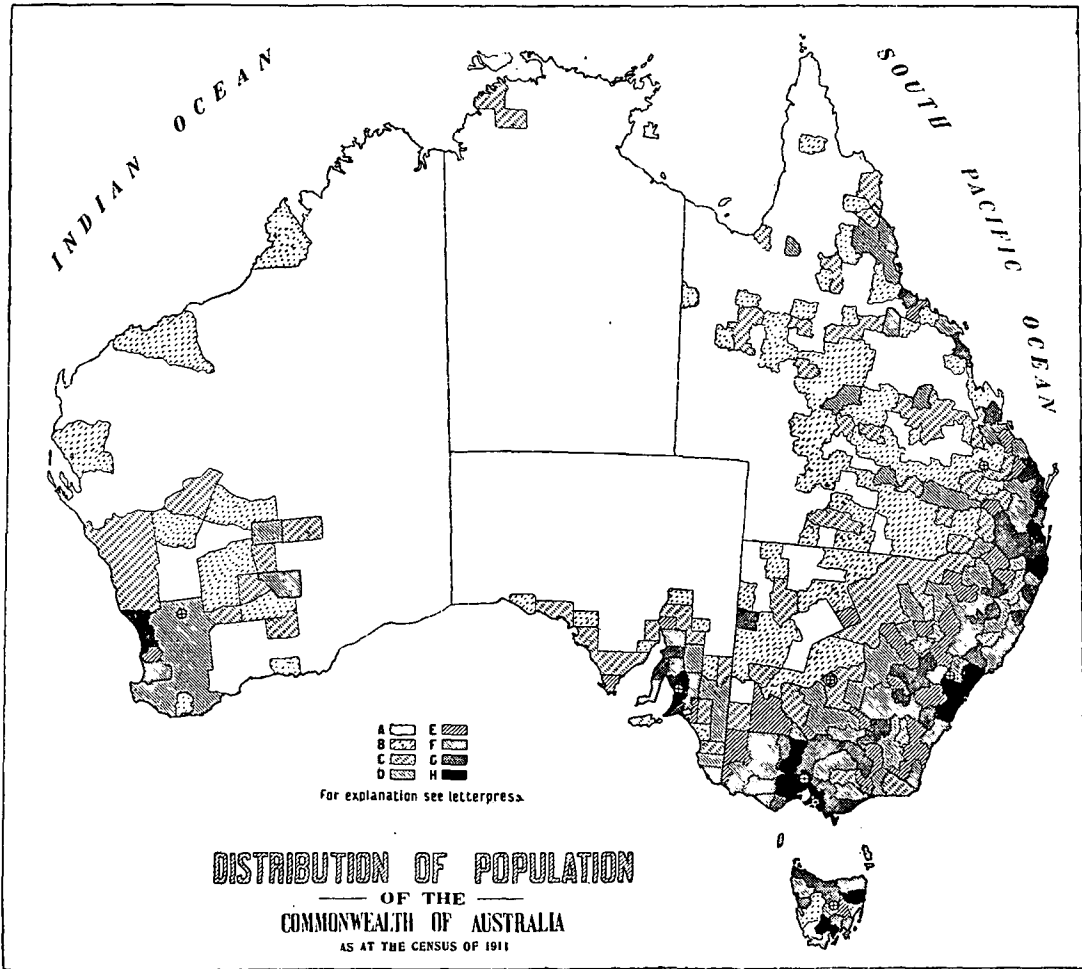

The map on page 135 furnishes a graphic representation of the distribution of the population of the Commonwealth at the date of the census of 1911. For this purpose the density of the population has been computed for the counties of each State, and the areas representing these counties have been shaded in accordance with the following scale of density:—

|    |   |  |
|----|---|--|
| A— | Less than 1 inhabitant to 16 sq. miles                          |  |
| B— | From 1 inhabitant in 16 sq. miles to less than 1 in 4 sq. miles |  |
| C— | " 1 " " 4 " " " 1 in 1 sq. mile                                 |  |
| D— | " 1 " " 1 sq. mile " " 2 in 1 " "                               |  |
| E— | " 2 inhabitants in 1 " " " 4 in 1 " "                           |  |
| F— | " 4 " " 1 " " " 8 in 1 " "                                      |  |
| G— | " 8 " " 1 " " " 16 in 1 " "                                     |  |
| H— | 16 inhabitants and upwards in 1 square mile                     |  |

A map drawn upon such a small scale must, of course, be considered as furnishing only a rough approximation as to the true distribution of the population, owing to the fact that a small densely-populated area may exist in certain cases within a comparatively large district, the balance of which is but sparsely populated. Thus, in such a case, owing to the density of the whole district being alone taken into account, the fact of a concentration of population within a small area is lost for purposes of representation. It is evident that the larger the district is for which the density has been calculated, the less will the map represent the true facts. It is, however, believed that by the calculations being made in each State for counties this feature has been minimised, as the areas of the counties of New South Wales, Victoria, Queensland, South Australia, and Tasmania are fairly equal in area, and do not average much more than 2000 square miles. The areas of counties in the Northern Territory and in Western Australia average 4000 and 8000 square miles respectively. So far as the States of Queensland, Western Australia, and Tasmania are concerned, the map now published cannot be compared with the map contained in previous issues of this Year Book, as the density had been computed for that map for Registration Districts in Queensland, Magisterial Districts in Western Australia, and Electoral Districts in Tasmania.

An area of about 1,136,000 square miles, equal to 38 per cent. of the total area of the Commonwealth, and belonging to South Australia, Western Australia, and the Northern Territory, is not subdivided into counties. As the total population of that area is under 5000, it appears white on the map, together with a considerable number of adjoining counties, in which the population is less than one inhabitant to 16 square miles.

The concentration of population about the capitals, and, to a lesser extent, about some mining and agricultural centres, is obvious on reference to the map. The centres of gravity of the population of the several States and of the Commonwealth as a whole have been ascertained, and are shown in the map by crosses surrounded by circles. It is evident that the greater the percentage of the population of a State concentrated in the immediate neighbourhood of its capital, the closer to the capital the centre of gravity will be located, and the map shews this plainly. The centre of gravity of the population of the whole Commonwealth lies within the State of New South Wales, in county Nicholson, practically on the parallel of Sydney and the meridian of Melbourne, and almost in the centre of a straight line joining Sydney and Adelaide.

From the following table, which gives for the Commonwealth as a whole, particulars of education in conjunction with age, it will be seen that the major portion of those who were unable to read were under the age of 9. Of persons aged 20 and upwards only about 2½ per cent. were unable to read.

POPULATION OF THE COMMONWEALTH OF AUSTRALIA AT THE CENSUS OF  
3rd APRIL, 1911, CLASSIFIED ACCORDING TO EDUCATION AND AGE

(EXCLUSIVE OF FULL-BLOODED ABORIGINALS).

(a) Including 21 blind deaf mutes.

## § II. Naturalisation.

1. **The Commonwealth Act.**—The Commonwealth Constitution empowers the Commonwealth Parliament to make laws with respect to "Naturalisation and Aliens," a power which was exercised when the "Naturalisation Act of 1903" was passed. This Act was assented to on 13th October of that year, and came into force on 1st January, 1904, in accordance with a proclamation by *Gazette* of 14th November, 1903.

Prior to the passing of this Act the issue of certificates of naturalisation had been a function of the State Governments, carried out under Acts of the several State Legislatures, which, however, did not differ materially from each other, and furnished the basis on which the Commonwealth Act was drafted. From 1st January, 1904, when the Commonwealth Act became operative, the right to issue certificates of naturalisation in the Commonwealth has been vested exclusively in the Federal Government, but all certificates or letters of naturalisation issued under the several State Acts prior to that date entitle the recipients to be deemed to be naturalised under the Commonwealth Act.

The grant of a certificate of naturalisation entitles the recipient within the limits of the Commonwealth to all the rights and privileges, and renders him subject to all the obligations, of a natural-born British subject, with the exception that where, by any Commonwealth or State Constitution or Act, a distinction is made between natural-born British subjects and naturalised persons, such distinction shall hold good in the case of all persons naturalised under the Commonwealth Act.

Applications for certificate of naturalisation must be made to the Governor-General, the qualifications required in an applicant being:—

(i.) That he is not a British subject.

(ii.) That he is not an aboriginal native of Asia, Africa, or the Islands of the Pacific, excepting New Zealand.

- (iii.) That he intends to settle in the Commonwealth.
- (iv.) (a) That he has resided in Australia continuously for two years immediately preceding naturalisation ; or
- (b) That he has obtained in the United Kingdom a certificate or letters of naturalisation.

An applicant who has already obtained a certificate or letters of naturalisation in the United Kingdom is required to furnish, in support of his application—

- (i.) His certificate or letters of naturalisation.
- (ii.) His statutory declaration—
  - (a) That he is the person named therein.
  - (b) That he obtained the certificate or letters without fraud or intentional false statement.
  - (c) That the signature and seal thereto are, to the best of his knowledge and belief, genuine.
  - (d) That he intends to settle in the Commonwealth.

If the applicant is not already naturalised in the United Kingdom the particulars which he is required to furnish in support of his application are as follows:—

- (i.) His own statutory declaration stating—
  - (a) Name ; (b) Age ; (c) Birthplace ; (d) Occupation ; (e) Residence ; (f) Length of residence in Australia ; (g) Intention to settle in the Commonwealth.
- (ii.) A certificate signed by a Justice of the Peace, a postmaster, a teacher of a State school, or an officer of police, that the applicant is known to him and is of good repute.

In connection with any application for naturalisation, the Governor-General in Council is authorised to grant or withhold a certificate as he thinks most conducive to the public good, but the issue of a certificate to any person who is not already naturalised in the United Kingdom is not admissible until the applicant has taken an oath or affirmation of allegiance. The grant of a certificate is made free of charge.

In addition to naturalisation by grant of certificate, the Act makes provision for—

- (i.) Naturalisation by marriage.
- (ii.) Naturalisation by residence with naturalised parent.

The former relates to the case of a woman who is not herself a British subject, but is married to a British subject ; the latter to that of an infant who is not a natural-born British subject, but who has resided at any time in Australia with a father or mother who is a naturalised British subject. In each instance the person concerned is deemed to be naturalised under the Commonwealth Act.

The administration of the Act is carried out by the Department of External Affairs, and the Governor-General is authorised to make such regulations as are necessary or convenient for giving effect to the Act.

**2. Statistics of Naturalisation.**—Particulars relative to the nationalities of the recipients of certificates of naturalisation issued under the Act during each of the five years 1908 to 1912, and to the countries from which such recipients had come, are shewn in the following table:—

## COMMONWEALTH NATURALISATION CERTIFICATES GRANTED, 1908 to 1912.

| Nationalities of Recipients. | No. of Certificates Granted. |              |              |              |              | Countries from which Recipients of Commonwealth Certificates had come. | No. of Certificates Granted. |              |              |              |              |

\* By marriage.

The following table furnishes particulars concerning the States in which the recipients of Commonwealth certificates of naturalisation during the years 1904 to 1912 were resident. The numbers of certificates granted under the several State Acts during the year 1903 are also given :

## NATURALISATION CERTIFICATES GRANTED BY STATES AND COMMONWEALTH, 1903 to 1912.

| Year.    | N.S.W. | Victoria. | Qld. | S. Aust. | W.A. | Tas. | C'wlth. |
|----------|--------|-----------|------|----------|------|------|---------|
| 1903 ... | 400    | 397       | 355  | 43       | 75   | 149  | 1,419   |
| 1904 ... | 1,379  | 319       | 115  | 25       | 248  | 21   | 2,107   |
| 1905 ... | 544    | 213       | 150  | 34       | 166  | 11   | 1,118   |
| 1906 ... | 475    | 301       | 177  | 45       | 150  | 39   | 1,187   |
| 1907 ... | 458    | 214       | 193  | 27       | 134  | 16   | 1,042   |
| 1908 ... | 396    | 243       | 377  | 45       | 152  | 28   | 1,241   |
| 1909 ... | 644    | 507       | 378  | 600      | 221  | 81   | 2,431   |
| 1910 ... | 665    | 329       | 333  | 299      | 187  | 36   | 1,849   |
| 1911 ... | 565    | 491       | 469  | 282      | 248  | 22   | 2,077   |
| 1912 ... | 565    | 295       | 464  | 343      | 243  | 35   | 1,945   |

3. **Census Particulars.**—On the Personal Card used at the Census of 3rd April, 1911, an inquiry as to naturalisation was made, all persons who were British subjects by naturalisation being required to indicate the fact by inserting the letter N in the place provided for the purpose on the card. In addition, in checking the cards in the Census Bureau, instructions were given that cases of women naturalised by marriage to British subjects, and of children naturalised by residence with parents who have become British subjects, should be duly taken into account by the insertion of the letter N if originally omitted. The results of the tabulation will be found in the following table :—

**NUMBER OF NATURALISED BRITISH SUBJECTS**  
**RECORDED AT THE AUSTRALIAN CENSUS OF 1911.**  
**STATES.**

## § 12. Graphical Representation of Growth of Population.

1. **General.**—The nature of the fluctuations of the numbers representing (a) total population, or those representing (b) births and deaths from year to year, or (c) the natural increase, *i.e.*, the difference of births and deaths, or (d) the net immigration, all of which taken together make up the element of increase of total population, cannot be readily discerned from mere numerical tables. It has been deemed desirable therefore to furnish a series of graphical representations, shewing in some cases the characteristics of these elements from 1788 to 1912, and in others from 1860 to 1912. The graphs furnish at a glance a clear indication of the changes taking place, and of their significance from year to year. The great importance of such representations is that only by their means can the most recent changes be justly apprehended, either in their relation to the past, or their meaning for the future.

2. **Graphs of Total Population** (page 127).—These graphs furnish interesting evidence of the comparatively slow rate of growth of the several States and of the Commonwealth as a whole, during the period from the foundation of settlement in 1788 until 1832. From that year onwards to 1851, a moderately increased rate of progress was experienced. In 1851 gold was discovered in Australia, and the effect of this discovery on the population of the Commonwealth is shewn by the steepness of the curves for New South Wales and Victoria, and also for the Commonwealth, from this point onwards for a series of years. The sudden breaks in the continuity of the curves for New South Wales indicate the creation of new colonies, and their separation from the mother colony. Thus, Tasmania came into existence in 1825, Victoria in 1851, and Queensland in 1859. Owing to the extensive gold discoveries in Victoria, its population increased so rapidly that in 1854 its total passed that of New South Wales, and remained in excess until 1892, when the mother State again assumed the lead, which it has since maintained. The rate of increase in New South Wales is large, but the State is still only sparsely populated. A feature of the New South Wales curve is its comparative regularity as compared with that of Victoria, the population of which State increased with great rapidity from 1851 to 1860, less rapidly from 1861 to 1878, with a further period of increased rapidity from 1878 to 1891, and a period of very slow and fluctuating growth from the latter year to 1912. Victoria, however, has a population density more than double that of Tasmania, and nearly three times that of New South Wales.

In the case of Queensland, the curve indicates a rate of growth which, though varying somewhat, has on the whole been satisfactory, and at times very rapid. Periods of particularly rapid increase occurred from 1862 to 1865, from 1873 to 1877, and from 1881 to 1889. The population of Queensland passed that of Tasmania in 1867, and that of South Australia in 1885. The population density of Queensland is less than one-sixteenth of that of Victoria.

The curve for South Australia indicates that with fluctuations more or less marked, the population increased at a moderate rate from the date of the foundation of the colony in 1834 until 1884, and that from that point onwards a diminished rate of increase

was experienced. The population of South Australia passed that of Tasmania in 1852. Its density is nearly one and one-fifth of that of Queensland, about one-fifth of that of New South Wales, and about one-fourteenth of that of Victoria.

The curve for Western Australia indicates that the population increased regularly but very slowly until 1886, when the discovery of gold in the Kimberley division caused an influx of population. The effects of the further rich discoveries of gold in the Murchison and Coolgardie districts in 1891 and 1892, are clearly shewn in the rapid increase of population in those and subsequent years to 1897. Two years of retarded progress then occurred, followed by a satisfactorily rapid rate of increase from 1899 to 1906, a slight decline in 1907 and a further advance in 1908 and subsequent years. The population of Western Australia became greater than that of Tasmania in 1899. Its density is little more than one-fourth of that of South Australia, one-third of that of Queensland, one-nineteenth of that of New South Wales, and about one-fiftieth of that of Victoria.

The Tasmanian population curve indicates a comparatively slow rate of growth throughout. Its most noticeable feature is a retardation in increase in 1852 and subsequent years, brought about by the discovery of gold on the mainland. The population density of Tasmania is about 30 per cent. greater than that of New South Wales, and a little less than half of that of Victoria.

**3. Graphs for Commonwealth of Male and Female Population** (page 128).—These curves shew the relative growth of male and female population of the Commonwealth, and it will be seen that the former are far more liable to marked fluctuations than the latter. The curves representing an increase of population on the basis of the United States rate for 1790 to 1860, indicate that on the whole the female rate of increase in the Commonwealth has been a fairly satisfactory one, and that from 1860 to 1893 the same might be said of the male population. From 1893 onwards, however, the male population of the Commonwealth has fallen considerably below this rate, and it may be added that the rapid lowering of the rate of increase of the male population must be regarded as unsatisfactory from a national standpoint.

Although the rate of increase of the female population from 1860 onwards is on the whole very satisfactory, it should be noted that the total number at the beginning of this period was relatively very small, and that from 1894 there is an unsatisfactory falling off in the rate of increase, similar to that experienced in the case of males.

**4. Graphs for each State of Male and Female Population** (page 129).—These graphs, shewing the relative progress in male and female population for each of the States, disclose the fact that in all cases the female population is much less liable to marked fluctuations than the male, and further, that in cases where rapid increases have taken place in the latter, a similar, but much more gradual, increase is in evidence in the former, commencing usually, however, somewhat later than in the case of the males. A comparison of the graphs of each of the States with that of the Commonwealth shews that the fluctuations in the latter case are smaller than in the former. This is largely due to internal migrations of the male element of the population, brought about by various causes, amongst which mining developments figure prominently.

**5. Graphs for Natural Increase of Population, Commonwealth and States** (page 132).—The graphs indicate that, with the exception of certain marked variations, the natural increase of the population of the Commonwealth, i.e., the excess of births over deaths, advanced with fair rapidity from 1860 to 1892, in which year it attained its maximum, and then fell rapidly till 1898. A subsequent rise to 1900 was followed by a continuous fall for the three years succeeding, viz., to 1903. The recovery shews a fairly rapid rise to 1909, during which year the natural increase was 16.35 per 1000 of mean population. In succeeding years a correspondingly high rate was maintained with minor fluctuations until 1912, when a record of 17.42 was obtained. This latter figure is, however, an over-statement of the true natural increase, owing to the fact that the introduction of "Maternity Allowances" in 1912 resulted in expediting the registration of births. The years in which the natural increase of the Commonwealth was at its highest were 1865, 1871, 1881, 1892, 1900, 1909, and 1912, and the years

of extraordinarily low rates of natural increase were 1866, 1875, 1882, 1898, and 1903. The low rate of 1898 was due in large measure to a phenomenally high death rate experienced in practically all the States in that year, when an epidemic of measles was prevalent throughout the Commonwealth. The low rate of 1903 was brought about by the low birth rates and the high death rates which accompanied the drought of 1902-3, while the advance in the rate of natural increase since 1903 has been collateral with the marked improvement in material conditions experienced throughout the Commonwealth during that period.

**6. Graphs shewing Net Increase of Population** (pages 130 and 131).—The graphs disclose the fact that the most notable years of large net increases of population of the Commonwealth as a whole were 1864, 1877, 1883, 1888, 1909, 1910, 1911 and 1912. The highest increase was attained in 1912. The net increase for 1910 was higher than for any year since 1883, while that for 1912 was the highest on record. The years in which low net increases were noticeable were 1861, 1867, 1872, 1878, 1889, 1893, 1898, and 1903.

The graph for New South Wales indicates a high net increase of population between 1876 and 1894, advancing to a maximum in 1883, and then declining to 1901. From the latter year onwards to 1907 an advance in the net increase was in evidence, followed by a decline in 1908, and a recovery in 1909, which was maintained in subsequent years.

Some features of the graph shewing the Victorian net increase are the height attained in 1864, 1870, 1888, 1901, and 1912, the smallness of the increase for the years 1861 and 1875, and the decreases for 1896, 1902, and 1903.

For Queensland it will be seen that the years of high net increases were 1863, 1875, 1883, 1895, 1901, 1909, 1910, and 1911, while the years in which these were at very low level were 1869, 1878, 1891, and 1903.

In South Australia the net increases were exceptionally high in 1865, 1876, 1883, 1892, 1908, 1910, 1911, and 1912, and correspondingly low in 1870, 1885, 1896, and 1903, while actual decreases took place in 1886, 1888, and 1902.

In Western Australia the net increase graph indicates no very marked advance until about 1884, from which it rises somewhat rapidly to 1886, and then declines to 1888. This is followed by an exceedingly rapid rise to 1896, and a subsequent fall to 1899, succeeded by a further rise to 1902, and a fall thereafter to 1907, followed by a rise to 1911 and a further fall in 1912. Decreases took place in 1888 and 1907.

In the case of the Tasmanian graph, indications of a very varied net increase are in evidence, the principal high points being those for the years 1887, 1891, 1897, 1902, 1907, and 1912, while actual decreases were experienced in 1874, 1875, 1892, 1906, and 1911.

**7. Graphs shewing Masculinity of Population, Commonwealth and States** (page 133).—These graphs furnish information concerning the variations which have taken place in the relative numbers of males and females in the populations of the Commonwealth and the several States during the years 1796 to 1912, and incidentally serve to indicate special features of growth in the respective populations. In general it will be noted that in recent years there has been a marked tendency towards a masculinity of 100, that is, to a condition in which the numbers of males and females in the population were equal, but that with the exception of Victoria and South Australia the masculinity has never fallen below 100. The early experience of the Commonwealth exhibits a fairly rapid decline in masculinity to 1812, followed by an even more rapid rise to 1828 and a subsequent fall with more gentle slope to 1850. From 1850 onwards the decline in masculinity has been fairly continuous though subject to fluctuations. It should be noted that the marked variations of the earlier as compared with the later years have been due to a considerable extent to the fact that, owing to the smallness of the population, any considerable influx of male immigrants had a marked effect in increasing the masculinity of the population, while an influx of female immigrants tended to considerably reduce it. Two points of special interest in the graphs of the separate States are the maxima attained in 1852 in Victoria and 1896 in Western Australia, as the result of extensive male immigration consequent on the gold discoveries in the respective States.

## SECTION V.

## VITAL STATISTICS.

NOTE.—The rates quoted throughout this Section for the years 1902 to 1912 have been calculated in accordance with the corrected populations as determined by the results of the Census of 1911.

## § 1. Births.

1. Male and Female Births, 1902 to 1912.—The total number of male and female births registered in the Commonwealth during the years 1902 to 1912 is as shewn in the two tables hereunder:—

## TOTAL MALE BIRTHS, COMMONWEALTH, 1902 to 1912.

| Year.    | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | North.<br>Terr. | Federal<br>Territory. | C'wealth. |
|----------|--------|-----------|---------|----------|----------|-------|-----------------|-----------------------|-----------|
| 1902 ... | 19,322 | 15,583    | 7,279   | 4,579    | 3,241    | 2,604 | 8               | ...                   | 52,616    |
| 1903 ... | 18,377 | 15,115    | 6,427   | 4,464    | 3,433    | 2,570 | 20              | ...                   | 50,406    |
| 1904 ... | 19,857 | 15,313    | 7,134   | 4,665    | 3,666    | 2,702 | 21              | ...                   | 53,358    |

## TOTAL FEMALE BIRTHS, COMMONWEALTH, 1902 to 1912.

| Year.    | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | North.<br>Terr. | Federal<br>Territory. | C'wealth. |
|----------|--------|-----------|---------|----------|----------|-------|-----------------|-----------------------|-----------|
| 1902 ... | 18,513 | 14,878    | 6,937   | 4,348    | 2,991    | 2,481 | 12              | ...                   | 50,160    |
| 1903 ... | 17,589 | 14,454    | 6,194   | 4,011    | 3,266    | 2,510 | 13              | ...                   | 48,037    |
| 1904 ... | 18,810 | 14,450    | 6,948   | 4,435    | 3,510    | 2,590 | 12              | ...                   | 50,755    |
| 1905 ... | 19,295 | 14,584    | 6,648   | 4,341    | 3,720    | 2,445 | 13              | ...                   | 51,046    |
| 1906 ... | 19,882 | 15,128    | 6,739   | 4,316    | 3,757    | 2,541 | 13              | ...                   | 52,376    |
| 1907 ... | 20,597 | 15,379    | 7,089   | 4,536    | 3,750    | 2,494 | 13              | ...                   | 53,858    |
| 1908 ... | 20,853 | 15,026    | 7,153   | 4,832    | 3,762    | 2,797 | 9               | ...                   | 54,432    |
| 1909 ... | 21,318 | 15,448    | 7,598   | 4,840    | 3,718    | 2,651 | 16              | ...                   | 55,589    |
| 1910 ... | 22,076 | 15,025    | 7,909   | 5,145    | 3,730    | 2,698 | 12              | ...                   | 56,595    |
| 1911 ... | 23,154 | 16,092    | 8,281   | 5,442    | 3,967    | 2,721 | 15              | (a) 13                | 59,685    |
| 1912 ... | 25,337 | 17,570    | 9,162   | 5,911    | 4,220    | 2,837 | 10              | 19                    | 65,066    |

(a) Part of New South Wales prior to 1911.

2. Total Births, 1902 to 1912.—While the total number of births for the Commonwealth was higher in 1912 than in any of the preceding ten years, the following table of particulars discloses also the fact that the excess of births in 1912 over those in 1902 was very unequally distributed between the States:—

## TOTAL BIRTHS, COMMONWEALTH, 1902 to 1912.

| Year.    | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | North.<br>Terr. | Fed'l<br>Terr. | C'wealth. |
|----------|--------|-----------|---------|----------|----------|-------|-----------------|----------------|-----------|
| 1902 ... | 37,835 | 30,461    | 14,216  | 8,927    | 6,232    | 5,085 | 20              | ...            | 102,776   |
| 1903 ... | 35,966 | 29,569    | 12,621  | 8,475    | 6,699    | 5,080 | 33              | ...            | 98,443    |
| 1904 ... | 38,667 | 29,763    | 14,082  | 9,100    | 7,176    | 5,292 | 33              | ...            | 104,113   |
| 1905 ... | 39,501 | 30,107    | 13,626  | 8,832    | 7,582    | 5,257 | 36              | ...            | 104,941   |
| 1906 ... | 40,948 | 30,844    | 14,019  | 8,921    | 7,800    | 5,333 | 25              | ...            | 107,890   |
| 1907 ... | 42,201 | 31,365    | 14,540  | 9,211    | 7,712    | 5,291 | 27              | ...            | 110,347   |
| 1908 ... | 42,458 | 31,097    | 14,830  | 9,756    | 7,755    | 5,615 | 34              | ...            | 111,545   |
| 1909 ... | 43,782 | 31,544    | 15,552  | 10,064   | 7,602    | 5,500 | 27              | ...            | 114,071   |
| 1910 ... | 45,444 | 31,437    | 16,169  | 10,540   | 7,585    | 5,586 | 40              | ...            | 116,801   |
| 1911 ... | 47,537 | 33,026    | 16,984  | 11,057   | 8,091    | 5,437 | 31              | (a) 30         | 122,193   |
| 1912 ... | 51,861 | 35,796    | 18,738  | 12,079   | 8,689    | 5,853 | 33              | 39             | 133,088   |

(a) Part of New South Wales prior to 1911.

3. *Birth Rates, 1902 to 1912.*—(i.) *Crude Birth Rate.* The birth rate for the whole Commonwealth during 1911 was higher than in any of the preceding ten years, an uninterrupted increase having been experienced since 1907. The increase shewn by the 1912 figures over those of 1911 is, however, to some extent fictitious. The law relating to Maternity Allowances which came into force on 10th October, 1912, had the effect of materially diminishing the period between the dates of birth and the dates of registration, so that probably about 6000 births were registered during the last three months of the year which, under ordinary circumstances, would not have been registered before the beginning of 1913. The very high masculinity of the population accounts for the low birth rate experienced in the Northern Territory :—

## CRUDE BIRTH RATE (a), COMMONWEALTH, 1902 to 1912 (b).

| Year.                                 | N.S.W. | Vic.  | Qld.  | S.A.  | W.A.  | Tas.  | North.<br>Terr. | Federal.  | Cwlth. |
|---------------------------------------|--------|-------|-------|-------|-------|-------|-----------------|-----------|--------|
| 1902 ...                              | 27.23  | 25.23 | 27.85 | 25.08 | 30.44 | 29.03 | 4.37            | ...       | 26.71  |
| 1903 ...                              | 25.44  | 24.53 | 24.53 | 23.84 | 30.50 | 28.16 | 7.58            | ...       | 25.29  |

| Density (c) (No. per square mile) ... | 5.74   | 15.71 | 0.95  | 1.13  | 0.31  | 7.52  | 0.007           | 2.13      | 1.59   |

(a) Number of births per 1,000 of the mean annual population. (b) Rates corrected in view of Census Returns, 1911. (c) On 31st December, 1912. (d) Part of New South Wales prior to 1911.

The population density of each State and of the Commonwealth has been given for the purpose of considering the influence, if any, of concentration of population on birth rate, in connection with the disparities of the rate in different parts of Australia.

(ii.) *Objections to Crude Birth Rate.* The figures just given represent the "crude birth rate," i.e., the number of births per thousand of mean annual population. The number of births per thousand of the female population of child-bearing ages, i.e., from 15 to 45, furnish a more significant rate. This calculation has been made for the four last Census periods, and covers in each case the Census year together with the year immediately preceding and the year immediately following. The following results have been obtained for the four Census periods:—Total births per 1000 women (married and unmarried) of ages 15 to 45 :—Years 1880-82, 169.69; years 1890-92, 158.81; years

1900-02, 117.26; years 1910-12, 117.22. Nuptial births per 1000 married women of ages 15 to 45:—Years 1880-82, 320.96; years 1890-92, 332.03; years 1900-02, 235.84; years 1910-12, 236.06.

4. **Birth Rates of Various Countries.**—A comparison with other countries shews that the Australian States occupy a very low position, which is, however, fortunately counterbalanced by a still lower position in regard to their death rates, as will be seen from the table hereinafter in the section dealing with "Deaths."

**CRUDE BIRTH RATE (a) OF VARIOUS COUNTRIES.**

| Country.              | Year. | Rate. | Country.              | Year. | Rate. |
|-----------------------|-------|-------|-----------------------|-------|-------|
| Russia, European ...  | 1905  | 44.8  | Commonwealth ...      | 1912  | 28.7  |
| Rumania ...           | 1911  | 43.0  | South Australia ...   | 1912  | 28.7  |

| Queensland ...        | 1912  | 29.7  | Ireland ...           | 1911  | 23.2  |
| Prussia ...           | 1911  | 29.4  | Canada (Ontario) ...  | 1911  | 21.7  |
| Finland ...           | 1911  | 29.1  | France ...            | 1911  | 18.7  |
| Western Australia ... | 1912  | 28.8  |                       |       |       |

(a) Number of births per 1000 of the mean population.

5. **Masculinity at Birth.**—The masculinity of births, i.e., the number of males per 100 females, registered during the last eleven years in the several States of the Commonwealth has, apart from the Northern Territory, the figures for which are useless for comparative purposes on account of the smallness of the returns on which they are based, varied from 99.82 in Tasmania in 1911 to 115.01 in Tasmania in 1905. The following table, which gives the values for the States and Commonwealth for 1902 to 1912, shews the remarkable fact that for the Commonwealth there was a steady increase of masculinity from 1902 to 1906, with a sharp decrease in 1907, a further increase in 1908, 1909, 1910, and a rapid decrease in 1911 and 1912:—

(a) Number of males to each 100 females. (b) Part of New South Wales prior to 1911.

There is ordinarily a very small difference between the masculinity of nuptial and ex-nuptial births. Thus, according to Bodio, whose figures are quoted in the following

table, for the period about 1887-1891, the masculinity ranged from 108.3 to 103.6, and from 107.9 to 101.6 for total and ex-nuptial births respectively.

### MASCULINITY OF BIRTHS IN VARIOUS COUNTRIES.

| Country.             | Masculinity of Births. (a) |                         | Country.          | Masculinity of Births. (a) |                         |

| 1912 ... | 109.83 | 95.98  | 97.30   | 120.85   | 124.40   | 82.69  | 200.00          | ...               | 104.05 |

(a) Number of males to each 100 females. (b) Part of New South Wales prior to 1911.

It is curious to note that while, so far as the total births are concerned, there has always been an excess of male births over female births (excepting Tasmania in 1911), this has not been the case in regard to ex-nuptial births, where in South Australia in 1904 the masculinity was only 83.50. On the other hand it rose as high as 129.14 in Western Australia in 1909. Little weight, however, can be attached to these results on account of the small totals on which they are based, and for the same reason the figures for the Northern Territory are not taken into consideration.

**6. Ex-nuptiality of Births.**—The total ex-nuptial births fell from 1902 to 1903, then rose rapidly to 1908 and remained almost stationary till 1909, when the number again decreased. The total for 1910 was the lowest number recorded since 1906. (See the table on the following page).

It is, of course, possible that the number of ex-nuptial births is somewhat understated, owing to diffidence in proclaiming the fact of ex-nuptiality, and it is not unlikely that the majority of unregistered births are ex-nuptial.

**TOTAL EX-NUPTIAL BIRTHS REGISTERED IN THE COMMONWEALTH, 1902 to 1912.**

(i.) *Rate of Ex-nuptiality, 1902 to 1912.* The rate of ex-nuptiality, i.e., the percentage of ex-nuptial to total births, shews on the whole a slight increase from 1902 to 1905, with a decrease during the last seven years, as the subjoined table shews:—

**PERCENTAGE OF EX-NUPTIAL ON TOTAL BIRTHS, COMMONWEALTH, 1902 to 1912.**

| Year.    | N.S.W. | Vic. | Q'land. | S. Aust. | W. Aust. | Tas. | North.<br>Terr. | Fed'l<br>Terr. | C'wealth. |

| 1911 ... | 6.14   | 5.96 | 6.22    | 4.21     | 4.47     | 5.33 | 29.03           | (a)...         | 5.79      |
| 1912 ... | 5.60   | 5.72 | 6.24    | 4.74     | 4.34     | 4.87 | 9.09            | 2.56           | 5.53      |

(a) Part of New South Wales prior to 1911.

A comparison of greater significance is obtained by calculating the number of ex-nuptial births per thousand of the single and widowed female population between the ages of 15 and 45. The calculation has been made for the last four Census periods, and covers in each case the Census year, together with the year immediately preceding and the year immediately following. The number of ex-nuptial births per 1000 unmarried women of ages 15 to 45 has been found to be as follows:—Years 1880-82, 14.49; years 1890-92, 15.93; years 1900-02, 13.30; years 1910-12, 12.53.

(ii.) *Comparison of Rates.* Since the rate of ex-nuptiality might appear to increase by the mere decrease in the general birth rate, the following table has been prepared:—

**CRUDE EX-NUPTIAL, NUPTIAL AND TOTAL BIRTH RATES, (a), COMMONWEALTH, 1902 TO 1912 (b).**

| Births.     | 1902. | 1903. | 1904. | 1905. | 1906. | 1907. | 1908. | 1909. | 1910. | 1911. | 1912. |
|-------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Ex-nuptial  | 1.55  | 1.52  | 1.63  | 1.64  | 1.65  | 1.64  | 1.64  | 1.60  | 1.54  | 1.57  | 1.58  |
| Nuptial ... | 25.16 | 23.77 | 24.78 | 24.59 | 24.92 | 25.12 | 24.95 | 25.09 | 25.19 | 25.64 | 27.07 |
| Total ...   | 26.71 | 25.29 | 26.41 | 26.23 | 26.57 | 26.76 | 26.59 | 26.69 | 26.73 | 27.21 | 28.65 |

(a) Number of births per 1000 of mean population. (b) Rates corrected in view of Census Returns, 1911.

(iii.) *Ex-nuptiality—Rates of Various Countries.* The rate for the Commonwealth is higher than that for England and Wales, slightly lower than that for Scotland, and considerably below the rates for many of the countries for which returns are available, as the table hereunder shews. The rates shewn below refer to three triennial periods, 1880-2, 1890-2, and 1900-2, and are given per thousand of the unmarried and widowed female population:—

**EX-NUPTIAL BIRTHS PER THOUSAND OF UNMARRIED AND WIDOWED FEMALE  
POPULATION IN VARIOUS COUNTRIES.**

| Country.              | Rate.   |         |         | Country.          | Rate.   |         |         |
|-----------------------|---------|---------|---------|-------------------|---------|---------|---------|
|                       | 1880-2. | 1890-2. | 1900-2. |                   | 1880-2. | 1890-2. | 1900-2. |
|                       | %       | %       | %       |                   | %       | %       | %       |
| Ireland ...           | 4.4     | 3.9     | 3.8     | Belgium ...       | 20.0    | 20.6    | 17.8    |
| Netherlands ...       | 9.7     | 9.0     | 6.8     | France ...        | 17.6    | 17.7    | 19.1    |
| England and Wales ... | 14.1    | 10.5    | 8.5     | Italy ...         | 25.4    | ...     | 19.4    |
| New Zealand ...       | 13.4    | 9.0     | 8.9     | Russia ...        | 25.8    | 25.1    | 23.7    |
| Switzerland ...       | 10.8    | 10.0    | 9.8     | Denmark ...       | 26.9    | 24.5    | 24.2    |
| Commonwealth ...      | 14.5    | 15.9    | 13.3    | Sweden ...        | 22.6    | 22.9    | 24.3    |
| Scotland ...          | 21.4    | 17.1    | 13.4    | German Empire ... | 29.6    | 28.7    | 27.4    |
| Spain ...             | 16.0    | 17.5    | 15.5    | Austria ...       | 43.4    | 42.7    | 40.1    |
| Norway ...            | 19.7    | 16.9    | 17.2    |                   |         |         |         |

It may be added that the general circumstances in Australia with regard to opportunity for marriage are probably relatively easy as compared with those in older established countries.

7. **Multiple Births.**—Among the total number of 133,088 births registered in the Commonwealth in 1912 there were 130,373 single births, 2664 twins, and 48 triplets. The number of cases of twins was 1334, four children being still-born, and the number of cases of triplets 16. The total number of mothers was, therefore, 131,725, the proportion of mothers of twins being one in every 99, and of mothers of triplets one in every 8233 of total mothers. The proportion of multiple births is a fairly constant one. In 1907 they numbered 1043 out of a total of 109,306, or one in 105; in 1908, 1065, or one in 104; in 1909, 1142, or one in 99; in 1910, 1189, or one in 99, in 1911, 1236, or one in 98, and in 1912, 1350, or one in 98. The number of cases of triplets is so small that a slight alteration in the total will completely change the proportion. Thus, there were 14 cases in 1907, or one in 7872 of total mothers, as compared with one in 18,415 in 1908; one in 8066 in 1909, one in 8893 in 1910, one in 8639 in 1911, and one in 8233 in 1912.

8. **Ages of Parents.**—The relative ages of the parents of children registered in 1912 have been tabulated, twins and triplets being distinguished from single births, and are shewn for single ages and for every State in "Bulletin of Population and Vital Statistics, No. 30; Commonwealth Demography, 1912 and previous years." In the present work the exigencies of space allow only the insertion of corresponding tables shewing the relative ages of parents in groups of five years. It will be seen from the tables that the largest number of single births occurred where the ages of both father and mother were between 25 and 29, while the largest number of twin births occurred where the ages of both father and mother were between 30 and 34. The largest number of mothers was found at ages 25 to 29.

## (a) AGES OF PARENTS IN CASES OF SINGLE BIRTHS, COMMONWEALTH, 1912.

| Age.                            | Total Fathers. | Ages of Mothers. |           |           |           |           |           |           |               |             |
|---------------------------------|----------------|------------------|-----------|-----------|-----------|-----------|-----------|-----------|---------------|-------------|
|                                 |                | Under 15.        | 15 to 19. | 20 to 24. | 25 to 29. | 30 to 34. | 35 to 39. | 40 to 44. | 45 and Upwds. | Not Stated. |

11. **Mothers' Age, Duration of Marriage, and Issue.**—A tabulation has been made shewing, in age-groups, the duration of marriage and issue of mothers. The total number of nuptial confinements in 1912 was 124,427, viz., 123,137 single births, 1275 cases of twins, and 15 cases of triplets. From this number 364 mothers must be deducted, in whose case the necessary particulars either as to date of marriage or as to previous issue were not stated. The tables refer, therefore, to a total of 124,063 mothers. They exclude children by former marriages and still-born children, but include ex-nuptial children, previous issue by the same father. The tables cannot be given *in extenso*, but the following are their most salient features. The complete tabulations are shewn in "Commonwealth Bulletin of Population and Vital Statistics, No. 30; Commonwealth Demography, 1912, and previous years."

**DURATION OF MARRIAGE AND ISSUE OF MOTHERS OF ALL AGES.**  
COMMONWEALTH, 1912.

| Total Mothers   | 4,608           | 29,098       | 37,036       | 27,884       | 17,645       | 7,071        | 721                | 124,063 |

The tables shew a fairly regular increase in the number of children up to the period where the marriage has lasted twenty years, and it appears that the average interval between successive confinements up to that period was rather more than two and a half years. The average number of children of all marriages was 3.29, the corresponding figure for 1911 having been 3.34, and for 1910, 3.41.

A similar table has been prepared shewing the previous issue of mothers of twins and triplets, from which it appears that 277 mothers had twins at their first confinement; 206 at their second; 213 at their third; 164 at their fourth; 122 at their fifth; 78 at their sixth; 79 at their seventh; 44 at their eighth; 27 at their ninth; 22 at their tenth; 11 at their eleventh; 5 at their twelfth; 4 at their thirteenth; 1 at her fourteenth; and one at her fifteenth.

Of the fifteen cases of triplets 2 occurred at the first confinement; 2 at the second; 3 at the third; 2 at the fourth; 2 at the fifth; 2 at the seventh; 1 at the ninth; and 1 at the fifteenth.

12. **Interval between Marriage and First Birth.**—The following table shows the interval between marriage and first birth. Twins and triplets are included, the eldest born only being enumerated.

**INTERVAL BETWEEN MARRIAGE AND FIRST BIRTH, COMMONWEALTH, 1912.**

| 7 "           | 1,904                     | 7 "       | 120                       | 18 "      | 8                         |
| 8 "           | 1,656                     | 8 "       | 80                        | 19 "      | 5                         |
| 9 "           | 3,802                     | 9 "       | 71                        | 20 "      | 1                         |
| 10 "          | 3,034                     | 10 "      | 66                        | 21 "      | 2                         |
|               |                           |           |                           | Total     | 34,692                    |

Of these 34,692 children 17,698 were males and 16,994 were females; the masculinity of first births was therefore 104.14 as compared with 104.54 for total births.

The previous issue of mothers of ex-nuptial children is not recorded, but for the purposes of the following table all ex-nuptial births have been assumed to be first births. The table shows the ages of mothers of ex-nuptial births, of nuptial births occurring less than nine months after marriage, and of nuptial births occurring nine months or more after marriage. A comparison of the combined total of the first two columns with the total of nuptial children born nine months or more after marriage, reveals the fact that for all ages the ratio of the two was approximately as 25 is to 28. At all ages up to and including 21, however, there was a great preponderance of ex-nuptial births and of births following on ante-nuptial conception. It must, of course, be understood that a certain number of premature births are necessarily included among the births which occurred less than nine months after marriage, but there is no means of arriving at the proportion of those births.

**AGES OF MOTHERS AND INTERVAL BETWEEN MARRIAGE AND FIRST BIRTH, etc.**

**COMMONWEALTH, 1912.**

**13. Interval between Birth and Registration of Birth.**—Information was obtained during 1912 as to the period elapsing between birth and registration. The maximum number registered was forty-one days after birth, while in the case of ex-nuptial births the greatest number of children was registered within two days after birth.

## § 2. Marriages.

1. **Marriages, 1902 to 1912.**—The number of marriages registered in the Commonwealth in 1912 was 42,147, the highest number ever recorded. There has been a steady increase in the annual number of marriages in each State since 1903, and the crude marriage-rate increased similarly in all the States until 1907, with the exception of Western Australia. In 1908 all the States, with the exception of New South Wales and Tasmania, had a lower marriage rate than in 1907, but the rate recovered in 1909 and the three following years, and was considerably higher in 1912 than in 1907 in all the States. The number of marriages in each State since 1902 is shewn below. The rate for 1912 was the highest ever experienced in the Commonwealth.

### TOTAL MARRIAGES, COMMONWEALTH, 1902 to 1912.

| Year.    | N.S.W. | Victoria. | Qld.  | S. Aust. | W. Aust. | Tas.  | North Terr. | Federal Terr. | C'wealth. |

(a) Part of New South Wales prior to 1911.

2. **Marriage Rates, 1902 to 1912.**—The number of marriages registered per thousand of mean population is shewn in the following table for the same period :—

## CRUDE MARRIAGE RATE (a), COMMONWEALTH, 1902 to 1912 (b).

| Year.    | N.S.W. | Victoria. | Qld. | S. Aust. | W. Aust. | Tas. | Nthn. Terr. | Federal Territory. | C'wealth. |
|----------|--------|-----------|------|----------|----------|------|-------------|--------------------|-----------|
| 1902 ... | 7.55   | 7.02      | 6.35 | 6.68     | 9.89     | 7.50 | 1.53        | ...                | 7.26      |
| 1903 ... | 6.90   | 6.31      | 5.70 | 6.36     | 9.40     | 7.45 | 2.76        | ...                | 6.67      |
| 1904 ... | 7.24   | 6.83      | 5.90 | 7.08     | 8.92     | 7.38 | 1.90        | ...                | 7.02      |
| 1905 ... | 7.46   | 7.28      | 6.00 | 7.21     | 8.61     | 7.40 | 1.21        | ...                | 7.25      |
| 1906 ... | 7.68   | 7.86      | 6.69 | 7.88     | 8.89     | 7.59 | 0.50        | ...                | 7.49      |
| 1907 ... | 7.89   | 7.81      | 7.56 | 8.35     | 8.27     | 7.63 | 2.35        | ...                | 7.87      |
| 1908 ... | 8.03   | 7.53      | 7.24 | 8.23     | 7.80     | 7.64 | 2.74        | ...                | 7.76      |
| 1909 ... | 8.15   | 7.48      | 7.97 | 8.43     | 7.59     | 7.85 | 2.83        | ...                | 7.90      |
| 1910 ... | 8.76   | 7.98      | 8.06 | 9.21     | 7.77     | 7.82 | 5.00        | ...                | 8.37      |
| 1911 ... | 9.19   | 8.40      | 8.41 | 9.81     | 8.44     | 7.76 | 3.01        | (c) 2.81           | 8.79      |
| 1912 ... | 9.60   | 8.65      | 8.91 | 9.62     | 8.37     | 7.86 | 7.14        | 2.95               | 9.07      |

(a) Number of marriages (not persons married) per 1000 of mean annual population. (b) Rate corrected in view of Census Returns, 1911. (c) Part of New South Wales prior to 1911.

As in some international tabulations the marriage rates are calculated per 1000 of the unmarried population of 15 years and over, the corresponding rates have been worked out for the Commonwealth for the four last Census periods. The figures comprise in each case the Census year with the year immediately preceding and the year immediately following, and are as follows:—Years 1880-82, 48.98; years 1890-92, 45.74; years 1900-02, 42.14; years 1910-12, 50.10. These rates refer, of course, to persons married and not to marriages, as do the rates in the preceding table.

3. **Marriage Rates in Various Countries.**—A comparison of the Australian marriage rate with that of European countries shews it to be considerably below the rates prevailing in the East of Europe, above those of Central and Western Europe, and much higher than those of the North of Europe:—

## CRUDE MARRIAGE RATES.—VARIOUS COUNTRIES.

| Country.              | Year. | Crude Marriage Rate. | Country.              | Year. | Crude Marriage Rate. |
|-----------------------|-------|----------------------|-----------------------|-------|----------------------|
| Rumania ...           | 1911  | 10.5                 | Russia ...            | 1905  | 7.8                  |
| Servia ...            | 1911  | 10.3                 | Austria ...           | 1911  | 7.6                  |
| Canada (Ontario) ...  | 1911  | 10.2                 | England and Wales ... | 1911  | 7.6                  |
| New South Wales ...   | 1912  | 9.6                  | Italy ...             | 1911  | 7.5                  |
| South Australia ...   | 1912  | 9.6                  | Switzerland ...       | 1910  | 7.3                  |
| Hungary ...           | 1911  | 9.3                  | United Kingdom ...    | 1911  | 7.3                  |
| Commonwealth ...      | 1912  | 9.1                  | Denmark ...           | 1911  | 7.2                  |
| Bulgaria ...          | 1908  | 8.9                  | Netherlands ...       | 1911  | 7.2                  |
| Queensland ...        | 1912  | 8.9                  | Spain ...             | 1911  | 7.1                  |
| Japan ...             | 1909  | 8.8                  | Scotland ...          | 1911  | 6.7                  |
| New Zealand ...       | 1912  | 8.8                  | Norway ...            | 1911  | 6.3                  |
| Victoria ...          | 1912  | 8.7                  | Finland ...           | 1911  | 6.0                  |
| Western Australia ... | 1912  | 8.4                  | Sweden ...            | 1911  | 5.9                  |
| Prussia ...           | 1911  | 8.0                  | Chile ...             | 1911  | 5.7                  |
| Belgium ...           | 1910  | 7.9                  | Ireland ...           | 1911  | 5.4                  |
| German Empire ...     | 1911  | 7.9                  | Ceylon ...            | 1911  | 5.2                  |
| Tasmania ...          | 1912  | 7.9                  | Jamaca ...            | 1911  | 4.3                  |
| France ...            | 1911  | 7.8                  |                       |       |                      |

4. **Age at Marriage.**—(a) The age at marriage of bridegrooms and brides will be found in the following table, the previous conjugal condition of the contracting parties being distinguished. It will be seen that no less than 1735 males were married during 1912 who were less than twenty-one years of age, of whom one was a widower. The corresponding number of females was 8605, of whom one was a widow. At the other extreme there were twenty-four men of sixty-five years and upwards, who described themselves as bachelors, and two spinsters of corresponding ages.

5. **Previous Conjugal Condition.**—In a previous table the total number of bachelors and spinsters, widowed and divorced persons, who were married during the year 1912, was shewn. In the following table the relative conjugal condition of the contracting parties is given:—

**RELATIVE CONJUGAL CONDITION OF PERSONS MARRIED, COMMONWEALTH, 1912.**

| Conjugal Condition. |               | Total<br>Bridegrooms. | Brides.    |         |           |
|---------------------|---------------|-----------------------|------------|---------|-----------|
|                     |               |                       | Spinsters. | Widows. | Divorced. |
| Bridegrooms         | Bachelors ... | 39,480                | 37,914     | 1,315   | 251       |
|                     | Widowers ...  | 2,414                 | 675        | 680     | 59        |
|                     | Divorced ...  | 253                   | 209        | 30      | 14        |
| Total Brides ...    |               | 42,147                | 38,798     | 2,025   | 324       |

6. **Birthplaces of Persons Married.**—Information as to the birthplaces of persons who were married in 1912 was not obtained in the State of Western Australia; the following figures refer, therefore, only to New South Wales, Victoria, Queensland, South Australia, Tasmania and Northern Territory and Federal Territory. As might be expected, there were more brides than bridegrooms who were natives of the Commonwealth. In "Bulletin No. 30, Commonwealth Demography," the relative birthplaces of bridegrooms and brides will be found tabulated.

### BIRTHPLACES OF PERSONS MARRIED, 1912.

#### COMMONWEALTH (a).

7. **Occupations and Ages of Bridegrooms.**—A tabulation has been made of the occupations and ages of all males married in the Commonwealth in the years 1907 to 1912. In "Bulletin No. 30" the 1912 tabulation is shewn for orders of occupations: here it is repeated for classes only, with a subdivision of the Industrial class and of the class of Primary Producers. The average ages of the persons falling under those twelve subdivisions were determined, and it appears that, apart from the Indefinite class, which consists chiefly of persons who have retired from business and who are living on their own means, and where a high average age may naturally be expected, the average age ranges from 27.58 in the Manufacturing class to 32.09 years in the Pastoral class. The averages for five years 1907-1911 have been added for the purposes of comparison. The results obtained are shewn in the following table:—

### OCCUPATIONS AND AGES OF BRIDEGROOMS, COMMONWEALTH, 1912.

| Ages at Marriage.        | Professional | Domestic. | Mercantile. | Transport and Communication. | Industrial.         |                               |                                      | Primary Producers. |           |                        |                             | Indefinite. |       |

| " " (1907-1911)          | 31.12        | 30.32     | 29.73       | 28.65                        | 28.27               | 29.11                         | 28.83                                | 30.99              | 32.50     | 29.14                  | 29.43                       | 41.60       | 41.60 |

The average age at marriage of brides has slowly risen from 25.56 years in 1907 to 25.74 years in 1912. The figures for the six years are:—1907, 25.56 years; 1908, 25.67 years; 1909, 25.74 years; 1910, 25.77 years; 1911, 25.74 years; and 1912, 25.74 years. For the five years 1907-11 the average age was 25.70 years, compared with 25.74 years in 1912.

8. **Fertility of Marriages.**—The quotient obtained by division of the nuptial births registered, say during the five years 1908 to 1912, by the number of marriages registered during the five years 1903 to 1907, i.e., the period antecedent by five years to the period of the births, has been called the "fertility of marriages." This works out at 3.87, or in other words, the number of children to be expected from every marriage in the

Commonwealth is under four. This method, while not professing any claim to accuracy, generally furnishes results which agree fairly well with those found by more elaborate and careful investigation, but in this instance it is, owing chiefly to the fictitious increase in the number of births shewn in 1912, rather higher than for a number of years past. For the period 1907-11 the result was 3.43.

9. **Registration of Marriages.**—In all the States of the Commonwealth marriages may be celebrated either by ministers of religion, whose names are registered for that purpose with the Registrar-General, or by certain civil officers, in most cases district registrars. The percentage of marriages celebrated by ministers of religion has increased from 96.47 per cent. in 1902 to 96.81 per cent. in 1912. The figures for the individual States in 1912 were: New South Wales, 97.90 per cent.; Victoria, 97.70 per cent.; Queensland, 95.27 per cent.; South Australia, 95.73 per cent.; Western Australia, 89.58 per cent.; and Tasmania, 98.80 per cent. The registered ministers in 1912 belonged to more than forty different denominations, some of which, however, can hardly be regarded as having any valid existence. A number of these have been omitted from the tabulation, and are bracketed under the heading "Other Christians." The figures for 1912 are shewn in the following table:—

MARRIAGES IN EACH DENOMINATION, COMMONWEALTH, 1912.

| Denomination.                    | N.S.W. | Vic.   | Qld.  | S.A.  | W.A.  | Tas.  | N. Ter. | Fed. Ter. | Com'-wealth. |

| Total ...                        | 16,666 | 11,738 | 5,627 | 4,056 | 2,524 | 1,506 | 24      | 6         | 42,147       |

10. **Mark Signatures.**—The marriage registers afford some clue, even if an imperfect one, to the illiteracy of the adult population, since a small and constantly diminishing percentage of bridegrooms and brides sign the registers with marks.

(i.) *Males and Females, 1902 to 1912.* For a number of years, with the exception of 1905, 1908, 1910, and 1912, mark signatures by males have been slightly more numerous than those by females, the percentages for the Commonwealth during the past eleven years having been as follows:—

## PERCENTAGE OF MARK SIGNATURES AT MARRIAGE, COMMONWEALTH, 1902 to 1912.

| Year. ... | 1902. | 1903. | 1904. | 1905. | 1906. | 1907. | 1908. | 1909. | 1910. | 1911. | 1912. |
|-----------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Male...   | 1.21  | 1.17  | 0.95  | 0.91  | 0.92  | 0.81  | 0.71  | 0.65  | 0.56  | 0.56  | 0.43  |
| Female    | 1.11  | 1.02  | 0.91  | 0.93  | 0.86  | 0.70  | 0.73  | 0.62  | 0.59  | 0.54  | 0.45  |

(ii.) *Mark Signatures in Commonwealth States, 1902 to 1912.* The following table shews that while the Tasmanian percentage has been the highest, and the Victorian the lowest, in each of the eleven years under review, there has been a marked decrease in every State:—

## PERCENTAGE OF MARK SIGNATURES AT MARRIAGE, COMMONWEALTH, 1902 to 1912.

| Year.    | N.S.W. | Vic. | Q'land. | S. Aust. | W. Aust. | Tas. | North. Terr. | Fed. Terr. | C'wealth. |

| 1906 ... | 0.94   | 0.43 | 1.67    | 0.65     | 0.66     | 2.18 | 25.00        | ...        | 0.89      |
| 1907 ... | 0.87   | 0.36 | 1.14    | 0.55     | 0.64     | 2.02 | ...          | ...        | 0.76      |
| 1908 ... | 0.79   | 0.33 | 1.20    | 0.56     | 0.82     | 1.57 | ...          | ...        | 0.72      |
| 1909 ... | 0.60   | 0.22 | 1.16    | 0.55     | 0.68     | 2.07 | 30.00        | ...        | 0.64      |
| 1910 ... | 0.61   | 0.29 | 0.92    | 0.44     | 0.52     | 1.17 | 29.41        | ...        | 0.58      |
| 1911 ... | 0.54   | 0.22 | 0.84    | 0.46     | 0.78     | 1.96 | 15.00        | (a)...     | 0.55      |
| 1912 ... | 0.33   | 0.27 | 0.60    | 0.54     | 0.61     | 1.29 | 25.00        | ...        | 0.44      |

(a) Part of New South Wales prior to 1911.

A complete disappearance of mark signatures is hardly to be expected, for the available information tends to shew that two-thirds of those who sign with marks are natives of their respective States, who apparently have not made use of the advantages offered to them by the State schools.

## § 3. Deaths.

1. *Male and Female Deaths, 1902 to 1912.*—The total number of deaths registered in the Commonwealth from 1902 to 1912 inclusive, gives an annual average of 26,621 males and 19,591 females, the details being as follow:—

## MALE DEATHS, COMMONWEALTH, 1902 to 1912.

| Year.         | N.S.W. | Vic.  | Q'land. | S. Aust. | W. Aust. | Tas.  | Nor. Terr. | Fed. Terr. | C'wealth. |
|---------------|--------|-------|---------|----------|----------|-------|------------|------------|-----------|
| 1902 ...      | 9,535  | 9,152 | 3,924   | 2,316    | 1,832    | 1,044 | 73         | ...        | 27,876    |

(a) Part of New South Wales prior to 1911. (b) Number of deaths per 1000 of mean population.

2. **Male and Female Death Rates, 1912.**—The crude male and female death rates for 1912 only are given, viz., in the last line of the preceding tables. Victoria has the highest rate both for males and for females, while South Australia has the lowest male and Western Australia the lowest female death rate. The rates for the two Territories are based on very small numbers, and comparisons with the States are misleading.

Owing to differences in the age constitution of the six States, the crude rates are not, however, strictly comparable, but for the purposes of calculating the "Index of Mortality" (see page 179) a distribution into five age-groups has, however, been made, and the death rates are shown for males and females in each State in five-year age groups for the three years 1910-1912 on page 174.

3. **Death Rates of Various Countries.**—A comparison with foreign States is, for the same reason, apt to shew the Commonwealth in too favourable a light, but even if an allowance for the different age constitution were made, it would still be found occupying a very enviable position. The following table gives particulars of the death rates of various countries for the latest available years:—

## DEATH RATES (a) OF VARIOUS COUNTRIES.

| Country.              | Year. | Crude<br>Death<br>Rate. | Country.             | Year. | Crude<br>Death<br>Rate. |
|-----------------------|-------|-------------------------|----------------------|-------|-------------------------|
| New Zealand ...       | 1912  | 8.9                     | Finland ...          | 1911  | 16.5                    |
| South Australia ...   | 1912  | 10.3                    | Ireland ...          | 1911  | 16.5                    |
| Tasmania ...          | 1912  | 10.7                    | Prussia ...          | 1911  | 17.2                    |
| New South Wales ...   | 1912  | 10.9                    | German Empire ...    | 1911  | 17.3                    |
| Queensland ...        | 1912  | 11.0                    | France ...           | 1911  | 19.6                    |
| Western Australia ... | 1912  | 11.1                    | Italy ...            | 1911  | 21.4                    |
| Commonwealth ...      | 1912  | 11.2                    | Servia ...           | 1911  | 21.8                    |
| Victoria ...          | 1912  | 12.2                    | Austria ...          | 1911  | 21.9                    |
| Canada (Ontario) ...  | 1911  | 12.6                    | Japan ...            | 1909  | 22.0                    |

| Denmark ...           | 1911  | 13.6                    | Spain ...            | 1911  | 23.2                    |
| Sweden ...            | 1911  | 13.8                    | Bulgaria ...         | 1908  | 24.3                    |
| Netherlands ...       | 1911  | 14.5                    | Hungary ...          | 1911  | 25.1                    |
| England and Wales ... | 1911  | 14.6                    | Rumania ...          | 1911  | 25.7                    |
| United Kingdom ...    | 1911  | 14.8                    | Chile ...            | 1911  | 31.1                    |
| Scotland ...          | 1911  | 15.1                    | Russia, European ... | 1905  | 31.1                    |
| Switzerland ...       | 1910  | 15.1                    | Ceylon ...           | 1911  | 34.8                    |
| Belgium ...           | 1910  | 15.2                    |                      |       |                         |

(a) Number of deaths per 1000 of mean population.

4. **Total Deaths, 1902 to 1912.**—The total number of deaths in each of the Commonwealth States during the eleven years 1902 to 1912, is shown below:—

## TOTAL DEATHS, COMMONWEALTH, 1902 to 1912.

| Year.    | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aus. | Tas.  | North Terr. | Federal Terr. | C'wealth. |
|----------|--------|-----------|---------|----------|---------|-------|-------------|---------------|-----------|
| 1902 ... | 16,646 | 16,177    | 6,204   | 4,236    | 2,823   | 1,914 | 78          | ...           | 48,078    |
| 1903 ... | 16,497 | 15,595    | 6,346   | 3,873    | 2,788   | 2,116 | 78          | ...           | 47,293    |
| 1904 ... | 15,360 | 14,393    | 5,250   | 3,719    | 2,817   | 1,974 | 59          | ...           | 43,572    |
| 1905 ... | 14,978 | 14,676    | 5,503   | 3,761    | 2,709   | 1,844 | 43          | ...           | 43,514    |
| 1906 ... | 14,975 | 15,237    | 5,095   | 3,872    | 3,084   | 2,011 | 59          | ...           | 44,333    |
| 1907 ... | 16,411 | 14,539    | 5,598   | 3,736    | 2,931   | 1,998 | 92          | ...           | 45,305    |
| 1908 ... | 16,055 | 15,766    | 5,680   | 3,834    | 2,879   | 2,129 | 83          | ...           | 46,426    |
| 1909 ... | 15,810 | 14,436    | 5,530   | 3,782    | 2,704   | 1,842 | 68          | ...           | 44,172    |
| 1910 ... | 16,158 | 14,732    | 5,744   | 4,014    | 2,740   | 2,120 | 82          | ...           | 45,590    |
| 1911 ... | 17,146 | 15,216    | 6,544   | 4,038    | 2,923   | 1,927 | 65          | (a) 10        | 47,869    |
| 1912 ... | 18,862 | 16,589    | 6,921   | 4,336    | 3,335   | 2,057 | 67          | 10            | 52,177    |

(a) Part of New South Wales prior to 1911.

5. **Crude Death Rates, 1902 to 1912.**—The death rate for 1912 shewed an increase on that for 1911 in all the States. The rates are lower than those experienced in 1902 and 1903, but are generally higher than those of any other year of the period, South Australia, Western Australia, and Tasmania being exceptions to this rule. The Commonwealth rate for 1912 was higher than in any of the other years of the period under review excepting the years 1902 and 1903.

## CRUDE DEATH RATE (a), COMMONWEALTH, 1902 to 1912 (b).

| Year.    | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | North Terr. | Federal Terr. | C'wealth. |
|----------|--------|-----------|---------|----------|----------|-------|-------------|---------------|-----------|
| 1902 ... | 11.98  | 13.40     | 12.15   | 11.90    | 13.79    | 10.93 | 17.05       | ...           | 12.49     |
| 1903 ... | 11.67  | 12.94     | 12.33   | 10.90    | 12.69    | 11.73 | 17.91       | ...           | 12.15     |
| 1904 ... | 10.67  | 11.97     | 10.06   | 10.42    | 12.04    | 10.79 | 13.98       | ...           | 11.05     |
| 1905 ... | 10.18  | 12.17     | 10.40   | 10.45    | 10.98    | 10.00 | 10.42       | ...           | 10.88     |
| 1906 ... | 9.95   | 12.55     | 9.50    | 10.66    | 12.12    | 10.91 | 14.84       | ...           | 10.92     |
| 1907 ... | 10.63  | 11.86     | 10.31   | 10.16    | 11.47    | 10.81 | 24.07       | ...           | 10.99     |
| 1908 ... | 10.20  | 12.71     | 10.26   | 10.14    | 11.17    | 11.36 | 22.71       | ...           | 11.07     |
| 1909 ... | 9.89   | 11.45     | 9.70    | 9.74     | 10.27    | 9.68  | 19.22       | ...           | 10.33     |
| 1910 ... | 9.89   | 11.49     | 9.71    | 10.09    | 10.11    | 11.10 | 24.10       | ...           | 10.43     |
| 1911 ... | 10.32  | 11.52     | 10.65   | 9.82     | 10.19    | 10.13 | 19.58       | (c) 5.62      | 10.66     |
| 1912 ... | 10.86  | 12.23     | 10.96   | 10.28    | 11.06    | 10.73 | 19.95       | 4.91          | 11.23     |

(a) Number of deaths per thousand of mean population for year. (b) Rates corrected in view of Census Returns. (c) Part of New South Wales prior to 1911.

6. **Male and Female Death Rates, 1902 to 1912.**—The rise in the Commonwealth rate from 1905 to 1907 was due to an increase in the female death rate, while the increase in 1908 was practically limited to the male death rate, as the subjoined table shews. The decrease from 1908 to 1909 was fairly equal for the male and female rates, and the increase in 1910 was due to a rise in the female rate. From 1910 to 1911, and again from 1911 to 1912 the increase in the male rate was about one and a half times as strong as that in the female rate.

## MALE AND FEMALE DEATH RATES (a), COMMONWEALTH, 1902 to 1912 (b).

| Year.            | 1902. | 1903. | 1904. | 1905. | 1906. | 1907. | 1908. | 1909. | 1910. | 1911. | 1912. |
|------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Male rate        | 13.83 | 13.37 | 12.12 | 12.14 | 12.01 | 12.11 | 12.24 | 11.51 | 11.54 | 11.82 | 12.51 |
| F'male "         | 11.02 | 10.80 | 9.88  | 9.50  | 9.73  | 9.77  | 9.81  | 9.06  | 9.24  | 9.40  | 9.84  |
| Crude total rate | 12.49 | 12.15 | 11.05 | 10.88 | 10.92 | 10.99 | 11.07 | 10.33 | 10.43 | 10.66 | 11.23 |

(a) Number of deaths per thousand of mean population. (b) Rates corrected in view of Census Returns.

**7. Infantile Death Rate.**—(i.) *Deaths and Death Rates of Male and Female Infants, 1902 to 1912.* A marked improvement has taken place in the infantile death rate since 1902, in which year it stood at 107.15 per thousand births registered, while in 1912 it had fallen to 71.74 per thousand, a rate lower than that experienced in any previous year, 1909 and 1911 excepted. In the following table, which shews both the total number of deaths of children under one year and the rate per thousand births since 1902, males and females are distinguished. The universal experience that during the first few years of life the excess of male births disappears as a consequence of the higher death rate of male infants is shewn by the fact that out of 628,609 male infants born from 1902 to 1912, 56,200 died during their first year of life, while of 597,599 female infants the number who died was only 44,297:—

**NUMBER OF INFANTILE DEATHS AND RATE OF INFANTILE MORTALITY,  
COMMONWEALTH, 1902 to 1912.**

| Year.    | Registered Deaths under one year. |          |        | Rate of Infantile Mortality (a). |          |        |
|----------|-----------------------------------|----------|--------|----------------------------------|----------|--------|
|          | Males.                            | Females. | Total. | Males.                           | Females. | Total. |
| 1902 ... | 6,008                             | 5,004    | 11,012 | 114.19                           | 99.76    | 107.15 |
| 1903 ... | 6,004                             | 4,959    | 10,963 | 119.11                           | 103.23   | 111.36 |
| 1904 ... | 4,713                             | 3,800    | 8,513  | 88.33                            | 74.87    | 81.77  |
| 1905 ... | 4,884                             | 3,696    | 8,580  | 90.62                            | 72.41    | 81.76  |
| 1906 ... | 5,002                             | 3,981    | 8,983  | 90.10                            | 76.01    | 83.26  |
| 1907 ... | 4,993                             | 3,952    | 8,945  | 88.39                            | 73.38    | 81.06  |
| 1908 ... | 4,885                             | 3,791    | 8,676  | 85.53                            | 69.65    | 77.78  |
| 1909 ... | 4,604                             | 3,559    | 8,163  | 78.73                            | 64.02    | 71.56  |
| 1910 ... | 4,916                             | 3,822    | 8,738  | 81.65                            | 67.53    | 74.81  |
| 1911 ... | 4,745                             | 3,624    | 8,369  | 75.91                            | 60.72    | 68.49  |
| 1912 ... | 5,446                             | 4,102    | 9,548  | 80.06                            | 63.04    | 71.74  |

(a) Number of deaths under 1 year per 1000 births registered.

(ii.) *Infantile Mortality, 1902 to 1912.* Divided among the States and Territories, the rate of infantile mortality during the last eleven years was as follows:—

**RATE (a) OF INFANTILE MORTALITY, COMMONWEALTH, 1902 to 1912.**

(a) Number of deaths under 1 year per 1000 births registered. (b) Part of New South Wales prior to 1911.

The movement has been a fairly regular one, shewing an increase in the rate during 1902 and 1903, and a fall since the latter year, so that the 1909 rate was lower than that for 1902 in every State. The regrettable increase in the Victorian rate for 1908 over that of 1907 was wholly due to the large mortality caused by the phenomenal heat of January, 1908. With the exception of Queensland, where the 1908 rate was exceptionally low, the 1909 rate was the lowest ever experienced up to that date in any of the States. A further rise occurred in every State in 1910, with the exception of Queensland, which was counterbalanced by a considerable decrease during 1911 in every State

but Queensland. In 1912 the rate shewed a rise in every State except Tasmania, the rise amounting to about 1 per 1000 in South Australia,  $1\frac{1}{2}$  per 1000 in New South Wales, and to 6 per 1000 in Victoria, Queensland, and Western Australia. The Commonwealth rate rose by more than 3 per 1000, and was a little higher than in 1909.

(iii.) *Infantile Mortality in Various Countries and Cities.* Compared with European countries the cities and States of the Commonwealth occupy a very enviable position, and it may be pointed out that experience has shewn that a high birth rate is often, though not invariably, accompanied by a high infantile death rate. The figures in the subjoined tables relate to the latest years for which returns are available:—

#### RATE (a) OF INFANTILE MORTALITY IN VARIOUS COUNTRIES.

| Country.              | Year. | Rate of Infantile Mortality. (a) | Crude Birth Rate. (b) | Country.          | Year. | Rate of Infantile Mortality. (a) | Crude Birth Rate. (b) |

(a) Number of deaths under 1 year per 1000 births registered. (b) Number of births per 1000 of mean population.

(iv.) *The Effect of Infantile Mortality on Birth Rate.* It has been contended by certain investigators that the birth-rate question is intimately related to that of infantile mortality, and that in many cases a declining birth rate may be to a large extent accounted for by a decline in the infantile death rate, since, in the case in which an infant has survived, the period elapsing before the birth of the next child is likely to be longer than in the case in which the infant has died. It may indeed be readily admitted that in any community the birth rate may be affected in a definite way by variations of infantile mortality, but careful investigation of the question serves to shew that, whether considered from the theoretical aspect with a view to determining the *maximum* and the *probable* effects which a given change in the rate of infantile mortality would produce in the birth rate, or from the practical point of view by observing the fluctuations in the birth rates of various countries which have been collateral with changes in their rates of infantile mortality, there is little ground for the contention that the rate of infantile mortality is an important factor in determining the variations in the birth rate. One calculation which has been made on the basis of normal Australian conditions indicates that the *maximum* effect of increasing the rate of infantile mortality 100 per cent. would, in the absence of other disturbing causes, be to increase the birth rate by only  $3\frac{1}{2}$  per cent., whilst the *probable* effect would be considerably less than this. In other words, the *maximum* effect of an increase in the rate of infantile mortality from 100 to 200 per 1000 births would be to increase the birth rate from say 30 to 31 per 1000 of population. It may be noted too, that although in some countries an increase in birth-rate accompanies an increase in the rate of infantile mortality, in others the birth rate would appear to be quite unaffected by such an increase, while in the case of England and Wales, Scotland, and Ireland, the tendency apparently exhibited is for an increase in the rate of infantile mortality to be associated with a decrease in the birth rate. The conclusion which these results appear to warrant is that although infantile mortality undoubtedly tends on the whole to increase the birth rate, the practical effect produced is so slight that the existence of such a relation may in any instance be quite masked by more important causes of variation.

8. **Deaths in Age-Groups, 1902 to 1912.**—A distribution into age-groups has been made of the 508,329 deaths which occurred in the Commonwealth from 1902 to 1912, and the results are tabulated for each State. It is, however, sufficient here to shew the results for the Commonwealth as a whole, which are as follow:—

**DEATHS IN AGE-GROUPS, COMMONWEALTH, 1902 to 1912.**

| Ages.                     | Males.  | Females. | Total.  | Percentage of Total Males. | Percentage of Total Females. | Percentage of Total. |
|---------------------------|---------|----------|---------|----------------------------|------------------------------|----------------------|
| Under 1 year ...          | 56,200  | 44,290   | 100,490 | 19.19                      | 20.55                        | 19.77                |
| 1 year and under 5 ...    | 16,770  | 15,232   | 32,002  | 5.73                       | 7.07                         | 6.30                 |
| 5 years and under 20 ...  | 16,618  | 14,930   | 31,548  | 5.67                       | 6.93                         | 6.21                 |
| 20 years and under 40 ... | 39,533  | 35,005   | 74,538  | 13.50                      | 16.24                        | 14.66                |
| 40 years and under 60 ... | 59,090  | 34,583   | 93,673  | 20.18                      | 16.05                        | 18.43                |
| 60 years and under 65 ... | 16,844  | 10,266   | 27,110  | 5.75                       | 4.76                         | 5.33                 |
| 65 years and over ...     | 87,200  | 61,090   | 148,290 | 29.78                      | 28.35                        | 29.17                |
| Age not stated ...        | 572     | 106      | 678     | 0.20                       | 0.05                         | 0.13                 |
| Total ...                 | 292,827 | 215,502  | 508,329 | 100.00                     | 100.00                       | 100.00               |

9. **Deaths at Single Ages and in Age-Groups, 1912.**—The 52,177 deaths which were registered in the Commonwealth in the year 1912 will be found tabulated under single years, and in groups of five years for each State and Territory, in "Bulletin No.

30, Commonwealth Demography, 1912." It has been thought advisable to tabulate the deaths during the first two years of life in greater detail. The first month has, therefore, been shewn in weeks, and the twenty-three months up to the end of the second year in months. This tabulation shews a great number of children dying during the first week, the number gradually diminishing towards the end of the second year. The particulars relating to the Commonwealth are given in the following table:—

## DEATHS AT SINGLE AGES AND IN AGE-GROUPS, 1912.

## COMMONWEALTH.

| Ages.                      | Males. | Females. | Total. | Ages.                       | Males. | Females. | Total. |
|----------------------------|--------|----------|--------|-----------------------------|--------|----------|--------|
| Under 1 week ...           | 1,670  | 1,146    | 2,816  | 10 years ...                | 75     | 73       | 148    |
| 1 week and under 2 ...     | 330    | 205      | 535    | 11 " ...                    | 81     | 82       | 163    |
| 2 weeks " " 3 ...          | 246    | 168      | 414    | 12 " ...                    | 83     | 68       | 151    |

The tables shew a high death rate for children under five years of age, which rapidly diminishes until at ages 10 to 14, a rate of 1.66 per 1000 was experienced, which was the lowest at any age. The rate then gradually increases with increasing age until, at the ages 90 and over, more than one-third die every year.

**10. Deaths of Centenarians, 1912.**—Particulars as to the sixteen persons who died in 1912, aged 100 years and upwards, are given in the following table. It must, of course, be understood that while the Registrars-General of the various States take the greatest care to have statements as to abnormally high ages verified as far as possible, no absolute reliance can be placed on the accuracy of the ages shewn, owing to the well-known tendency of very old people to overstate their ages. The fact must not be lost sight of in connection with this question, that while parish registers in the United Kingdom often date very far back, compulsory registration of births dates practically only from 1874, the Act passed in 1836 having left many loop-holes open for those unwilling to register the births of their children.

### DEATHS OF CENTENARIANS, 1912.—COMMONWEALTH.

14. **Index of Mortality.**—The death rates, those for age-groups on pages 171 and 174 excepted, so far shewn are crude rates, *i.e.*, they simply shew the number of deaths per thousand of mean population, without taking the age constitution of that population into consideration. It is, however, a well-known fact that the death rate and age constitution of a people are intimately related, thus, other conditions being equal, the death rate of a country will be lower if it contain a large percentage of young people (*not infants*). In order to have a comparison of the mortality of various countries on a uniform basis, so far as age constitution is concerned, the International Statistical Institute in its 1895 session recommended the universal adoption of the population of Sweden in five age-groups, as ascertained at the Census of 1890, as the standard population by which this "Index of Mortality," as distinguished from the crude death rate, should be ascertained. The calculation for 1912 is shewn below for each of the States and Territories and for the Commonwealth, the distribution of the mean population of 1912 into age-groups being in accordance with the distribution as found at the Census of 1911:—

## INDEX OF MORTALITY, 1912.—(STATES AND COMMONWEALTH).

| Age-Group.                 | Mean Population, 1912, distributed according to Results of Census of 1911. | Number of Deaths, 1912. | No. of Deaths per 1000 of Mean Population, 1912, in each Age-Group. | Age Distribution per 1000 of Standard Population. | Index of Mortality. |

| 60 " and upwards ... ..    | 299,368  | 18,639                  | 62.26   | 114.6   | 7.13               |
| Total ... ..               | 4,644,852  | 52,177                  | 11.23   | 1,000.0   | 14.08              |

NOTE.—The small number of persons whose ages were not ascertained at the 1911 Census have been proportionately distributed among the various age-groups, and the same plan has been followed in regard to the 112 persons who died in 1912, and whose ages were not stated in the certificates of death.

It will be seen that Victoria has the highest index and crude rates, while South Australia has the lowest index and lowest crude rate. The range of the indexes is slightly larger than that of the crude death rates, thus, while the latter in 1912 rose from 10.28 per thousand in South Australia to 12.23 per thousand in Victoria, a range of 1.95 per thousand, the indexes varied from 12.76 per thousand in South Australia to 14.94 per thousand in Victoria, a range of 2.18 per thousand.

For purposes of comparison with previous years the index of mortality is shewn in the following table for each of the eleven years 1902-1912 :—

## INDEX OF MORTALITY, 1902-1912 (STATES AND TERRITORIES).

| Year.       | N.S.W. | Vic.  | Qld.  | S.A.  | W.A.  | Tas.  | Northern Territory. | Federal Territory. | Commonwealth. |
|-------------|--------|-------|-------|-------|-------|-------|---------------------|--------------------|---------------|
| 1902 ... .. | 15.32  | 15.90 | 15.68 | 15.50 | 17.55 | 14.25 | ...                 | ...                | 15.70         |

| 1910 ... .. | 12.48  | 14.15 | 12.60 | 12.50 | 13.48 | 13.62 | ...                 | ...                | 13.17         |
| 1911 ... .. | 13.23  | 14.23 | 13.57 | 12.18 | 13.47 | 12.97 | (a) 17.91           | (b) 6.53           | 13.55         |
| 1912 ... .. | 13.63  | 14.94 | 13.91 | 12.76 | 14.55 | 13.69 | 17.23               | 6.36               | 14.08         |

(a) Included in South Australia prior to 1911. (b) Part of New South Wales prior to 1911.

A comparison of the above figures with the crude death rates given on a previous page shews that while the crude rate was highest in Victoria nine times in 11 years and twice in Western Australia, the index was highest in Victoria six times and in Western Australia five times in the same period. South Australia had the lowest index six times, Queensland and Tasmania each twice, and New South Wales once. The high index in Victoria is due to the large proportion of persons over 60 years of age, and in Western Australia to the heavy mortality in the early period of life.

**15. Monthly Variations in Death Rates.**—(i.) *General Death Rates.* The annual death rates, corresponding to the number of deaths registered in each equalised month, have been calculated for the six years 1907-1912, and a series of diagrams shewing the results for each State and the Commonwealth as a whole appears on page 209 of this issue, distinguishing the rates for males, females, and persons. The curves shewing the male and female rate exhibit in each State a fairly parallel course, irregularities being, however, more strongly marked in the case of the male curve.

The minimum rates in New South Wales and Queensland fall within the autumn months, from March to May, while in Victoria, South Australia, Western Australia, and Tasmania they fall in the spring months, October and November. In no case is there, however, a very great difference between the rates in spring and in autumn, the figures for the Commonwealth being 10.19 per thousand in March, and 10.34 per thousand in October. The maximum rates in New South Wales, Victoria, and Tasmania are experienced in August, and in Queensland in September, with the rates for December and January as secondary maxima. In South Australia the maximum rate of 11.33 per thousand falls in January, the rate for August standing next with 10.80 per thousand. In Western Australia the maximum rate is found in May.

(ii.) *Infantile Death Rates.* A similar series of diagrams, shewing the monthly variations in the infantile death rates, appears on page 210. With the exception of Western Australia, where the maximum occurs in May, the minima are found in the summer months in every State. The rates gradually decrease from January to March, shewing in several States a slight increase in April, with a further diminution until July. In July and August the rates rise to some extent, to fall again until October or November. From that time a rapid rise takes place, until the maximum is reached in December or January. Tasmania, where the seasons are rather later than in the continental States, shews two distinct minima in May and November, with a summer maximum in February, and a fairly high rate in September. In Western Australia the rates are moderately high in December and January, and drop until March, to rise rapidly in April and May when the maximum is reached. From May to September there is a gradual decrease, with a quick rise from the latter month until December.

16. **Causes of Death.**—(i.) Information regarding the changes in the classification of causes of death will be found in previous editions of this Year Book (*e.g.*, Year Book No. 5, pages 222 and 223). The statement will suffice, therefore, that the classification adopted by the Commonwealth Bureau of Census and Statistics is that of the International Institute of Statistics, as amended by the Committee of Revision which met in 1909. The detailed classification groups causes of death under 189 different headings in fourteen categories, as follows:—

- |   |   |
|---|---|
| i. General Diseases.  | viii. Diseases of the Skin and Cellular Tissue. |
| ii. Diseases of the Nervous System and Organs of Special Sense. | ix. Diseases of the Organs of Locomotion.       |
| iii. Diseases of the Circulatory System.                        | x. Malformations.                               |
| iv. Diseases of the Respiratory System.                         | xi. Infancy.                                    |
| v. Diseases of the Digestive System.                            | xii. Old Age.                                   |
| vi. Diseases of the Genito-urinary System and Adnexa.           | xiii. Violence.                                 |
| vii. Puerperal Condition.                                       | xiv. Ill-defined Diseases.                      |

(ii.) *Compilation of Vital Statistics for 1907 and Subsequent Years in Commonwealth Bureau.* The vital statistics of the Commonwealth from the year 1907 onward have been tabulated according to this classification in the Commonwealth Bureau, and the system is being employed in the majority of the State offices in the preparation of their monthly and quarterly bulletins of vital statistics.

(iii.) *Classification of Causes of Death, 1907 to 1912, according to Abridged International Classification.* An abridged classification, which enumerates thirty-eight diseases and groups of diseases according to the revised classification, is in use in many European and American States, while the Commonwealth Statistics have been compiled on the detailed classification of 189 headings. A table has been compiled shewing the causes of death according to the abridged classification, so that the results may be compared with those of countries which use the abridged index.

The compilations for the years 1907 to 1912 will be found in full in "Bulletins Nos. 8, 14, 20, 25, 29, and 30 of Population and Vital Statistics"; here it will suffice to give the abridged classification under thirty-eight headings for the year 1912:—

| Total—Males and Females   | 18,862 | 16,589 | 6,921 | 4,336 | 3,335 | 2,057 | 67      | 10        | 52,177       |

(d) The classification for the years 1907 to 1911 is shown for the Commonwealth in the following table, and for purposes of comparison the figures for the year 1912 have

been repeated from the preceding table. Male and female deaths for 1905, 1906, and 1907 are shewn separately on page 237 of the second issue, those for 1908 on pages 211 and 212 of the third issue, for 1909 on pages 200 and 201 of the fourth issue, for 1910 on pages 202 and 203 of the fifth issue, and for 1911 on pages 224 and 225 of the sixth issue of this Year Book; while the figures for 1912 are given on pages 182 and 183.

The figures for 1907, 1908, and 1909, which were compiled under thirty-five headings, have here been distributed among the corresponding headings of the revised classification.

## CAUSES OF DEATH—COMMONWEALTH, 1907 to 1912.

## MALES AND FEMALES.

**17. Certification of Deaths.**—Information was obtained in 1912 as to the persons by whom the 52,177 deaths which occurred in the Commonwealth were certified. The result of the enquiry shows that approximately 88.1 per cent. (in 1910, 88.1 per cent., and in 1911, 88.2 per cent.) were certified by medical practitioners, and 10.9 per cent. (in 1910, 11.1 per cent., and in 1911, 10.9 per cent.) by coroners after inquests, or magisterial enquiries, while in 1.0 per cent. (in 1910, 0.8 per cent., and in 1911, 0.9 per cent.) of the cases there was either no certificate given, or particulars were not forthcoming. The results are shewn in detail in Bulletin No. 30; a short summary will therefore suffice here:—

#### CERTIFICATION OF DEATHS, COMMONWEALTH, 1912.

| Death Certified by—                | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | N.T. | Fed.<br>Ter. | C'wlth. |
|------------------------------------|--------|-----------|---------|----------|----------|-------|------|--------------|---------|
| Medical practitioner               | 16,600 | 14,620    | 6,261   | 3,896    | 2,727    | 1,849 | 29   | 9            | 45,991  |
| Coroner ...                        | 2,229  | 1,965     | 428     | 431      | 390      | 195   | 38   | 1            | 5,677   |
| Not certified or not<br>stated ... | 33     | 4         | 232     | 9        | 218      | 13    | ...  | ...          | 509     |
| Total Deaths ...                   | 18,862 | 16,589    | 6,921   | 4,336    | 3,335    | 2,057 | 67   | 10           | 52,177  |

Of the cases certified by coroners, violent deaths numbered 2836, ill-defined cause<sup>s</sup> 289, organic heart disease 508, senile decay 456, congenital debility 189, diarrhoea and enteritis 91, Bright's disease 98, congestion and hæmorrhage of brain 120, tuberculosis of lungs 84, pneumonia 102, infantile convulsions 87, broncho-pneumonia 38, diseases of arteries, aneurisms, etc. 45, and acute and chronic alcoholism 47; a total of 4990 out of 5677.

Of uncertified causes of death, violent deaths numbered 249, senile debility 55, ill-defined causes 32, infantile convulsions 25, congenital debility 34, diarrhoea and enteritis 6, tuberculosis of the lungs 7, organic heart disease 20, and pneumonia 2; a total of 430 out of 509.

**18. Deaths from Special Causes.**—The table on p. 185 furnishes comparisons for the last six years only, and comparisons will, therefore, be restricted to that period.

(i.) *Typhoid Fever.* Deaths from typhoid fever were more numerous in 1908 than in 1907, numbering 736, against 564 in 1907. In 1909 the number fell to 661, in 1910, to 648, and to 488 in 1911. In 1912, 619 were due to typhoid fever, of which 229 occurred in New South Wales, 95 in Victoria, 141 in Queensland, 39 in South Australia, 99 in Western Australia, and 16 in Tasmania.

(ii.) *Typhus.* The death of one woman was registered in 1906 in Victoria as being due to typhus, but this registration may have been due to an error in the death certificate, and the death may possibly have been one of typhoid (enteric) fever. No deaths from typhus have been registered from 1907 to 1912.

(iii.) *Malaria.* Deaths from malarial diseases are practically confined to the tropical districts of Northern Queensland and Western Australia, and to the Northern Territory, 9 out of 17 deaths registered in 1912 having occurred in Queensland, and 1 in Western Australia.

(iv.) *Small-pox.* No deaths from small-pox occurred during the two years 1907 and 1908, but in 1909 one death was registered in Western Australia. In 1910 one death was registered in New South Wales, and three in Victoria, and in 1911, only one death occurred in New South Wales. No deaths were registered in 1912.

(v.) *Measles.* No serious epidemic of measles has occurred for several years; the deaths in 1908 were less numerous than in 1907, numbering 125, against 147. In 1909 the deaths numbered 31, while 124 were registered in 1910, and 206 in 1911. In 1912

New South Wales experienced a slight epidemic, and was responsible for 352 deaths out of 519 registered, Victoria contributing 88, Queensland 52, South Australia 14, Western Australia 1, and Tasmania 12.

(iv.) *Scarlet Fever*. 41 deaths were registered in 1912, distributed over all six States.

(vii.) *Whooping Cough*. A rather severe epidemic of whooping cough visited New South Wales in the early part of 1907, causing 592 deaths out of a total of 1070 registered in the Commonwealth. The deaths in 1908 fell to 249, with a slight increase to 257 in 1909, and a much greater increase to 476 in 1910. During 1911, however, only 291 deaths, and in 1912, 301 deaths were registered.

(viii.) *Diphtheria and Croup*. Deaths in 1907, 403; in 1908, 421; in 1909, 435; in 1910, 555; in 1911, 696, and in 1912, 754, of which 267 occurred in New South Wales, 252 in Victoria, 98 in Queensland, 57 in South Australia, 35 in Western Australia, and 45 in Tasmania.

(ix.) *Influenza*. This disease was rather more prevalent in 1907 than in the two previous years, the deaths numbering 902, against 428 and 539. The deaths in 1908 were 588; in 1909, 326; 324 in 1910; in 1911, 447; and in 1912, 386, of which 121 occurred in New South Wales, 152 in Victoria, 47 in Queensland, 21 in South Australia, 18 in Western Australia, and 27 in Tasmania.

(x.) *Asiatic Cholera*. No cases of Asiatic cholera have ever occurred in the Commonwealth.

(xi.) *Cholera Nostras*. Isolated cases only of choleric form diarrhoea occurred in each of the six years. Five deaths from this cause occurred during 1912.

(xii.) *Other Epidemic Diseases*. The number of deaths registered under this heading was 276 in 1907, 268 in 1908, 221 in 1909, 184 in 1910, 295 in 1911, and 224 in 1912. The list in 1912 includes the following diseases:—Dysentery 103, erysipelas 93, leprosy 11, of which 10 occurred in Queensland, plague 1, other epidemic diseases, 16. Prior to 1910 beri-beri was included in other epidemic diseases, but is now included in No. 37 of the revised classification. Of the 65 deaths from leprosy in the years 1907 to 1912, 50 occurred in Queensland. There were no deaths from plague in the Commonwealth during 1910 and 1911. In 1907, 48 deaths were registered; in 1908, 14 deaths; and in 1909, 13 deaths. The only death registered in 1912 occurred in the Northern Territory.

(xiii.) *Tuberculosis of the Lungs and Acute Miliary Tuberculosis*. The deaths in 1912 numbered 3146, viz., 1794 males and 1352 females. The figures for the years 1907 to 1911 were 3206, 3409, 3169, 3059, and 3164 respectively. Of the deaths in 1912, 1070 occurred in New South Wales, 1070 in Victoria, 335 in Queensland, 320 in South Australia, 222 in Western Australia, 119 in Tasmania, and 10 in Northern Territory. In accordance with the revised classification, deaths from tuberculosis of the larynx are now included with tuberculosis of the lungs, instead of in class 15 as in years prior to 1910. In the table on page 185, deaths from tuberculosis of the larynx have been included with tuberculosis of the lungs, so that the figures allow of correct comparison.

(xiii.a.) *Tuberculosis of the Respiratory System*. Of the various forms of tuberculosis prevalent in the Commonwealth, that which has probably attracted the most attention and has been the subject of the widest comment is phthisis, or tuberculosis of the lungs. The intimate relation, however, between tuberculosis of the lungs and that of other parts of the respiratory system renders it desirable that all forms of tuberculosis of the respiratory system should be brought under one head for various investigations concerning the age incidence and duration of this disease.

In the matter of the age incidence of death from tuberculosis of the respiratory system, diagrams were given in Year Books 2, 3, and 4, pp. 239, 217, and 206 respectively, shewing the frequency of deaths at successive ages in England and Wales during 1906 (Fig. 1), and in the Commonwealth during 1907 (Fig. 2). These were superseded by a fuller reference based on later results in Year Book No. 5, pp. 230, etc. The results given depended upon intercensal estimates of population, and these having now been

adjusted to agree with the Census of 3rd April, 1911, some slight amendments of the figures in previous issues were made in Year Book No. 5. The figures are not now repeated.

(xiv.) *Tuberculosis of the Meninges.* The number of deaths registered in 1907 was 237; in 1908, 205; in 1909, 220; in 1910, 215; in 1911, 269; and in 1912, 215.

(xv.) *Other Forms of Tuberculosis.* Deaths numbered in 1907, 415; in 1908, 352; in 1909, 332; in 1910, 343; in 1911, 303; and in 1912, 327. The deaths in 1912 include the following forms of tuberculosis:—Abdominal tuberculosis, 146; Pott's disease, 49; white swellings, 24; tuberculosis of other organs, 45; and disseminated tuberculosis, 63. Tuberculosis of the larynx (see paragraph xiii.)

(xvi.) *All Forms of Tuberculosis.* A complete tabulation of all the different tubercular diseases from which deaths occurred in 1912, will be found in Bulletin No. 30 of Population and Vital Statistics. Here it will suffice to show a few of the features of the tabulation mentioned. The total number of deaths due to tubercular diseases was 3688, viz., 2084 males and 1604 females. The following table shews the ages of these 3688 persons:—

#### AGES OF PERSONS WHO DIED FROM TUBERCULAR DISEASES, 1912.

##### COMMONWEALTH.

| Ages.                | Male. | Female | Total. | Ages.                 | Male. | Female | Total. |
|----------------------|-------|--------|--------|-----------------------|-------|--------|--------|
| Under 5 years ...    | 122   | 111    | 233    | 55 years and under 60 | 131   | 42     | 173    |

A tabulation has been made of the occupations of males dying from tubercular diseases during 1912. A summary is here given:—

#### OCCUPATION OF MALES WHO DIED FROM TUBERCULAR DISEASES, 1912.

##### COMMONWEALTH.

| Occupation.                                | No. of Deaths | Occupation.                       | No. of Deaths |
|--|---------------|-----------------------------------|---------------|
| Professional class ...                     | 106           | Agricultural class ...            | 156           |
| Domestic class ...                         | 79            | Pastoral class ...                | 50            |
| Mercantile class ...                       | 266           | Working in mines and quarries ... | 205           |
| Engaged in transport and communication ... | 138           | Other primary producers ...       | 12            |
| Manufacturing class ...                    | 276           | Independent means ...             | 21            |
| Engaged in building and construction ...   | 99            | Dependents ...                    | 247           |
| Other industrial workers ...               | 383           | Occupation not stated ...         | 46            |
|  |               | Total male deaths ...             | 2,084         |

The length of residence in the Commonwealth of persons who died from tubercular diseases has been tabulated for the year 1912 for all the Commonwealth States, with the following results:—

**LENGTH OF RESIDENCE IN COMMONWEALTH**  
OF PERSONS WHO DIED FROM TUBERCULAR DISEASES, 1912.

| Length of Residence in Commonwealth. | Male. | Fem.  | Total. | Length of Residence in Commonwealth. | Male. | Fem.  | Total. |
|--------------------------------------|-------|-------|--------|--------------------------------------|-------|-------|--------|
| Born in Commonwealth ...             | 1,329 | 1,333 | 2,662  | Resident 10 yrs. & under 15          | 36    | 7     | 43     |
| Resident under 1 year ...            | 44    | 24    | 68     | "    15    "    20                   | 61    | 12    | 73     |
| "    1 year ...                      | 39    | 14    | 53     | "    20    "    over ...             | 383   | 144   | 527    |
| "    2 years ...                     | 23    | 9     | 32     | Length of resid'ce not stated        | 110   | 34    | 144    |
| "    3    "    ...                   | 9     | 8     | 17     |                                      |       |       |        |
| "    4    "    ...                   | 10    | 4     | 14     |                                      |       |       |        |
| "    5    "    & under 10            | 40    | 15    | 55     | Total Deaths ...                     | 2,084 | 1,604 | 3,688  |

There would not appear, therefore, to be much ground for the statement sometimes heard that many persons arrive in Australia in the last stages of consumption.

In order to shew the prevalence of tuberculosis in the several States, the death rates from tubercular diseases are shewn in the following table, together with the percentage which deaths from tuberculosis bear on the total number of deaths registered :—

**DEATH RATES (a) FROM TUBERCULOSIS AND PERCENTAGE ON TOTAL DEATHS.**  
COMMONWEALTH, 1912.

| State.              | Death Rates (a) from Tuberculosis. |          |        | Percentage on Total Deaths. |          |        |
|---------------------|------------------------------------|----------|--------|-----------------------------|----------|--------|
|                     | Males.                             | Females. | Total. | Males.                      | Females. | Total. |
| New South Wales     | 0.80                               | 0.62     | 0.71   | 6.55                        | 6.54     | 6.55   |
| Victoria ...        | 0.95                               | 0.91     | 0.93   | 7.09                        | 8.25     | 7.61   |
| Queensland ...      | 0.78                               | 0.44     | 0.62   | 6.20                        | 4.86     | 5.69   |
| South Australia ... | 0.97                               | 0.86     | 0.92   | 8.68                        | 9.29     | 8.95   |

| Tasmania ...        | 0.58                               | 1.03     | 0.80   | 5.04                        | 10.36    | 7.44   |
| North. Territory    | 2.90                               | 3.39     | 2.98   | 13.12                       | 33.33    | 14.93  |
| Federal Territory   | ...                                | ...      | ...    | ...                         | ...      | ...    |
| Commonwealth        | 0.86                               | 0.72     | 0.79   | 6.88                        | 7.33     | 7.07   |

(a) Number of deaths from tuberculosis per 1000 of mean population.

It may be of interest to state that while deaths from pulmonary tuberculosis in the Commonwealth were 0.68 per thousand in 1912, they were 0.93 per thousand in Ontario in 1911; 1.08 per thousand in England and Wales in 1911; 1.51 per thousand in Prussia in 1911; 2.94 per thousand in Austria in 1911; and 3.67 per thousand in Hungary in 1911. The Commonwealth occupies, therefore, a very enviable position in regard to tubercular diseases, when compared with European countries.

(xvi.) *Cancer and other Malignant Tumours.* Deaths from cancer shew a tendency to increase, the figures for 1907 being 2940 deaths; for 1908, 2921 deaths; for 1909, 3112 deaths; 1910, 3205 deaths; 1911, 3321 deaths; and 1912, 3537 deaths. Of the deaths registered in 1912, 1845 were those of males, viz., 709 in New South Wales, 572 in Victoria, 221 in Queensland, 173 in South Australia, 105 in Western Australia; 62 in Tasmania; 2 in the Northern Territory, and 1 in the Federal Territory; while 1692 were those of females; viz., 578 in New South Wales, 644 in Victoria, 173 in Queensland, 152 in South Australia, 75 in Western Australia, and 70 in Tasmania. Bulletin No. 30 contains a complete tabulation of the various types of cancer and of the seat of the disease, of which the following is a summary :—

## DEATHS FROM CANCER, COMMONWEALTH, 1912.

| Seat of Disease.                                       | Male. | Female | Total. |
|--|-------|--------|--------|
| Cancer, etc., of the buccal cavity ... ..              | 260   | 31     | 291    |
| „ „ the stomach and liver ... ..                       | 779   | 501    | 1,280  |
| „ „ the peritoneum, the intestines, and the rectum ... | 220   | 219    | 439    |
| „ „ the female genital organs ... ..                   | ...   | 362    | 362    |
| „ „ the breast ... ..                                  | ...   | 276    | 276    |
| „ „ the skin ... ..                                    | 81    | 41     | 122    |
| „ „ other organs ... ..                                | 505   | 262    | 767    |
| Total Deaths ... ..                                    | 1,845 | 1,692  | 3,537  |

Of these deaths 1012 were described as cancer, 1551 as carcinoma, 145 as epithelioma, 452 as "malignant disease," 37 as "malignant tumour," 10 as neoplasm, 37 as "rodent ulcer," 275 as sarcoma, and 18 as scirrhus.

The ages of the 3537 persons who died from cancer in 1912, are shewn in the following table, from which it will be seen that while the ages below 35 are not by any means immune from the disease, the great majority of deaths occurred at ages from 35 upwards, the maximum being found in the age group 65 to 70.

## AGES OF PERSONS WHO DIED FROM CANCER, 1912.

## COMMONWEALTH.

| Ages.                 | Males. | Female | Total. | Ages.                 | Males. | Female | Total. |
|-----------------------|--------|--------|--------|-----------------------|--------|--------|--------|
| Under 15 years ...    | 18     | 15     | 33     | 65 years and under 70 | 281    | 183    | 464    |
| 15 years and under 20 | 6      | 5      | 11     | 70 „ „ 75             | 223    | 196    | 419    |

| 45 „ „ 50             | 166    | 173    | 339    |                       |        |        |        |
| 50 „ „ 55             | 199    | 187    | 386    | Total Deaths ...      | 1,845  | 1,692  | 3,537  |
| 55 „ „ 60             | 246    | 213    | 459    |                       |        |        |        |
| 60 „ „ 65             | 243    | 192    | 435    |                       |        |        |        |

A tabulation has been made of the occupations of the males who died from cancer, of which the following is a summary:—

## OCCUPATION OF MALES WHO DIED FROM CANCER, 1912.

## COMMONWEALTH.

| Occupation.                                   | No. of Deaths. | Occupation.                      | No. of Deaths. |
|---|----------------|----------------------------------|----------------|
| Professional class ... ..                     | 77             | Pastoral class ... ..            | 72             |
| Domestic class ... ..                         | 63             | Working in mines and quarries... | 136            |
| Mercantile class ... ..                       | 206            | Other primary producers ... ..   | 13             |
| Engaged in transport and communication ... .. | 124            | Independent means ... ..         | 67             |
| Manufacturing class ... ..                    | 201            | Dependents ... ..                | 61             |
| Engaged in building and construction ... ..   | 113            | Occupation not stated ... ..     | 53             |
| Other industrial workers ... ..               | 373            |                                  |                |
| Agricultural class ... ..                     | 286            | Total Male Deaths ... ..         | 1,845          |

As the following tables shew, the total death rates from cancer are below those for tubercular diseases in all the States with the exception of New South Wales, while both rates were equal in Queensland. The male death rate from cancer was, in 1912, in excess of that from tuberculosis in Tasmania, and the female death rates in New South Wales, Victoria, Queensland, and Western Australia. While the death rates from tuberculosis have a general tendency to decrease, the death rates from cancer have, on the contrary, shewn an increase in nearly every recent year. Thus for the whole Commonwealth in 1907 the death rate from tuberculosis was 0.22 per thousand greater than that from cancer, and in 1908 the excess amounted to 0.25 per thousand. In 1909 this decreased to 0.14; in 1910 to 0.10; in 1911 to 0.09; and in 1912 to 0.03 per thousand.

### DEATH RATES (a) FROM CANCER AND PERCENTAGE ON TOTAL DEATHS, 1912.

#### COMMONWEALTH.

| State.              | Death Rates (a) from Cancer. |          |        | Percentage on Total Deaths. |          |        |

The fifth issue of this Year Book contains, on pages 230, etc., a paper dealing, *inter alia*, with the incidence of cancer in the Commonwealth. The paper is not reprinted in the present issue.

(xvii.) *Simple Meningitis.* The table shews 648 deaths in 1907, 676 deaths in 1908, 616 deaths in 1909, 567 in 1910, 636 in 1911, and 749 in 1912.

(xviii.) *Apoplexy, Hæmorrhage, and Softening of the Brain.* The deaths registered under this heading in 1907 were 901, viz., 1038 males and 863 females; in 1908, 1867, viz., 991 males and 876 females; in 1909, 1665, viz., 869 males and 796 females; in 1910, 1704, viz., 864 males and 840 females; in 1911, 2178, viz., 1122 males and 1056 females, and in 1912, 2176, viz., 1146 males and 1030 females. The 1912 figures are made up of hæmorrhage of the brain and apoplexy—1086 males, 968 females, total 2054; and softening of the brain—60 males, 62 females, total 122.

(xix.) *Organic Diseases of the Heart.* The number of deaths registered in 1912 was 5267, viz., 3042 males and 2225 females. Of these deaths, New South Wales was responsible for 1119 males and 727 females; Victoria for 957 males and 873 females; Queensland for 459 males and 248 females; South Australia for 249 males and 220 females; Western Australia for 133 males and 74 females; Tasmania for 125 males and 82 females; and the Federal Territory 1 female. To the figures for 1912 correspond the following death rates and percentages to total deaths:—

**DEATH RATES (a) FROM ORGANIC HEART DISEASE AND PERCENTAGE ON TOTAL DEATHS, COMMONWEALTH, 1912.**

| State.             | Death Rates (a) from Organic Heart Disease. |          |        | Percentage on Total Deaths. |          |        |
|--------------------|---|----------|--------|-----------------------------|----------|--------|
|                    | Males.                                      | Females. | Total. | Males.                      | Females. | Total. |
| New South Wales    | 1.23  | 0.88     | 1.06   | 10.09                       | 9.36     | 9.79   |

| Commonwealth       | 1.26  | 1.00     | 1.13   | 10.05                       | 10.16    | 10.10  |

(a) Number of deaths from Organic Heart Disease per 1000 of mean population.

(xx.) *Acute Bronchitis.* The classification of causes of deaths requires deaths of persons under five years of age, which are merely ascribed to "bronchitis," to be classified under "acute bronchitis," and similarly certified deaths of older persons under "chronic bronchitis." This rule has been followed throughout in compiling the tables for 1907-1912, with the result that acute bronchitis is credited with 514 deaths in 1907, 412 deaths in 1908, 422 deaths in 1909, 420 deaths in 1910, 515 deaths in 1911, and 460 deaths in 1912, viz., 242 males and 218 females.

(xxi.) *Chronic Bronchitis.* The adjustment mentioned in the preceding paragraph gives a total of 844 deaths in 1907, 818 deaths in 1908, 897 deaths in 1909, 859 in 1910, 1046 in 1911, and 1053 in 1912, viz., 599 males and 454 females.

(xxii.) *Pneumonia.* The 1912 figures were 1385 males and 722 females, a total of 2107 deaths.

(xxiii.) *Other Diseases of the Respiratory System.* This head was established in 1910, the figures previously being included in "Other Diseases" (paragraph xxxvii.). Deaths in 1907 numbered 1689; in 1908, 1569; in 1909, 1565; in 1910, 1544; in 1911, 1872; and in 1912, 1863. The total for 1912 is made up as follows, viz.:—Diseases of the nasal fossæ, 2 deaths; diseases of the larynx, 81 deaths; diseases of the thyroid body, 14 deaths; broncho-pneumonia, 989 deaths; pleurisy, 164 deaths; pulmonary congestion and apoplexy, 211 deaths; gangrene of the lung, 28 deaths; asthma, 146 deaths; pulmonary emphysema, 9 deaths; fibroid phthisis, miners' complaint, 135 deaths; other diseases of the respiratory system (tuberculosis excepted), 84 deaths.

(xxiv.) *Diseases of the Stomach (Cancer excepted).* In 1912 this heading includes: Ulcer of the stomach, 71 males, 54 females; and other diseases of the stomach (cancer excepted), 167 males, 165 females; a total of 457 deaths. The corresponding figures for the years 1907 to 1911 were 334, 308, 272, 297, and 370 respectively.

(xxv.) *Diarrhœa and Enteritis (Children under two years only).* In 1907, deaths numbered 2733, viz., 1513 boys and 1220 girls; in 1908, 3236, viz., 1814 boys and 1422 girls; in 1909, 2803, viz., 1544 boys and 1259 girls; in 1910, 3145, viz., 1713 boys and 1432 girls; in 1911, 2462, viz., 1388 boys and 1074 girls, and in 1912, 3248, viz., 1794 boys and 1454 girls. The 1912 deaths were distributed amongst the six States as follows:—New South Wales, 753 males, 641 females, total 1394; Victoria, 422 males, 326 females, total 748; Queensland, 273 males, 217 females, total 490; South Australia, 118 males, 84 females, total 202; Western Australia, 184 males, 144 females, total 328; Tasmania, 44 males, 41 females, total 85; and Federal Territory, 1 female.

The following are the death rates and percentages on total deaths due to infantile diarrhœa and enteritis in the States and Territories for the year 1912:—

**DEATH RATES (a) FROM INFANTILE DIARRHŒA AND ENTERITIS, AND PERCENTAGE ON TOTAL DEATHS, COMMONWEALTH, 1912.**

| State.              | Death Rate (a) from Infantile Diarrhœa and Enteritis. |          |        | Percentage on Total Deaths. |          |        |

| Commonwealth        | 0.74  | 0.65     | 0.70   | 5.92                        | 6.64     | 6.23   |

(a) Number of deaths from these diseases per 1000 of mean population.

As a large number of these deaths is directly due to improper feeding, it would be interesting to know the percentage of infants who were bottle-fed, but, unfortunately, no provision exists for the registration of this information. The number of deaths was larger than usual in 1908, particularly in Victoria, and to a lesser degree in South Australia and in Tasmania, owing to the phenomenal heat experienced in the early part of that year. The death rates for the three States named were 0.83, 0.61, and 0.71 per 1000 respectively in 1908, compared with 0.55, 0.45 and 0.48 in 1907, and with 0.50, 0.36 and 0.51 in 1911. The rate in 1912 was higher in every State, Tasmania excepted, than that for 1911, the increase being particularly noticeable in New South Wales, Queensland, and Western Australia, where the 1911 rate had been 0.57, 0.58, and 0.87 respectively, compared with 0.80, 0.78, and 1.09 for 1912, as shewn in the preceding table.

(xxvi.) *Appendicitis and Typhlitis*. Prior to 1910 deaths from these causes were included in Other Diseases, paragraph xxxvii. Deaths numbered 305 in 1907, 293 in 1908, 344 in 1909, 315 in 1910, 320 in 1911, and in 1912, 347, viz., 215 males and 132 females.

(xxvii.) *Hernia, Intestinal Obstructions*. The number of deaths has not varied much from year to year, the number registered in 1907 being 411; in 1908, 389; in 1909, 396; in 1910, 398; in 1911, 439; and in 1912, 463, viz., 248 males and 215 females.

(xxviii.) *Cirrhosis of the Liver*. The deaths in 1907 numbered 325; in 1908, 362; in 1909, 331; in 1910, 368; in 1911, 385; and in 1912, 426, viz., 284 males and 142 females.

(xxix.) *Nephritis and Bright's Disease*. The number of deaths attributable to these diseases from year to year is a very large one. In 1907 there were registered the deaths of 1065 males and 695 females; in 1908, those of 1140 males and 724 females; in 1909 those of 1076 males and 723 females; in 1910, 1771, 1077 males and 694 females; in 1911, 1951, 1197 males and 754 females; and in 1912, 2188, 1352 males and 836 females. Of the deaths registered in 1912, those of 66 males and 69 females were ascribed to acute nephritis, and those of 1286 males and 767 females to Bright's disease. New South Wales was responsible for 716 deaths; Victoria for 847; Queensland for 306; South Australia for 180; Western Australia for 85; Tasmania for 49; the Northern Territory for 4, and the Federal Territory for 1; making a total of 2188.

(xxx.) *Non-cancerous Tumours and other Diseases of the Female Genital Organs*. Deaths in 1907 numbered 128; in 1908, 159; in 1909, 130; in 1910, 149; in 1911, 120; and in 1912, 145. Included in the 145 deaths registered in 1912 were the following:—Non-puerperal uterine hæmorrhage, 4; non-cancerous uterine tumours, 32; other diseases of the uterus, 32; cysts and other ovarian tumours, 29; other diseases of the female genital organs, 48.

(xxxi.) *Puerperal Septicæmia (Puerperal Fever, Puerperal Peritonitis, Puerperal Phlebitis)*. Deaths in 1907 were 179; in 1908, 202; in 1909, 201; in 1910, 218; in 1911, 209, and in 1912, 231.

(xxxii.) *Other Puerperal Accidents of Pregnancy and Confinement*. The deaths in 1907 numbered 435; in 1908, 404; in 1909, 376; in 1910, 373; in 1911, 406; and in 1912, 413. Included in the 413 deaths registered in 1912 were the following:—Accidents of pregnancy, 92; puerperal hæmorrhage, 75; other accidents of childbirth, 83; puerperal albuminuria and convulsions, 120; puerperal phlegmasia alba dolens, embolus, sudden death, 35; death following childbirth, 8.

(xxxiii.) *All Puerperal Diseases*. The 644 deaths registered in 1912 under the two preceding headings will be found tabulated in "Bulletin No. 30: Commonwealth Demography" under various aspects. It will suffice to repeat here the following facts:—

Of the 644 mothers who died in childbirth during the year 1912, 579 were married and 65 were single. As the total number of nuptial confinements was 124,427, and of ex-nuptial confinements 7299, it follows that one in 215 of married mothers, and one in 112 of single mothers, died of puerperal disease, the general proportion being one in 205, as against one in 197 in 1911, one in 196 in 1910, one in 195 in 1909, one in 181 in 1908, and one in 178 in 1907.

The ages of the mothers who died varied from 15 to 47 years, and are shewn in the following table:—

## AGES OF MOTHERS WHO DIED IN CHILDBIRTH, COMMONWEALTH, 1912.

| Age at Death. | Married Women. | Single Women. | Total. | Age at Death. | Married Women. | Single Women. | Total. |
|---------------|----------------|---------------|--------|---------------|----------------|---------------|--------|
| 15 years ...  | ...            | 3             | 3      | 32 years ...  | 30             | 1             | 31     |

| 22 " ...      | 14             | 3             | 17     | 39 " ...      | 17             | 1             | 18     |
| 23 " ...      | 31             | 6             | 37     | 40 " ...      | 14             | 1             | 15     |
| 24 " ...      | 21             | 3             | 24     | 41 " ...      | 11             | 1             | 12     |
| 25 " ...      | 24             | 4             | 28     | 42 " ...      | 7              | 2             | 9      |
| 26 " ...      | 35             | 1             | 36     | 43 " ...      | 10             | ...           | 10     |
| 27 " ...      | 22             | 1             | 23     | 44 " ...      | 9              | ...           | 9      |
| 28 " ...      | 37             | 2             | 39     | 45 " ...      | 6              | ...           | 6      |
| 29 " ...      | 25             | 3             | 28     | 46 " ...      | 1              | ...           | 1      |
| 30 " ...      | 36             | 1             | 37     |               |                |               |        |
| 31 " ...      | 35             | 2             | 37     | Total deaths  | 579            | 65            | 644    |

Of the 579 married women shewn in the above table, 17 died in Tasmania; in regard to these no information is available as to previous issue and as to duration of marriage. Of the remaining 562 women, 197 died at their first confinement, 84 at their second, 73 at their third, 59 at their fourth, 52 at their fifth, 32 at their sixth, 27 at their seventh, 15 at their eighth, 8 at their ninth, 6 at their tenth, 6 at their eleventh, 2 at their twelfth, and 1 at her thirteenth. The total number of children of the 562 mothers was 1578.

Forty-three of the mothers who died had been married less than one year, 85 between one and two years, 52 between two and three years, the duration of marriage ranging up to 26 years. This tabulation will be found in detail, and distinguishing the ages at marriage, in "Bulletin No. 30; Commonwealth Demography," as will a further tabulation shewing the duration of marriage and previous issue in combination. These tables shew, for instance, that one mother, who had been married at the age of 24 years, died at the age of 43, in the 19th year of her marriage, at her thirteenth confinement.

(xxxiii.) *Congenital Debility and Malformations.* The total deaths registered under these heads in 1912 were 3611, of whom 3577 were children under 1 year of age, inclusive of 3135 under three months. The figures include:—Malformations, 279 males, 175 females, total 454; and congenital debility, icterus, and sclerema of children under one year of age, 1835 males and 1322 females, total 3157; or a grand total of 3611. Of these deaths, 1365 were registered in New South Wales, viz., 786 males and 579 females; 1015 in Victoria, viz., 595, males and 420 females; 453 in Queensland, viz., 264 males and 189 females; 339 in South Australia, viz., 195 males and 144 females; 255 in Western Australia, viz., 160 males and 95 females; 181 in Tasmania, viz., 112 males and 69 females; 1 male in the Northern Territory, and 1 male and 1 female in the Federal Territory.

(xxxiv.) *Senile Debility.* The deaths ascribed to "old age" form a large group, and are slightly in excess of those due to infantile debility. In 1907 they numbered 3136, viz., 1721 males and 1415 females; in 1908, 3466, viz., 2027 males and 1439 females; in 1909, 3194, viz., 1829 males and 1365 females; in 1910, 3353, viz., 1905 males and 1448 females; in 1911, 3849, viz., 2225 males and 1624 females, and in 1912, 4124, viz., 2362 males and 1762 females. Of the deaths registered in 1912, 1460 occurred in New South Wales, viz., 886 males and 574 females; 1445 in Victoria, viz., 769 males and 676 females; 389 in Queensland, viz., 255 males and 134 females; 443 in South Australia, viz., 224 males and 219 females; 150 in Western Australia, viz., 105 males and 45 females; 230 in Tasmania, viz., 118 males and 112 females; 5 males and 1 female in the Northern Territory and 1 female in the Federal Territory.

Of the males whose death was described as due to senility, 6 were aged between 55 and 59; 59 between 60 and 64; 169 between 65 and 69; 348 between 70 and 74; 609 between 75 and 79; 625 between 80 and 84; 359 between 85 and 89; 136 between 90 and 94; 45 between 95 and 99; while 4 were 100 years old and upwards; and of two the age was not stated.

Of the females, 1 was between 55 and 59; 35 were between 60 and 64; 107 between 65 and 69; 237 between 70 and 74; 404 between 75 and 79; 494 between 80 and 84; 308 between 85 and 89; 131 between 90 and 94; 36 between 95 and 99; while 7 were 100 years old and upwards; and of two the age was not stated.

(xxxv.) *Violence.* A very large number of deaths is every year due to external violence, and, as might be expected from the fact that their occupations expose them much more to accidents, males largely predominate. The figures quoted are exclusive of suicides, which have been treated as a separate group. Deaths ascribed to violence numbered in 1907, 2679, viz., 2038 males and 641 females; in 1908, 2922, viz., 2187 males and 735 females; in 1909, 2664, viz., 2050 males and 614 females; in 1910, 2738, viz., 2128 males and 610 females; in 1911, 3018, viz., 2323 males and 695 females; and in 1912, 3237, viz., 2559 males and 678 females. Of the deaths registered in 1912, those of 860 males and 242 females occurred in New South Wales; those of 543 males and 190 females in Victoria; those of 463 males and 121 females in Queensland; those of 198 males and 51 females in South Australia; those of 412 males and 54 females in Western Australia; those of 77 males and 20 females in Tasmania; and those of 6 males in the Northern Territory.

The following table shews the various kinds of accidental deaths which occurred in 1912, distinguishing males and females:—

#### DEATHS FROM VIOLENCE, COMMONWEALTH, 1912.

| Cause of Death.   | Males. | Females. | Total. |
|---|--------|----------|--------|
| Poisoning by food ... ..  | 24     | 7        | 31     |
| Venomous bites and stings ... ..                                | 10     | 6        | 16     |
| Other acute poisonings ... ..                                   | 36     | 20       | 56     |
| Conflagration ... ..  | 8      | 1        | 9      |
| Burns (conflagration excepted) ... ..                           | 114    | 207      | 321    |
| Absorption of deleterious gases ... ..                          | 53     | 41       | 94     |
| Accidental drowning ... ..                                      | 643    | 89       | 732    |
| Traumatism by firearms ... ..                                   | 112    | 9        | 121    |
| Traumatism by cutting or piercing instruments                   | 3      | 2        | 5      |
| Traumatism by fall ... ..                                       | 325    | 58       | 383    |
| Traumatism in mines or quarries ... ..                          | 155    | ...      | 155    |
| Traumatism by machines ... ..                                   | 24     | ...      | 24     |
| Traumatism by other crushing (vehicles, rail-ways, etc.) ... .. | 509    | 58       | 567    |
| Injuries by animals ... ..                                      | 74     | 6        | 80     |
| Starvation, thirst, fatigue ... ..                              | 46     | 5        | 51     |
| Excessive cold ... ..   | 5      | ...      | 5      |
| Effects of heat ... ..  | 81     | 46       | 127    |
| Lightning ... ..  | 8      | 2        | 10     |
| Electricity (lightning excepted) ... ..                         | 8      | ...      | 8      |
| Homicide by firearms ... ..                                     | 14     | 3        | 17     |
| Homicide by cutting or piercing instruments...                  | 11     | 8        | 19     |
| Homicide by other means ... ..                                  | 35     | 30       | 65     |
| Fractures (cause not specified) ... ..                          | 116    | 57       | 173    |
| Other external violence ... ..                                  | 145    | 23       | 168    |
| Total Deaths ... ..   | 2,559  | 678      | 3,237  |

In every kind of violent death there was, therefore, an excess of males, with the exception of burning accidents, in which female deaths largely predominated.

The excessive heat of January, 1908, was responsible for an increase in the number of deaths caused by insolation, i.e., sunstroke and heat apoplexy, from 64 in 1907 to 246 in 1908, distributed as follows:—New South Wales, 46; Victoria, 130; Queensland, 14; South Australia, 39; Western Australia, 15; Tasmania, 2. In 1911 the deaths fell to 78, while in 1912 they numbered 127.

(xxxvi.) *Suicide*. It may be said that suicides have shown a tendency to decrease during recent years, the number in 1905 having been 520, viz., 431 males and 89 females; while in 1906 it was 499, viz., 403 males and 96 females; in 1907, 461, viz., 385 males and 76 females; in 1908, 497, viz., 413 males and 84 females; in 1909, 495, viz., 398 males and 97 females; in 1910, 516, viz., 432 males and 84 females; in 1911, 544, viz., 446 males and 98 females, and in 1912, 631, viz., 514 males and 117 females. Of the suicides in 1912, a number considerably in excess of the number in previous years, those of 195 males and 66 females, happened in New South Wales; those of 118 males and 27 females in Victoria; those of 96 males and 10 females in Queensland; those of 43 males and 6 females in South Australia; those of 48 males and 6 females in Western Australia; those of 18 males and 2 females in Tasmania, and that of 1 male in Northern Territory.

The modes adopted by persons who committed suicide in the years 1907 to 1912 were as follows:—

**NUMBER OF MALE AND FEMALE SUICIDES, COMMONWEALTH, 1907 to 1912.**

| Mode of Death.                     | Males.                    |       | Females.                  |       | Total.                    |       |
|------------------------------------|---------------------------|-------|---------------------------|-------|---------------------------|-------|
|                                    | Total of 5 years 1907-11. | 1912. | Total of 5 years 1907-11. | 1912. | Total of 5 years 1907-11. | 1912. |
| Poisoning ... ..                   | 387                       | 128   | 207                       | 70    | 594                       | 198   |
| Asphyxia ... ..                    | 7                         | 4     | 1                         | ...   | 8                         | 4     |
| Hanging or Strangulation ... ..    | 347                       | 79    | 56                        | 12    | 403                       | 91    |
| Drowning ... ..                    | 177                       | 34    | 84                        | 11    | 261                       | 45    |
| Firearms ... ..                    | 680                       | 168   | 31                        | 10    | 711                       | 178   |
| Cutting instruments ... ..         | 333                       | 76    | 38                        | 8     | 371                       | 84    |
| Precipitation from a height ... .. | 22                        | ...   | 5                         | ...   | 27                        | ...   |
| Crushing... ..                     | 28                        | 8     | 5                         | 1     | 33                        | 9     |
| Other modes ... ..                 | 93                        | 17    | 12                        | 5     | 105                       | 22    |
| Total ... ..                       | 2,074                     | 514   | 439                       | 117   | 2,513                     | 631   |

The death rates from suicides and the percentage on total deaths borne by suicides are shown in the following table:—

**DEATH RATES (a) FROM SUICIDE AND PERCENTAGE ON TOTAL DEATHS, 1912. COMMONWEALTH.**

| State.                   | Death Rates (a) from Suicide. |          |        | Percentage on Total Deaths. |          |        |

| Agricultural class                     | ... | ... | 59      | Total Deaths                  | ... | ... | 514     |

The assertion has been made that suicide has become more frequent during recent years, but an examination of the figures from the year 1871 onwards hardly bears this out. The absolute figures have certainly increased, but proportionately to the population the figures for 1906-10 were practically the same as those for 1886-90 and 1891-95. The figures for the two years 1911-12, which have been added to the table, shew, however, a regrettable increase, not only absolutely, but also in proportion to the population. No particulars are available for Western Australia prior to 1886, and from 1886 to 1895 the sexes are not distinguished. All figures for the first five periods are, therefore, exclusive of Western Australia:—

**SUICIDES, COMMONWEALTH, 1871-75 to 1911-12.**

| Period.   | Number of Suicides. |          |        | Suicides per One Million. |          |         | Suicides of Females to 100 Suicides of Males. Based on |        |

a. 1705 inclusive of Western Australian figures. b. 1984 inclusive of Western Australian figures. c. 116.49 inclusive of Western Australian figures. d. 119.11 inclusive of Western Australian figures.

In the fifth issue of this Year Book (pp. 240, etc.), the result of a series of investigations into periodicity of suicide was published. The paper was partly reprinted in the sixth issue (pp. 241, etc.), but is not repeated in the present issue.

(xxxvii.) *Other Diseases.* The number of causes included under this heading is a very large one, amounting to no less than 79 of the items shewn in the detailed classification, and deaths were recorded under every one of these with the exception of the following six:—Glanders, anthrax, rabies, pellagra, intestinal parasites, and amputation. The total number of deaths under "other diseases" in 1907 was 6677, viz., 3933 males and 2744 females; in 1908, 7417, viz., 4351 males and 3066 females; in 1909, 7419, viz., 4344 males and 3075 females; in 1910, 7794, viz., 4590 males and 3204 females; in 1911, 7652, viz., 4508 males, 3144 females, and in 1912, 8300, viz., 4777 males and 3523 females. Following the revised edition of the classification the following changes have been made in this heading during 1910: beri-beri is now included under this heading instead of under xii., "Other Epidemic Diseases." Other diseases of the respiratory system (1863 deaths) are now shewn under a new head (xxiii.), and appendicitis and typhlitis (347 deaths) under head xxvi. Some of the diseases included here account for very considerable numbers of deaths. Thus there were 804 deaths ascribed to diarrhoea and enteritis of children over two years of age and of adults, 473 to convulsions of children under five years of age; 437 to diabetes; 370 to paralysis without indicated cause; and 470 to diseases of the arteries, atheroma, and aneurism. Particulars of the deaths included in 1912 are shewn in the following table:—

**CAUSES OF DEATH INCLUDED UNDER "OTHER DISEASES," COMMONWEALTH, 1912**

| Causes.  | M.  | F.  | Total. | Causes.   | M.    | F.    | Total. |

|  |     |     |        | Total Deaths ... ..   | 4,777 | 3,523 | 8,300  |

(xxxviii.) *Unspecified or Ill-defined Diseases.* The number of cases which has to be included here is a considerable one from year to year, having numbered 1275 in 1907, 1262 in 1908, 1087 in 1909, 598 in 1910, 460 in 1911, and 590, viz., 388 males and 202 females in 1912. The detailed classification distinguishes these ill-defined diseases under three headings:—Ill-defined organic diseases, including such definitions as dropsy, anasarca, ascites, general oedema, etc.; sudden death, including syncope; and unspecified or ill-defined causes, of which the following are specimens:—Asthenia, coma, dentition, exhaustion, heart failure, etc. In 1912 the number of cases of death which would have to be classed under the first of these categories was 26; those belonging to the second, 29; and those belonging to the third, 535. It is, of course, true that there must always occur some cases where the disease is not well characterised, or where sufficient information is not procurable to allow of a clear definition being given in the certificate of death, but in the majority of cases included under this heading a more complete diagnosis and consequently a more satisfactory certificate would no doubt have been possible.

In the fifth issue of this Year Book, pp. 234, etc., some observations were published, dealing with the incidence of scarlet fever, measles, whooping cough, diphtheria and croup, typhoid, diarrhoea, enteritis, and dysentery. It has not been judged expedient to reprint the paper in the present issue.

**19. Causes of Death in Classes.**—The figures presented in the preceding paragraphs relate to certain definite causes of death. It is almost generally acknowledged that figures of this kind are of greater value in medical statistics than is a classification under general headings. The classification under fourteen general headings adopted by the compiler of The International Nomenclature is, however, shewn in the following table, together with the death rates and percentages on total deaths pertaining to those classes:

**DEATHS, DEATH RATES (a), AND PERCENTAGES ON TOTAL DEATHS IN CLASSES, 1912.—COMMONWEALTH.**

| Class.  | Total Deaths. |        |        | Death Rate. (a) |      |       | Percentage on Total Deaths. |        |        |
|---|---------------|--------|--------|-----------------|------|-------|-----------------------------|--------|--------|
|   | M.            | F.     | Total. | M.              | F.   | Total | M.                          | F.     | Total. |
| 1. General diseases ... ..  | 6,572         | 5,604  | 12,176 | 2.72            | 2.52 | 2.62  | 21.70                       | 25.60  | 23.34  |
| 2. Diseases of the Nervous System & of the Organs of Special Sense... | 2,691         | 2,113  | 4,804  | 1.11            | 0.95 | 1.03  | 8.89                        | 9.65   | 9.20   |
| 3. Diseases of the Circulatory System                                 | 3,866         | 2,801  | 6,667  | 1.60            | 1.26 | 1.43  | 12.76                       | 12.80  | 12.78  |
| 4. Diseases of the Respiratory System                                 | 3,376         | 2,107  | 5,483  | 1.39            | 0.94 | 1.18  | 11.15                       | 9.62   | 10.51  |
| 5. Diseases of the Digestive Organs...                                | 3,516         | 2,930  | 6,446  | 1.45            | 1.32 | 1.39  | 11.61                       | 13.38  | 12.36  |
| 6. Diseases of the Genito-Urinary System and Adnexa ... ..            | 1,797         | 1,062  | 2,859  | 0.74            | 0.48 | 0.62  | 5.93                        | 4.85   | 5.48   |

(a) Number of deaths per 1000 of mean population.

**20. Deaths of Children under 1 Year.**—"Bulletin No. 30; Commonwealth Demography" contains tables shewing the age at death of children dying during the first year of life from twenty causes. In the Bulletin mentioned the particulars are published for males and females separately for the States, Territories and Commonwealth, but the totals for the Commonwealth only are here shewn for both sexes combined:—

GRAPHS SHEWING TOTAL ANNUAL BIRTHS IN THE COMMONWEALTH AND STATES OF AUSTRALIA, 1860-1912.

(See Table page 146.)

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year for both Commonwealth and States, and the vertical height represents 2000 persons for the Commonwealth; and 1000 for the States.

The scale on the left relates to the Commonwealth, and that on the right to the States.

The distances upwards from the common zero lines of the States and Commonwealth, marked 0, denote the total annual number of births in the States and Commonwealth, the scale of the latter being reduced one-half.

The names of the States to which the graphs refer are written thereon, and the characters of the lines used are as follows:—Commonwealth, —————; New South Wales, - - - - -; Victoria, - - - - -; Queensland, - - - - -; South Australia, - - - - -; Western Australia, - - - - -; Tasmania, - - - - -.

GRAPHS SHEWING TOTAL ANNUAL MARRIAGES IN THE COMMONWEALTH AND STATES OF AUSTRALIA, 1860-1912.

(See Table page 159.)

**EXPLANATION OF GRAPHS.**—The base of each small square represents an interval of one year for both Commonwealth and States, and the vertical height represents 600 marriages for the Commonwealth and 300 for the States.

The scale on the left relates to the Commonwealth, and that on the right relates to the States.

The distances upwards from the zero line, marked 0, denote the total annual number of marriages in the States and Commonwealth, the scale of the latter being reduced one-half.

The names of the States to which the graphs refer are written thereon, and the lines used are similar to those for births on page 201.

GRAPHS SHEWING TOTAL ANNUAL DEATHS IN THE COMMONWEALTH AND STATES OF AUSTRALIA, 1860-1912.

**EXPLANATION OF GRAPHS.**—The base of each small square represents an interval of one year for both Commonwealth and States, and the vertical height represents 2000 persons for the Commonwealth and 1000 for the States.

The scale on the left relates to the Commonwealth, and that on the right relates to the States.

The distances upwards from the common zero line for States and Commonwealth, marked 0, denote the total annual number of deaths in the States and Commonwealth, the scale of the latter being reduced one-half.

The names of the States to which the curves refer are written thereon, and the lines used are similar to those for births on page 201.

GRAPHS SHEWING GENERAL BIRTH, NATURAL INCREASE, DEATH (MALE, GENERAL AND FEMALE), AND MARRIAGE RATES IN THE COMMONWEALTH OF AUSTRALIA, 1860-1912.

(See pages 146, 159, 168 and 218.)

EXPLANATION OF GRAPHS.—The base of each small square represents one year's interval, and the vertical height, according to the character of the curve, one half per thousand of the population—the basic line being five per thousand of the population.

GRAPHS SHEWING BIRTH RATES IN THE STATES OF NEW SOUTH WALES,  
VICTORIA, AND QUEENSLAND, 1860-1912.

(See Table page 146.)

EXPLANATION OF GRAPHS.—The base of each small square represents one year's interval, and the vertical height one birth per thousand of the population—the basic line for each State being twenty per thousand of the population.

GRAPHS SHEWING BIRTH RATES IN THE STATES OF SOUTH AUSTRALIA,  
WESTERN AUSTRALIA, AND TASMANIA, 1860-1912.

EXPLANATION OF GRAPHS.—The base of each small square represents one year's interval, and the vertical height one birth per thousand of the population—the basic line for each State being twenty per thousand of the population.

GRAPHS SHEWING DEATH RATES IN THE STATES OF NEW SOUTH WALES,  
VICTORIA, AND QUEENSLAND, 1860-1912.

(See Table page 16S.)

EXPLANATION OF GRAPHS.—The base of each small square represents one year's interval, and the vertical height one death per thousand of the population: The zero for each State is shewn by a thickened line.

GRAPHS SHEWING DEATH RATES IN THE STATES OF SOUTH AUSTRALIA,  
WESTERN AUSTRALIA, AND TASMANIA, 1860-1912.

(See Table page 168.)

EXPLANATION OF GRAPHS.—The base of each small square represents one year's interval, and the vertical height one death per thousand of the population. The zero for each State is shewn by a thickened line.

GRAPHS SHEWING GENERAL MONTHLY DEATH RATES, 1907-1912

| Total under 1 year |     | 340                | 199        | 2,702                   | 93                                 | 420            | 3,157                                      | 576                                       | 8             | 7                        | 824           | 9,548  |

It will be seen that the maximum number of deaths from syphilis, convulsions pneumonia, hernia and intestinal obstruction, malformations, congenital debility, icterus and sclerema, other diseases peculiar to early infancy, lack of care, and other external violence occurred during the first month of life, while acute bronchitis

and broncho-pneumonia were most fatal during the second month. Diarrhoea and enteritis carried off more children in the fifth month than in any other, the numbers gradually decreasing toward the end of the year. Whooping cough reached its maximum during the second and third month of life.

21. **Age at Death of Married Males and Females, and Issue.**—"Bulletin No. 30; Commonwealth Demography" contains a number of tables, for the Commonwealth, shewing the age at marriage, age at death, duration of life after marriage, birthplaces, and occupations, in combination with the issue, of married persons who died in 1912. A short summary of the tables mentioned is given hereunder. Deaths of married males in 1912 numbered 12,881, and of married females, 11,881. The ages at death of the males ranged from 18 to 105 years, and those of the females, from 16 to 108 years. The total number of children in the families of the 12,881 males was 69,089, the maximum in one family being 23; and of the 11,881 females, 62,824, with a maximum of 22. The average number of children is shewn for various age-groups in the following table:—

### AGE AT DEATH OF MARRIED MALES AND FEMALES, AND AVERAGE ISSUE.

COMMONWEALTH, 1912.

| Age at Death.      | Average Family of Males. | Average Family of Females. | Age at Death.         | Average Family of Males. | Average Family of Females. |
|--------------------|--------------------------|----------------------------|-----------------------|--------------------------|----------------------------|
| Under 20 years ... | ...                      | 1.06                       | 70 to 74 years ...    | 6.31                     | 6.59                       |

| 50 „ 54 „ ...      | 4.60                     | 4.93                       | Age not stated ...    | 4.75                     | 5.25                       |
| 55 „ 59 „ ...      | 5.20                     | 5.77                       |                       |                          |                            |
| 60 „ 64 „ ...      | 5.71                     | 5.91                       |                       |                          |                            |
| 65 „ 69 „ ...      | 6.30                     | 6.32                       | All ages ...          | 5.36                     | 5.29                       |

The figures shewn in the preceding table include the issue both living and dead; the proportion between the two, taking deceased males and females together, was about as 1000 to 311, or, roughly speaking, as ten to three. The totals are shewn in the following table:—

### ISSUE OF MARRIED MALES AND FEMALES.

COMMONWEALTH, 1912.

| Issue of Married Males. | Males. | Females. | Total. | Issue of Married Females. | Males. | Females. | Total. |
|-------------------------|--------|----------|--------|---------------------------|--------|----------|--------|
| Living ...              | 27,486 | 26,489   | 53,975 | Living ...                | 23,707 | 22,959   | 46,666 |
| Dead ...                | 8,095  | 7,019    | 15,114 | Dead ...                  | 8,559  | 7,599    | 16,158 |
| Total ...               | 35,581 | 33,508   | 69,089 | Total ...                 | 32,266 | 30,558   | 62,824 |

These figures shew a masculinity in the births of 105.90, which agrees fairly well with the experience of the birth statistics, the masculinity of the births in the Commonwealth from 1902 to 1912 having ranged from 104.54 to 106.38.

**22. Age at Marriage of Males and Females, and Issue.**—While the table giving the average families of married males and females naturally shews an increase in the averages with advancing ages at death, the following table, which gives the average families of males and females according to the age at marriage of the deceased parents, shews a corresponding decrease in the averages as the age at marriage advances :—

#### AGE AT MARRIAGE OF MALES AND FEMALES, AND AVERAGE ISSUE.

COMMONWEALTH, 1912.

| Age at Marriage.   | Average Family of Males. | Average Family of Females. | Age at Marriage.         | Average Family of Males. | Average Family of Females. |
|--------------------|--------------------------|----------------------------|--------------------------|--------------------------|----------------------------|
| Under 20 years ... | 6.33                     | 7.13                       | 55 to 59 years ...       | 0.86                     | ...                        |
| 20 to 24 years ... | 6.37                     | 5.70                       | 60 „ 64 „ ...            | 1.84                     | ...                        |
| 25 „ 29 „ ...      | 5.54                     | 4.24                       | 65 years and upwards ... | 1.18                     | ...                        |
| 30 „ 34 „ ...      | 4.82                     | 2.83                       | Age not stated ...       | 5.35                     | 5.31                       |
| 35 „ 39 „ ...      | 4.06                     | 1.55                       |                          |                          |                            |
| 40 „ 44 „ ...      | 3.53                     | 0.43                       |                          |                          |                            |
| 45 „ 49 „ ...      | 2.69                     | 0.15                       |                          |                          |                            |
| 50 „ 54 „ ...      | 1.90                     | 0.08                       | All ages ...             | 5.36                     | 5.29                       |

It will be seen that of women who were married at ages from 40 to 44 years, two in every five gave birth to a child, while in the case of women who were married at ages from 45 to 49 years, the proportion fell to about one in every seven.

**23. Duration of Life after Marriage of Males and Females.**—The duration of life after marriage has been tabulated for males and females both in combination with the age at marriage, and with the total and average issue. The tables shewing the result do not, however, lend themselves to condensation, and are, therefore, omitted here. They will be found in “Bulletin No. 30 of Commonwealth Demography,” pages 173 to 178.

**24. Birthplaces of Married Males and Females, and Issue.**—The following table shews the birthplaces of married males and females whose deaths were registered in 1912, together with their average issue. No generalisations can, of course, be made in those cases where the number of deaths is small, and where the average family had to be worked out on small figures. But where the figures are comparatively large, as in the case of natives of the Commonwealth, differences occur between the averages of the individual States which appear inexplicable on any other ground than that of inefficient registration in some of the States. It will be noted that the differences occur both in the male and female averages. Although the figures apply to the Commonwealth as a whole, it must be borne in mind that the vast majority of deaths of natives of any one State are registered in that particular State. The average family of all deceased males who were natives of the Commonwealth was 4.77, and that of deceased females who were natives of the Commonwealth, 4.45.

**BIRTHPLACES OF MARRIED MALES AND FEMALES, AND AVERAGE ISSUE.**

25.—Occupations of Married Males, and Issue.—A final tabulation shows the average issue in combination with the occupation of deceased males. When these figures are available for a number of years they will afford some clue to the much debated question as to the decrease in the birth rate among various classes of the population.

**OCCUPATIONS OF MARRIED MALES, AND AVERAGE ISSUE.**

COMMONWEALTH, 1912.

| Occupations.                           | Deaths of Married Males. | Average Family. |
|--|--------------------------|-----------------|
| Professional class                     | 696                      | 4.73            |
| Domestic class                         | 433                      | 4.04            |
| Mercantile class                       | 1,566                    | 4.66            |
| Engaged in transport and communication | 1,014                    | 4.74            |
| Manufacturing class                    | 1,485                    | 5.12            |
| Engaged in building and construction   | 842                      | 5.43            |
| Indefinite industrial workers          | 2,107                    | 5.17            |
| Agricultural class                     | 2,131                    | 6.65            |
| Pastoral class                         | 477                      | 6.11            |
| Working in mines and quarries          | 986                      | 5.46            |
| Other primary producers                | 83                       | 4.83            |
| Independent means                      | 626                      | 5.85            |
| Dependents                             | 82                       | 3.94            |
| Occupation not stated                  | 353                      | 5.75            |
| Total                                  | 12,881                   | 5.36            |

In the fifth issue of this Year Book (pp. 227 to 229), a series of observations was published dealing with the Commonwealth Rates of Infantile Mortality. These observations are not reprinted in the present issue.

### § 4. Graphical Representation of Vital Statistics.

1. **General.**—The progressive fluctuations of the numbers representing the total births and marriages are important indexes of the economic conditions and social ideals of a community. For this reason graphs have been prepared (see pages 201 and 202), shewing these fluctuations from 1860 to 1912, both for the States and the Commonwealth. The facts are very significant from the national point of view and call for serious consideration. To properly appreciate the situation it should be remembered that, normally, the increase of births and also of marriages will be similar to the increase of population. Although the marriage curve shows a falling off in marriages after 1891 (see page 202), it shows a recovery in 1894, and, with the exception of a small fall for 1903, it has continually advanced. The same characteristic is not seen in the curve of births, which discloses a recovering tendency only in 1904.

The table printed below shows the number of births, marriages and deaths which would have been experienced had the rate for 1890 continued, and reveals the significance of the facts disclosed by the curves. It may be remarked that the death rate has greatly improved, and among other countries Australia stands in a very favourable position in this respect. At the same time the decline in the marriage rate, overtaken once more in 1907, and the still more serious decline in the birth rate, in a country but sparsely populated, have an obvious and most important bearing on the national future, and on questions concerning the extent to which it is desirable to promote immigration.

#### ACTUAL BIRTHS, DEATHS, AND MARRIAGES.

EXPERIENCED IN THE COMMONWEALTH DURING THE YEARS 1890 TO 1912,  
COMPARED WITH THE NUMBER THAT WOULD HAVE OCCURRED IF THE  
RATES OF 1890 HAD REMAINED IN OPERATION.

| Year. | BIRTHS. |   | DEATHS. |   | MARRIAGES. |   |
|-------|---------|---|---------|---|------------|---|
|       | Actual. | Number of Births that would have been experienced if the 1890 birth rate had been in operation. | Actual. | Number of Deaths that would have been experienced if the 1890 death rate had been in operation. | Actual.    | Number of Marriages that would have been experienced if the 1890 marriage rate had been in operation. |
| 1890  | 108,683 |   | 44,449  |   | 23,725     |   |
| 1891  | 110,187 | 111,802   | 47,430  | 45,737  | 23,862     | 24,419  |
| 1892  | 110,158 | 114,502   | 42,268  | 46,842  | 22,049     | 25,009  |
| 1893  | 109,322 | 116,617   | 45,801  | 47,707  | 20,631     | 25,470  |
| 1894  | 104,660 | 118,734   | 42,958  | 48,573  | 20,625     | 25,933  |
| 1895  | 105,084 | 121,002   | 43,080  | 49,501  | 21,564     | 26,428  |
| 1896  | 100,134 | 123,212   | 45,202  | 50,405  | 23,068     | 26,911  |
| 1897  | 101,137 | 125,419   | 43,447  | 51,308  | 23,939     | 27,393  |
| 1898  | 98,845  | 127,371   | 51,406  | 52,106  | 24,472     | 27,819  |
| 1899  | 100,688 | 129,088   | 47,629  | 52,809  | 25,958     | 28,194  |
| 1900  | 102,221 | 130,848   | 44,060  | 53,529  | 27,101     | 28,579  |
| 1901  | 102,945 | 132,599   | 46,330  | 54,245  | 27,753     | 28,961  |
| 1902  | 102,776 | 134,603   | 48,078  | 55,065  | 27,926     | 29,399  |
| 1903  | 98,443  | 136,189   | 47,293  | 55,714  | 25,977     | 29,745  |
| 1904  | 104,113 | 137,917   | 43,572  | 56,420  | 27,682     | 30,122  |
| 1905  | 104,941 | 139,959   | 43,514  | 57,256  | 29,004     | 30,569  |
| 1906  | 107,890 | 142,030   | 44,333  | 58,103  | 30,410     | 31,021  |
| 1907  | 110,347 | 144,248   | 45,305  | 59,011  | 32,470     | 31,505  |
| 1908  | 111,545 | 146,720   | 46,426  | 60,022  | 32,551     | 32,045  |
| 1909  | 114,071 | 149,526   | 44,172  | 61,170  | 33,775     | 32,658  |
| 1910  | 116,801 | 152,869   | 45,590  | 62,537  | 36,592     | 33,388  |
| 1911  | 122,193 | 157,072   | 47,869  | 64,257  | 39,482     | 34,306  |
| 1912  | 133,088 | 162,477   | 52,177  | 66,468  | 42,147     | 35,487  |

2. **Graphs of Annual Births, Commonwealth and States** (page 201).—A striking feature of the graphs of births is the practically continuous increase in the number of births exhibited in the graph for the Commonwealth from 1860 to 1891, and the marked variations of subsequent years. As the curve clearly shews, a turning point in the number of births occurred in 1891, whilst, as regards the separate States, New South Wales and Tasmania date their decline in number from 1893, Victoria from 1891, and Queensland from 1890. In South Australia the corresponding decline took place as early as 1885, while in Western Australia the increase in number of births has been practically continuous throughout.

It is of special interest to note the decline in births associated with the commercial crisis of 1891-3, and also the decline occurring in 1903, an accompaniment of the severe drought of that period.

In the case of New South Wales the graph crosses that of Victoria in 1879, *i.e.*, the births for that year were sensibly identical in the two States. A fairly continuous increase was experienced in the former State from 1860 to 1893, the only marked fluctuation being a sudden decline in 1889 and an equally rapid recovery in 1890. From 1893 to 1898 a somewhat rapid decline again took place, succeeded by a rise, the continuity of which was broken only by a sharp decline in 1903 and recovery in 1904.

In the case of Victoria the graph shews the increase between 1860 and 1880 to have been comparatively slight, the curve being a gradual rise, with fluctuations more or less marked to 1873, with a subsequent decline. From 1880 to 1891 the increase in the number of births is seen to be very rapid and practically continuous, while from 1891 to 1898 an equally sharp and continuous decline was experienced. A further rise and fall took place between 1898 and 1903, succeeded by a continuous rise from the last-mentioned year to 1907, and a slight fall in 1908, followed by a recovery in 1909.

Starting in 1860 with a lower number of births than any State except Western Australia, the Queensland graph shews that the births increased somewhat rapidly until 1867. The equality in the number of births in Queensland and Tasmania in 1864 is shewn by the Queensland curve crossing the Tasmanian curve at the line for that year. From 1867 to 1882 a continuous though somewhat less rapid increase was experienced, followed by a very rapid rise to 1890, in which year Queensland's maximum number of births was recorded. The South Australian graph is crossed by that of Queensland at the year 1885. From 1890 onwards the number of births has fluctuated somewhat, but has, on the whole, retained a practically stationary position at a height rather less than that of 1890. The most serious variation was a sudden fall in 1903, the drought year, and rapid recovery in 1904, with a further fall in 1905 and a continuous rise since 1906.

The South Australian graph, a slow but practically continuous rise from 1860 to 1885, exhibits the steady increase in the total number of births. This rise is followed by a slow but fluctuating decline to 1903, and a slight recovery to 1912.

The Tasmanian curve may be regarded as made up of five portions, of which the first, from 1860 to 1877, represents a period of very slight variation, with, on the whole, an increase; the second, from 1877 to 1884, a period of continuous and moderately rapid increase; the third, from 1884 to 1893, a period of rapid increase; the fourth, from 1893 to 1898, a period of continuous but slow decrease; and the fifth, from 1898 onwards, a period of steady recovery.

The Western Australian curve indicates that an increase, which was practically continuous but very slow, took place from 1860 to 1884, and that a somewhat quicker rate of increase, experienced from 1884 to 1896, was succeeded by a still more rapid and very satisfactory rate of increase from 1896 onwards.

It will be seen that the years in which the highest points were reached by the several curves are as follows :—

|           |        |      |         |          |          |      |           |
|-----------|--------|------|---------|----------|----------|------|-----------|
| State ... | N.S.W. | Vic. | Q'land. | S. Aust. | W. Aust. | Tas. | C'wealth. |
| Year ...  | 1912   | 1891 | 1912    | 1912     | 1912     | 1912 | 1912      |

**3. Graphs of Annual Marriages, Commonwealth and States** (page 202).—The Commonwealth marriage graph from 1860 to 1885 reveals a moderate but somewhat fluctuating increase in the annual number of marriages between 1860 and 1871, a more rapid increase between 1871 and 1879, a still more rapid increase between 1879 and 1885. From 1885 to 1891 the numbers continued to increase, but with marked fluctuations in rate. The financial crisis associated with the period subsequent to the latter year was accompanied by a strongly-marked decline in the number of marriages, which reached its lowest point in 1894. From that year onwards a fairly rapid recovery was effected, the record for 1891 being exceeded by that of 1897. This progress was maintained until 1902, when the severe drought of that and the succeeding year were collateral with a rapid fall in the number of marriages. An equally rapid recovery, however, has since taken place, and the number of marriages in the Commonwealth during 1912 was greater than in any preceding year.

**4. Graphs of Annual Deaths, Commonwealth and States** (page 203).—The curves shewing the progression of the annual number of deaths indicate clearly that the periods for which exceptionally large numbers of deaths occurred were:—(a) 1866-7, (b) 1875-6, (c) 1884-5, (d) 1889-1891, (e) 1893, (f) 1898, and (g) 1902-3. It is remarkable that in each of the periods specified the phenomenon of a relatively high number of deaths was experienced in the majority of the States. Thus, as regards 1866-7, all the States except Western Australia and Tasmania were so affected; in 1875-6 all except Western Australia; in 1884-5 all were affected; in 1889 all except Western Australia and South Australia; in 1891 all except Queensland; whilst in 1893 and 1898, and 1902-3 all were affected. The fact that the periods of high death rates have been practically identical in the several States furnishes an indication that the excessive mortality has been due to a considerable extent to some common cause operating throughout the Commonwealth.

It may be noted as curious that periods of heavy mortality have occurred at intervals of approximately nine years, viz.:—1866-7, 1875-6, 1884-5, 1893, and 1902-3. There are, however, two marked increases between the third and fourth dates, and one between the fourth and fifth. Thus there is no real indication of the periodicity of the death rate.

Periods in which the number of deaths was exceptionally low are far less clearly defined than those in which the number was high, and the agreement amongst the States is also less complete. The principal periods of low mortality may be said to be 1861, 1869-71, 1879, 1892, 1897, 1900, 1904-5, 1909.

**5. Graphs of Annual Birth, Death, and Marriage Rates and of Rate of Natural Increase—Commonwealth** (page 204).—(i.) *General*. These graphs represent the number of births, deaths, and marriages, and the excess of births over deaths (natural increase) per 1000 of the population of the Commonwealth, for each of the years 1860 to 1912.

(ii.) *Births*. In the case of births, the graph indicates a well marked decline in rate during the period, and represents a fall from 42.56 per 1000 of population in 1860 to 28.65 per 1000 in 1912. This enormous reduction has been subject to small fluctuations during the period under review, but may, on the whole, be said to have been in evidence throughout. There are, however, two periods of arrested decline noticeable, one from 1877 to 1890, and the other from 1898 to the present time. The course of the graph thus indicates a rapid fall from 42.56 in 1860 to 34.99 in 1877, succeeded by a fluctuating but, on the whole, fairly stationary period to 34.98 in 1890, then a fall even more rapid to 27.15 in 1898, and a further comparatively stationary period to 28.65 in 1912. The lowest point reached, viz., 25.29, was attained in 1903, the year in which the Commonwealth suffered severely from the worst drought it has ever experienced.

Since then a small but well defined advance in the birth rate has been in evidence. A declining birth rate is usually due to complex causes, amongst which the variations in the age constitution of the population, and the adoption of preventative measures, are generally considered the most potent.

(iii.) *Deaths.* The three graphs relating to deaths furnish particulars concerning the rates experienced during the period amongst males and females separately, and in the population as a whole, the latter occupying naturally a position between the other two. Throughout the period the rate for males has largely exceeded that for females, but the fluctuations in the two rates have synchronised remarkably, indicating that the conditions which have been responsible for the marked variations which have occurred from time to time have affected males and females alike. On the whole, the graphs furnish clear evidence of a satisfactory decline in the death rate of the Commonwealth, a fall having taken place from 20.86 in 1860 to 11.23 in 1912. The graphical representation of the death rates brings into prominence five years in which the rates were exceptionally high when compared with those of adjacent years. These years are 1860, 1866, 1875, 1884, and 1898. The principal cause of the excessive rate of 1860 was the prevalence in that year of measles, scarlatina, and diphtheria, while the high rates of 1866, 1875, and 1898 were also largely due to epidemics of measles. Prior to 1892, when a rate of 12.91 was experienced, the lowest general death rate for the Commonwealth was that of 1871, viz., 13.24. The highest male death rate for the period was 20.97 in 1860, and the lowest 11.51 in 1909. For females the highest was 20.71 in 1860, and the lowest 9.06 in 1909. The difference between the male and female rate has, since 1869, been fairly constant, and has ranged between 1.97 and 3.44, with a mean value of about 2.7.

(iv.) *Marriages.* In the case of the graph representing marriage rates, the fluctuations are less abrupt than in the case of the birth rate and death rate graphs, and the rate for 1912, the final year of the period, viz., 9.07, does not differ very considerably from that of 1860, which was 8.42. The lowest marriage rate for the period was that of 1894, viz., 6.08, marking the culmination of the commercial and financial depression indicated by the declining rates from 1888 onwards. From 1894 to the present time a satisfactory increase has been in evidence, disturbed only by the sharp decline which, in 1903, accompanied the severe drought experienced in the Commonwealth in that year.

(v.) *Natural Increase.* This graph, which represents the excess of births over deaths per 1000 of population, exhibits marked fluctuations arising from the combined fluctuations in birth and death rates. Thus, corresponding to the high death rates of 1860, 1866, 1875, and 1898, there are exceptionally low rates of natural increase, accentuated in the last-mentioned year by a comparatively low birth rate. A combination of low birth rate and comparatively high death rate was also responsible for a very low rate of natural increase in 1903. The highest rate of natural increase for the period was 26.58 in 1864, and the lowest 13.03 in 1898.

**6. Graphs of Annual Birth Rates—States** (pages 205 and 206).—These graphs furnish for the several States information similar to that supplied in the graph on page 204 for the Commonwealth as a whole. It will be seen that in every case the total effect has been an extensive decline in rate, subject to very marked fluctuations. In all the States the period from 1875 to 1885 was one of arrested decline, if not of actual advance, in the birth rate. With the exception of the very low rate accompanying the drought in 1903, the variations in any of the States since 1901 have not been very marked, and in some cases a slight tendency to increase is in evidence.

The highest birth rates during the period were as follows:—New South Wales (1864), 44.00; Victoria (1862), 44.71; Queensland (1860), 47.93; South Australia (1862),

45.44 ; Western Australia (1860), 38.96 ; and Tasmania (1884), 36.63. The following were the lowest rates for the period :—New South Wales (1903), 25.44 ; Victoria (1910), 24.51 ; Queensland (1903), 24.53 ; South Australia (1903), 23.84 ; Western Australia (1896), 23.44 ; Tasmania (1899), 27.43.

**7. Graphs of Annual Death Rates—States** (pages 207 and 208).—These graphs furnish for the several States similar information to that given for the Commonwealth as a whole in the diagram on page 204, and indicate in each case a satisfactory decline in death rate. It may be noted that an exceptionally high death rate was experienced in all the States in 1875, and that a similar uniformity, though on a smaller scale, is observable for the year 1898, the principal cause in each case having been an epidemic of measles. The highest death rates experienced during the period were as follows :—New South Wales (1867), 19.79 ; Victoria (1860), 22.77 ; Queensland (1866), 25.96 ; South Australia (1875) 19.97 ; Western Australia (1884), 21.54 ; and Tasmania (1875), 19.99. The following were the lowest death rates for the period :—New South Wales (1909 and 1910), 9.89 ; Victoria (1909 and 1911), 11.45 ; Queensland (1906), 9.50 ; South Australia (1909), 9.74 ; Western Australia (1910), 10.11 ; and Tasmania (1909), 9.68.

**8. Graphs shewing Variations in Annual Death Rates from Month to Month.**—The graphs on pages 209 and 210 shew for the Commonwealth as a whole and for each of the six States the annual death rates for males, females, and persons calculated for equalised months, and the infantile death rate, calculated in the same way, and also distinguishing males, females, and persons. Further particulars in regard to these graphs will be found on page 180.

## SECTION VI.

### LAND TENURE AND SETTLEMENT.

#### § 1. Introduction and Early History.

1. **Introduction.**—A comprehensive description, in a classified form, of the land tenure systems of the several States has been given in preceding issues of this book; see especially Year Book No. 4 (pp. 235 to 333). The details of that description have been necessarily condensed in the present issue, and for more complete information for past years, reference may therefore be made to Year Book No. 4. The historical matter dealing with the development of land legislation in the individual States may be found in Year Book No. 2 (pp. 263 to 272), and in a more condensed form in Year Books No. 3 (pp. 245 to 254), and No. 4 (pp. 235 to 244).

#### § 2. Land Legislation in Individual States.

1. **New South Wales.**—(i.) *Acts now in Force.* The Crown Lands Act of 1884 and the supplementary Act of 1889 were passed chiefly for the purpose of putting an end to speculative selection without *bonâ fide* intention of settlement. Pastoral leases were required to be surrendered to the Crown and divided into two equal parts, one of which was returned to the lessee under a lease with a fixity of tenure for a term of years, the other half the lessee was allowed to hold under an annual occupation license, but this half was always open for selection.

Nevertheless accumulation of land into large estates continued, and settlement proceeded slowly. Entirely new principles of agrarian legislation have been embodied in the Crown Lands Acts 1895 to 1912, the Labour Settlements Act 1902, the Closer Settlement Acts 1904 to 1909, and the Closer Settlement Promotion Act 1910, which offer *bonâ fide* settlers special inducements by the introduction of new forms of tenure on easy terms and conditions.

(ii.) *The Western Lands Acts.* All Crown lands in the Western Division of New South Wales are now subject to the special provisions of the Western Lands Acts 1901 and 1905. All leases or occupation licenses could be brought within the provisions of the Western Lands Act by application before the 30th June, 1902. Otherwise the leases or licenses were dealt with by the Board as if the Act had not been passed. All leases issued or brought under the provisions of the Western Lands Acts expire on the 30th June, 1943, except in cases where part of the land leased is withdrawn for the purpose of sale by auction, or to provide small holdings, in which case an extension of the term of lease of the remainder may be granted as compensation for the part withdrawn.

2. **Victoria.**—(i.) *Acts now in Force.* The Consolidating Land Act of 1901, amended by the Acts of 1903, 1904, 1905, 1909, 1910, and 1911, deals with the whole system of land occupation and alienation in this State. Closer Settlement was provided for by the Land Acts of 1898 and 1901 and amendments, until the introduction of the Closer Settlement Act 1904, amended in 1906, 1907, 1909, 1910, and 1911. Other special forms of tenure have been provided for by the Settlement on Lands Act 1893, and the Small Improved Holdings Act 1906; these, however, are now embraced in the Land Acts and Closer Settlement Acts respectively.

The Land Act 1910 allows large tracts of land in the counties of Millewa, Croajingolong, and Dargo hitherto reserved for public purposes to be dealt with as unalienated Crown Lands. It is proposed to pass an amending and consolidating Land Act at an early date.

(ii.) *Mallee Lands.* The lands in the Mallee territory, comprising an area of about 11,000,000 acres in the north-western district of the State, can be cleared at a moderate expenditure. An extension of railway facilities and of successful systems of water supply should bring this territory into greater prominence as a field for agricultural enterprise. More than one-half of this area is unalienated and available for occupation.

Alienation of Mallee lands is now dealt with by a special part of the Land Act of 1901 (see § 6, 3, iii.), as amended in 1904, by the Murray Settlements Act 1907, and by the Land Act 1911.

3. *Queensland.—Acts now in Force.* The Closer Settlement Act 1906 and the Land Act 1910 control the alienation of Crown lands in this State. The latter Act consolidates, amends and simplifies the law relating to the occupation and alienation of Crown lands.

4. *South Australia.—Acts now in Force.* The Crown Lands Act 1903, amended in 1905, 1906, 1909, 1910, 1911, and 1912, repealed and consolidated previous Land Acts, and also repealed the earlier Closer Settlement and Village Settlement Acts. Acts amending the provisions relating to Closer Settlement were passed in 1910, 1911, and 1912. The Pastoral Act 1904 controls the pastoral occupation of lands, and the Irrigation and Reclaimed Land Acts of 1908, 1909, and 1910 provide for leases of reclaimed and irrigable lands.

5. *Western Australia.—Acts now in Force.* The Land Act 1898, which consolidated previous legislation as to the management of Crown lands, has in turn been amended at various times, and, with such amendments, is now in force. The principle of repurchasing Crown lands for the purpose of Closer Settlement was introduced by the Agricultural Lands Purchase Acts 1896 to 1904; these Acts were repealed and consolidated by the Agricultural Lands Purchase Act 1909.

6. *Tasmania.—Acts now in Force.* The law relating to land tenure and settlement is now consolidated in the Crown Lands Act 1911; and in Closer Settlement Acts 1906, 1907, 1908, and 1911.

7. *Northern Territory.—*Prior to the transfer of the Northern Territory to the Commonwealth on the 1st January, 1911, the sale and occupation of lands in the Territory were regulated by the Northern Territory Crown Lands Act 1890, the Northern Territory Land Act 1899, and the Northern Territory Tropical Products Act 1904, but from that date the further alienation and occupation of land in the Territory were suspended, pending a complete reorganisation of the system of land settlement by the Commonwealth Government. In December, 1912, an ordinance, cited as the Crown Lands Ordinance 1912, dealing with this question, was made, by which the conditions of land tenure and settlement in the Territory are now determined. Under this ordinance no further alienation of Crown lands is permitted, unless such alienation is in pursuance of existing agreements.

8. *Administration and Classification of Crown Lands.*—In each of the States of the Commonwealth there is now a Lands Department under the direction of a responsible Cabinet Minister, who is charged generally with the administration of the Acts relating to the alienation, occupation, and management of Crown lands. The administrative functions of most of the Lands Departments are to some extent decentralised by the division of the States into what are usually termed Land Districts, in each of which there is a Lands Office, under the management of a land officer, who deals with applications for selections and other matters generally appertaining to the administration of the Acts within the particular district. In some of the States there is also a Local Land Board or a Commissioner for each district or group of districts. In the Northern Territory the administration of the regulations relating to the occupation and management of Crown lands is in the hands of a Classification Board, consisting of the Director of Lands, the Director of Agriculture, and the Chief Surveyor.

In most of the States, Crown lands are classified according to their situation, the suitability of the soil for particular purposes, and the prevailing climatic and other conditions. The modes of tenure under the Acts, as well as the amount of purchase money or rent and the conditions as to improvements and residence, may vary in each State according to the classification of the land. The administration of certain special Acts relating to Crown lands has in some cases been placed in the hands of a Board under the general supervision of the Minister; for such purpose, for instance, are constituted the Western Lands Board in New South Wales, the Lands Purchase and Management Board in Victoria, and the Closer Settlement Board in Tasmania.

In each of the States and in the Northern Territory there is also a Mines Department, which is empowered under the several Acts relating to mining to grant leases and licenses of Crown lands for mining and auxiliary purposes. Such leases and licenses are more particularly referred to in a later part of this section. (See § 9.)

Full information respecting lands available for settlement or on any matter connected with the selection of holdings may be obtained from the Commonwealth representative in London, from the Lands Departments, or from the Agents-General of the respective States. The administration and classification of Crown lands in each State were more fully dealt with in Year Book No. 2, (p p. 273-6).

### § 3. Tenures under which Crown Lands may be Alienated or Occupied.

1. **Introduction.**—The freehold of Crown lands in the several States of the Commonwealth may now ordinarily be alienated either by free grant (in trust for certain specified purposes), by direct sale and purchase (which may be either by agreement or at auction), or by conditional sale and purchase. Crown lands may be occupied in the several States under a variety of forms of leases and licenses, issued both by the Lands and the Mines Departments.

2. **Classification of Tenures.**—The tabular statement given on pages 224 and 225 shews the several tenures under which Crown lands may be acquired or occupied in each State of the Commonwealth. The forms of tenure are dealt with individually in succeeding parts of this section. In the State of Victoria it is proposed to amend and consolidate the Land Acts at an early date, and to abolish some of the existing forms of tenure. Reference to any amending Acts which are passed up to the latest available date prior to the publication of this book may be found in the Appendix.

(i.) *Free Grants, Reservations, and Dedications.* The modes of alienation given in this category include all free grants either of the fee simple or of leases of Crown lands. "Free" homesteads in Queensland and Western Australia are not included in this class, these tenures being free in the sense that no purchase money is payable, but not free from residential and improvement conditions. Reservation and dedication, which are ordinarily conditions precedent to the issue of free grants, are also dealt with therein.

(ii.) *Sales by Auction and Special Sales.* This class of tenure includes all methods by which the freehold of Crown lands may be obtained (exclusive of sales under the Closer Settlement and kindred Acts) for cash or by deferred payments, and in which the only condition for the issue of the grant is the payment of the purchase-money.

(iii.) *Conditional Purchases.* In this class are included all tenures (except tenures under Closer Settlement and kindred Acts) in which the issue of the grant is governed by the fulfilment of certain conditions (as to residence or improvements) other than, or in addition to, that of the payment of purchase money.

(iv.) *Leases and Licenses.* This class includes all forms of occupation of Crown lands (other than under Closer Settlement and kindred Acts) for a term of years under leases and licenses issued by the Lands Departments. As the terms indicate, the freehold cannot be obtained under these forms of tenure.

(v.) *Closer Settlement Sales, Leases, and Licenses.* In this division are included all forms of tenure provided for under the various Closer Settlement Acts, and also under kindred Acts, such as the Village Settlements and Small Holdings Acts.

(vi.) *Mines Departments' Leases and Licenses.* The tenures specified include all methods in which Crown lands may be occupied for mining and auxiliary purposes under leases and licenses issued by the Mines Departments in the several States.

**3. Limitation of Tenures in New South Wales.**—In October, 1910, it was officially stated that it was the policy of the Government to discontinue the granting of the freehold of Crown Lands. Under the Crown Lands Act 1912 this policy was given effect to by the discontinuance of the disposal of Crown Lands by conditional purchase or as homestead selections, and by the institution of several new forms of tenure, viz., homestead farms, suburban holdings, and Crown leases.

The first two are leases in perpetuity, while the term of a Crown lease is 45 years.

**4. Tenure of Lands by Aliens.**—In the States of New South Wales, Queensland, South Australia and Tasmania restrictions are imposed upon the tenure of lands by aliens (*i.e.*, persons other than natural-born or naturalised British subjects). In Victoria and Western Australia there are no such restrictions.

(i.) *New South Wales.* Under the Crown Lands Act 1895 (sections 40 and 41), an alien is not qualified to apply for a homestead selection, conditional purchase lease, settlement lease, original homestead lease, or original conditional purchase, unless he has resided in New South Wales for one year, and at the time of making application he lodge a declaration of his intention to become naturalised within five years. If he fails to become naturalised within that period, the land is forfeited.

Under the Crown Lands Act 1912 (section 32) any alien who shall become the holder of a homestead farm, a suburban holding, or Crown lease, or a lease within an irrigation area shall become naturalised within three years after his becoming such holder. Failure to comply with this regulation involves forfeiture of such holding, together with all improvements thereon.

(ii.) *Victoria.* Under the Aliens Act 1890 (section 3), every alien friend resident in Victoria may acquire, either by grant from the Crown or otherwise, both real and personal property.

(iii.) *Queensland.* Under the Land Act 1910 (section 59 B and 62) an alien cannot apply for any land in Queensland unless he obtain a certificate that he is able to read and write from dictation, words in such language as the Minister for Lands may direct. If he acquire a selection he must within five years of such acquisition become a naturalised subject.

(iv.) *South Australia.* In South Australia, Asiatics are disqualified from holding perpetual leases of lands in irrigation areas under Section 18 of the Irrigation and Reclaimed Lands Act 1908.

(v.) *Western Australia.* In this State aliens are under no disability as regards the acquisition of the freehold of lands already alienated. Every application to acquire Crown lands, whether by a British subject or an alien, is subject to the approval of the Minister for Lands, with an appeal to the Governor-in-Council.

(vi.) *Tasmania.* Under the Aliens Act 1861 (section 2), aliens cannot hold real estate. An alien, if the subject of a friendly State, may, however, occupy lands for any term not exceeding twenty-one years.

(vii.) *Northern Territory.* No restrictions are imposed upon the tenure of lands by aliens, excepting that under the Mining Act 1903, Asiatic aliens are disqualified from holding gold or mineral leases.

NOTE.—*Northern Territory*.—By the Crown Lands Ordinance of 1912, the only forms of tenure under which land may be held in the Northern Territory, exclusive of land held under pre-existing rights, is that of leasehold. See § 7 of this section.

### § 4. Free Grants, Reservations, and Dedications.

1. **Introduction.**—Although free grants of Crown lands were virtually abolished as far back as 1831, the Land Acts of all the States now contain provisions under which the free alienation or occupation of Crown lands for certain specified purposes—comprising generally charitable, educational, and public purposes—is allowed. In all the States, also, Crown lands may be excepted from sale and reserved to the Crown or dedicated for various public and special purposes. Generally, reservation and dedication are conditions precedent to the issue of a free grant. In addition to reservations of a permanent nature, temporary reservations are also made, but these are, as a rule, subject to considerable fluctuations in area by reason of withdrawals, renotifications, and fresh reservations.

The following table shews the area for which free grants were issued and the areas permanently reserved or dedicated in each State during 1901, and from 1908 to 1912 inclusive:—

#### PARTICULARS OF FREE GRANTS, RESERVATIONS, AND DEDICATIONS, 1901 AND 1908-12.

| Year.                         | N.S.W. | Victoria.* | Q'land.   | S. Aust. | W. Aust.  | Tasmania. | C'wealth.  |

\* Including both permanent and temporary reservations and dedications. † Free leases.

† Not available. § Exclusive of South Australia. || Including Northern Territory.

2. **New South Wales.**—Under Sections 104 to 106 of the Crown Lands Act 1884, Crown lands may be reserved or dedicated for certain charitable, educational, and public purposes therein specified. No fresh promises of dedication for religious purposes were made after the 11th May, 1880, on which date a resolution against any further such grants was passed by the Legislative Assembly. During 1912-13, 10 free grants comprising a total area of 500 acres were issued under the Volunteer Force Regulations Act 1867.

(i.) **Reservations.** In addition to the reservations under Sections 104 to 106 of the Act of 1884, referred to above, Crown lands may also be temporarily reserved as sites for cities, towns, or villages under Section 101 of the same Act, and may be reserved for mining purposes under Section 106 of the Mining Act 1906. Crown lands within one mile of any made or projected railway may be temporarily reserved from sale under Section 103 of the Crown Lands Act 1884, and under Sections 112 to 114 of that Act any Crown lands may be reserved from sale for the preservation and growth of timber. Further, under Section 39 of the Crown Lands Act 1889, Crown lands may be reserved by notification in the *Gazette* from being sold or let upon lease or license, in such particular manner as may be specified, or may be reserved from sale or lease generally.

(ii.) *Areas Granted and Reserved, 1912-13.* During the financial year 1912-13, the total area for which free grants were prepared was 2256 acres, including grants of 1698 acres of land resumed under the 12th clause of the Public Roads Act 1902. During the same period 1370 acres were dedicated and permanently reserved, the number of separate dedications being 89.

On the 30th June, 1913, the total area temporarily reserved was 27,372,752 acres, of which 6,249,364 acres were for travelling stock, 6,714,370 acres for forest reserves, 2,897,188 acres for water, 1,263,939 acres for mining, and the remainder for temporary commons, railways, recreation and parks, and miscellaneous purposes.

3. **Victoria.**—Under Section 10 of the Land Act 1901, the Governor is authorised to reserve Crown lands, either temporarily or permanently, from sale, lease or license, for any public purpose whatever.

During the year 1912 six free grants, comprising an area of 358 acres, were issued. During the same year reservations of both a permanent and temporary nature, comprising an area of 3686 acres, were made; of this area 392 acres were reserved for recreation grounds.

4. **Queensland.**—Under the Land Act 1910, the Governor-in-Council may grant in trust, or reserve from sale, or lease, temporarily or permanently, any Crown lands required for public purposes.

(i.) *Reservations.* Under Section 2 of the State Forests and National Parks Act 1906, the Governor-in-Council may permanently reserve any Crown lands and declare them to be a State Forest or a National Park.

(ii.) *Areas Granted and Reserved, 1912.* During the year 1912 there were sixty-two free grants issued for a total area of 283 acres. During the same period areas covering an area of 250,372 acres were reserved; 492,989 acres were reserved for timber, over and above areas cancelled, but the area of other reserves cancelled exceeded the area reserved by 242,617 acres, leaving a net area of 250,372 acres, and 44,198 acres for camping, water, and other purposes. The total area reserved up to the end of the year 1912 was 13,585,749 acres.

5. **South Australia.**—Under Section 7 (d) of the Crown Lands Act 1903, the Governor is empowered to dedicate by proclamation any Crown lands for various charitable, educational and public purposes, and may, at any time after dedication, grant the fee simple of such lands to secure the use thereof for the purpose for which they were dedicated.

(i.) *Reservations.* Under Section 7 (f) of the same Act the Governor may by proclamation reserve any Crown lands (a) for the use of aborigines, (b) for the purposes of military defence, (c) for forest or travelling stock reserves, (d) for public recreation grounds, (e) for railways or tramways, and (f) for park lands.

(ii.) *Artesian Leases.* Under special circumstances free leases of pastoral lands may be granted to discoverers of artesian wells.

(iii.) *Areas Granted and Reserved, 1912.* During the year 1912 there were 38 free grants issued for a total area of 173 acres. During the same year 106 reserves, comprising 13,975 acres, were proclaimed.

6. **Western Australia.**—Under Section 39 of the Land Act 1898, as amended by Section 27 of the Act of 1906, the Governor may reserve any Crown lands which may be required for religious, charitable, or public purposes. These reservations may be either temporary or permanent.

During the year 1912, 634 free grants totalling 2663 acres were issued, while the area reserved was 724,757 acres. Further particulars are not available.

7. **Tasmania.**—Under Section 11 of the Crown Lands Act 1911, the Governor may reserve any Crown lands for the purposes therein specified. The lands are ordinarily leased for a period of ninety-nine years at a peppercorn rental.

During the year 1912 there were 9 free leases, comprising an area of 3054 acres issued. During the same period 14,402 acres were reserved, 3000 acres being reserved for marine board purposes, 11,170 acres for re-afforestation purposes, 10 acres for recreation grounds, and 222 acres for other public reserves. The total area permanently reserved to the end of the year 1912 was 1,072,933 acres.

## § 5. Sales by Auction and Special Sales.

1. **Introduction.**—In all the States sales by auction of Crown lands are held from time to time. Notifications of such sales are given in the Government *Gazettes*, together with particulars as to the upset price and conditions of sale. Excepting in the case of South Australia, where land is sold at auction for cash only, the purchase may be either for cash or on credit by deferred payments. In most of the States land may also be purchased by private contract at the upset price, when it has been offered at auction and not sold. In the case of auction sales on credit in the States of Western Australia and Tasmania, certain improvement conditions are imposed, and such sales are therefore classed for the purposes of this article among *Conditional Purchases*. (See § 6.) In most of the States comparatively small areas of Crown lands may be sold without competition under special circumstances. Sales by auction and special sales under Closer Settlement Acts are referred to in a later part of this section. (See § 8.)

2. **New South Wales.**—Under the Crown Lands Act 1884 lands not exceeding in the aggregate 200,000 acres for the whole State may be sold by auction during any one year. The sales are notified in the *Gazette* not less than one month before the day of sale. The upset prices may not be less than £8 an acre for town lands; £2 10s. for suburban lands; and other lands fifteen shillings. Town lands may not be sold in areas exceeding half-an-acre; suburban lands in areas exceeding twenty acres; and country lands in areas exceeding 640 acres. A deposit of 25 per cent. on the purchase money must be paid at the sale, and the remainder within three months.

A fuller description of the conditions under which land may be purchased at auction may be found in the previous issues of the Year Book. (See Year Book No. 5, p. 273.)

*Alienation by Auction and Special Sales.* During the year ended the 30th June, 1913, the area of Crown lands sold by auction and special sales for which grants were prepared amounted to 7658 acres, of which 3852 acres were sold by auction in 1331 lots; 1181 acres were sold by after-auction sales in 809 lots; 55 acres were sold as improvement purchases in 149 lots; and 2570 acres were sold as special purchases in 312 lots. The following table gives particulars of Crown lands alienated by auction and special sales during 1901 and for each year from 1908 to 1913:—

### NEW SOUTH WALES.—AUCTION AND SPECIAL SALES, 1901 and 1908-13.

| Year.                 | Auction and After-auction Sales. | Improvement Purchases. | Special Sales. | Total. |         |
|-----------------------|----------------------------------|------------------------|----------------|--------|---------|
|                       |                                  |                        |                | Area.  | Price.  |
|                       | Acres.                           | Acres.                 | Acres.         | Acres. | £       |

| 1910 ...              | 7,980 <sup>3</sup>               | 86                     | 1,109          | 9,175  | 91,374  |
| 1911 ...              | 6,732 <sup>4</sup>               | 47                     | 1,348          | 8,127  | 86,601  |
| 1912 ...              | 4,530 <sup>5</sup>               | 32                     | 2,063          | 6,625  | 77,274  |
| 1913 ...              | 3,764 <sup>6</sup>               | 53                     | 2,739          | 6,556  | 58,552  |

1. Year ended 31st December. Subsequent years to 30th June. 2. Including land sold under the Centennial Park Sale Act. 3. Exclusive of 3423 feet frontage sold for £15,005 under the Centennial Park Sale Act. 4. Exclusive of 2347 feet frontage sold for £9175 under Centennial Park Sale Act. 5. Exclusive of 1882 feet frontage sold for £7554 under Centennial Park Sale Act. 6. Exclusive of 87 feet frontage sold for £391 under Centennial Park Sale Act.

Particulars of total areas alienated are given hereafter. (See § 11.)

3. **Victoria.**—Lands specially classed for sale by auction, and any land in any city, town, or borough, may be sold by auction in fee simple, not exceeding 100,000 acres in any one year, at an upset price of £1 an acre, or at any higher price determined. The purchaser must pay the survey charge at the time of the sale, together with a deposit of  $12\frac{1}{2}$  per cent. of the whole price; the residue is payable in equal half-yearly instalments, not exceeding forty in number, according to the amount, with interest at the rate of 4 per cent. per annum.

(i.) *Special Sales without Competition.* Detached strips of land not exceeding twenty acres may be sold at a valuation to the owner of the adjoining freehold in cases somewhat similar to those specified above in respect to Crown lands in New South Wales.

(ii.) *Areas Sold at Auction and by Special Sales.* The following table gives particulars of auction sales and special sales for the year 1901 and from 1908 to 1912:—

VICTORIA.—AUCTION AND SPECIAL SALES, 1901 and 1908-12.

| Particulars.                   | 1901.  | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |
|--------------------------------|--------|--------|--------|--------|--------|--------|
|                                | Acres. | Acres. | Acres. | Acres. | Acres. | Acres. |
| Country lands ... ..           | 4,079  | 2,805  | 2,729  | 2,469  | 1,096  | 1,178  |
| Town and suburban lands ... .. | 2,127  | 1,630  | 2,062  | 1,789  | 1,263  | 1,412  |
| Special sales ... ..           | 846    | 2,117  | 2,602  | 1,537  | 1,709  | 1,530  |
| Total... ..                    | 7,052  | 6,552  | 7,393  | 5,795  | 4,068  | 4,120  |

Particulars of total areas alienated are given hereafter. (See § 11.)

4. **Queensland.**—The Minister may, with the approval of the Governor-in-Council, cause any Crown lands to be offered for sale by auction. The notification must specify the amount of deposit, and the term for payment of the balance of the money, which term may not exceed ten years. The upset price may not be less than £8 per acre for town lands, £2 per acre for suburban lands, and 10s. per acre for country lands.

(i.) *After-auction Sales.* The notification of lands for sale by auction may declare that any lands therein mentioned, which have been offered at auction, but not sold or withdrawn, shall be open to purchase at the upset price by the first applicant. The price may be paid in the same instalments and at the same periods as if the land had been bought at the auction.

(ii.) *Special Sales without Competition.* Land may be sold without competition to the holder or holders of adjoining lands at a price to be determined by the Land Court, under circumstances similar to those specified above in the case of New South Wales. When the holder of any land proves that, owing to danger from floods or other reasons, it is unsafe to reside on his holding, he may be granted, on payment of a price determined by the Land Court, an area not exceeding ten acres out of the nearest convenient and available Crown lands.

(iii.) *Areas Sold at Auction, after Auction, and by Special Sales.* The following table shows the areas sold at or after auction, and by special sales, during the year 1901 and from 1908 to 1912:—

## QUEENSLAND.—AUCTION AND SPECIAL SALES, 1901 and 1908-12.

| Particulars.                      | 1901.  | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |
|-----------------------------------|--------|--------|--------|--------|--------|--------|
|                                   | Acres. | Acres. | Acres. | Acres. | Acres. | Acres. |
| Town ... ..                       | 334    | 472    | 227    | 464    | 764    | 646    |

| Total ... ..                      | 53,259 | 8,678  | 13,411 | 10,578 | 10,123 | 6,394  |

Particulars of total areas alienated are given hereafter. (See § 11.)

(iv.) *Unconditional Selections.* This form of tenure is similar to that of a sale by auction with deferred payment. The minimum price for the land is 13s. 4d. an acre, payable in twenty annual instalments, and the maximum area granted to the applicant is 1280 acres. A deed of grant may be obtained upon payment of the purchase money.

The following table shews the number and area of unconditional selections for which applications were accepted during the year 1901 and from 1908 to 1912:—

## QUEENSLAND.—UNCONDITIONAL SELECTIONS, 1901 and 1908-1912.

| Particulars.      | 1901.  | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |
|-------------------|--------|--------|--------|--------|--------|--------|

| Rent ... .. £     | 1,180  | 1,073  | 1,111  | 685    | 525    | 565    |

5. *South Australia.*—The following lands may be sold by auction for cash:—(a) *Special blocks.* Any single section of Crown lands which may be surrounded by lands sold or contracted to be sold, and any section (not exceeding 100 acres in area) which may be required for the establishment of any industry. (b) Crown lands which have been offered for perpetual lease, and not taken up for two years. (c) Town lands. (d) Suburban lands. The upset price is determined by the Commissioner, and 20 per cent. of the purchase-money must be deposited at the time of sale, and the residue paid within such a time as the Commissioner may allow.

(i.) *After-auction Sales.* All Crown lands, except town or suburban lands, offered at auction and not sold remain open for leasing or sale under agreement or may be sold by private contract for cash at the upset price.

(ii.) *Sales for Special Purposes.* The Governor may, on the application of the purchaser or lessee under any of the Crown Lands Acts, grant 2 acres of the land comprised in such agreement or lease to trustees, to be used for any public or charitable purposes, or he may grant not over one acre of land, comprised in such agreement, as a site for a shop, mill, or post office. The purchase-money for such land must be paid at the time of application.

(iii.) *Areas Sold for Cash.* The following table shews the areas sold for cash during the year 1901 and from 1908 to 1912. The total areas sold under all types of sale are shewn in a later part of this section. (See § 11.)

**SOUTH AUSTRALIA.—AUCTION AND SPECIAL SALES, 1901 and 1908-1912.**

| Year ... ..          | 1901.  | 1908.  | 1909.   | 1910.   | 1911.   | 1912.   |
|----------------------|--------|--------|---------|---------|---------|---------|
| Area in acres ... .. | 11,314 | 78,557 | 128,529 | 386,977 | 470,003 | 277,665 |

6. **Western Australia.**—Surveyed town lots notified in the *Gazette* as open for sale, were sold by public auction at a prescribed upset price up to 18th October, 1911, since which date, however, all town lands have been withdrawn from sale and are now granted under lease only. In the case of suburban lands, the purchaser must carry out certain improvements, which are more particularly referred to below. (See § 6, *Conditional Purchases*.)

(i.) *Areas Sold by Auction.* The following table shews the areas of town and suburban lands sold at auction during the year 1901 and from 1908 to 1913 :—

**WESTERN AUSTRALIA.—AUCTION SALES, 1901 and 1908-1913.**

| Year ... ..          | 1901. | 1908. <sup>1</sup> | 1909. <sup>1</sup> | 1910. <sup>1</sup> | 1911. <sup>1</sup> | 1912. <sup>1</sup> | 1913. <sup>1</sup> |
|----------------------|-------|--------------------|--------------------|--------------------|--------------------|--------------------|--------------------|
| Area sold ... Acres  | 856   | 2,258              | 2,160              | 1,643              | 1,848              | 1,359              | 1,087              |
| Number of Allotments | 1,366 | 1,090              | 879                | 783                | 778                | 705                | 530                |

1. For the year ended 30th June.

Particulars as to total areas alienated are given in a later part of this section. (See § 11.)

7. **Tasmania.**—Any town lands may be sold at auction or by private contract, either for cash or on credit, provided that no such lands may be sold on credit if the price is less than £15. Rural lands may also be sold at auction or by private contract, but lots of first-class land may not be sold on credit if less than fifteen acres in area. In the case of sales on credit both of town and rural lands, improvement conditions are imposed, and such sales are therefore classified for the purposes of this article as *Conditional Purchases*. (See § 6.)

(i.) *After-auction Sales.* All rural lands and town lands, not within five miles of any city, which have been offered at auction and not sold, may be purchased by private contract at the upset price, and subject to the conditions on which they were offered at auction.

(ii.) *Sale of Land in Mining Towns.* The holder of a residence or business license, who is in occupation and is the owner of buildings and improvements upon the area licensed of a value equal to the upset price of such area, is entitled to purchase not more than half an acre in area. The areas may be sold on credit.

(iii.) *Areas Sold for Cash.* The following table shews the areas sold for cash during the year 1901 and from 1908 to 1912 :—

**TASMANIA.—AUCTION AND SPECIAL SALES, 1901 and 1908-1912.**

| Year ... ..          | 1901. | 1908. | 1909. | 1910. | 1911. | 1912. |
|----------------------|-------|-------|-------|-------|-------|-------|
| Area in acres ... .. | 1,915 | 603   | 1,026 | 55    | 190   | 2,026 |

Particulars of total areas alienated are given in a later part of this section. (See § 11.)

## § 6. Conditional Purchases.

1. **Introduction.**—In all the States of the Commonwealth the freehold of the land may be acquired under what are known as systems of conditional purchase by deferred payments of half-yearly or yearly instalments. Certain conditions, generally as to residence and improvements, have to be complied with before the freehold is granted, but these conditions are usually of a light nature and are inserted chiefly with the object of guaranteeing that the occupier will become of benefit to the community by making a reasonable effort to render his holding wealth-producing. Though there is a considerable similarity between some of the forms of tenure in the several States, the terms and conditions vary greatly in detail. As a rule a lease or license for a certain period is first issued to the selector, and upon fulfilment of the prescribed conditions and payment of the full amount of purchase-money the freehold is conveyed to him. In Queensland and Western Australia "free" homesteads may be acquired. Although under these tenures no purchase-money is payable, the grant is conditional on the performance of residential and improvement conditions; these tenures are therefore included here with conditional purchases rather than with free grants.

2. **New South Wales.**—The following are the methods by which land may be alienated by conditional purchase:—(i.) Residential conditional purchase; (ii.) non-residential conditional purchase; (iii.) conversion of conditional purchase; and (iv.) homestead selections.

A description of the conditions under which land may be taken up under this form of tenure is given in previous issues of the Year Book. (See No. 6, p. 277.)

During the year ended the 30th June, 1913, deeds of grant were prepared on the completion of conditional purchases for 406,019 acres, making the total number of conditional purchases in existence at the end of the financial year 92,183 for a total area of 17,305,305 acres. The following table gives particulars of conditional purchases in 1901 and from 1908 to 1913:—

### NEW SOUTH WALES.—CONDITIONAL PURCHASES, 1901 and 1908 to 1913.

| Year.             | Applications Made. |        | Applications Confirmed. |        | Areas for which Deeds have been Issued. |                 |            |

| 1911 <sup>1</sup> | ...                | 1,602  | 221,537                 | 1,613  | 227,520                                 | 632,738         | 15,614,036 |
| 1912 <sup>1</sup> | ...                | 1,258  | 190,969                 | 1,099  | 175,004                                 | 671,564         | 15,232,355 |
| 1913 <sup>1</sup> | ...                | 783    | 103,844                 | 839    | 105,167                                 | 406,019         | 15,638,374 |

1. Year ended 30th June. 2. Exclusive of exchanges under the Crown Lands Act 1895.

Further particulars as to the total areas alienated and in process of alienation are given hereinafter. (See § 11.)

During the year ended 30th June, 1913, there were 25 original and 40 additional homestead selections applied for, comprising an area of 19,595 acres. During the same period the total number of applications confirmed was 106, comprising 30,879 acres, and 4701 homestead selections and grants, comprising an area of 1,480,834 acres, were in existence on the 30th June, 1913. Further particulars for previous years are given in a later part of this section. (See § 11.)

3. **Victoria.**—The freehold of agricultural and grazing lands may be acquired by conditional purchase under the following tenures:—(i.) Agricultural allotments and grazing allotments; (ii.) Agricultural and grazing allotments by selection from grazing area or perpetual leases; (iii.) Mallee agricultural licenses; (iv.) Murray settlements leases; and (v.) swamp or reclaimed lands purchase leases.

A description of the conditions under which land may be taken up under this form of tenure may be found in previous issues of the Year Book. (See No. 6, p. 278.)

With reference to Murray settlement leases, two settlement areas have been laid out under the Act with due regard to irrigation conditions, viz., those at White Cliffs and Nyah, and at the former place a dry farm area has also been subdivided. At White Cliffs 6273 acres were subdivided as homestead allotments, and 50,345 acres as dry farm allotments, while at Nyah 1960 acres were subdivided as homestead allotments. No additional subdivision has been made during 1912.

The subjoined table gives particulars shewing the areas selected conditionally during the year 1901 and from 1908 to 1912. A large proportion of the areas shewn has reverted to the Crown in consequence of non-fulfilment of conditions.

#### VICTORIA.—AREAS PURCHASED CONDITIONALLY, 1901 and 1908 to 1912.

| Particulars.             | 1901.   | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |

Particulars as to total areas alienated and in process of alienation are given in a later part of this section. (See § 11.)

4. **Queensland.**—The several types of selection under which the freehold may be acquired by conditional purchase are as follows:—(i.) Agricultural farms; (ii.) agricultural homesteads; (iii.) prickly pear selections; and (iv.) free homesteads.

In previous issues of this book may be found the conditions under which land may be selected under this form of tenure. (See No. 6, p. 280.)

*Number and Area of Conditional Purchases.* The following table shews the number and area of conditional purchases for which applications were accepted in 1901 and from 1908 to 1912:—

#### QUEENSLAND.—CONDITIONAL PURCHASES (APPLICATIONS ACCEPTED).

1901 AND 1908 TO 1912.

| Year.    | Agricultural Farms. |         | Agricultural Homesteads. |         | Prickly Pear Selections. |           | Total.  |           |

| 1910 ... | 1,733               | 628,222 | 67                       | 14,778  | 920                      | 1,308,170 | 2,720   | 1,951,170 |
| 1911 ... | 2,046               | 714,733 | 30                       | 5,814   | 806                      | 1,020,615 | 2,882   | 1,741,162 |
| 1912 ... | 1,717               | 614,269 | 18                       | 3,771   | 544                      | 628,614   | 2,279   | 1,246,654 |

During the year 1912, applications were accepted to select agricultural farms to the number of 1717 for 614,269 acres, an average area of 358 acres, at an average price of 19s. 1d. per acre. The number of selections and the total area selected were higher than the corresponding figures for the previous year by 329 and 100,464 acres, respectively. The average area is greater by 9 acres, and the average price lower by 1s. 9d. per acre.

The average area of agricultural homesteads was 209½ acres. The average price of the land selected as prickly pear selections during the year was 4s. 6½d. per acre.

During the year 1912 the number of acres of land opened for selection as free homesteads was 479, and 3 applications, totalling 480 acres, were accepted.

Particulars as to total areas alienated and in process of alienation may be found hereinafter. (See § 11.)

**5. South Australia.**—The types of conditional purchases under which land may be alienated in this State are as follows :—(i.) Agreement to purchase, and (ii.) Agreement under the Pinnaroo Railway Act 1903.

(i.) *Agreement to Purchase.*—Surveyed Crown lands are available for agreement to purchase, as well as for perpetual lease under the Crown Lands Acts of 1903 to 1912, the purchase-money being fixed by the Land Board, and payable in sixty half-yearly payments, including interest at not less than 2 per cent. per annum. The condition as to payment of instalments for land offered under the provisions of Act of 1912 in newly surveyed mallee lands is that no payment is made for the first four years, for the fifth and sixth years interest only at the rate of 2 per cent. per annum on value of land is payable, the first instalment of purchase-money, including interest at the rate of 4 per cent. per annum, being payable at the commencement of the seventh year. All payments are made in advance, the term of agreement being thereby extended to thirty-six years. If the conditions relating to fencing, vermin destruction, and in some cases to residence, are fulfilled, the purchase may be completed after a term of six years from commencement of the agreement on payment of all principal and interest due. All minerals are reserved to the Crown, and the Crown may resume any part of the land for the purposes of roads, water conservation, mining, etc., compensation being payable to the purchaser for loss occasioned by resumption.

(ii.) *Pinnaroo Railway Lands.* Under the Pinnaroo Railway Act 1903 provision was made for opening up about 1,500,000 acres of good agricultural country in the vicinity of a line from Pinnaroo adjoining the Victorian border to Tailem Bend, a distance of eighty-seven miles. These lands are now offered on agreement with covenant to purchase or on perpetual lease under the Crown Lands Act 1903. The railway has been paid for from the proceeds of the land already selected. The conditions of purchase are similar to those stated in par. (i.) above.

The total area held on 30th June, 1913, was 570,583 acres ; of this area 16,984 acres are held on perpetual and right of purchase leases, allotted before the Pinnaroo Railway Act was passed.

(iii.) *Particulars of Conditional Purchases.* The subjoined table gives particulars of the areas alienated by conditional purchase, on fulfilment of the conditions, at the end of 1901 and from 1908 to 1912 :—

**SOUTH AUSTRALIA.—AREAS ALIENATED UNDER AGREEMENTS TO PURCHASE,**

1901 AND 1908 TO 1912.

| Year ... ..          | 1901   | 1908.  | 1909.   | 1910.   | 1911.   | 1912.  |

1. Including selections and sales on credit.

Particulars of total areas alienated and in process of alienation are given hereinafter. (See § 11.)

## § 7. Leases and Licenses.

1. **Introduction.**—Leases and licenses are issued in all the States and in the Northern Territory for various terms and upon various conditions. In Victoria, Queensland, South Australia, and the Northern Territory perpetual leases are issued for an indefinitely long period upon payment of an annual rent, while in all the States leases or licenses of comparatively large areas may be obtained for pastoral purposes. Provision has also been made in all the States for convenient forms of leases and licenses for various special purposes, and also for special classes of lands. The leases and licenses dealt with below are exclusive of those issued under Closer Settlement and kindred Acts, and also of those issued for mining and auxiliary purposes. (See §§ 8 and 9.)

2. **New South Wales.**—The following are the various types of leases and licenses issued in this State:—(i.) Conditional leases; (ii.) conditional purchase leases; (iii.) settlement leases; (iv.) improvement leases; (v.) annual leases; (vi.) residential leases; (vii.) special leases; (viii.) snow leases; (ix.) pastoral leases; (x.) scrub leases; (xi.) inferior lands leases; (xii.) occupation licenses; (xiii.) Western lands leases; (xiv.) homestead farm leases; (xv.) suburban holdings leases; (xvi.) Crown leases; (xvii.) irrigation farm leases.

A description in detail of the conditions which govern the issue of these various leases and licenses may be found in previous editions of the Year Book. (See Year Book No. 6, p. 285.)

On the 30th June, 1913, there were 60,242 leases and licenses current under the Lands Department and the Western Land Board, comprising 124,361,637 acres of Crown Lands. Of these leases there were 38,972, comprising 19,483,197 acres, in the Eastern Division; 18,254, comprising 28,379,049 acres, in the Central; and 3,016, comprising 76,499,391 acres, in the Western Division.

The following table shews the areas held under various descriptions of leases and licenses at the end of the year 1901, and at the end of the financial years 1909-10, 1910-11, and 1911-12, and also the area and rental of leases current on the 30th June, 1913:—

1. Includes 831,100 acres held under Permissive Occupancy at a rental of £416.

2. Permissive Occupancies in the Western Division not included.

The total annual rent derived from the leases and licenses issued by the Lands Department and the Western Lands Board amounted to £576,240, or an average of 1.112 pence per acre. Particulars regarding leases and licenses issued by the Mines Department are given in a later part of this section. (See § 9, *Occupation of Crown Lands for Mining Purposes*.)

3. **Victoria.**—The various types of leases and licenses (exclusive of Closer Settlement and Mines Department leases and licenses) which may be issued in this State are as follows:—(i.) Grazing area leases; (ii.) perpetual leases; (iii.) Mallee perpetual leases; (iv.) licenses of auriferous lands; (v.) swamp or reclaimed lands leases; (vi.) grazing licenses and pastoral leases; (vii.) leases and licenses for other than pastoral purposes; and (viii.) State forests and timber reserves licenses.

A description in detail of the conditions which govern the issue of these various leases and licenses may be found in the previous issues of the Year Book. (See Year Book No. 5, pp. 291-2.)

*Areas held under Leases and Licenses.* The following statement shews the areas of Crown lands occupied under leases and licenses at the end of the year 1901, and from 1908 to 1912.

**VICTORIA.—OCCUPATIONS OF CROWN LANDS UNDER LEASE OR LICENSE,  
1901 AND 1908-12.**

4. **Queensland.**—In this State Crown lands may be occupied under the following types of leases and licenses:—(i.) Grazing homesteads; (ii.) grazing farms; (iii.) occupation licenses; (iv.) special leases; (v.) perpetual lease selections; and (vi.) pastoral leases. An applicant for a grazing homestead or grazing farm may not hold more than 6000 acres, and the term of the lease may not exceed 28 years. General conditions as to applications for selections have been mentioned above. (See § 6, 4.)

(i.) *Grazing Homesteads.* Lands opened for grazing selections are available for fifty-six days as grazing homesteads only. Personal residence is necessary for the first 5 years, and prior to the expiration of such period or the earlier death of the lessee, a grazing homestead can not be assigned or transferred. Without the special permission of the Minister it may not be mortgaged during the five years except to the Agricultural Bank; thereafter the lease is subject to the condition of occupation.

(ii.) *Grazing Farms.* In order to obtain priority of claim the applicant may tender an annual rent higher than the notified one, for the first seven years. As soon as the land is fenced the selector becomes entitled to a lease, and may thereafter mortgage the same. The lease is subject to the condition of occupation during the whole term. The Crown may resume the whole or part of the lease.

Particulars of grazing farms and grazing homesteads are given in the following paragraph:—

(iii.) *Grazing Farms, Homestead and Scrub Selections.* The following table shews the number of grazing farms, grazing homesteads, and scrub selections, for which applications were accepted in 1901 and from 1908 to 1912:—

1. The Land Act 1910, makes no provision for the further selection of land as scrub selections.

The average rent in 1912 was  $1\frac{1}{3}$ d. per acre for grazing farms and  $1\frac{1}{4}$ d. per acre for grazing homesteads.

Particulars of total areas held under leases and licenses are given in a later part of this section. (See § 11.)

(iv.) *Occupation Licenses.* Annual licenses are granted to occupy Crown lands which have been declared open for such occupation by notification in the *Gazette*. The rent is as specified by the notification or as bid by the licensee, but the Minister may by notice before the 1st September in any year increase the rent. The total number of licenses in force at the end of the year 1912 was 1985, comprising an area of 66,352 square miles, the total rent being £44,170. Particulars of the area held under license for previous years are given in a later part of this section. (See § 11.)

(v.) *Special Leases.* Leases of any portion of land may be issued for a term not exceeding thirty years to any person for any manufacturing, industrial, business or recreation purposes. Leases for a similar term may be issued for any country lands reserved for public purposes and which are infested with noxious weeds.

During the year 1912 there were 88 leases for special purposes granted, comprising an area of 9968 acres, the total annual rent being £598, and there were extant at the end of the year 542 such leases, reserving rents amounting to £3160 per annum. In addition, 31 leases of reserves, aggregating 11,176 acres, were granted at rentals amounting to £142 per annum; the total number of these leases of reserves in force at the end of the year being 156, reserving rents amounting to £644. Particulars of special leases for previous years are given in a later part of this section. (See § 11.)

(vi.) *Perpetual Lease Selections.* Land proclaimed to be open for agricultural farm selection (see § 6, 4) may also be opened for perpetual lease selection, and the latter mode may be conceded priority of application over the former. The rent for the first period of ten years of the lease is  $1\frac{1}{2}$  per cent. on the proclaimed purchase price of the land for agricultural farm selection. The rent for each succeeding period of ten years is determined by the Land Court. Similar conditions of occupation and improvement as are prescribed for agricultural farms are attached to perpetual lease selections.

(vii.) *Special Licenses.* Licenses to cut timber or to dig for any stone, gravel, earth, shells, or guano, may be issued.

(viii.) *Pastoral Leases.* Existing pastoral leases are now deemed to be held under the Land Act 1910. Lands open for pastoral lease may be leased for a period not exceeding thirty years. The annual rent, per square mile, for the first ten years must be as notified in the *Gazette*, or in case of competition, bid at auction. If the value of the holding become enhanced by the development of public works in the neighbourhood, or by the occurrence of minerals on or near the holding, the rent may be redetermined.

The following table shews the total areas of pastoral leases (including resumed parts) occupied under the various Acts at the end of the year 1901 and from 1908 to 1912, inclusive:—

QUEENSLAND.—PASTORAL LEASES OCCUPIED UNDER VARIOUS ACTS,  
1901 AND 1908-1912.

| Particulars.                          | Area in Square Miles. |         |         |         |         |         |
|---------------------------------------|-----------------------|---------|---------|---------|---------|---------|
|                                       | 1901.                 | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
| Pastoral Leases Act 1869              | 39,307                | 1,513   | 1,379   | 890     | ...     | ...     |
| Crown Lands Act 1884                  | 243,586               | 26,842  | 18,733  | 11,710  | ...     | ...     |
| Land Act 1897                         | 15,046                | 3,636   | 1,307   | 86      | ...     | ...     |
| Pastoral Leases Act 1900              | 50,076                | 24,061  | 24,061  | 21,739  | ...     | ...     |
| Pastoral Holdings New Leases Act 1901 | —                     | 349     | 347     | 500     | ...     | ...     |
| Land Act 1902                         | —                     | 258,975 | 280,960 | 305,924 | ...     | ...     |
| Land Act 1910                         | —                     | —       | —       | —       | 346,637 | 354,843 |
| Total                                 | 348,015               | 315,426 | 326,787 | 340,849 | 346,637 | 354,843 |

The gross area held at the end of the year 1912 for purely pastoral purposes (under *Occupation Licenses and Pastoral Leases*) was 421,195 square miles, at rentals aggregating £346,973 per annum. The area was 6622 square miles greater than that for the previous year, and the rental was £9372 greater. The average rent was 16s. 5½d. per square mile, as against 16s. 3½d. for the previous year.

5. **South Australia.**—The following are the various types of leases and licenses which are issued in this State:—(i.) Perpetual leases; (ii.) miscellaneous leases; (iii.) miscellaneous grazing and cultivation leases; (iv.) irrigation and reclaimed swamp leases; (v.) licenses for special purposes; (vi.) leases under the Pastoral Act 1904; and (vii.) leases with right of purchase.

(i.) *Perpetual Leases.* Surveyed Crown lands are available for perpetual leases as well as for agreements to purchase under Crown Lands Acts of 1903 to 1912. Under the Crown Lands Act of 1888 perpetual leases were granted in perpetuity, and the rent determined for each period of fourteen years, at least twelve months before the expiration of each such period. Under the Crown Lands Act of 1893 the revaluation section was repealed and the rent was fixed in perpetuity, generally at rates varying from 2 per cent. to 4 per cent. per annum on the value of the land as fixed by the Land Board. The condition as to payment of rent of land offered under provisions of the Act of 1912 in newly surveyed mallee lands is that no rent is charged for the first four years, for the fifth and sixth years payment is made at the rate of 2 per cent. per annum, the full rate at 4 per cent. becoming due at the commencement of the seventh year. All minerals are reserved to the Crown, and the Crown may reserve any part of the land for the purposes of roads, water conservation, mining, etc., compensation being payable to the lessee for loss occasioned by resumption.

The conditions under which the other leases and licenses are issued will be found in detail in the previous issues of the Year Book. (See Year Book No. 5, pp. 294 and 295.)

*Area held under Lease.* The following table shews the area held under leases and licenses at the end of the year 1901, and from 1908 to 1912:—

**SOUTH AUSTRALIA.—AREA UNDER LEASES AND LICENSES, 1901 and 1908 to 1912.**

| Particulars.                 | 1901.      | 1908.       | 1909.       | 1910.       | 1911.       | 1912.       |
|------------------------------|------------|-------------|-------------|-------------|-------------|-------------|
|                              | Acres.     | Acres.      | Acres.      | Acres.      | Acres.      | Acres.      |
| Right of Purchase Leases ... | 5,639,519  | 4,424,814   | 4,232,009   | 3,697,423   | 3,150,533   | 2,836,346   |
| Perpetual Leases ...         | 7,115,782  | 13,269,290  | 14,088,223  | 14,789,305  | 15,020,544  | 15,070,607  |
| Pastoral Leases ...          | 68,916,125 | 83,009,650  | 87,038,450  | 91,434,450  | 91,546,770  | 96,356,850  |
| Other Leases ...             | 3,905,729  | 1,812,959   | 1,513,032   | 1,394,964   | 1,283,663   | 1,273,350   |
| Total held under Lease ...   | 85,577,155 | 102,516,713 | 106,871,714 | 111,316,142 | 111,001,510 | 115,537,153 |

6. **Western Australia.**—The following are the various types of leases and licenses issued in this State:—(i.) Pastoral leases; (ii.) permits and licenses to cut timber; (iii.) special leases; and (iv.) licenses for quarrying.

The conditions of tenure with respect to these leases and licenses may be found in the previous issues of the Year Book. (See Year Book No. 5, pp. 296-7.)

*Areas Held under Leases and Licenses.* The following table shews the number and area of leases and licenses issued during the year 1901, and from 1908 to 1913:—

## WESTERN AUSTRALIA.—LEASES AND LICENSES ISSUED, 1901 and 1908 to 1913.

| Particulars.                           | 1901.      | 1908. <sup>1</sup> | 1909. <sup>1</sup> | 1910. <sup>1</sup> | 1911. <sup>1</sup> | 1912. <sup>1</sup> | 1913. <sup>1</sup> |

| Residential Lots ...                   | 221        | 1                  | 3                  | 6                  | 4                  | 18                 | 2                  |
| Total ...                              | 20,019,575 | 16,415,556         | 9,869,397          | 10,700,566         | 9,302,655          | 11,560,117         | 21,170,038         |
| Number Issued ...                      | 1,466      | 870                | 480                | 505                | 396                | 487                | 1,918              |

1. For financial year ended the 30th June. 2. No timber leases granted since 1903.

Particulars as to the total area occupied under leases and licenses are given in a later part of this section. (See § 11.)

7. **Tasmania.**—The several forms of leases and licenses in this State are as follows:—(i.) Grazing leases; (ii.) miscellaneous leases; (iii.) timber licenses; (iv.) occupation licenses; (v.) temporary licenses; and (vi.) timber leases.

The conditions which govern the issue of these leases and licenses are more fully dealt with in the previous issues of the Year Book. (See Year Book No. 5, p. 297).

*Area held under Leases and Licenses.* The following table shows the areas of Crown lands occupied under leases and licenses at the end of the year 1901 and from 1908 to 1912:—

## TASMANIA.—LEASES AND LICENSES, 1901 and 1908-1912.

| Particulars.               | 1901.     | 1908.     | 1909.     | 1910.     | 1911.     | 1912.     |
|----------------------------|-----------|-----------|-----------|-----------|-----------|-----------|
|                            | Acres.    | Acres.    | Acres.    | Acres.    | Acres.    | Acres.    |
| Ordinary Leased Land ...   | 1,280,688 | 1,235,823 | 1,173,823 | 1,176,900 | 1,242,400 | 1,245,400 |
| Islands ...                | 149,165   | 103,130   | 90,100    | 87,100    | 62,000    | 135,025   |
| Land Leased for Timber ... | 40,768    | 91,972    | 100,098   | 108,889   | 134,516   | 136,471   |
| Total ...                  | 1,470,621 | 1,430,925 | 1,364,021 | 1,372,889 | 1,438,916 | 1,516,896 |

8. **Northern Territory.**—The system of land settlement in the Northern Territory is being reorganised by the Commonwealth Government. A new Lands Ordinance was passed in December, 1912, known as the Crown Lands Ordinance 1912, and future disposal of land in the Territory will be made in accordance with this Ordinance, which provides for a leasehold system only, and no further alienation of Crown lands will be permitted, unless such alienation is in pursuance of existing agreements. Under this Ordinance, the classification and control of Crown lands is in the hands of a Board, consisting of the Director of Lands, the Director of Agriculture, and the Chief Surveyor. The classified land is leased in blocks, the maximum area ranging from 300 square miles of first-class pastoral to 1280 acres of first-class agricultural land. Before offering any land for leasing, the Board fixes the annual rental, but every lease is subject to reappraisal of rent at specified periods, viz., every fourteen years in the case of town lands, and every twenty-one years in the case of agricultural and pastoral lands.

Leases under this Ordinance are in perpetuity, except as regards pastoral and miscellaneous leases, the term of which is 21 or 42 years, according to the quality of the land leased.

The lessee must reside on the land leased for a certain period every year, must fence, stock, and cultivate it to the extent prescribed, and must, within two years of the commencement of the lease, establish a home on it. In order to promote settlement in

the Territory, the first five thousand blocks of agricultural land taken up on perpetual lease under this ordinance will be rent free during the life of the applicant, or for 21 years from the commencement of the lease, whichever period is longer.

The various types of leases, licenses, and permits current are as follows:—(i.) Agricultural leases; (ii.) pastoral leases; (iii.) special leases; (iv.) leases with right of purchase; (v.) tropical products leases; (vi.) leases for horsebreeding stations; (vii.) licences; and (viii.) pastoral and other permits. (See § 2, 7). The permit system was discontinued at the end of 1911.

*Area held under Lease, License, and Permit.* The following table shews the total area held under lease, license, and permit at the end of the year 1901 and 1908 to 1912:—

**NORTHERN TERRITORY.—AREA HELD UNDER LEASE, LICENSE OR PERMIT,  
1901 AND 1908-1912.**

| Particulars.                     | 1901.       | 1908.       | 1909.      | 1910.      | 1911.      | 1912.      |
|----------------------------------|-------------|-------------|------------|------------|------------|------------|
|                                  | Acres.      | Acres.      | Acres.     | Acres.     | Acres.     | Acres.     |
| Right of Purchase Leases ...     | 1,067       | 2,931       | 5,224      | 667        | 667        | 667        |

| Total Leased ...                 | 112,654,288 | 103,419,428 | 96,077,714 | 99,175,023 | 93,744,961 | 96,026,438 |

1. See Table given below.

The following statement gives particulars of the areas held under the various types of lease and license as at the end of the year 1912, and included in the previous table under the heads of "pastoral leases" and "other leases."

"Pastoral leases" include:—

|  |     |     |     |                  |
|--|-----|-----|-----|------------------|
| Pastoral leases ...                                      | ... | ... | ... | 69,483,520 acres |
| Pastoral permits ...                                     | ... | ... | ... | 24,219,520 "     |
| Annual pastoral leases ...                               | ... | ... | ... | 378,240 "        |
| Grazing Licenses (under Crown Lands Ordinance, 1912) ... | ... | ... | ... | 248,320 "        |
| Total "Pastoral leases" ...                              | ... | ... | ... | 94,329,600 acres |

"Other Leases" include:—

|  |     |     |     |                 |
|--|-----|-----|-----|-----------------|
| Agricultural leases ...                                    | ... | ... | ... | 8,317 acres     |
| Leases for special purposes ...                            | ... | ... | ... | 10 "            |
| Mineral leases ...   | ... | ... | ... | 1,290 "         |
| Gold leases ...  | ... | ... | ... | 762 "           |
| Occupation and special licenses ...                        | ... | ... | ... | 52 "            |
| Tin-dredging permits ...                                   | ... | ... | ... | 400 "           |
| Coal and oil permits ...                                   | ... | ... | ... | 1,664,060 "     |
| Mixed farming permits ...                                  | ... | ... | ... | 1,280 "         |
| Approved applications under Tropical Products Act 1904 ... | ... | ... | ... | 20,000 "        |
| Total "Other leases" ...                                   | ... | ... | ... | 1,696,171 acres |

## § 8. Closer Settlement.

**1. Introduction.**—In all the States, Acts have been passed authorising the Governments to repurchase alienated lands for the purpose of cutting them up into blocks of suitable size and throwing them open to settlement on easy terms and conditions. Special Acts have also been passed in several of the States authorising the establishment on particular lines of co-operative communities, village settlements, and labour colonies. Lands may be acquired either compulsorily or voluntarily in New South Wales, Victoria, Queensland, and Tasmania, but only voluntarily in South Australia and Western Australia.

The following table gives particulars up to the latest available date of operations under the Closer Settlement Acts for each State and the whole Commonwealth:—

**CLOSER SETTLEMENT.—TOTAL AREAS ACQUIRED AND ALLOTTED UP TO  
30th JUNE, 1913.**

| Particulars.                | N.S.W.    | Victoria. | Qld.      | S. Aust.  | W. Aust. | Tas.    | Cwlth.     |
|-----------------------------|-----------|-----------|-----------|-----------|----------|---------|------------|
| Area acquired ... acres     | 676,439   | 563,554   | 664,363   | 619,568   | 144,333  | 49,206  | 2,717,463  |
| Purchasing price ... £      | 2,525,056 | 4,184,447 | 1,713,165 | 1,890,424 | 144,526  | 135,857 | 10,593,475 |
| Farms, etc., allotted { No. | 1,554     | 3,906     | 2,423     | 1,705     | 16       | 197     | 12,801     |
| acres                       | 724,924   | 433,321   | 525,168   | 482,011   | 10,835   | 42,549  | 2,223,808  |

The following table shows the areas of private lands acquired in each State for the financial year 1901, and for each year from 1908 to 1913:—

**CLOSER SETTLEMENT.—AREAS OF PRIVATE LANDS ACQUIRED, 1901 and 1908 to 1913.**

\* Particulars are for calendar years.

† To the preceding 31st December.

‡ To 30th June. § Including 4581 acres of Crown lands.

2. **Government Loans to Settlers.**—For the purpose of promoting pastoral, agricultural, and similar pursuits, and with the object of assisting settlers in erecting buildings and carrying out improvements on their holdings, general systems have been established in all the States, under which financial aid is rendered to settlers by the State Governments. These general systems are more particularly referred to in the section in this book dealing with "Agriculture." In many of the Closer Settlement and similar Acts, however, special provisions have been inserted with the object of lending money to settlers taking up land under these Acts, with which to build homes or effect improvements. The principal features of these provisions are referred to below.

3. **New South Wales.**—Under the Closer Settlement Act of 1901 provision was made for the acquisition of private lands or of Crown lands held under lease, for the purpose of closer settlement. No power of compulsory resumption was conferred by the Act, which was consequently practically inoperative. Under the Closer Settlement Act of 1904, as amended in 1906, 1907, and 1909, and the Closer Settlement Promotion Act 1910, the Government is empowered to resume private lands, either by agreement or by compulsory purchase, and to alienate them on favourable terms to persons who desire to settle and make homes for themselves and their families on the soil. The administration of the Closer Settlement Acts is in the hands of a Board. Land acquired under the Acts is subdivided into blocks or farms, and by notification in the *Government Gazette* is declared to be a settlement purchase area available for application. The *Gazette* notice also gives all necessary information as to the class and character of the land, and the capital value, area, etc., of each block or farm.

(i.) **Closer Settlement Purchase.** Under this tenure a settler may acquire the freehold of the land under a system of deferred payments. A deposit of 5 per cent. of the notified value of the settlement purchase must be lodged with the application, and a similar amount by way of instalment, paid annually until the purchase-money, together with interest at the rate of 4 per cent., is paid off. Under this system the balance due to the Crown will be paid off in thirty-eight years, the holding then becoming a freehold. A condition of residence for ten years attaches to every settlement purchase. Under the

amending Act of 1909 postponement of the payment of instalments may be granted by the Minister, subject to the conditions (a) that additional improvements to the value of the amount postponed be made on the land within twelve months, and (b) that interest at 4 per cent. per annum be paid on the amount postponed.

(ii.) *Closer Settlement Annual Leases.* Leases for areas not exceeding 320 acres may be obtained under the Closer Settlement Acts at a rent fixed by the Board. They may be renewed from year to year on payment of the yearly rent in advance. The land held under this form of lease may be applied for by the lessee as a settlement purchase.

(iii.) *Sales by Auction.* Areas within closer settlement districts necessary for township settlement may be set apart by notification in the *Gazette*. Allotments, each of which may not exceed half an acre in extent, within such areas may be sold by auction.

(iv.) *Private Subdivision.* An important feature of the amending Act of 1909 is the power which is given to owners for private subdivision of lands which have been notified by proclamation for resumption. Upon the owner entering into an agreement with the Minister to subdivide the land and to sell or lease in such areas and subject to such terms as may be agreed upon, the Minister is empowered to suspend the power of resumption for a period not exceeding two years.

(v.) *The Closer Settlement Promotion Act 1910.* Under this Act any three or more persons who are qualified to hold settlement purchases and who desire to purchase from the same owner any private lands may, upon entering into an agreement with the owner and subject to valuation by the Advisory Board and the Savings Bank Commissioners, acquire such lands through the Minister on Closer Settlement conditions. The maximum sum which may be advanced for the purposes of this Act may not exceed £1,000,000 in any financial year.

The following table shews the number and area of farms allotted since the passing of the Act:—

#### NEW SOUTH WALES.—CLOSER SETTLEMENT PROMOTION ACT 1910.

| Year.          | Farms Allotted— |         |                  |

(vi.) *Areas Acquired and Disposed of.* Up to the 30th June, 1913, ten areas had been opened for settlement under the Closer Settlement Acts.

The following statement gives particulars of the aggregate areas opened up to the 30th June, in each year from 1909 to 1913:—

#### NEW SOUTH WALES.—CLOSER SETTLEMENT AREAS, 1909 to 1913.

| Year Ended<br>30th June. | Areas.             |                           |         | Capital Values.    |                           |           |

| 1910 ... ..              | 461,723            | 83,045                    | 544,768 | 1,624,858          | 147,977                   | 1,772,835 |
| 1911 ... ..              | 591,861            | 86,127                    | 677,988 | 2,293,399          | 148,696                   | 2,442,095 |
| 1912 ... ..              | 676,438            | 87,760                    | 764,198 | 2,666,516          | 156,796                   | 2,823,312 |
| 1913 ... ..              | 676,439            | 87,759                    | 764,198 | 2,667,203          | 159,973                   | 2,827,176 |

The total area thus set apart has been divided into 1608 farms comprising 738,876 acres, the remaining area being reserved for recreation areas, roads, stock routes, schools, etc.

The following table gives particulars as to the disposal of the farms by closer settlement purchase for each year ended the 30th June, 1909 to 1913 :—

**NEW SOUTH WALES.—CLOSER SETTLEMENT ALLOTMENTS, 1909 to 1913.**

| Year.       | Farms Allotted by Board to Date. |         |           | Total Amount received in respect of Settlement Purchases. | Total Number of Applications received. |
|-------------|----------------------------------|---------|-----------|---|--|
|             | Number.                          | Area.   | Value.    |   |  |
|             | No.                              | Acres.  | £         | £   | No.                                    |
| 1908-9 ...  | 683                              | 312,075 | 1,192,283 | 73,133  | 953                                    |
| 1909-10 ... | 941                              | 471,639 | 1,731,480 | 147,945   | 1,209                                  |

| 1911-12 ... | 1,485                            | 673,610 | 2,722,564 | 274,440   | 1,555                                  |
| 1912-13 ... | 1,554                            | 724,924 | 2,767,370 | 363,425   | 1,568                                  |

(vii.) *Labour Settlements.* These settlements were founded by the Labour Settlements Acts 1893 and 1894, which have now been amended and repealed by the Labour Settlements Act 1902. Land may be set apart for lease for a period of 28 years as a labour settlement under the superintendence of a Board of Control. The functions of the Board of Control are to enrol members of the settlement; to make regulations concerning the work to be done; to apportion the work among the members; and to distribute the wages and profits. The Minister is empowered to grant financial assistance to the Board of Control.

*Settlements Established.* Only two settlements had been established under the Act up to the 30th June, 1913. Particulars are given in the following statement :—

**NEW SOUTH WALES.—PARTICULARS OF LABOUR SETTLEMENTS, 30th JUNE, 1913.**

| Settlement.     | Date of Establishment. | Area.  | Population.   |        |           |        | Value of Improvements. | Loans Advanced by the Government. |

| Total ...       | —                      | 1,795  | 36            | 38     | 117       | 191    | 4,560                  | 4,899                             |

The Murrumbidgee Irrigation Act 1910 provides for the acquisition of 1,668,000 acres near Narrandera, in Riverina, for irrigation and other purposes in connection with the Burrinjuck Irrigation Scheme. Part of this area has since been made available. (See *Water Conservation*, Section XVI., § 3.)

4. *Victoria.*—(i.) *Closer Settlement Acts, 1904 to 1909.* The Closer Settlement Acts (§ 2, p. 266) are administered by a Board consisting of three persons appointed by the Governor-in-Council, and intrusted with power to acquire, either compulsorily or by agreement, private lands in any part of the State for the purpose of Closer Settlement. The Board may dispose of all lands acquired, either Crown lands or repurchased lands, on conditional purchase leases either as (a) farm allotments not exceeding £2500 in value, (b) workmen's homes allotments not exceeding £250 in value, and (c) agricultural labourers' allotments not exceeding £350 in value. The price of the land must cover the cost of the original purchase and the cost of all improvements. Land acquired by the

Board may also be sold in small areas in fee simple as sites for churches, public halls, butter factories, creameries, or recreation reserves.

The Board may approve of an agreement between an owner and one or more persons to purchase a farm or farms, not exceeding £2500 in value. On the property being acquired by the Board, the applicant obtains a lease under Closer Settlement conditions.

(a) *Closer Settlement Leases.* Every conditional purchase lease is for such a term of years as may be agreed upon by the lessee and the Board, and payment must be made with interest at  $4\frac{1}{2}$  per cent. per annum by sixty-three half-yearly instalments, or such lesser number as may be agreed upon. Under the amending Act of 1906 postponement of payment of instalments may be granted by the Board up to 60 per cent. of the value of improvements. The lessee must personally reside during eight months in each year on his allotment, and for six years he must carry out prescribed improvements. Thereafter he may, with permission, transfer, assign, mortgage or sublet his allotment. After twelve years, if all conditions have been fulfilled, a Crown grant, with the same residence condition as that contained in the lease, will be issued. In the case of workmen's homes allotments the land must be fenced within one year, and a dwelling-house to the value of at least £50 must be erected within the same time; within two years further improvements must be made to the value of at least £25. As regards agricultural labourers' allotments, a dwelling-house to the value of at least £30 must be erected within one year, and within two years the allotment must be fenced.

(b) *Advances to Settlers.* The Board may make advances for the purpose of fencing and building dwelling-houses, and is empowered to erect dwelling-houses, outbuildings, or improvements on any allotment at a cost not exceeding £250 for any one allotment. Any sum so expended is repayable by instalments extending over a prescribed period, not greater than twenty years. Provision has also been made for deferring payments in cases of hardship, as well as for advances (to the extent of 60 per cent. of the value of the improvements) to enable work to be carried on. Special advances may also be granted to purchase wire netting in rabbit-infested districts.

(c) *Loans to Municipalities.* Under the Amendment Act of 1907 loans may be made out of the Closer Settlements Fund for the purpose of carrying out any road-making or other public works within the boundaries of an estate.

(d) *Areas acquired and made available for Closer Settlement.* The following statement shows the operations which have taken place in Victoria under the provisions of the Closer Settlement Acts, 1898 to 1910, up to the 30th June, 1901 and 1908 to 1913 :—

#### VICTORIA.—CLOSER SETTLEMENT, 1901 and 1908-1913.

| Year ended 30th June. | Total Area Acquired by Government to Date. | Total Cost to Date. | How Made Available for Settlement. |                             |                                     |                  |                     | Number of Applications Granted to Date. | Total Receipts to Date. | Repayments of Principal to Date. | Area Available for Settlement. |

(ii.) *The Small Improved Holdings Act 1906.* Under this Act, which has been repealed, 2822 acres at a cost of £53,568 allotted to 260 settlers were purchased close to towns where industrial employment could be obtained by the settlers.

These settlements are now under the control of the Closer Settlement Board.

(iii.) *Village Communities.* The settlement of land by Village Communities is now provided for in the Land Act 1901, but is not availed of to any extent. Certain unalienated Crown lands were surveyed into allotments of one to twenty acres. The price is not less than twenty shillings an acre. Additional areas may be acquired by conditional purchase. The rent is a nominal one for three years. The total amount of monetary aid advanced up to the 30th June, 1912, was £67,379, of which sum the amount repaid to date was £40,300. After three years a lease may be obtained.

Particulars of areas in process of cultivation under the Act are given hereinafter. (See § 11, 3.)

On the 30th June, 1913, there were 928 settlers actually residing, and 109 not residing, but improving, making a total of 1037 in occupation. Including wives and children the total number in residence was 4310. At the same date the area under cultivation was 11,257 acres; the value of live stock £56,596, and of improvements, £166,217.

(iv.) *Closer Settlement in the Irrigated Districts.* The movement for closer settlement in the irrigated districts started about four years ago. The State had expended between three and four million pounds on irrigation works, which were not being used to their full extent. Under the Goulburn Scheme, the largest of the State works, more than half the available water was being wasted. The reason was lack of people to cultivate the land as irrigation requires. Previously, in the various districts the average size of farms varied from 400 to 600 acres, while under irrigation from 20 to 80 acres will now give employment to a good-sized family and furnish them a comfortable living. The large farms of the irrigation districts could not be properly cultivated by their owners, and the only way to make irrigation a success was to subdivide these holdings and bring in farmers to cultivate the smaller areas. To this end the State offered to buy suitable land in any district having a reliable and ample water supply at a price fixed by impartial expert valuers, and has now purchased about 111,000 acres for this purpose. This land is sold to settlers on 31½ years' terms with 4½% interest on deferred payments. These payments are calculated on the Credit Foncier basis and are equalised through the whole period. As a result, the settlers by paying an additional 1½ per cent., or six per cent. in all, on the cost for 31½ years pay off both principal and interest. To help the settler of small capital, the State will build him a house and give 15 to 20 years to pay for it, will prepare a part of his area for irrigation and allow payments to be extended over 10 years. The cash payments required are as follows :—On houses costing less than £100, £10; from £100 to £150, £15; while on houses costing more the cash payment.

varies from 12 to 30 per cent. of the estimated cost. A cash payment of one-fifth the estimated cost of preparing land for irrigation is required. The State also makes loans to settlers equal to 60 per cent. of the value of permanent improvements, these loans to be repaid in 20 years. Five per cent. interest is charged on all advances—whether for houses, preparing land, or money furnished the settler. In the past four years 914 irrigated blocks, averaging 62 acres, have been taken by settlers, of whom 335 were from oversea, chiefly from Great Britain, and 579 were Australian. At Shepparton, one of the oldest of these settlements, there are now 100 families living where there were originally six. In Koyuga there are now 46 families with good houses, many young orchards, fine crops of lucerne and vegetables, where in November 1910 there was not a house, a family, or an acre of cultivated land. Under three years ago there were 27 houses in the Rochester district, now there are over 230. In Tongala there are now 180 houses where two years ago there were 30.

Similar progress has been made in the other settlements. Houses now being erected are of a better type than the original ones. This has been made possible because the settlers now applying have as a rule more capital than the earlier ones and desire better homes.

5. **Queensland.**—Under the provisions of the Closer Settlement Act of 1906 private lands may be re-purchased by the Crown, either by agreement or compulsorily.

(i.) *Compulsory Acquisition.* The owner of an estate in possession, the whole of which is proposed to be taken compulsorily, has the right to retain in one block, land of the value of £10,000 to £20,000 according to the value of the whole estate. The maximum sum which may be expended on the acquisition of land for the purpose of closer settlement is £500,000 in any one year.

(ii.) *Disposal of Land.* A sufficient part of the land acquired must be set apart for roads, public reserves, and townships, and the remainder is proclaimed open for selection as agricultural farms under the Land Act 1910, which repealed the Land Acts 1897 to 1909; the term of the lease is 25 years. The rent to be paid for the first year is equal to £10 for every £100 of the purchasing price; and (no payment being required during the second, third, or fourth years) an annual payment of £8 2s. 7d. for every £100, continued from the fifth to the twenty-fifth year, will, at the end of the term, have paid off the principal sum together with interest.

(iii.) *Areas Acquired and Selected.*—The following table gives particulars of the operations under the above Acts at the end of the year 1901 and of each year from 1908 to 1912:—

#### QUEENSLAND.—CLOSER SETTLEMENT, 1901 and 1908-1912.

| Year.       | Number of Estates Acquired. | Total Area Acquired to Date. | Total Amount of Purchase Money. | Total Area Selected to Date. |
|-------------|-----------------------------|------------------------------|---------------------------------|------------------------------|
|             |                             | Acres.                       | £                               | Acres.                       |
| 1901 ... .. | 15                          | 132,760                      | 335,056                         | 124,710                      |
| 1908 ... .. | 27                          | 456,742                      | 1,208,013                       | 364,334                      |
| 1909 ... .. | 27                          | 497,095                      | 1,349,251                       | 409,381                      |
| 1910 ... .. | 27                          | 537,449                      | 1,490,489                       | 437,496                      |
| 1911 ... .. | 29                          | 644,385                      | 1,670,330                       | 498,315 <sup>1</sup>         |
| 1912 ... .. | 29                          | 664,363                      | 1,713,165                       | 525,168                      |

1. In addition there were at the end of the year 1912, 11,750 acres sold at auction and 3136 acres retained by the Government for experimental farms and other sales.

The total area opened for selection up to the end of the year 1912 was 597,782 acres, of which 525,168 acres had been selected by 2077 selectors. There remained 72,614 acres unselected or reserved. The total amount of rent paid up to the same date was £878,855, the amount in arrear being £7320. At the end of the year 1912 there were 2077 selectors holding 2177 agricultural farms, 244 unconditional selections, and two prickly pear infested selections. In addition, land and improvements to the value of £76,726 had been sold at auction.

(iv.) *The Special Agricultural Selections Acts 1901 to 1905.* These Acts were partly repealed by the Amending Act of 1909, which was in its turn repealed by the Land Act 1910. Under the last Act land may be set apart for members of bodies of selectors who desire to settle in the same locality. The terms and conditions are similar to those in force for single selectors. Every group selection shall be subject to the condition of personal residence during the first five years of the term.

The Special Agricultural Selections Act 1905 provides that financial aid may be granted to all or any of the members of a body of selectors of agricultural homesteads. Advances may also be made to each selector for a value not exceeding £80 for the purpose of buying tools, rations, stock and poultry.

The portions opened for "group settlement" in 1912 numbered 906, and comprised a gross area of 557,346 acres. Up to the end of that year 678 portions, comprising 397,738 acres, valued at £233,914, had been applied for by members of the bodies of settlers for whom they were opened. The greater part of the remaining lots have since been selected.

**6. South Australia.**—Under the provisions of the Crown Lands Acts the Commissioner may repurchase land for the purposes of closer settlement at a cost not exceeding £600,000 in any two years.

Reference has already been made to the provisions of the Irrigation and Reclaimed Lands Acts 1908, regarding the settlement of reclaimed lands. (See § 7, 5 iv.)

(i.) *Disposal of Land.* The Crown Lands Act Further Amendment Act 1910 enlarges the value of the blocks into which estates may be subdivided for closer settlement purposes from £2000 to £5000 unimproved value. The purchase money with interest thereon at 4 per cent. per annum is payable in seventy half-yearly instalments, the first ten payments being interest only.

For the first five years, improvements to the value of £3 for every £100 of the purchase money must be yearly effected.

(ii.) *Areas Acquired and Selected.* The following table shews the area of land acquired by the Government in South Australia for the purposes of closer settlement, and the manner in which the same has been disposed of under the provisions of the Crown Lands Acts for the years 1902 and 1908 to 1912:—

**SOUTH AUSTRALIA.—CLOSER SETTLEMENT, 1902 and 1908 to 1912.**

| Year. | Area of Lands Repurchased to 31st Dec. | Agreements with Covenants to Purchase. | Total Area Leased as Homestead Blocks. |                  | Perpetual Leases. | Miscellaneous Leases. | Sold.  | Remainder Unoccupied (including Roads). |
|-------|--|--|--|------------------|-------------------|-----------------------|--------|---|
|       |  |  | Right of Purchase.                     | Perpetual Lease. |                   |                       |        |   |
|       | Acres.                                 | Acres.                                 | Acres.                                 | Acres.           | Acres.            | Acres.                | Acres. | Acres.                                  |
| 1902  | 156,481                                | —                                      | 2,717                                  | 3,073            | 90,126            | 309                   | 403    | 59,851                                  |

| 1910  | 527,501                                | 357,480                                | 1,241                                  | 1,510            | 62,386            | 40,077                | 35,266 | 29,541                                  |
| 1911  | 622,422                                | 411,370                                | 1,077                                  | 1,414            | 55,121            | 40,082                | 43,969 | 69,389                                  |
| 1912  | 624,122                                | 436,038                                | 894                                    | 1,386            | 49,857            | 40,101                | 57,884 | 38,408                                  |

During the financial year 1912-13 one property of 80 acres was repurchased. The total area repurchased at 30th June, 1913, was 624,220 acres, the purchase money being £1,918,441. Of that area 544,508 acres had been allotted to 2387 persons, the average area to each being 228 acres.

(iii.) *Irrigation Areas.* Under the Irrigation and Reclaimed Lands Act, 1908, 1909 and 1910, special provisions are made for granting perpetual leases of reclaimed lands. The maximum area of irrigable or reclaimed land one person may hold in any irrigation area is 50 acres. Each block is offered under perpetual lease, at a rent not less than a sum equivalent to 4 per cent. on the unimproved value of the land, plus the cost of reclaiming. For the first year only one-quarter of the fixed rent is payable, for the second year one-half, and for the third year three-quarters.

(a) *Irrigation Boards.* Irrigation Boards, to whom advances of money may be made by the Commissioner for Crown Lands, may be constituted in irrigation areas.

(b) *Government Loans to Settlers.* Under Part V. of the Act a fund is to be constituted, to be called the Lessees of Reclaimed Lands Loan Fund, consisting of money provided by Parliament, to be advanced to assist lessees to make improvements on their lands. The total amount owing by any lessee may not exceed £300. In cases of hardship the time may be extended by the Commissioner, the deferred payments carrying interest at 5 per cent.

During 1910 the Waikerie and Berri Irrigation Areas were gazetted. No irrigation areas were gazetted in 1911, but Rameo Village District has been added to the Waikerie Irrigation Area.

(iv.) *Village Settlement.* Out of the reserved lands the Commissioner is directed to set apart for the purpose of village settlement such land as he shall consider fit (a) for horticultural purposes, to be termed "horticultural land;" (b) for agricultural purposes, to be termed "commonage land;" and (c) land whereon any irrigation works are situated. Land so set apart is to be divided as follows:—Horticultural lands into blocks of as nearly as practicable equal unimproved value, and of about ten acres in extent; and the commonage lands into one or more blocks of such area as the Commissioner may determine, and the lands so set apart in each case form the district of the association. No person may hold more than two blocks. Commonage lands may only be leased to the association on perpetual lease, and all unleased horticultural blocks are under the control of the association. Every member of each association must provide or contribute towards the maintenance and regulation of irrigation works and the care and cultivation of the commonage lands.

As the Waikerie district was proclaimed an irrigation area under the Irrigation and Reclaimed Lands Acts 1908 and 1909, and the settlers of Kingston have applied to be dealt with under the same Acts, this would leave only the Lyrup Village Settlement, which is in a better position, both financially and as regards population, than the others.

(v.) *Homestead Blocks.* Aboriginal reservations, except those at Point McLeay or Point Pearce, and other suitable lands may be offered as homestead blocks on perpetual lease or lease with a right of purchase. Each block must not exceed £100 in value, and residence by a member of the family for at least nine months of every year is compulsory.

There is now hardly any demand for homestead blocks, persons generally preferring small blocks of repurchased or Crown lands on ordinary conditions. The system appears to be of value only in centres of population where work can be obtained, and within a reasonable distance of a school.

- (a) *Advances to Blockholders.* Advances up to £50 may be made by the Commissioner to any homestead blockholder who has complied with the conditions of his lease or agreement, to assist in erecting permanent buildings on the blocks, or other improvements. Advances must be repaid, with interest at 4 per cent. per annum, by twenty equal instalments, commencing twelve months from the date of advance. The Commissioner may, in case of hardship, extend the time of repayment, deferred payments bearing interest at 5 per cent. per annum. The total amount advanced up to the 30th June, 1913, was £40,802, of which £38,322 had been repaid.
- (b) *Particulars of Homestead Blocks.* The total number of leases and agreements of which purchase had been completed to the 31st December, 1912, was 1998, comprising 30,238 acres, at a purchase price of £71,112, or an average of £2 7s. per acre, the average of each holding of which purchase was completed being 15 acres.

7. **Western Australia.**—Under the Agricultural Lands Purchase Act 1909, which repealed and consolidated the Agricultural Lands Purchase Acts 1896 to 1904, sums not exceeding in the aggregate £400,000 may be expended on the repurchase of Crown lands near the railways, suitable for immediate cultivation.

(i.) *Acquisition of Land by the Government.* For the purpose of carrying out the provisions of the Acts, a Land Purchase Board has been constituted. Advised by the report of the Board, the Minister, with the approval of the Governor, may make a contract for the acquisition of the land by surrender at the price fixed by the Board, or at any lesser price.

(ii.) *Sale of Repurchased Land.* After reservation of part of the repurchased land for public purposes, the remainder is thrown open for selection. The maximum quantity held by one person must not exceed 1000 acres; in special cases 2000 acres.

(iii.) *Conditions of Sale to Selectors.* The maximum selling price of any repurchased land is equal to 105 per cent. of the actual cost of the land plus the cost of any improvements made upon it. A lease for twenty years is issued at a rent, the half-yearly instalments of which are to be at the rate of £3 17s. 9d. for each £100 of the selling price. Improvements must be made to the value of one-fifth of the purchase-money every two years of the first ten years of the lease. One-half of the land must be fenced within the first five years and the whole within ten years. Loans may be granted to selectors under the provisions of the Agricultural Bank Acts.

(iv.) *Areas Acquired and Selected.* The transactions conducted under the provisions of the Agricultural Lands Purchase Acts are shewn for 1901 and for each year from 1908 to 1913 in the subjoined table:—

**WESTERN AUSTRALIA.—CLOSER SETTLEMENT, 1901 and 1908-9 to 1912-13.\***

| Year.      | Total Area Acquired. | Total Purchase-money. | Roads, Reserves, etc. | Total Area made available for Selection. | Area Selected during the Year. | Total Area occupied to Date. | Balance of Area available for Selection. | Total Revenue received to Date. |
|------------|----------------------|-----------------------|-----------------------|--|--------------------------------|------------------------------|--|---------------------------------|
|            | Acres.               | £                     | Acres.                | Acres.                                   | Acres.                         | Acres.                       | Acres.                                   | £                               |

| 1911-12    | 303,469              | 270,622               | 14,506                | 282,385                                  | 8,375                          | 264,685                      | 18,000                                   | 151,110                         |
| 1912-13    | 446,804              | 421,333               | 12,799                | 290,670                                  | 10,335                         | 270,945                      | 19,724                                   | 175,245                         |

\* The figures for 1901 are up to 31st December. For 1908-9 and subsequent years they are given as up to 30th June.

On the 30th June, 1913, the total expenditure, exclusive of purchase-money but including interest, was £88,460, which left a balance of £86,785. At the same date the amount invested as sinking fund was £86,426. During the year 1912-13 two properties, viz., Henty and Yandanooha, having a total area of 144,526 acres, were purchased, but have not yet been made available for selection.

(v.) *Working Men's Blocks.* Any person not already holding land within the State is entitled to obtain a lease of lands which have been surveyed and thrown open for selection as working men's blocks. The maximum area that may be selected by one person is, if within any town or goldfield, half an acre, or five acres elsewhere. The price is not less than twenty shillings per acre, payable in ten years by half-yearly instalments. Residence and improvement conditions must be fulfilled. At the expiration of the lease, or at any time after five years from the date of the commencement of the lease, upon compliance with all conditions and upon payment of the full purchase-money and fee, a Crown grant will be issued. No person who has once held a working-man's block is allowed to select another, except under very special circumstances.

The following table shows the number and area of accepted applications for working men's blocks during each year, as well as the total number and area in existence at the end of the year 1901 and for each year from 1908 to 1913:—

**WESTERN AUSTRALIA.—PARTICULARS OF WORKING MEN'S BLOCKS,  
1901 and 1908 to 1913.**

| Year ...  | ... | 1901. | 1908. <sup>1</sup> | 1909. <sup>1</sup> | 1910. <sup>1</sup> | 1911. <sup>1</sup> | 1912. <sup>1</sup> | 1913. <sup>1</sup> |

1. For financial year ended 30th June.

During the years 1907 to 1911 residential blocks on the goldfields were made available as workingmen's blocks, instead of under residential lease, as before, and since 19th October, 1911, the system of leasehold has been reverted to.

8. *Tasmania.*—The principles of closer settlement were not introduced into Tasmania until the Closer Settlement Act of 1906 was passed. Under this Act, which was amended in 1908, and again in 1911, power is given to the Minister for Lands, on the recommendation of the Closer Settlement Board, to purchase by agreement private land in any part of Tasmania for the purpose of closer settlement, and also to deal with and dispose of any unoccupied Crown land for the same purpose.

(i.) *Disposal of Land.* Lands so brought under the Act are subdivided into farm allotments of a suitable size—not exceeding £1500 in value—and are disposed of by way of lease for ninety-nine years. The rental is determined by the Board at a rate not exceeding 5 per cent. per annum on the capital value of the land. Any lessee who has fulfilled the conditions under the Act may, after the expiration of ten years of the term of the lease, purchase the land leased to him. Under the Amendment Act of 1908 the Minister is authorised to lease any allotment of land exceeding £1500, but not exceeding £4000 in value, exclusive of buildings.

A lessee must improve his holding to a value equal to  $2\frac{1}{2}$  per cent. on the capital value of the land in each of the first ten years of the term of his lease, and he must, within two years of the date of the lease, personally reside on his allotment during at least eight months of each of the following nine years.

Under the Amendment Act of 1911, provision is made for reserving a proportion of the allotments thrown open, and leasing the same, under special terms and conditions, to *bonâ fide* immigrants.

(ii.) *Advances to Settlers.* The total advance by the Government in aid of the cost of effecting improvements to any one lessee must not exceed one-fifth of the capital value of such lessee allotment, and must not exceed pound for pound the sum expended by him in fencing and building. Such advances must be repaid, together with interest at 5 per cent., in equal half-yearly instalments.

(iii.) *Special Sales.* The fee-simple of land acquired may be disposed of by sale on the recommendation of the Board as sites for churches, public halls, dairy factories, fruit-preserving factories, mills, or creameries. The area sold may not exceed one acre in the case of a church or public hall, or five acres in other cases.

(iv.) *Areas Acquired and Selected.* Up to the 30th June, 1913, ten areas, viz., Cheshunt, Mount Pleasant, Forester No. 1 and No. 2, Isandula, Brinktop, Frogmore, Woolmers, Branhholm and Hillhome had been opened up for closer settlement. Particulars are given in the following statement:—

#### TASMANIA.—CLOSER SETTLEMENT, 1907 to 1913.

| Year. |     |     | Number of<br>Farms made<br>Available. | Number of<br>Farms<br>Allotted. | Area<br>of Farms<br>Allotted. | Rental of<br>Farms<br>Allotted. | Total Area<br>Purchased. |

| 1909  | ... | ... | 49                                    | 45                              | 9,117                         | 789                             | 7,902                    |
| 1910  | ... | ... | 9                                     | 15                              | 1,872                         | 539                             | 1,362                    |
| 1911  | ... | ... | 37                                    | 36                              | 4,965                         | 168                             | 5,143                    |
| 1912  | ... | ... | 11                                    | 7                               | 3,912                         | 563                             | 6,147                    |
| 1913  | ... | ... | 18                                    | 21                              | 5,652                         | 1,134                           | 3,745                    |
| Total | ... | ... | 213                                   | 204                             | 44,074                        | 5,750                           | 49,476                   |

The total purchase-money paid by the Government up to the 30th June, 1913, was £135,857.

### § 9. Occupation of Crown Lands under Leases and Licenses Issued by Mines Departments.

1. *Introduction.*—Leases and licenses for the occupation of Crown lands for mining and other purposes are issued by the Mines Departments in all the States. Such leases and licenses may be issued with respect to all Crown lands, whether otherwise unoccupied or whether occupied also under leases and licenses issued by the Lands Departments. Certain Crown lands, such as reserves, etc., are, however, subject to special conditions.

(i.) *Mining on Private Lands.* Certain of the Crown lands of the several States have been alienated from time to time, subject to various reservations in respect of gold and other minerals which might afterwards be found therein. Other lands have been alienated without such reservation, but as the mineral gold does not pass from the Crown unless by express conveyance, it has remained the property of the State on all alienated lands. All lands alienated or in process of alienation are open to mining for gold; but to mining for other minerals, those lands only are open in respect of which the rights are reserved in the grants. There are, however, generally certain reservations, such as those with reference to town or village lands and lands which have been built on or are used for special purposes. The working of minerals on private lands is regulated in the several States either by special Acts or by special provisions of the Acts relating to mining.

(ii.) *Leases and Licenses Issued and Total Areas of Crown Lands Occupied.* The following tables shew the total areas of Crown lands for which leases and licenses for mining purposes were issued in each State during 1901 and for each year from 1908 to 1912 inclusive, and also the total areas of Crown lands occupied for mining purposes at the end of each year during the same period:—

**CROWN LANDS, LEASES AND LICENSES FOR MINING PURPOSES, 1901 and  
1908 to 1912.**

1. Including private lands, leases, and water right licenses only. 2. Exclusive of lands held under miners' rights only, amounting in 1908 to approximately 27,500 acres. 3. Exclusive of miners' rights. 4. Excluding Victoria, except for 1910, 1911 and 1912.

**2. New South Wales.** Under the provisions of the Mining Act 1906 and the regulations made thereunder, Crown lands may be occupied for mining or other purposes by virtue of (i.) miners' rights; (ii.) business licenses; (iii.) authorities to prospect; or (iv.) leases.

A description of the conditions under which these licenses and leases are granted may be found in previous issues of the Year Book. (See Year Book No. 6, p. 307.)

(i.) *Particulars of Leases and Licenses Issued, 1912.* The following table gives particulars of leases and licenses of Crown lands issued by the Mines Department during the year 1912:—

**NEW SOUTH WALES.—LEASES AND LICENSES,  
ISSUED BY MINES DEPARTMENT DURING YEAR 1911.**

| Particulars.                     | Act under which Issued.        | Purpose for which Issued.    | Area.         |

| <i>Leases—</i>                   | Mining Act 1906 ... ..         | To mine for—                 | Acres.        |
|                                  | " " " " " "                    | Gold ... ..                  | 1,566         |
|                                  | " " " " " "                    | Minerals other than coal ... | 6,851         |
|                                  | " " " " " "                    | Coal ... ..                  | 4,820         |
|                                  | " " " " " "                    | Leases (mining purposes) ... | 110           |
|                                  | Mining Act 1906 (Dredging) ... | Gold ... ..                  | 2,018         |
|                                  | " " " " " "                    | Minerals other than gold }   |               |
| <i>Other forms of occupancy—</i> | Mining Act 1906 ... ..         | Authorities to prospect ...  | 183           |
| <b>Total ... ..</b>              | <b>—</b>                       | <b>—</b>                     | <b>15,548</b> |

It may be remarked that the Mining Act 1874 has now been repealed, so that no further authorities will be issued under that Act.

(ii.) *Leases and Licenses Issued and Areas Occupied.* The following table gives particulars of the areas of Crown lands for which leases and licenses were issued by the Mines Department during each year, and of the total areas of Crown lands occupied under such leases and licenses at the end of the year 1901 and from 1908 to 1912 inclusive:—

**NEW SOUTH WALES.—LEASES AND LICENSES.**

3. **Victoria.**—The occupations of Crown lands for mining and auxiliary purposes in this State is regulated by the Mines Act 1890-1907. The Department of Mines and Forests is authorised to issue mining leases (gold-mining, mineral, and dredging), and special license (searching, tailings, and water-right), while the issue of miners' rights, business licenses and residence areas is restricted to the Treasury Department. A description of the conditions governing the issue of these leases and licenses will be found in previous editions of the Year Book. (See Year Book No. 6, p. 308.)

Licenses of auriferous lands not for mining purposes may be issued by the Lands Department. (§ 7, 3 iv.)

*Leases and Licenses Issued and Areas Occupied for Mining.* Particulars of leases and licenses for mining purposes of Crown lands alone are not available, the official returns including also private lands. During the year 1912 the number of mining leases, licenses, etc., issued was 552, covering an area of 34,047 acres; the rent, fees, etc., received amounted to £2590. No particulars are available as to the total area of either Crown or private land occupied for mining purposes.

4. **Queensland.**—The occupation of the Crown lands for mining purposes in this State is regulated by the Mining Acts 1898 to 1902, and the Mining for Coal and Mineral Oil Act 1912. Under these Acts the Department of Mines is authorised to issue:— (i.) Miners' rights; (ii.) mining leases; (iii.) mining leases and licenses for coal and mineral oil; and (iv.) miners' homestead leases.

The conditions which govern the issue of miners' rights, mining leases, and miners' homestead leases are described in previous issues of the Year Book. (See Year Book No. 6, p. 309.)

Mineral leases for coal and mineral oil may be granted for a term of twenty-one years at an annual rent of sixpence an acre, together with a royalty according to the distance the lease is from a seaport or other place of delivery of twopence to threepence per ton of coal raised during the first five years of the lease and of fourpence to sixpence per ton during the remainder of the term. A lease for mineral oil with a maximum area of 30 acres may be granted for a term of 21 years at an annual rental of 6d. per acre, with a royalty of 5% of the value of all crude oil produced. Licenses to occupy not more than 2560 acres may be granted to any person desiring to prospect Crown lands for coal and mineral oil upon payment of one penny for every acre comprised in the application.

The "Mining on Private Land Act 1909," authorizes the granting of leases, etc. on and under private land, under conditions as to compensation, etc.

(i.) *Particulars of Leases and Licenses Issued, 1912.* The subjoined table gives particulars of the leases and licenses of Crown lands issued for mining purposes during the year 1912:—

### QUEENSLAND.—LEASES AND LICENSES.

ISSUED BY MINES DEPARTMENT DURING YEAR 1912.

| Lease or License.        | Mining Leases.   |                                      |          |                         | Miners' Homestead Leases. | Coal Prospecting Licenses. | Miscellaneous Rights & Licenses. |

\* Exclusive of lands held under miners' rights only.

5. **South Australia.**—In this State leases and licenses for mining purposes are issued by the Department of Mines under the authority of the Mining Act 1893, as amended in 1900. Under these Acts mining and prospecting are permitted in virtue of (i.) miners' rights; (ii.) mining leases; (iii.) coal or oil leases; and (iv.) miscellaneous leases, and in addition occupation of Crown lands is permitted by virtue of (v.) business claims, and (vi.) occupation licenses.

The conditions which govern the issue of these various leases and licenses have been described in previous issues of the Year Book. (See Year Book No. 6, p. 311.)

(i.) *Particulars of Leases and Licenses, 1912.* The following table gives particulars of leases and licenses of Crown lands issued by the Mines Department during the year 1912:—

## SOUTH AUSTRALIA.—LEASES AND LICENSES.

ISSUED BY THE MINES DEPARTMENT DURING YEAR 1912.

| Particulars.          | Act under which Issued.              | Purpose for which Issued.  | Area.   |
|-----------------------|--------------------------------------|--|---------|
|                       |                                      |  | Acres.  |
| Leases ... ..         | Mining Act 1893 ... ..               | To mine for—<br>Gold and other metals and miner's  | 8,221   |
| Mineral claims ... .. | Mining Act Amendment Act 1900 ... .. | To "search for" precious stones,<br>mineral phosphates, oil, rare<br>metals, minerals, and earths, the<br>mining for which has not proved<br>payable in any portion of the State | 11,160  |
| Licenses ... ..       |                                      |  | 240,000 |
| Total ... ..          | —                                    | —  | 259,381 |

(ii.) *Leases and Licenses Issued and Areas Occupied.* The following table gives particulars of the areas of Crown lands for which leases and licenses were issued by the Mines Department during each year, and of the total area of Crown lands occupied under such leases and licenses at the end of the year 1901 and from 1908 to 1912 inclusive:—

### SOUTH AUSTRALIA.—LEASES AND LICENSES.

ISSUED BY MINES DEPARTMENT, 1901 AND 1908 TO 1912.

| Particulars.                     | 1901.           | 1908.        | 1909.         | 1910.         | 1911.         | 1912.         |

| Total ... ..                     | 14,140          | 100,387      | 84,293        | 197,714       | 89,077        | 292,320       |

\* Exclusive of miners' rights.

The following table shews the total area occupied (exclusive of miners' rights) at the end of the year 1912, classified according to the nature of the holding:—

### SOUTH AUSTRALIA.—TOTAL AREA UNDER MINING ACTS, 1912.

| Nature of Holding.          | Number. | Area.  | Nature of Holding.         | Number. | Area.   |
|-----------------------------|---------|--------|----------------------------|---------|---------|
|                             |         | Acres. |                            |         | Acres.  |
| Mineral leases ... ..       | 252     | 12,101 | Search licenses ... ..     | 130     | 240,000 |
| Gold leases ... ..          | 76      | 1,424  | Coal and oil claims ... .. | 5       | 3,200   |
| Gold dredging leases ... .. | 1       | 100    | Gold claims ... ..         | 5       | 12      |
| Miscellaneous leases ... .. | 57      | 15,369 |                            |         |         |
| Mineral claims ... ..       | 531     | 19,997 |                            |         |         |
| Occupation licenses ... ..  | 234     | 117    | Total ... ..               | 1,291   | 292,320 |

6. **Western Australia.**—The issue of leases and licenses by the Mines Department is regulated by the Mining Act 1904. Under this Act Crown lands may be occupied by virtue of (i.) Miners' rights; (ii.) mining leases; and (iii.) miners' homestead leases.

The conditions governing the issue of these leases and licenses are described in previous issues of the Year Book. (See Year Book No. 6, p. 312.)

(i.) *Particulars of Leases and Licenses Issued, 1912.* The following table gives particulars of mining leases and licenses of Crown lands issued during 1912:—

**WESTERN AUSTRALIA.—LEASES AND LICENSES ISSUED BY MINES DEPARTMENT, 1912.**

| Particulars. | Gold-Mining. | Minerals other than Gold. | Miners' Homesteads. | Miscellaneous. | Total. |

\* Exclusive of miners' rights.

7. *Tasmania.*—Under the provisions of the Mining Act 1905, Crown lands in this State may be occupied for mining and auxiliary purposes by virtue of (i.) prospectors' licenses; (ii.) miners' rights; (iii.) mining leases; and (iv.) miscellaneous licenses. Business and residence licenses within mining areas may be issued by the Lands Department. (See § 7, 8 iv.)

A description of the conditions under which these leases and licenses are issued may be found in previous editions of the Year Book. (See Year Book No. 6, p. 314.)

(i.) *Particulars of Leases and Licenses Issued, 1912.* The following table shows particulars of leases and licenses of Crown lands, exclusive of prospectors' licenses and miners' rights, issued by the Mines Department during the year 1912 :—

## § 10. Resumption by Crown of Alienated Lands.

1. **General.**—Under various Acts, alienated lands may be compulsorily resumed by the Crown in the several States for certain purposes, generally connected with works of a public nature. Resumptions for closer settlement purposes have already been referred to (see § 1, above). In most of the States there are Lands Clauses or similar Acts providing the machinery, and indicating the procedure to be adopted in assessing the compensation to be paid by the Crown to private owners in cases where the parties have failed to agree as to the amount to be paid. The provisions of these Acts are generally incorporated in the special Acts specifying the purposes for which alienated lands may be resumed. Lands leased for pastoral purposes may generally be resumed by the Crown on short notice. The lessee is ordinarily entitled to compensation for land resumed, for loss or depreciation in value of the lease caused by such resumption, and for improvements.

(a) *New South Wales.* Alienated lands may be recovered by the Crown for authorised works and certain public purposes under the provisions of the Public Works Act 1900, and in other cases may be acquired by the Crown by purchase, gift, or surrender under Executive authority. Alienated lands required for public roads may be resumed under the Public Roads Act 1902, and if containing gold may be resumed for mining under Section 72 of the Mining Act 1906. Lands dedicated or granted by the Crown for public purposes may be resumed under Section 105 of the Crown Lands Act 1884, Section 41 of the Crown Lands Act 1889, and Section 1 of the Public Trusts Act 1897. Surrender and exchange of lands alienated or in process of alienation may be carried out under Section 47 of the Crown Lands Act 1895.

(b) *Victoria.* In Victoria lands may be resumed in accordance with the provisions of the Lands Compensation Act 1890, the Public Works Act 1890, the Railways Acts, the Land Act 1901, the Local Government Act 1903, the Water Act 1905, the Vacant Unclaimed Lands Act 1906, and the Forests Act 1907.

(c) *Queensland.* In this State alienated lands may be resumed under the provisions of the Public Works Land Resumption Act 1906, for any of the purposes specified in Section 4 of that Act.

(d) *South Australia.* In this State the principal Acts under which land is re-purchased for public works are the Railways Commissioners Act 1887, the Water Conservation Acts 1886, 1889, and 1900, the Waterworks Act 1882, and the Sewers Act 1878.

(e) *Western Australia.* In Western Australia private lands may be resumed under the provisions of the Land Act 1898, the Roads Act 1902, and the Public Works Act 1902.

(f) *Tasmania.* The procedure for resuming land when required for road purposes is as follows:—

When provision is made by Parliament for a Public Works vote for any road, or when amount is available from other sources, such as under the Crown Lands Act (under which a proportion of the amount paid as purchase money is set aside for road purposes), application is made to the owner of the property through which the road is to pass. In most cases either land is given free or a price is agreed on between the owner and the officers of the Department. The purchase-money, with cost of necessary survey, is charged against the provision as referred to above, the land is surveyed and proclaimed under the provisions of the Lands Vesting Act. In case of it being impossible to settle the matter by arrangement with the owner, the land can be acquired by arbitration under the Lands Clauses Act, which is incorporated with the Public Works and Crown Lands

Acts, but since the passing of the Lands Resumption Act it is possible to acquire in a compulsory way without waiting for the usual formalities. Under this Act a notification is given to the owner, the land is surveyed, and then resumed by notification in the Gazette, on the publication of which the fee simple of the land vests at once in the Crown absolutely. The owner is then called upon to submit his claim, and the amount can be settled either by arbitration or by a court of competent jurisdiction in accordance with the provisions of the Lands Resumption Act. This procedure, that is, under the Lands Resumption Act, is now becoming much more general in cases where the land cannot be acquired by arrangement, and it is expected that the effect of the operation of the Act will be to the advantage of the Government and consequently to the public, in enabling land to be acquired more economically than under the former practice. The local bodies, that is, the municipalities, have also power to acquire land under the provisions of the Local Government Act, but in practice it has been found most convenient for the procedure to be carried out by the Public Works Department on behalf of the local bodies, and this insures the title being vested in the Crown, which gives uniformity of practice, and has also the effect that inquiry made as to title at the Government office shows at once the land that has been acquired.

**2. Areas Resumed.**—The subjoined table shews, so far as particulars are available, the areas of private lands resumed, exclusive of resumptions for closer settlement purposes, in each State during 1901 and 1908-12:—

#### AREAS OF PRIVATE LANDS RESUMED BY THE CROWN

(EXCLUSIVE OF RESUMPTIONS FOR CLOSER SETTLEMENT), 1901 AND 1908-12.

\* Exclusive of resumptions for railway purposes, which for the years 1901 to 1906, inclusive, amounted to 13,081 acres. † Not available. ‡ Exclusive of South Australia.

### § 11. Alienation and Occupation of Crown Lands in the Several States.

**1. Introduction.**—The tables given in the previous parts of this section shew separately the areas alienated, in process of alienation, and occupied under various tenures in the several States. The tables given below shew collectively the general condition of the public estate in each State, having regard to (a) the area alienated absolutely, which includes free grants, sales, and conditional purchases for which grants have been issued, the conditions having been complied with; (b) the area in process of alienation, comprising holdings for which the fee-simple has not yet been alienated, but which are in process of sale under systems of deferred payments; (c) the area occupied under all descriptions of leases and licenses; and (d) the area unoccupied, which, ordinarily, includes roads, permanent reserves, forests, etc. In some cases, however, lands which are permanently reserved from alienation are occupied under leases and licenses, so that

in such cases the areas reserved are comprised in class (c) and not in class (d). Particulars of leases and licenses of reserved areas, as distinguished from leases and licenses of other lands, are not available. It should be observed that in many cases lands occupied under leases or licenses for pastoral purposes are held on short tenures only, and could thus be made available for settlement practically whenever required.

**2. New South Wales.**—The total area of the State of New South Wales (exclusive of Commonwealth Territory) is 198,054,420 acres, of which on the 30th June, 1913, 39,584,685 acres, or nearly one-fifth, were alienated absolutely; 18,233,338 acres, or over one-eleventh were in process of alienation; 124,590,163 acres, or about three-fifths, were occupied under Lands Department, Western Land Board, or Mines Department leases and licenses; and the remaining 15,648,234 acres, or about one-eleventh, were unoccupied. The next table shews the areas alienated, in process of alienation, held under leases and licenses, and unoccupied, in 1901 and from 1909-10 to 1912-13.

During the year 1912-13, a total area of 1,839,837 acres became available for homestead selection, and settlement lease, Crown leases, homestead farms and suburban and additional holdings. Of this area, 28,693 acres were made available for irrigation farms, 765 acres for settlement purchase, and 107,791 acres were acquired under the Closer Settlement Promotion Act.

**NEW SOUTH WALES.—ALIENATION AND OCCUPATION OF CROWN LANDS,  
1901 and 1909-1913.\***

Area of State (exclusive of Commonwealth Territory)—198,054,420 acres.

\* The figures for 1901 are up to the 31st December, while for the other years given they are up to the 30th June. † Includes 495,052 acres acquired for closer settlement. ‡ Inclusive of alienated area within the Commonwealth Territory, and acquisitions under Closer Settlement Acts. § Now included under Homestead grants. || Up to 31st December.

3. **Victoria.**—The total area of the State of Victoria is 56,245,760 acres, of which 23,856,389 acres, or about three-eighths, had been alienated absolutely up to the end of the year 1912; 7,198,531 acres, or about one-eighth, were in process of alienation under deferred payments; and 14,443,191 acres were occupied under leases and licenses, while the remaining 10,747,649 acres were unoccupied. The following table shews the areas alienated and in process of alienation, together with the areas reserved, leased, and available for occupation at the end of the year 1901 and from 1908 to 1912 :—

**VICTORIA.—ALIENATION AND OCCUPATION OF CROWN LANDS, 1901 and 1908-1912.**

Total area of State—56,245,760 acres.

\* Including 187,778 acres which, having reverted to the Crown in March, 1911, are now included in Mallee Lands. † Not available.

Crown lands in Victoria include roads, 1,708,824 acres; water reserves, 315,748 acres; agricultural colleges, etc., 85,107 acres; State forests and timber reserves (now under Forests Act 1907), 3,825,946 acres; State forests and timber reserves under Land Acts, 268,480 acres; reserves in the Mallee, 397,881 acres; unsold land in towns, etc., 1,754,255 acres; and other reserves, 299,300 acres. The Crown Lands Reserve Act was passed in 1910; it revokes permanent reserves for public purposes, in order that the areas totalling 1,591,500 acres may be dealt with as unoccupied Crown lands. Of these lands 1,195,000 acres are mallee country situated in the county of Millewa, while the remainder, 396,500 acres, are situated in the counties of Dargo and Croajingolong in the eastern part of the State.

4. **Queensland.**—The total area of this State is 429,120,000 acres, of which, on the 31st December, 1912, 15,874,202 acres, or about one-twenty-seventh, were alienated absolutely; 9,577,037 acres, or about one-forty-fifth, were in process of alienation; 317,615,144, or nearly three-quarters, were occupied under leases and licenses; roads, reserves, etc., occupied 15,471,446 acres, the remaining 70,682,171 acres being unoccupied. From 1901 to 1912 the area alienated absolutely increased by 2,340,734 acres or 17½ per cent., and the area in process of alienation by 6,785,373 acres or 243 per cent.

The following table shews the area alienated absolutely, the area in process of alienation, and the area held under various forms of lease and license at the end of the year 1901 and from 1908 to 1912 :—

Total area of State—429,120,000 acres.

The area open for selection (as distinguished from occupation for purely pastoral or special purposes) under every mode at the beginning of the year 1912 was 6,583,732 acres, and the area opened during the year was 10,885,397 acres, while the area withdrawn was 1,687,448 acres. The area selected was 6,976,745 acres, and the area remaining open at the end of the year was 8,804,936 acres. The number of grazing selections was 571 as against 414 in the previous year, and their gross area 4,695,807 acres, as against 4,488,712 acres.

**5. South Australia.**—The area of the State of South Australia is 243,244,800 acres. In South Australia, at the end of the year 1912, there were 10,252,746 acres, or about one twenty-fourth, alienated absolutely; 1,782,451 acres, or about one one-hundred and thirty-sixth, were in process of alienation; 115,829,476 acres, or about one-half were occupied under leases and licenses; while the remaining 115,380,127 acres were unoccupied. From 1901 to the end of 1911, the area of land absolutely alienated has increased by upwards of three million acres, or over 36 per cent., while, during the same period, the area of land in process of alienation has increased by upwards of two million acres, or over 220 per cent. The subjoined table shews for South Australia the area of land alienated absolutely, and in process of alienation under deferred payments, and the area held under different forms of leases:—

Total area of State—243,244,800 acres.

\* Exclusive of miners' rights.

**6. Western Australia.**—The total area of Western Australia is 624,588,800 acres, of which on the 30th June, 1913, 7,606,759 acres, or about a one-eighty-fifth part, were alienated absolutely; 13,755,787 acres, or about one-forty-seventh part, were in process of alienation; while 188,547,418 acres, a little more than a quarter, were occupied under leases and licenses issued either by the Lands or the Mines Departments. The remaining 414,678,836 acres, or about two-thirds, were unoccupied.

The following table shews the area alienated absolutely and conditionally, and the areas held under leases and licenses at the end of the years 1901 and on 30th June, 1909 to 1913:—

Total area of State—16,777,600 acres.

8. **Northern Territory.**—On the 1st January, 1911, the Northern Territory was taken over by the Commonwealth. In the Northern Territory at the end of the year 1912, there were 473,990 acres, or only about one seven-hundred-and-seventh part alienated absolutely; 96,026,438 acres, or nearly two-sevenths, were held under leases and licenses; while the remaining 238,616,372 acres, or about five-sevenths, were unoccupied. The following table shews the area of land alienated absolutely, and also the area under lease :—

**NORTHERN TERRITORY.—ALIENATION AND OCCUPATION OF CROWN LANDS,  
1901 and 1908-1912.**

Total area of Northern Territory—335,116,800 acres.

## § 12. Classification of Holdings according to Size.

1. **General.**—The classification of holdings according to their area is of interest chiefly in relation to the efforts made by the several States in recent years to promote settlement on the land on blocks of suitable size, especially by means of the Closer Settlement Acts. Returns shewing such a classification are not available for Queensland and the Northern Territory.

A table shewing the movement of land consequent on the operation of the Commonwealth Land Tax Act of 1910, can be found in the section dealing with Commonwealth Finance.

The following table gives particulars of the number and aggregate area of holdings of lands alienated and in process of alienation in area series, as returned to the collectors of agricultural statistics, for all the States excepting Queensland and the Northern Territory for the season 1912-13:—

## CLASSIFICATION OF HOLDINGS (ONE ACRE AND OVER) IN AREA SERIES, 1912-13.

| Size of Holdings.   | N.S.W. | Victoria. | S. Aust. | W. Aust. | Tasmania. | Federal Territory | Total.  |
|---------------------|--------|-----------|----------|----------|-----------|-------------------|---------|
| NUMBER.             |        |           |          |          |           |                   |         |
| Acres.              |        |           |          |          |           |                   |         |
| 1 to 50 ...         | 38,641 | 18,757    | 6,909    | 3,656    | 4,752     | 36                | 72,751  |
| 51 " 100 ...        | 8,955  | 7,356     | 1,724    | 609      | 2,378     | 32                | 21,054  |
| 101 " 500 ...       | 26,251 | 24,735    | 5,691    | 3,320    | 5,161     | 90                | 65,248  |
| 501 " 1,000 ...     | 8,616  | 10,181    | 3,590    | 3,465    | 705       | 30                | 26,587  |
| 1,001 " 5,000 ...   | 7,287  | 5,364     | 3,075    | 3,545    | 634       | 43                | 19,948  |

| 10,001 " 20,000 ... | 5,206,019  | 1,609,045  | 656,659    | 1,155,013  | 852,499   | 35,534  | 9,514,769   |
| 20,001 " 50,000 ... | 7,103,057  | 992,521    | 642,254    | 822,823    | 731,539   | 116,213 | 10,408,407  |
| 50,001 and over ... | 7,501,515  | 51,400     | ...        | 606,495    | 258,898   | ...     | 8,418,308   |
| Total...            | 53,995,859 | 28,429,357 | 11,652,952 | 14,817,354 | 5,777,133 | 294,329 | 114,966,984 |

2. **New South Wales.**—The total number of holdings of one acre and over in area in this State on the 31st March, 1901, was 69,439. On the 31st March, 1913, the corresponding number was 91,313, shewing an increase of about 30 per cent. The following table shews the number of holdings of land alienated and in process of alienation, on the 31st March, 1901, and from 1908 to 1913:—

## NEW SOUTH WALES.—NUMBER OF HOLDINGS ALIENATED AND IN PROCESS OF ALIENATION, 1901 and 1908-1913.

| Size of Holdings.   | 1901.   | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   | 1913.   |

5. **Western Australia.**—In this State the number of holdings of one acre and over in area was 5699 for the season 1900-1 (see Year Book No. 1), and 14,925 for the season 1911-12, shewing an increase of 7926, or about 150 per cent. The subjoined table shews the number of holdings of land alienated, and in process of alienation, for 1901 and 1909-1913:—

**WESTERN AUSTRALIA.—NUMBER OF HOLDINGS ALIENATED AND IN PROCESS OF ALIENATION, 1901 and 1909-13.**

| Size of Holdings.   | 1900-1. | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |

**§ 13. The Progress of Land Settlement, 1901 to 1912.**

1. **Recent Progress.**—The progress of settlement and the growth of land alienation in the States of the Commonwealth under recent legislation is seen in the subjoined statement, which shews concisely the condition of the public estate in each State and in the Commonwealth, at the end of 1901 and of each year from 1908 to 1912 inclusive. The effect of the land laws during that period has been generally to diminish the number of large holdings, at the same time decreasing the area held under lease, while both the area alienated and the area in process of alienation have increased. As leases of large areas fall in or are otherwise terminated they are in many cases not renewed, but the land leased is cut up for the purpose of settlement under systems of deferred payment; the

State Governments, also, have in many cases acquired by repurchase considerable areas under the provisions of the various Closer Settlement Acts. Further, greater facilities have been granted to the working classes to acquire possession of the soil, and special inducements have been offered to *bona fide* settlers by the introduction of new forms of tenure on easy terms and conditions.

From 1901 to 1912 the area alienated absolutely in the whole Commonwealth increased by 26,603,938 acres, or 35 per cent.; the area in process of alienation increased by 16,917,332 acres, or 48 per cent.; the area leased by 137,524,801 acres, or 19 per cent.; while the area unoccupied decreased by 181,046,071 acres, or 20 per cent.

### TOTAL AREA ALIENATED, IN PROCESS OF ALIENATION, HELD UNDER LEASE OR LICENSE, AND UNOCCUPIED.

EXPRESSED ABSOLUTELY AND AS PERCENTAGES OF AREA OF ENTIRE STATE FOR THE YEARS 1901 AND 1908-12.

| Year.                                     | Alienated.     |           | In Process of Alienation. |           | Held under Lease or License. |           | Occupied by the Crown or Unoccupied.* |           |

\* Including roads and reserves. † Including aboriginal reserves and mission stations.

‡ Including Federal Capital Territory.

2. **Diagram shewing Condition of Public Estate.**—The following diagram shews the condition of the public estate in the Commonwealth at the end of the year 1912. The square itself represents the total area of the Commonwealth, while the relative areas of individual States are shewn by the vertical rectangles. The areas alienated absolutely, in process of alienation under systems of deferred payments, and the areas held under leases or licenses, are designated by the differently-shaded areas as described in the reference given below the diagram, while the areas unoccupied are left unshaded:—

Area alienated absolutely

Area held under lease, etc.

Area in process of alienation

Area unoccupied

3. **Federal Territory.** The following particulars relate to the tenures of land within the Federal Capital Territory at the end of the year 1913. The figures are approximate:—

**FEDERAL CAPITAL TERRITORY, TENURES OF LAND, 1913.**

## SECTION VII.

## PASTORAL PRODUCTION.

## § 1. Initiation and Growth of Pastoral Industry.

1. **Early Statistics.**—In previous issues of the Year Book will be found a brief review of the history of the pastoral industry in Australia up to the year 1860. (See Year Book No. 6, page 330.)

2. **Subsequent Statistics.**—The statistical records of live stock in Australia prior to the year 1860 are somewhat defective, but from that year onwards fairly complete particulars are available in most of the States. At the present time statistics of live stock are collected annually in all the States, principally through the agency of the police, but in the years 1885 to 1888 inclusive, and 1893 to 1895 inclusive, no such particulars were collected in South Australia, and similar gaps occur in the Victorian records for the periods 1895 to 1899 inclusive, and 1901 to 1903. In order to obtain totals for the Commonwealth for these years the missing numbers have been supplied by interpolation. The results so obtained probably differ but slightly from the actual numbers for the respective years.

3. **Increase in Numbers.**—Particulars concerning the numbers of each of the principal kinds of live stock in the Commonwealth at quinquennial intervals from 1860 to 1905, and thence onwards in single years, are given in the following table, and are shewn continuously in the graphs as given hereinafter.

During the fifty-two years covered by the table the live stock of the Commonwealth increased considerably, horses by 458 per cent., cattle 193 per cent., sheep 314 per cent., and pigs 141 per cent. The average annual increases which these aggregates represent are as follows:—Horses, 3.36 per cent. per annum; cattle, 2.08 per cent.; sheep, 2.77 per cent.; and pigs, 1.70 per cent.

COMMONWEALTH LIVE STOCK, 1860 to 1912.

4. **Fluctuations.**—The increases referred to, however, have not been continuous, marked fluctuations having taken place during the period, mainly on account of the droughts which have from time to time left their impress on the pastoral history of Australia. These were in evidence in 1869, 1877, 1884, 1895 and subsequent years, 1902, to some extent in 1908, and in a severer form during the earlier half of 1912. The want of rain had commenced to be seriously felt in the latter year, when an opportune general downfall in June materially relieved the situation, not however before much loss of stock had resulted, the poor lambing being the principal contributing factor. The drought of 1902: was one of the most severe experienced in Australia, the number of sheep in the Commonwealth diminishing under its influence from 72,040,211 on 31st December, 1901, to 53,668,347 at the same date in 1902—a decrease of more than 25 per cent. The falling off in the number of sheep in 1912 was 9,739,835, of cattle 251,695, and of pigs 265,466, being 10.47, 2.13 and 23.9 respectively. The number of horses during 1912 was the highest ever recorded in the Commonwealth, shewing an increase of 129,086, or 5.66 per cent., over the 1911 figures.

The extraordinary recuperative power of Australia is evidenced by the large increases in the numbers of stock which the good seasons, supervening on the various droughts, have witnessed. Thus, in the nine years from 1902 to 1911, horses increased by 754,426, cattle by 4,766,212, and sheep by 38,335,174, the corresponding increases per cent. per annum being horses 4.57 per cent., cattle 5.90 per cent., and sheep 6.30 per cent.

The years in which the numbers of live stock attained their maxima are as follows:— Horses, 1912, 2,408,113; cattle, 1894, 12,311,617; sheep, 1891, 106,421,068; and pigs, 1911, 1,110,721.

5. **Live Stock in Relation to Population.**—The number of each kind of live stock per head of the population of the Commonwealth has varied during the past fifty-two years in the manner shewn in the succeeding table:—

NUMBER OF LIVE STOCK PER HEAD OF POPULATION, 1860 to 1912.

| Year. |     | Horses. | Cattle. | Sheep. | Pigs. | Year. |     | Horses. | Cattle. | Sheep. | Pigs. |

Considered in relation to population, the live stock attained its maximum in the period 1890-5, and its minimum in the year 1902. During the period of fifty-two years under review, the number of horses varied but slightly in proportion to population, the range being from 0.38 to 0.51 per head. In the case of cattle, the limits of variation were 1.82 and 3.45; sheep, 13.85 and 31.06; and pigs, 0.16 and 0.37.

6. **Live Stock in Relation to Area.**—The numbers of live stock per square mile in the several States and Territories of the Commonwealth on 31st December, 1912, were as follows:—

## NUMBER OF LIVE STOCK PER SQUARE MILE, 31st DECEMBER, 1912.

| States and Territories.   | Horses. | Cattle. | Sheep. | Pigs. |
|---------------------------|---------|---------|--------|-------|
| New South Wales ... ..    | 2.31    | 9.80    | 125.56 | 0.95  |
| Victoria ... ..           | 6.04    | 17.16   | 135.32 | 2.73  |
| Queensland ... ..         | 1.01    | 7.77    | 30.29  | 0.21  |
| South Australia... ..     | 0.73    | 1.01    | 14.42  | 0.18  |
| Western Australia ... ..  | 0.15    | 0.83    | 4.71   | 0.05  |
| Tasmania ... ..           | 1.68    | 8.48    | 71.05  | 1.87  |
| Northern Territory ... .. | 0.04    | 0.77    | 0.14   | 0.003 |
| Federal Territory ... ..  | 1.65    | 7.79    | 206.84 | 0.22  |
| Commonwealth ... ..       | 0.81    | 3.89    | 27.99  | 0.28  |

7. **Minor Classes of Live Stock.**—The numbers of minor classes of live stock returned as at 31st December, 1912, were as follows:—Goats, 270,973; camels, 10,045; mules and donkeys, 6973; and ostriches, 1891. Of these, goats were most numerous in Queensland, camels and donkeys in Western Australia, and mules and ostriches in South Australia. In the raising of goats, considerable attention has in recent years been devoted to the *angora goat* and its product—*mohair*, and over 20,000 *angora goats* are included in the total of 270,973 goats shewn above. Of these, 6924 were in Queensland, while the quantity of *mohair* produced in that State in 1912 was set down at 6770 lbs., and the number of skins placed on the market was returned as 1342.

8. **Net Exports of Principal Pastoral Products.**—The quantities by which the exports of the principal pastoral products of the Commonwealth exceeded the imports for the years 1908 to 1912 are as follows:—

## QUANTITIES OF NET EXPORTS OF PRINCIPAL PASTORAL PRODUCTS

OF THE COMMONWEALTH, 1908 to 1912.

| Products.  | Unit of Quantity. | 1908.       | 1909.       | 1910.       | 1911.       | 1912.       |

## § 2. Horses.

1. **Suitability of Australia for Horse-breeding.**—From the earliest times the suitability of the climate and pastures of Australia for the production of serviceable breeds of horses has been fully recognised. By the importation of high-class sires, and the careful selection of breeding mares, these natural advantages were utilised to the fullest extent, all classes of horses being bred. As a consequence of this combination of advantages the Australian horse, whether of the heavy draught, medium weight, or light saddle and carriage variety, compares more than favourably with the product of other lands. The Australian horse has been found suitable for the army in India, and large numbers are obtained annually for remount purposes.

2. **Distribution throughout the Commonwealth.**—As regards numbers, the State of New South Wales, the earliest settled of the group, established a lead, which it has ever since retained. The figures for the several States for a series of years are as follows:—

**NUMBER OF HORSES IN STATES, TERRITORIES, AND COMMONWEALTH,  
1860 to 1912.**

| Year.    | N.S.W.  | Victoria. | Q'sland. | S. Aust. | W. Aust. | Tas.   | N. T.  | Fed. Terr. | Commonwealth. |

\* Statistics not collected prior to 1880.

**3. Proportion in the Several States and Territories.**—The percentages of the numbers of horses in the several States and Territories on the totals for the Commonwealth for 1901 and the past five years are as follows:—

**PERCENTAGE OF HORSES IN EACH STATE AND TERRITORY ON THE TOTAL FOR  
COMMONWEALTH, 1901 and 1908 to 1912.**

| Year.    | N.S.W. | Victoria. | Q'sland. | S. Aust. | W. Aust. | Tas. | North'n Terr. | Fed. Terr. | Commonwealth. |
|----------|--------|-----------|----------|----------|----------|------|---------------|------------|---------------|
|          | %      | %         | %        | %        | %        | %    | %             | %          | %             |
| 1901 ... | 30.03  | 23.90     | 28.52    | 10.20    | 4.55     | 2.00 | 0.80          | ...        | 100.00        |
| 1908 ... | 30.66  | 22.04     | 26.97    | 11.07    | 6.06     | 2.07 | 1.13          | ...        | 100.00        |
| 1909 ... | 29.90  | 21.89     | 27.47    | 11.39    | 6.19     | 2.00 | 1.16          | ...        | 100.00        |
| 1910 ... | 30.04  | 21.80     | 27.42    | 11.51    | 6.19     | 1.91 | 1.13          | ...        | 100.00        |
| 1911 ... | 30.15  | 22.28     | 27.16    | 11.40    | 6.15     | 1.84 | 0.94          | 0.08       | 100.00        |
| 1912 ... | 29.69  | 22.03     | 28.01    | 11.48    | 6.13     | 1.83 | 0.77          | 0.06       | 100.00        |

During the period under review, the proportions in South Australia and Western Australia have increased, that in Victoria has diminished, while in the case of New South Wales, Queensland, Tasmania, and the Northern Territory the proportion in 1912 was practically identical with that in 1901.

**4. Oversea Export Trade in Horses.**—Australia's export trade in horses is a fairly considerable, though somewhat fluctuating, one. During the past five years it has varied in number between 12,161 for the year 1910 and 7807 in 1909, and in value between £256,104 and £173,012 respectively for the same two years. The total number of horses exported during the five years amounted to 48,952, an average of 9790 per annum. The total value of the exports for the period was £1,062,829, or £212,566 per annum.

The average export value per head for the period was £21 14s. 3d. The numbers exported to the principal countries concerned in this trade are as follows :—

**NUMBER AND DESTINATION OF HORSES EXPORTED FROM THE COMMONWEALTH, 1908 to 1912.**

| Country to which Exported. | 1908.        | 1909.        | 1910.         | 1911.         | 1912.        | Total for 5 years. |

It will be seen from the foregoing tables that the export trade in horses with India, the Straits Settlements, and Java has been fairly uniform throughout the five years under review, but that the particulars for some of the other countries specified exhibit marked fluctuations.

The number of horses imported into the Commonwealth is comparatively small, consisting mainly of valuable animals introduced for breeding purposes, and imported principally from New Zealand and the United Kingdom. The average value per head of the horses imported during the five years was £67 1s. 1d., as compared with £21 14s. 3d. per head for the exports for the same period. The average number imported per annum was, however, only 3080, and the average annual value £206,554. The following table furnishes a comparison of imports and exports of horses during the five years 1908 to 1912:—

#### COMMONWEALTH IMPORTS AND EXPORTS OF HORSES, 1908 to 1912.

| Year.             | Imports. |           | Exports. |           | Net Exports. |         |
|-------------------|----------|-----------|----------|-----------|--------------|---------|
|                   | No.      | Value.    | No.      | Value.    | No.          | Value.  |
|                   |          | £         |          | £         |              | £       |
| 1908 ...          | 504      | 71,546    | 9,668    | 224,218   | 9,164        | 152,672 |
| 1909 ...          | 1,472    | 88,317    | 7,807    | 173,012   | 6,335        | 84,695  |
| 1910 ...          | 5,542    | 307,371   | 12,161   | 256,104   | 6,619        | 51,267  |
| 1911 ...          | 5,732    | 347,973   | 10,109   | 219,951   | 4,377        | 128,022 |
| 1912 ...          | 2,152    | 217,561   | 9,207    | 189,544   | 7,055        | 28,017  |
| Total for 5 years | 15,402   | 1,032,768 | 48,952   | 1,062,829 | 33,550       | 30,061  |

Note. — signifies value of net imports.

5. Comparison with other Countries.—The numbers of horses in some of the leading horse-breeding countries of the world, according to the latest available returns, are as follows:—

#### NUMBER OF HORSES IN SOME OF THE LEADING HORSE-BREEDING COUNTRIES IN THE WORLD.

| Country.                         | Date.       | Number of Horses. | Country.                     | Date | Number of Horses. |

1. European Russia 1911, Asiatic Russia 1909. 2. Austria 1910, Hungary 1911. 3. Exclusive of British Columbia. 4. Agricultural horses, unbroken horses, and breeding mares only. 5. Exclusive of Eastern Bengal. 6. Including mules and asses.

**6. Relation to Population.**—In proportion to population, horses are much more numerous in the Northern Territory than in any other of the principal divisions of the Commonwealth. Queensland is next in order, while Tasmania has the smallest number of horses per head. In all cases the number of horses per head of population was somewhat higher in 1912 than in 1901. Particulars for 1901 and the past five years are as follows:—

**NUMBER OF HORSES PER HEAD OF POPULATION, 1901 and 1908 to 1912.**

### § 3. Cattle.

**1. Purposes for which Raised.**—In all the States of the Commonwealth cattle-raising is carried out on a more or less extensive scale, the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. The great impetus which the development of the export trade in Australian butter gave to the dairying industry in the Commonwealth led to a considerable increase in the numbers and quality of the dairy herds of the States of Victoria, New South Wales, and Southern Queensland in particular, the sub-tropical portion of Australia being apparently the best adapted to this industry. On the other hand, by far the finest specimens of beef-producing cattle are those raised in the tropical districts of the Commonwealth, *i.e.*, in the northern parts of Queensland, in the Northern Territory, and in the Kimberley districts in the north of Western Australia.

**2. Distribution throughout Commonwealth.**—Until 1880 New South Wales occupied the leading position in the Commonwealth group as a cattle-raising State, but in that year Queensland forged ahead and obtained a lead which it has since maintained. The extent of this lead has, however, varied considerably, owing principally to the effects produced by the tick fever and droughts, from both of which causes the Queensland herds suffered more severely than those of the other States. In fact, during the period from 1894, when the number of cattle in Queensland attained its maximum of rather more than 7,000,000, to 1903, when the number recorded was less than 2,500,000, an uninterrupted decline was experienced. During the nine years ended 1912, however, a rapid improvement took place, and the total reached on 31st December, 1912, was over 5,200,000.

The numbers of cattle in the several States and the Northern Territory at quinquennial intervals from 1860 to 1905 and thence onwards for each year are as follows:—

**NUMBER OF CATTLE IN STATES, TERRITORIES AND COMMONWEALTH,  
1860 to 1912.**

| Year. | N.S.W.    | Victoria. | Q'land.   | S. Aust. | W. Aust. | Tas.    | N.T.    | Fed.<br>Ter. | C'wealth.  |

| 1911  | 3,185,824 | 1,647,127 | 5,073,201 | 393,566  | 843,638  | 217,406 | 459,780 | 8,412        | 11,828,954 |
| 1912  | 3,033,726 | 1,508,089 | 5,210,891 | 383,418  | 806,294  | 222,181 | 405,552 | 7,108        | 11,577,259 |

\* Statistics not collected prior to 1880.

**3. Proportion in each State.**—During the period elapsing between 1901 and 1912 the proportion of cattle in the several States and the Northern Territory has varied considerably, as shewn hereunder :—

**PERCENTAGE OF CATTLE IN EACH STATE AND TERRITORY ON TOTAL FOR  
COMMONWEALTH, 1901 and 1908 to 1912.**

| Year.    | N.S.W. | Vic.  | Q'land. | S. Aust. | W. Aust. | Tas. | N.T. | Federal<br>Territory. | C'wealth. |
|----------|--------|-------|---------|----------|----------|------|------|-----------------------|-----------|
|          | %      | %     | %       | %        | %        | %    | %    | %                     | %         |
| 1901 ... | 24.11  | 19.12 | 44.43   | 2.65     | 4.69     | 1.99 | 3.01 | ...                   | 100.00    |
| 1908 ... | 28.02  | 14.92 | 40.97   | 3.23     | 7.04     | 1.95 | 3.87 | ...                   | 100.00    |
| 1909 ... | 27.42  | 14.04 | 42.68   | 3.12     | 7.18     | 1.81 | 3.75 | ...                   | 100.00    |
| 1910 ... | 26.74  | 13.18 | 43.69   | 3.28     | 7.02     | 1.72 | 4.37 | ...                   | 100.00    |
| 1911 ... | 26.93  | 13.92 | 42.89   | 3.33     | 7.14     | 1.84 | 3.89 | 0.07                  | 100.00    |
| 1912 ... | 26.20  | 13.03 | 45.01   | 3.31     | 6.97     | 1.92 | 3.50 | 0.06                  | 100.00    |

A comparison of the positions of the several States in 1901 and 1912 shews that, while Victoria's proportion of the Commonwealth herds suffered considerable diminution, and that for Tasmania a falling off to a slight extent, fairly large increases are in evidence in the other States, the Northern Territory also shewing an upward tendency..

**4. Imports and Exports of Cattle.**—Although the various products of the cattle-raising industry bulk largely in the export trade of the Commonwealth, the export of live cattle from Australia has never been considerable. The number of cattle imported is also small, consisting, as in the case of horses, mainly of valuable animals for breeding. Details are as follows :—

**COMMONWEALTH IMPORTS AND EXPORTS OF CATTLE, 1901 and 1908 to 1912.**

| Year.    | Imports. |        | Exports. |        | Net Exports. |        |
|----------|----------|--------|----------|--------|--------------|--------|
|          | No.      | Value. | No.      | Value. | No.          | Value. |
|          |          | £      |          | £      |              | £      |
| 1901 ... | 114      | 3,591  | 2,413    | 22,088 | 2,299        | 18,497 |
| 1908 ... | 112      | 11,020 | 953      | 11,724 | 841          | 704    |
| 1909 ... | 81       | 5,710  | 975      | 9,586  | 894          | 3,876  |
| 1910 ... | 104      | 8,665  | 3,745    | 20,181 | 3,641        | 11,516 |
| 1911 ... | 103      | 7,806  | 9,964    | 45,670 | 9,861        | 37,864 |
| 1912 ... | 33       | 1,502  | 16,083   | 65,735 | 16,050       | 64,233 |

The average value of the cattle imported into the Commonwealth during the last five years was £30 2s. 11d. per head, while the average value of the cattle exported during the same period was £4 16s. 5d. The imported cattle were principally for stud purposes.

The comparatively large exports for 1912 were due to shipments to Java and Philippine Islands valued at £19,257 and £35,884 respectively. The bulk of these cattle were exported from Western Australia.

**5. Cattle Slaughtered.**—Complete returns of the number of cattle slaughtered annually in the Commonwealth are not obtainable, as these particulars were collected in Tasmania prior to 1911 for Hobart and Launceston only, and were collected in South Australia for the first time in 1908 in respect of the year 1907. Estimates for the missing data for these States have, however, been made, as shewn in the following table:—

**CATTLE (INCLUDING CALVES) SLAUGHTERED IN STATES, TERRITORIES AND  
COMMONWEALTH, 1901 and 1908 to 1912.**

| Year. | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.<br>† | N.T.    | Fed.<br>Ter. | C'wealth. |

\* Estimated. † Partly estimated. ‡ Not available for previous years. § 1910 figures, those for 1911 and 1912 not available.

For Hobart and Launceston only, the figures for the years 1901 and 1907 to 1910 were, respectively, 8815, 12,037, 11,907, 10,059 and 11,569.

**6. Export of Beef Preserved by Cold Process.**—A large export trade in beef preserved by cold process is carried on by the Commonwealth, mainly with the United Kingdom, the Philippine Islands and the South African Union. The quantities so exported during the five years 1908 to 1912 are as follows:—

**QUANTITY OF BEEF PRESERVED BY COLD PROCESS EXPORTED FROM THE  
COMMONWEALTH, 1908 to 1912.**

| Country to which Exported. | 1908.             | 1909.             | 1910.              | 1911.              | 1912.              | Total for<br>5 years. |

During the five years under review, the largest of Australia's customers for beef preserved by cold process has been the United Kingdom, while the most consistent and the second largest customer has been the Philippine Islands; the South African Union and Egypt ranked next in order of importance. The exporting States during 1912 were: Queensland, 129,249,438 lbs., valued at £1,472,711; New South Wales, 7,897,831 lbs., valued at £98,244; Victoria, 4,582,640 lbs., valued at £54,794. and South Australia, 480,167 lbs., valued at £4982.

**7. Comparison with other Countries.**—In the following comparison of the herds of Australia with those of some of the principal cattle-raising countries of the world, the latest available figures have been inserted in each case :—

## NUMBER OF CATTLE IN VARIOUS COUNTRIES.

| Country.                          | Date.       | No. of Cattle.         | Country.            | Date. | No. of Cattle. |

| Denmark ...                       | 1909        | 2,253,982              |                     |       |                |

1. Exclusive of Eastern Bengal. 2. European Russia, 1911; Asiatic Russia, 1909. 3. Austria, 1910, Hungary 1911. 4. Exclusive of British Columbia. 5 Including buffaloes.

8. **Relation to Population.**—The number of cattle per head of population differs considerably in the several States, and is also subject to marked variation from year to year in the same State. Particulars for 1901 and the past five years are as follows:—

## NUMBER OF CATTLE PER HEAD OF POPULATION, 1901 and 1908 to 1912.

| Year.    | N.S.W. | Victoria. | Q'land. | S. Aust. | W.Aust. | Tas. | Northern Territ'ry. | Fed. Terr. | C'wealth. |
|----------|--------|-----------|---------|----------|---------|------|---------------------|------------|-----------|
| 1901 ... | 1.49   | 1.34      | 7.44    | 0.63     | 2.06    | 0.96 | 54.68               | ...        | 2.22      |
| 1908 ... | 1.89   | 1.26      | 7.76    | 0.88     | 2.86    | 1.03 | 111.63              | ...        | 2.49      |
| 1909 ... | 1.88   | 1.21      | 8.15    | 0.88     | 2.99    | 1.04 | 117.03              | ...        | 2.55      |
| 1910 ... | 1.91   | 1.21      | 8.57    | 0.95     | 2.98    | 1.04 | 150.86              | ...        | 2.65      |
| 1911 ... | 1.88   | 1.23      | 8.15    | 0.94     | 2.87    | 1.12 | 141.56              | 4.38       | 2.59      |
| 1912 ... | 1.71   | 1.09      | 8.19    | 0.89     | 3.63    | 1.13 | 116.71              | 3.66       | 2.45      |

For the Commonwealth as a whole the ratio of cattle to population is 10 per cent. greater for 1912 than for 1901, and exhibits a continuous increase from 1902 to 1910, while the proportion for 1911 is approximately the same as for the previous year; 1912 shews a slight decline. The excess of the 1911 figures over those for 1901 is in evidence in all the States except Victoria, and is most marked in the case of the Northern Territory. In Queensland the ratio has increased very rapidly during the past eight years, the ratio per head of population for 1911 being 72 per cent. greater than for 1903. In Victoria the ratios for the last three years are the lowest for the period under review.

## § 4. Sheep.

1. **The Founding of the Commonwealth Pastoral Industry.**—Fortunately for Australia, the suitability of its climate and general conditions for the production of a high class of wool was, at an early date in the history of its settlement, surmised and tested by Captain Macarthur, one of the pioneer sheep-breeders of New South Wales. To the energy of this enterprising pastoralist is due in large measure the rapid and extremely satisfactory development of Australia as a producer of fine wool, and though

it would appear that the introduction of the Merino sheep into Australia was not due to Macarthur, a great deal of the credit for having successfully established the pastoral industry in Australia must certainly be his.

**2. Distribution throughout Commonwealth.**—With the exception of a short period in the early sixties, when the flocks of Victoria outnumbered those of the mother State, New South Wales has maintained amongst the Commonwealth group the lead in sheep production which naturally attached to it as the portion of the Commonwealth in which settlement was first effected. From 1878 onwards, the number of sheep in New South Wales has, in every year except 1902, 1908, 1910, 1911, and 1912 represented more than half the total for the Commonwealth, and even in these years it fell but little short of half the total.

The number of sheep in the several States and Territories at quinquennial intervals from 1860 to 1905, and for each year onwards to 1912, is as follows :—

**NUMBER OF SHEEP IN STATES, TERRITORIES AND COMMONWEALTH,  
1860 to 1912.**

| Year. | New South<br>Wales. | Victoria.  | Queens-<br>land. | South<br>Aust. | Western<br>Aust. | Tas-<br>mania. | Northern<br>Territory | Federal<br>Territory. | Total<br>C'wealth. |

\* Statistics not collected prior to 1880.

**3. Proportion in the Several States and Territories.**—Particulars concerning the relative positions of the several States and Territories with respect to the total flocks of Australia during the years 1901 and 1908 to 1912, and the variations in such positions which have taken place during those years are as hereunder :—

**PERCENTAGE OF SHEEP IN EACH STATE AND TERRITORY ON TOTAL  
FOR COMMONWEALTH, 1901 and 1908 to 1912.**

| Year. | N.S.W. | Vic.  | Q'sland. | S. Aust. | W. Aus. | Tas. | N. T. | Fed. Terr. | C'wealth. |        |
|-------|--------|-------|----------|----------|---------|------|-------|------------|-----------|--------|
|       | %      | %     | %        | %        | %       | %    | %     | %          | %         |        |
| 1901  | ...    | 58.10 | 14.82    | 13.92    | 6.95    | 3.65 | 2.49  | 0.07       | ...       | 100.00 |
| 1908  | ...    | 49.83 | 14.41    | 21.08    | 7.93    | 4.71 | 1.98  | 0.06       | ...       | 100.00 |
| 1909  | ...    | 50.40 | 14.11    | 21.37    | 7.02    | 5.16 | 1.89  | 0.05       | ...       | 100.00 |
| 1910  | ...    | 49.50 | 14.00    | 22.09    | 6.81    | 5.60 | 1.94  | 0.06       | ...       | 100.00 |
| 1911  | ...    | 48.09 | 14.90    | 22.30    | 6.64    | 5.82 | 1.96  | 0.05       | 0.24      | 100.00 |
| 1912  | ...    | 46.67 | 14.28    | 24.39    | 6.58    | 5.52 | 2.24  | 0.09       | 0.23      | 100.00 |

During the period the proportion of total Commonwealth flocks declined considerably in the case of New South Wales, and in a less marked degree in Victoria,

South Australia and Tasmania, while in the case of Queensland a marked advance in proportion was experienced, and in Western Australia to a minor extent.

4. **Oversea Imports and Exports of Sheep.**—As in the case of cattle, the oversea exports of live sheep from Australia are of comparatively small importance. The principal countries to which such exports have been consigned during recent years are the South African Union, Straits Settlements, and Papua. The following are the particulars of the imports and exports for the years 1901 and 1908 to 1912 :—

**COMMONWEALTH IMPORTS AND EXPORTS OF SHEEP, 1901 and 1908 to 1912.**

| Year.       | Imports. |        | Exports. |        | Net Exports. |        |

\* Estimated.    † Partly estimated    ‡ Figures for 1910, those for 1911 and 1912 not available.

6. **Exports of Mutton and Lamb Preserved by Cold Process.**—Australia's export trade in mutton and lamb preserved by cold process is one which has, in recent years, advanced rapidly. In 1903 the value of exports was £492,114, while seven years afterwards, in 1910, the value amounted to no less a sum than £2,161,513; the average for the past two years, 1911 and 1912, was £1,613,000. In all the States considerable attention is now being paid to the breeding of a class of sheep that will best meet the requirements of consumers. Crosses between the Merino and the Lincoln, or between the Merino and the Leicester breeds, have proved exceedingly valuable, as they furnish both a good quality of wool and also an excellent carcase for export purposes. The breeding of Shropshire and Southdown sheep with a view to combining meat production with that of wool is also on the increase. Special attention is being paid to the raising of lambs for the home markets, as it is becoming very widely recognised that with suitable breeds, the export trade in lambs is a very profitable one.

Australia's principal customer in this trade is the United Kingdom, which has absorbed 93.7 per cent. of the total quantity exported from the Commonwealth during the past

five years. The South African Union and Canada took 2.3 and 1.2 per cent. respectively, while the balance of 2.8 per cent. was principally absorbed by the Philippine Islands, Malta, Straits Settlements, and Egypt. The recent revision of the tariff of the United States of America will doubtless have the effect of eventually opening up a vast market in that country for Australian mutton and lamb and other meat products. The quantities exported to various countries are as follow :—

**QUANTITY OF MUTTON AND LAMB PRESERVED BY COLD PROCESS EXPORTED  
FROM THE COMMONWEALTH, 1908 to 1912.**

| Country to which Exported. | 1908.             | 1909.              | 1910.              | 1911.              | 1912.              | Total for<br>5 years. |

**7. Comparison with other Countries.**—As regards the size of its flocks and the quantity and quality of wool produced, Australia occupies the foremost position amongst the sheep-raising countries of the world. The following comparison gives the latest available figures relative to the number of sheep in the principal wool-producing countries :—

## NUMBER OF SHEEP IN VARIOUS COUNTRIES.

| Country.                       | Date.    | No. of Sheep | Country.            | Date. | No. of Sheep. |
|--------------------------------|----------|--------------|---------------------|-------|---------------|

## § 5. Wool.

1. Importance of Wool Production.—The chief contributing factor to the pastoral wealth of Australia is the production of wool, the value of the output for the season ended 30th June, 1913, being about £27,550,000. Most of the wool produced in the Commonwealth is exported, but with the increased activity of the local woollen mills there has, in recent years, been an increasing quantity used in Australia, although even now the quantity so used represents little more than 1½ per cent. of the whole clip.

2. Greasy and Scoured Wool.—For the purpose of comparing the clips of the several States or of the Commonwealth as a whole for a series of years, it is convenient to have the total production expressed in terms of greasy wool.

The total quantity of Australian wool scoured and washed before export is, on the average, about 20 per cent. of the total clip. The ratio of loss of weight in scouring varies largely with season, locality, breed, and condition. It seems preferable to express "scoured and washed" wool in terms of "greasy" rather than *vice versa*, since the absolute error arising from any uncertainty as to the average loss of weight has thus the less effect.

GRAPHS SHEWING NUMBER OF HORSES, CATTLE, SHEEP, AND PIGS  
IN THE COMMONWEALTH FROM 1860 TO 1912.

EXPLANATION OF GRAPH.—The base of each small square represents an interval of one year. The totals of the sheep, cattle, horses, and pigs for the Commonwealth are indicated by the several curves or graphs, the vertical side of a small square representing 2,000,000 in the case of sheep; 200,000 for cattle; 30,000 for horses; 40,000 for pigs.

GRAPHS SHEWING THE PRODUCTION OF BUTTER AND CHEESE, AND BACON AND HAM, IN THE COMMONWEALTH, FROM 1896 TO 1912.

EXPLANATION OF GRAPH.—The base of each small rectangle represents an interval of one year, and the vertical height of each small rectangle denotes in the case of butter 10,000,000 lbs.; in the case of bacon and ham, 4,000,000 lbs.; and in the case of cheese 3,000,000 lbs.

GRAPHS SHEWING THE QUANTITY AND VALUE OF NET EXPORTS OF BUTTER FROM THE COMMONWEALTH, FROM 1901 TO 1912.

EXPLANATION OF GRAPH.—The base of each small rectangle represents an interval of one year, and the vertical height of each small rectangle represents 5,000,000 lbs. in weight, or £1,000,000 in value.

In the following tables, relative to the production of wool, "scoured and washed" has been converted into the estimated equivalent amount of "greasy" on the assumption that two pounds of "greasy" wool are on the average required to produce one pound of "scoured and washed" wool.

**3. Total Production.**—The estimated production of wool in the several States, formerly based on Customs returns, being no longer available from that source, an effort has been made to arrive at approximate figures from data collected by the State Statisticians from growers and fellmongers, etc. Particulars for years prior to 1910 will be found in former issues (see Year Book No. 6, page 346). The following table gives the estimates obtained in reference to the three seasons ended 30th June, 1911, 1912 and 1913 :—

**ESTIMATED QUANTITY OF WOOL AS IN THE GREASE, SHORN, FELLMONGERED, OR ON SKINS SHIPPED DURING THE SEASONS ENDED 30th JUNE, 1911, 1912 and 1913.**

| State.                 | 1910-11.    | 1911-12.    | 1912-13.    |
|------------------------|-------------|-------------|-------------|
|                        | lbs.        | lbs.        | lbs.        |
| New South Wales* ...   | 374,907,068 | 371,546,415 | 326,804,000 |
| Victoria ...           | 101,803,644 | 110,463,041 | 88,762,612  |
| Queensland ...         | 139,250,802 | 142,382,269 | 136,878,270 |
| South Australia ...    | 63,613,781  | 60,056,470  | 56,691,036  |
| Western Australia ...  | 29,984,453  | 30,833,837  | 26,849,981  |
| Tasmania ...           | 11,338,540  | 10,726,593  | 12,416,014  |
| Northern Territory ... | 400,000     | 400,000     | 450,000     |
| Commonwealth...        | 721,298,288 | 726,408,625 | 648,851,913 |

\* Including Federal Territory.

It is to be noted that a shortage has apparently occurred in the collection of these statistics, the estimates falling considerably below the approximate totals obtained from oversea shipments of wool and skins, together with quantity used in local manufactories. The Commonwealth total so obtained represented 758,090,676 lbs. for the season 1910-11, 785,753,099 lbs. for 1911-12, and 668,667,078 lbs. for 1912-13.

**4. Wool Locally Used.**—The quantity of wool used in the manufactories of the several States of the Commonwealth during the past five calendar years was approximately as follows :—

**LOCALLY USED WOOL, ESTIMATED AS "GREASY," COMMONWEALTH AND STATES, 1908 to 1912.**

| State.                | 1908.     | 1909.     | 1910.     | 1911.      | 1912.      |
|-----------------------|-----------|-----------|-----------|------------|------------|
|                       | lbs.      | lbs.      | lbs.      | lbs.       | lbs.       |
| New South Wales ...   | 1,020,456 | 1,095,136 | 1,594,712 | 2,401,920  | 2,420,000  |
| Victoria ...          | 6,152,250 | 5,239,806 | 5,309,730 | 5,774,863  | 5,535,483  |
| Queensland ...        | 224,460   | 301,078   | 270,246   | 336,486    | 583,892    |
| South Australia ...   | 672,112   | 634,250   | 564,432   | 634,238    | 710,000    |
| Western Australia ... | ...       | ...       | ...       | ...        | ...        |
| Tasmania ...          | 1,044,879 | 991,388   | 1,087,400 | 986,000    | 1,082,000  |
| Commonwealth ...      | 9,114,157 | 8,261,658 | 8,826,520 | 10,133,512 | 10,331,375 |

5. **Bounties on Combed Wool or Tops Exported.**—Under the Bounties Act 1907, bounties are payable on combed wool or tops exported from the Commonwealth, provided they were produced therein. The maximum amount to be paid may not exceed the rate of £10,000 per annum; any unexpended sum may be carried forward and be available for the years following. For the three years commencing 1st January, 1909, the rate of bounty granted is 1½d. per lb.; and for the two years commencing 1st January, 1912, 1d. per lb. is payable. During the year 1908-9, an amount of £326 was paid in bounties, in 1909-10 £4933, in 1910-11 £8522, and in 1911-12 £16,898. The quantities of wool on which these amounts were paid were 52,085, 789,216, 1,363,520 and 3,122,244 lbs. respectively.

Figures shewing the exports of wool tops for the calendar years 1909 to 1912 inclusive will be found at the foot of the two following tables.

6. **Exports of Wool.**—About forty-two per cent. of the exports of wool from the Commonwealth is despatched to the United Kingdom, the other leading consignees being France, Germany, Belgium, the United States of America and Japan. The following table shews for the years 1908 to 1912 the quantities of "greasy" wool exported from the Commonwealth and the principal countries of destination:—

#### COMMONWEALTH EXPORTS OF WOOL IN THE GREASE, 1908 to 1912.

| Country to which Exported.   | 1908.       | 1909.       | 1910.       | 1911.       | 1912.       | Total for 5 Years. |

\* Including "tops." See hereunder.

The figures for "scoured and washed wool" for 1909 include for the first time an export of tops, amounting to 496,492 lbs. and valued at £58,638. In 1910 the corresponding export was 1,123,469 lbs., valued at £134,874, in 1911, 2,513,106 lbs., valued at £275,406 and in 1912, 3,018,050 lbs. valued at £323,299.

The total value of the wool exported from the Commonwealth to each of the various countries during the five years under review was:—

#### TOTAL VALUE OF WOOL EXPORTED FROM THE COMMONWEALTH, 1908 to 1912.

| Country to which Exported.   | 1908.             | 1909.             | 1910.             | 1911.             | 1912.             | Total for 5 Years. |

7. **Care needed in Comparing Clips.**—The Customs returns do not furnish a reliable indication of increase or decrease in successive clips, since in each case they relate to the year ended 31st December. Ordinarily, therefore, they include for any year imports and exports of wool belonging to two distinct clips. A further defect in the comparability of successive clips arises as follows:—Owing to climatic or other conditions, the time of shearing may be so far delayed that one clip may include almost thirteen months' growth of wool, while the succeeding one may include little more than eleven months' growth.

8. **Wool-producing Countries in Southern Hemisphere.**—The next table, compiled by Messrs. Helmuth Schwartze and Co., the well-known firm of English wool brokers, furnishes interesting evidence of the relative importance of the three great wool-producing countries of the Southern Hemisphere. The figures given represent for the respective years the imports of wool into Europe and North America:—

#### IMPORTS OF WOOL INTO EUROPE AND NORTH AMERICA, 1901 and 1909 to 1913.

| Year.       | Commonwealth and New Zealand. | Cape Colony. | River Plate. | Total.    |
|-------------|-------------------------------|--------------|--------------|-----------|
|             | Bales.                        | Bales.       | Bales.       | Bales.    |
| 1901 ... .. | 1,745,000                     | 217,000      | 532,000      | 2,494,000 |
| 1909 ... .. | 2,296,000                     | 380,000      | 571,000      | 3,247,000 |
| 1910 ... .. | 2,411,000                     | 377,000      | 461,000      | 3,249,000 |
| 1911 ... .. | 2,524,000                     | 376,000      | 499,000      | 3,399,000 |
| 1912 ... .. | 2,463,010                     | 463,000      | 497,000      | 3,423,000 |
| 1913 ... .. | 2,296,000                     | 484,000      | 437,000      | 3,217,000 |

As the River Plate is much larger than the Australian or Cape bale, a comparison of the number of bales would be somewhat misleading. Allowing approximately for the difference in size of the several bales, it may be said that during the last five years the importations from Australia and the Dominion of New Zealand represent about 65 per cent. of the total.

9. **United Kingdom Importation of Wool.**—The quantity and value of wool imported into the United Kingdom during the year 1912 from the principal wool-producing countries, furnish evidence of the important position which the Commonwealth occupies in the supply of wool to the mother country. This is shewn in the following table:—

#### IMPORTS OF WOOL INTO THE UNITED KINGDOM, 1912.

| Country from which Imported. | Quantity.   | Value.     | Country from which Imported. | Quantity.   | Value.     |
|------------------------------|-------------|------------|------------------------------|-------------|------------|
|                              | lbs.        | £          |                              | lbs.        | £          |
| Australia ...                | 285,061,874 | 12,589,003 | Peru ...                     | 3,068,147   | 130,494    |

| Germany ...                  | 3,836,278   | 169,315    | Other Countries ...          | 1,630,040   | 57,563     |
| U.S. of America ...          | 658,256     | 22,176     |                              |             |            |
| Falkland Islands             | 4,541,618   | 152,412    |                              |             |            |
| Uruguay ...                  | 9,614,036   | 385,679    |                              |             |            |
|                              |             |            | Total ...                    | 806,855,687 | 33,235,015 |

It will be seen that of the total importations of wool into the United Kingdom, Australian wool represented over 35 per cent. of quantity and nearly 38 per cent. of value.

10. **The Wool Market.**—The market for wool, which had been for some years steadily improving, received a severe set-back in the early portion of the season 1907-8 by the disastrous financial crisis which occurred in America soon after the commencement of that season. The result was that buying was restricted, prices fell, and a considerable quantity of wool was withdrawn from sale and held over until the succeeding season. The season 1908-9 consequently opened rather inauspiciously, but, although prices did not reach the high level attained in 1906-7, the demand, particularly in the latter part of the season, was much more spirited than in 1907-8, and the sales must be regarded as having been very satisfactory. The season 1909-10 opened favourably and prices exhibited a distinctly upward tendency, with the result that the price averaged over 20 per cent. more than was obtained during the preceding year. The 1910-11 season opened with a fall of 10 per cent. on the closing rates of the previous season; values gradually recovered before the middle of the series, when wool was selling almost as well as at any period of the previous year; prices again declined  $7\frac{1}{2}$  to 10 per cent., but made a good recovery towards the close of the season, the average for the year being 8 per cent. below that of the previous year. At the commencement of the 1911-12 season values were fully 10 per cent. lower than those ruling at the close of the previous sales. The strained international relationship existing among the European powers was mainly responsible for this.

Early in October the market experienced a further decline of  $2\frac{1}{2}$  per cent. on good wools and of about 5 per cent. on inferior sorts. Towards the end of that month a hardening tendency was manifested, the increased American demand having a material effect in hastening the improvement. During the middle of the season a further advance on prices was in evidence, and this, with a few slight fluctuations, was well maintained throughout the rest of the season. The level of prices throughout 1911-12 was some  $7\frac{1}{2}$  per cent. lower than during the previous season.

The 1912-13 season was particularly free from any violent fluctuations, and was a year of considerable and widespread demand and steady markets. Commencing with an advance of some 5 per cent. on closing rates of previous season, a further advance was experienced during the October sales. November witnessed a rush of fresh orders and frequently increased limits, which resulted in a further advance of about 5 per cent.

The market then firmed steadily, and at the close of the first series of sales, wools were some 10 per cent. or, say,  $\frac{3}{4}$ d. to  $1\frac{1}{4}$ d. per lb. above opening rates, and from 15 to 20 per cent. higher than prices ruling at same date of previous year. The second series at the beginning of January opened strong on December rates, the Yorkshire, German, and French buyers competing eagerly for every lot, merino and fine crossbred being in specially keen request. Towards the end of January the market was at the highest point of the season, prices being well maintained during the balance of the second series. The season closed with the Brisbane sales in June, when a portion of the new clip was offered, and a slightly easier feeling was noticeable owing to the tightness of the money market, particularly in Germany.

The average advance in value for all wool in Australia during the 1912-13 season was just under 20 per cent.

The average values per lb. of Australian greasy wool according to the export returns for the past ten years have been as follows:—

#### EXPORT VALUE PER LB. OF AUSTRALIAN GREASY WOOL, 1903 to 1912.

(i.) *Exports of Wool from each State and Quantity sold Locally.* Over 88 per cent. of the wool grown in Australia is now sold in the local markets prior to export from the Commonwealth. Buyers from the United Kingdom, France, Germany, and other European countries, also from America, Japan, China, and India, attend the sales conducted in Sydney, Melbourne, Geelong, Brisbane, Adelaide, Fremantle, Hobart, and Launceston.

The following table shews the number of bales of wool exported overseas from each State during the season ended 30th June, 1913, and the proportion sold at the local sales prior to shipment. It must be noted that as considerable quantities of wool grown in some States are sold in or shipped from others, these figures therefore do not shew actual local production, but total overseas shipments and sales. The estimated quantity of wool produced in each State is given on page 293.

**EXPORTS OF WOOL TO PLACES OUTSIDE THE COMMONWEALTH, AND THE  
QUANTITY SOLD LOCALLY IN THE SEVERAL STATES, DURING THE  
SEASON ENDED 30th JUNE, 1913.**

| State.                | Oversea Exports. |        | Sold at Local Sales prior to Export. |        | Ratio of Local Sales to          |                              |
|-----------------------|------------------|--------|--------------------------------------|--------|----------------------------------|------------------------------|
|                       |                  |        |                                      |        | Oversea Exports from each State. | Total Exports from C'wealth. |
|                       | Bales.           | %      | Bales.                               | %      | %                                | %                            |
| New South Wales ...   | 773,010          | 44.98  | 664,482                              | 43.76  | 85.96                            | 38.66                        |
| Victoria ...          | 435,795          | 25.36  | 420,013                              | 27.66  | 96.38                            | 24.44                        |
| Queensland ...        | 254,495          | 14.81  | 259,150                              | 17.06  | 101.83                           | 15.08                        |
| South Australia ...   | 164,250          | 9.56   | 147,983                              | 9.74   | 90.09                            | 8.61                         |
| Western Australia ... | 68,656           | 3.99   | 3,182                                | 0.21   | 4.63                             | 0.19                         |
| Tasmania...           | 22,271           | 1.30   | 23,840                               | 1.57   | 107.05                           | 1.39                         |
| Commonwealth ...      | 1,718,486        | 100.00 | 1,518,650                            | 100.00 | ...                              | 88.37                        |

It will be seen that in regard to the ratio of local sales to oversea exports, Victoria's sales represent over 96 per cent. of her exports, New South Wales about 86, South Australia 90, and Queensland 102 per cent. In Tasmania and Queensland some of the wool sold locally was subsequently shipped to interstate ports. Of the total quantity sold in the Commonwealth, New South Wales and Victoria disposed of 43.76 and 27.66 per cent. respectively; Queensland, South Australia, Tasmania, and Western Australia following next in the order named.

During the season under review 1,718,486 bales of wool were shipped from the Commonwealth, of which 88.37 per cent. was sold in the Australian markets. Of this ratio New South Wales and Victoria are represented by 63, Queensland and South Australia 23½, while Tasmania and Western Australia account for the balance.

(ii.) *Exports of Wool from Commonwealth and Quantity sold Locally.* The number of bales of wool exported from the Commonwealth and sold at local sales prior to shipment during 1895, 1900, 1905, and the past five seasons is shewn in the following table:—

**EXPORTS OF WOOL FROM THE COMMONWEALTH, AND THE QUANTITY SOLD  
LOCALLY, FROM 1895 to 1913.**

| Year ended 30th June. |     |     |     |     | Oversea Exports. | Sold prior to Export. | Ratio of Wool sold to Exports. |
|-----------------------|-----|-----|-----|-----|------------------|-----------------------|--------------------------------|
|                       |     |     |     |     | Bales.           | Bales.                | %                              |
| 1895                  | ... | ... | ... | ... | 1,595,652        | 817,333               | 51.22                          |
| 1900                  | ... | ... | ... | ... | 1,221,163        | 807,031               | 66.09                          |
| 1905                  | ... | ... | ... | ... | 1,218,969        | 926,940               | 76.04                          |
| 1909                  | ... | ... | ... | ... | 1,796,347        | 1,449,917             | 80.71                          |
| 1910                  | ... | ... | ... | ... | 1,921,705        | 1,624,561             | 84.54                          |
| 1911                  | ... | ... | ... | ... | 1,975,378        | 1,642,555             | 83.15                          |
| 1912                  | ... | ... | ... | ... | 2,020,547        | 1,700,494             | 84.16                          |
| 1913                  | ... | ... | ... | ... | 1,718,486        | 1,518,650             | 88.37                          |

The steady development of the Australian wool market is clearly shewn in this table. In eighteen years the quantity sold has nearly doubled, and the ratio of wool sold to

that exported has increased from 51 per cent. in 1895 to over 88 per cent. in the season ended 30th June, 1913.

During the past season 1,518,650 bales of wool were sold in Australia and 286,151 bales in New Zealand, representing the total value of £24,642,643. This enormous quantity far exceeds the sales of any other country in the world.

(iii.) *Distribution of Wool sold in Australian Markets.* The estimated approximate distribution of wool sold in the local markets during the season 1912-13 is shewn in the following table, and exhibits the world-wide representation of buyers at the Australian sales :—

| Total Sales ...   | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 |

(a) Including Western Australia, 3182 bales.

Of the total quantity sold, amounting to 1,518,650 bales, 994,515 were purchased for the Continent of Europe, 414,267 for the United Kingdom, 19,929 for America, 22,000 for Asiatic countries, 40,439 by scourers and speculators, while 27,500 bales went for consumption in the local woollen mills. Of the Continental purchases 56 per cent. went to France, Belgium and Holland, nearly 35 per cent. to Germany, and 9 per cent. to Austria, Italy and other European countries.

(iv.) *Quantities of Various Descriptions of Wool Sold in each State.* The quantities and ratios of the various descriptions of wool marketed in each State are shewn in the following tables:—

Wool in the grease represented over 90 per cent. of total sales during the period under review. Of fleece and lambs, the former shews about 96.4, and the latter 3.6 per cent. The poor lambing in 1912 resulted in the falling off of lamb's wool from 5 per cent. in 1911-12 to 3.6 in 1912-13. The class of wool produced principally is merino, which is

almost exclusively grown in the northern and central parts of the continent, the bulk of the merino wool sold in Victoria coming from Riverina and other parts of New South Wales. Victoria, the southern parts of South Australia and of New South Wales, and Tasmania, produce nearly every bale of crossbred and other strong bred wools.

(v.) *Percentages in each State of Various Descriptions of Wool Sold.* The following table gives the percentages of each description of wool sold in the several States during the season 1912-13:—

**PERCENTAGE OF BALES OF EACH DESCRIPTION OF WOOL SOLD IN THE SEVERAL STATES TO THE TOTAL SOLD IN THE COMMONWEALTH, 1912-13.**

## § 6. Hides and Sheepskins.

**1. Extent of Trade.**—In addition to the hides and sheepskins treated in the tanneries of the several States, a very considerable export trade is carried on, the total value of the hides and sheepskins exported from Australia during the five years 1908 to 1912 being no less a sum than £11,424,741, or an average of £2,284,948 per annum.

**2. Sheepskins with Wool.**—By far the largest item included in the amount mentioned in the preceding paragraph arises from the value of sheepskins with wool exported, which are shipped principally to France and the United Kingdom. Details concerning the number so exported during the five years 1908 to 1912 are as follow:—

4. **Hides.**—The Commonwealth trade in hides has now assumed considerable proportions, and during 1912 the total value of hides exported amounted to £1,007,254. The exports took place principally to the United Kingdom, Belgium, Germany, Italy, the United States of America, and France. Large quantities of hides are also imported into the Commonwealth, mainly from New Zealand and the Pacific Islands. The total value of hides imported during 1912 was £135,301.

Particulars concerning the export of hides during the past five years are as follows:—

| No. ...      | 183,362   | 136,375 | 119,408 | 97,926  | 87,680  | 624,751            |
| Value ...    | £ 204,358 | 173,251 | 169,771 | 143,893 | 135,301 | 826,574            |

## § 7. Graphical Representation of Pastoral Production.

1. **General.**—As comparatively complete statistics relative to the number of horses, cattle, sheep and pigs are available from 1860, the graphical representation of the increase in numbers for the Commonwealth as a whole, shewn on page 305, covers the period from 1860 to 1912.

2. **Horses.**—With relatively unimportant fluctuations the number of horses in the Commonwealth increased at a fairly consistent rate until 1895, when a decline set in, culminating in the losses of the disastrous drought of 1902. At this latter point the number was practically identical with that for 1890. From 1902 onwards a rapid improvement has been experienced, the total for 1912 being the highest recorded.

3. **Cattle.**—The graph for cattle furnishes evidence of rapid increase in number, interrupted by three marked periods of decline, of which the first extended from 1862 to 1866, the second from 1881 to 1885, and the third from 1894 to 1902. So extensive was this last-mentioned decline that the number receded to that of 1879. From 1902 a rapid recovery took place, and the total for 1911 exceeded that existing at the end of the year 1895, though still short of the maximum attained in 1894. The 1912 figures shew a slight decline, amounting to slightly over 2 per cent., on the previous year's returns.

4. **Sheep.**—In the case of sheep the graph furnishes evidence of five periods in which the upward movement in number has been arrested or reversed. The first of these occurred between 1868 and 1871, the second between 1875 and 1877, the third during 1884, the fourth, by far the most serious, between 1891 and 1902, and the fifth during 1912. From 1902 to 1907 a rapid increase took place, succeeded by a slight decline in 1908, and a rapid advance in 1909, 1910 and 1911, the point then reached in the latter year being the highest since 1894. The return for 1912, however, again shews a considerable decrease.

5. **Pigs.**—The graph for pigs exhibits more numerous fluctuations than that for any of the other classes of live stock represented, and from 1904 to 1908 furnished evidence of a persistent decline. In 1909, however, an upward movement took place; and this was well maintained during the two succeeding years, the 1911 returns exceeding all previous records. There was, however, a considerable decrease in 1912.

## SECTION VIII.

### AGRICULTURAL PRODUCTION.

NOTE.—Except where otherwise stated, the "agricultural" years hereinafter mentioned are taken as ending on the 31st March.

#### I. Introductory.

1. **Early Attempts at Agriculture.**—The instructions issued to Captain Phillip on the 25th April, 1787, directed him, amongst other things, to proceed as soon as possible to the cultivation of the soil "under such regulations as may appear to be necessary and best calculated for securing supplies of grain and provisions." When the settlers landed at Botany Bay, however, it was found that the glowing accounts published in England by members of Captain Cook's expedition of the fertility of the soil in that locality were considerably overdrawn. Even when Phillip and his company moved round to Port Jackson on the 26th January, 1788, matters were for a time in no better case. The ground in the immediate neighbourhood of the settlement was not suitable for the cultivation of cereal crops, and when the time came to cultivate the soil it was found that there were very few who possessed the slightest acquaintance with the art of husbandry.

2. **The First Sowing.**—In his despatch of the 15th May, 1788, Captain Phillip states that it was proposed to sow eight acres with wheat and barley, although, owing to the depredations of field mice and ants, he was doubtful of the success of the crops.

3. **Discovery of Suitable Agricultural Land.**—A branch settlement was formed at Rosehill, on the Parramatta River, towards the close of 1788, and here corn crops were successfully raised. In his despatch of 12th February, 1790, Phillip refers to the harvest at Rosehill at the end of December, 1789, as consisting of 200 bushels of wheat and 60 of barley, in addition to small quantities of oats, Indian corn, and flax. By the year 1791 there were 213 acres under crop in this locality. In 1792 a new settlement was formed at Toongabbie, about three miles westward of Parramatta, where Phillip states "there are several thousand acres of exceeding good ground." The Hawkesbury Valley, which probably contains some of the richest land in the world, was first settled in 1794. For a long time agricultural operations in Australia were restricted to the narrow belt of country between the tableland and the east coast of New South Wales, as it was not until the year 1813 that a passage was discovered across the Blue Mountains to the fertile plains of the west.

#### § 2. Progress of Agriculture.

1. **Early Records.**—In an "Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797," Governor Hunter gives the acreage under crop as follows:—Wheat, 3361 acres; maize, 1527 acres; barley, 26 acres; potatoes, 11 acres; and vines, 8 acres.

At a muster taken in 1808 the following was the return of crops:—Wheat, 6877 acres; maize, 3389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 34 acres.

By the year 1850 the area under crop had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850 the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres.

The gold discoveries of 1851 and subsequent years had at first a very disturbing effect on agricultural progress, the area under crop declining from 491,000 acres in 1850 to 458,000 acres in 1854; the area under cultivation in New South Wales decreased by nearly 66,000 acres, while in Tasmania a falling-off of over 41,000 acres was experienced. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia totalled over a million acres. The largest increase took place in Victoria, which returned an area of 299,000 acres. For the same year South Australia had 264,000 acres in cultivation, Tasmania 229,000 acres, and New South Wales 223,000 acres.

2. **Progress of Cultivation since 1860.**—The following table shews the area under crop in each of the Commonwealth States and Territories at quinquennial intervals since 1860 and during each of the last two seasons. The area under permanent artificially-sown grasses is excluded in all the States, except for the years 1860-79 in the case of New South Wales, where the acreage cannot be separated. During those years, however, the area laid down under permanent grasses could not have been very large:—

AREA UNDER CROP IN AUSTRALIA, 1860-61 to 1912-13.

| 1905-6  | 2,840,235           | 3,219,963 | 522,748          | 2,255,569           | 364,704   | 230,237        | ...    | ...           | 9,433,455          |
| 1910-11 | 3,386,017           | 3,952,070 | 667,113          | 2,746,334           | 855,024   | 286,920        | 360    | ...           | 11,893,838         |
| 1911-12 | 3,628,513           | 3,640,241 | 526,388          | 2,965,338           | 1,072,653 | 270,000        | 375    | 3,509         | 12,107,017         |
| 1912-13 | 3,737,085           | 4,079,356 | 668,483          | 3,062,998           | 1,199,991 | 286,065        | 330    | 3,741         | 13,038,049         |

The increase in the area under crop during the past twelve years has been most marked in the case of New South Wales, Western Australia and Victoria, the respective increases being 1,291,521, 998,653, and 965,224 acres. During the same period an increase of 693,318 acres was experienced in South Australia, 211,086 in Queensland, and 61,713 acres in Tasmania. The total area under crop in the Commonwealth increased during the period by 4,225,586 acres, and the total for 1912-13 was the highest ever attained by the Commonwealth. During the past seven seasons the percentage of increase was particularly high in Western Australia, viz., 229 per cent. South Australia and New South Wales had an increase of 35½ and 31½ per cent., while Victoria, Queensland and Tasmania added to their areas under crop to the extent of 26½, 26½ and 24½ per cent. respectively.

3. **Relation to Population.**—From the following table it will be seen that for the Commonwealth as a whole the area under crop has, during the seasons under review, with the exception of 1911-12, increased at a rate which is somewhat greater than that

at which the population of the Commonwealth has increased. This relatively greater increase is in evidence in all the States, being most marked in the case of Western Australia, which has now a larger area under crop per head of population than any State except South Australia. Details for 1901-2 and for the past five seasons are as follows:—

**TOTAL AREA UNDER CROP PER 1000 OF POPULATION.**

| Season.     | N.S.W. | Vic.   | Q'land | S. Aust | W. Aus. | Tas.   | Northern Territory | Federal Terr | C'wth. |
|-------------|--------|--------|--------|---------|---------|--------|--------------------|--------------|--------|
|             | Acres. | Acres. | Acres. | Acres.  | Acres.  | Acres. | Acres.             | Acres.       | Acres. |
| 1901-2 ...  | 1,656  | 2,451  | 954    | 6,224   | 1,123   | 1,327  | ...                | ...          | 2,200  |
| 1908-9 ...  | 1,740  | 2,769  | 962    | 6,018   | 2,254   | 1,405  | ...                | ...          | 2,337  |
| 1909-10 ... | 1,971  | 2,865  | 1,050  | 6,440   | 2,718   | 1,419  | ...                | ...          | 2,538  |
| 1910-11 ... | 2,060  | 3,037  | 1,114  | 6,750   | 3,089   | 1,480  | 109                | ...          | 2,688  |
| 1911-12 ... | 2,169  | 2,671  | 846    | 7,091   | 3,646   | 1,396  | 115                | 1,827        | 2,650  |
| 1912-13 ... | 2,102  | 2,955  | 1,050  | 7,122   | 3,920   | 1,451  | 95                 | 1,928        | 2,755  |

4. **Relation to Total Area.**—The next table furnishes a comparison of the area under crop in the Commonwealth and the several States and Territories, with the respective total areas. For the Commonwealth as a whole, the area under crop represented for 1912-13 only about one acre in every 146. In Victoria the area under crop was about one acre in every 14, in New South Wales one in 53, in Tasmania one in 59, in South Australia one in 79, in Western Australia one in 520, in Queensland one in 642, in the Northern Territory one in 1016, and in the Federal Territory one in 156.

**PERCENTAGE OF AREA UNDER CROP TO TOTAL AREA OF EACH STATE AND OF COMMONWEALTH FOR SEASONS 1901-2 and 1908-9 to 1912-13.**

5. **Artificially-Sown Grasses.**—In all the States considerable areas are devoted to artificially-sown grasses, frequently sown on uncultivated land after burning off. Statistics regarding the area under such grasses are as shewn hereunder:—

**AREA UNDER SOWN GRASSES, 1901-2 and 1908-9 to 1912-13.**

| Season. | New South Wales. | Victoria. | Queensland. | South Australia | Western Australia | Tasmania. | Fed. Terr. | Commonwealth. |
|---------|------------------|-----------|-------------|-----------------|-------------------|-----------|------------|---------------|

(a) Including 2 acres Northern Territory.

The considerable increase in the area of the grass lands of the Commonwealth is due in large measure to the great development of the dairying industry which has taken place during the last ten years, and which is referred to in the succeeding section. The areas contained in the above table relate in most cases to grasses sown for grazing purposes on uncultivated land, generally after burning off, and are consequently not included with "area under crop."

### § 3. Relative Importance of Crops.

1. **Various Crops.**—In the following table are furnished details concerning the areas in the several States under each of the principal crops for the season 1912-13:—

DISTRIBUTION OF CROPS IN AUSTRALIA, 1912-13.

| Crop.                          | N.S.W.           | Victoria.        | Q'land.        | S. Aust.         | W. Aust.         | Tas.           | N.T.       | Fed. Terr.   | Total for C'wealth |
|--------------------------------|------------------|------------------|----------------|------------------|------------------|----------------|------------|--------------|--------------------|
|                                | Acres.           | Acres.           | Acres.         | Acres.           | Acres.           | Acres.         | Acres.     | Acres.       | Acres.             |
| Wheat ...                      | 2,230,500        | 2,085,216        | 124,953        | 2,079,633        | 793,096          | 25,226         | 3          | 1,014        | 7,339,651          |

2. **Relative Areas of Crops in States and Territories.**—Taking the principal crops, i.e., those in the case of which the cultivation amounts to more than 50,000 acres in the Commonwealth, the proportion of each in the various States and Territories to the total area under crop for the season 1912-13 is shewn in the next table. In four of the States, viz., New South Wales, Victoria, South Australia, and Western Australia, wheat-growing for grain is by far the most extensive form of cultivation, while in each of these States the hay crop is second in importance. In New South Wales maize ranks third, but in Victoria, South Australia, and Western Australia, and also in the Commonwealth as a whole, the oat crop occupies third position. In Queensland, on the other hand, the three principal crops in the order of importance are sugar cane, green forage, and wheat, while in Tasmania hay, oats, and orchards occupy the leading positions. For the Commonwealth as a whole, the wheat, hay, and oat crops represent nearly 88 per cent. of the total area under crop.

## PROPORTION OF AREA UNDER CHIEF CROPS, 1912-13.

## 3. Relative Positions of States and Territories in regard to Principal Crops.—

The relative proportion of acreage of the several crops and position regarding them in each State and Territory is shewn in the following table. New South Wales exhibits the largest area under wheat, maize, and green forage; Victoria the leading position in regard to hay, oats, orchards and fruit gardens, potatoes, and barley; and Queensland first in sugar cane and second in maize and green forage. South Australia had the largest area under vineyards, and the second largest area under barley; Western Australia third position in oats and fourth in wheat, hay, and vineyards; while Tasmania was third in regard to potatoes, orchards and fruit gardens.

## RELATIVE POSITIONS OF THE SEVERAL STATES AND TERRITORIES IN REGARD TO AREA UNDER EACH OF THE PRINCIPAL CROPS DURING THE SEASON 1912-13.

| Vineyards                  | ... | 59,450    | 58,151     | 59,114     | 60,602     | 62,388     |
| All other Crops            | ... | 122,897   | 129,626    | 136,762    | 133,195    | 130,976    |
| Total                      | ... | 9,891,243 | 10,972,299 | 11,893,838 | 12,107,017 | 13,038,049 |

During the period under review the area devoted to the several crops has varied considerably, that under wheat attaining a maximum in the season 1911-12, and a minimum in 1908-9, while bay reached its maximum area in 1912-13 and its minimum in 1909-10. Of the other crops oats, green forage, orchards and fruit gardens, sugar-cane, barley, and vineyards attained their maximum areas in 1912-13, maize and potatoes in 1910-11.

**§ 4. Wheat.**

1. **Progress of Wheat-Growing.**—(i.) *Acreeage.* The area under wheat for grain is given below for each State at various periods since 1860, and is shewn diagrammatically in the graph hereinafter:—

**AREA UNDER WHEAT, 1860-1 to 1912-13.**

| Season. | N.S.W.    | Victoria. | Q'land. | Sth. Aust. | W. Aust. | Tas.   | N. T.  | Fed. Terr. | C'wealth. |
|---------|-----------|-----------|---------|------------|----------|--------|--------|------------|-----------|

| 1900-1  | 1,530,609 | 2,017,321 | 79,304  | 1,913,247  | 74,308   | 51,825 | ...    | ...        | 5,666,614 |
| 1905-6  | 1,939,447 | 2,070,517 | 119,356 | 1,757,036  | 195,071  | 41,319 | ...    | ...        | 6,122,746 |
| 1910-11 | 2,128,826 | 2,398,089 | 106,718 | 2,104,717  | 581,862  | 52,242 | 2      | ...        | 7,372,456 |
| 1911-12 | 2,379,968 | 2,164,066 | 42,962  | 2,190,782  | 612,104  | 37,208 | 2      | 742        | 7,427,834 |
| 1912-13 | 2,230,500 | 2,085,216 | 124,963 | 2,079,633  | 793,096  | 25,226 | 3      | 1014       | 7,339,651 |

The area devoted in the Commonwealth to the production of wheat for grain was higher for the season 1911-12 than for any previous season. Owing to climatic conditions at the time for sowing, there was a decrease for 1912-13 in New South Wales,

Victoria, South Australia, and Tasmania. In Queensland and Western Australia, however, there was a substantial increase. The maximum area under wheat for grain was attained by the several States in the following seasons:—New South Wales, and South Australia, 1911-12; Victoria, 1910-11; Queensland, 1904-5; Western Australia, 1912-13; and Tasmania, 1897-8. The average area under wheat in the Commonwealth in the past ten seasons was 6,331,361 acres. The past four seasons exceeded this average, while the previous six seasons fell short of it. According to the preliminary reports available it appears that the area of wheat reaped for grain in 1913-14 will exceed that for 1912-13, and will probably exceed 9,000,000 acres.

(ii.) *Yield.* The production during the same period for each State and for the Commonwealth as a whole is given below:—

#### PRODUCTION OF WHEAT, 1860-1 to 1912-13.

| 1912-13 | 32,466,506 | 26,223,104 | 1,975,505 | 21,496,216 | 9,168,594 | 630,315   | ...      | 20,830        | 91,981,070 |

Notwithstanding the decrease of area under wheat, the harvest of 1912-13 was a very satisfactory one, exceeding that of the previous season by 20,344,723 bushels, an average increase of 2.89 bushels per acre for the Commonwealth as a whole.

The harvest of 1910-11 was the largest ever reaped in the Commonwealth, and exceeded by 3,130,913 bushels that of 1912-13, the next largest harvest; the 1909-10 yield was 90,413,597 bushels, these being the only three occasions on which a yield exceeding 90,000,000 bushels has been obtained. The prospects for the forthcoming harvest of 1913-14 are very good, and it appears probable that the aggregate yield for the season will approximate 110,000,000 bushels. For latest particulars to date of going to press, see Appendix.

(iii.) *Average Yields.* In the next table will be found the average yield of wheat per acre in each of the seasons 1901-2 and 1908-9 to 1912-13 and for the decennium:—

#### YIELD OF WHEAT PER ACRE, 1901-2 and 1908-9 to 1912-13.

| Season.                | N.S.W.   | Vic.    | Q'land. | S. Aus. | W Aus.  | Tasmania. | N.T.    | Fed. Terr. | C'wealth |
|------------------------|----------|---------|---------|---------|---------|-----------|---------|------------|----------|
|                        | Bushels. | B'shls. | B'shls. | B'shls. | B'shls. | B'shls.   | B'shls. | B'shls.    | B'shls.  |
| 1901-2                 | 10.64    | 6.91    | 19.40   | 4.60    | 10.10   | 21.86     | ...     | ...        | 7.54     |
| 1908-9                 | 11.11    | 13.12   | 14.87   | 11.45   | 8.63    | 24.08     | ...     | ...        | 11.89    |
| 1909-10                | 14.34    | 13.72   | 13.41   | 13.26   | 12.48   | 21.41     | ...     | ...        | 13.73    |
| 1910-11                | 13.11    | 14.52   | 9.58    | 11.57   | 10.14   | 21.45     | 10.00   | ...        | 12.90    |
| 1911-12                | 10.54    | 9.65    | 6.64    | 9.29    | 7.12    | 17.73     | 10.00   | 10.77      | 9.64     |
| 1912-13                | 14.56    | 12.58   | 15.81   | 10.34   | 11.56   | 24.99     | ...     | 20.54      | 12.53    |
| Average for 10 seasons | 12.06    | 11.67   | 12.60   | 10.30   | 10.45   | 19.93     | 5.71    | 16.41      | 11.37    |

As the above figures shew, there were considerable variations in the average yields, chiefly due of course to the vagaries of the season.

For the Commonwealth as a whole the average yield for 1912-13 of 12.53 bushels per acre was 1.16 above the average yield of 11.37 per acre during the last ten seasons. The highest average yield for any State was in Tasmania with 24.99 bushels per acre. Queensland, New South Wales, and Victoria produced an average of 15.81, 14.56, and 12.58 respectively. Western Australia and South Australia had an average yield of 11.56 and 10.34 bushels per acre respectively, the former being 1.11 and the latter 0.04 above the average for the decennium.

(iv.) *Relation to Population.* During the seasons embraced in the following table, the Commonwealth's production of wheat per head of population has varied between  $3\frac{1}{2}$  bushels in 1902-3 and  $21\frac{1}{2}$  bushels in 1910-11. The State in which wheat-growing occupies the most important position relatively to population is South Australia, which in 1909-10 had a yield which averaged close upon 64 bushels per head. Queensland is the State in which the average production of wheat per head is least. Particulars for 1901-2 and the past five seasons are as follows:—

#### AUSTRALIAN WHEAT PRODUCTION PER 1000 OF POPULATION.

| Season. | N.S.W.   | Victoria. | Q'land.  | S. Aust. | W. Aust. | Tas.     | N. T.   | Fed. Terr. | C'wealth. |
|---------|----------|-----------|----------|----------|----------|----------|---------|------------|-----------|
|         | Bushels. | Bushels.  | Bushels. | Bushels. | Bushels. | Bushels. | Bush'ls | Bush'ls    | Bushels.  |
| 1901-2  | 10,766   | 10,023    | 3,340    | 22,299   | 4,943    | 5,499    | ...     | ...        | 10,082    |
| 1908-9  | 9,915    | 18,670    | 2,159    | 50,275   | 9,477    | 3,655    | ...     | ...        | 14,789    |
| 1909-10 | 17,679   | 22,537    | 2,720    | 63,971   | 21,087   | 4,110    | ...     | ...        | 20,910    |
| 1910-11 | 16,981   | 26,750    | 1,707    | 59,835   | 21,304   | 5,783    | 6       | ...        | 21,494    |
| 1911-12 | 14,993   | 15,330    | 485      | 48,671   | 14,817   | 3,409    | 6       | 4,056      | 15,955    |
| 1912-13 | 18,265   | 18,995    | 3,104    | 49,981   | 29,950   | 3,196    | ...     | 10,737     | 19,433    |

2. *Australian and Foreign Wheat Yields.*—In the next table will be found a statement of the average return per acre in the principal wheat-growing countries of the world, ranging from Belgium with a maximum of  $38\frac{1}{2}$  bushels per acre, to Tunis with a minimum of  $5\frac{1}{2}$  bushels per acre. Australia with approximately  $9\frac{1}{2}$  occupies a subordinate position; it must be remembered, however, that in this year, the yield is much below the average. (See table on previous page.)

#### AVERAGE YIELD OF WHEAT IN VARIOUS COUNTRIES, 1911.

| Country.           | Average Yield in bushels per acre. | Country.               | Average Yield in bushels per acre. |

3. *Wheat Crops of the World.*—The latest available official statistics of the production of wheat in various countries are given in the following table:—

## WHEAT YIELD OF VARIOUS COUNTRIES, 1911.

| Country.               | Yield in Bushels. | Country.           | Yield in Bushels. |
|------------------------|-------------------|--------------------|-------------------|
| United States ...      | 602,448,000       | United Kingdom ... | 64,313,456        |
| Russia in Europe ...   | 445,642,680       | Austria ...        | 57,046,056        |
| India ...              | 366,930,664       | Algeria ...        | 36,586,160        |
| France ...             | 304,486,872       | Egypt ...          | 28,940,368        |
| Canada ...             | 215,851,296       | Japan ...          | 24,848,808        |
| Italy ...              | 192,343,080       | Servia ...         | 15,307,488        |
| Hungary ...            | 190,188,672       | Belgium...         | 14,612,520        |
| Argentine Republic ... | 166,144,864       | Portugal ...       | 11,846,400        |
| Germany ...            | 149,370,040       | Uruguay...         | 8,754,400         |
| Spain ...              | 148,454,776       | Tunis ...          | 8,078,128         |
| Russia in Asia ...     | 116,082,176       | New Zealand† ...   | 7,913,403         |
| Rumania...             | 90,827,264        | Sweden ...         | 7,699,176         |
| Bulgaria ...           | 71,984,576        | Netherlands ...    | 5,340,736         |
| Australia * ...        | 71,636,347        | Denmark ...        | 4,298,976         |

\* 1912—91,981,070. † 1912—5,179,626.

Various estimates of the total quantity of wheat produced in the world have been made. That furnished by the United States Department of Agriculture gives the following figures for the five years 1908 to 1912 :—

## WORLD'S PRODUCTION OF WHEAT.

| Year ...       | 1908.              | 1909.              | 1910.              | 1911.              | 1912.              |
|----------------|--------------------|--------------------|--------------------|--------------------|--------------------|
|                | 1,000,000 bushels. | 1,000,000 bushels. | 1,000,000 bushels. | 1,000,000 bushels. | 1,000,000 bushels. |
| Production ... | 3,085              | 3,472              | 3,466              | 3,432              | 3,844              |

In this estimate the figures given for Australia and New Zealand relate to the agricultural year ending on 31st March in the year specified.

For the five years referred to, the Australian production of wheat aggregated 364,409,000 bushels, thus representing slightly over 2 per cent. of the world's production. The total quantity of wheat produced in the British Empire during the same period of five years was approximately 3,105,000,000 bushels, so that the Australian production of wheat represented 11½ per cent. of that of the British Empire, while the British Empire production represented 18 per cent. of the world's total.

4. Prices of Wheat.—(i.) *British Wheat.* Since the United Kingdom is the largest importer of Australian wheat, the price of wheat in the British markets is a matter of considerable interest to the local producer. The table below gives the average prices per Imperial quarter realised for British-grown wheat :—

## PRICES OF BRITISH WHEAT PER QUARTER, 1861 to 1912.

| Year.    | Average for Year. | Highest Weekly Average. | Lowest Weekly Average. | Year.    | Average for Year. | Highest Weekly Average. | Lowest Weekly Average. |
|----------|-------------------|-------------------------|------------------------|----------|-------------------|-------------------------|------------------------|
|          | s. d.             | s. d.                   | s. d.                  |          | s. d.             | s. d.                   | s. d.                  |
| 1861 ... | 55 4              | 61 6                    | 50 0                   | 1905 ... | 29 8              | 32 3                    | 26 8                   |
| 1871 ... | 56 8              | 60 0                    | 52 6                   | 1906 ... | 28 3              | 30 9                    | 25 9                   |
| 1881 ... | 45 4              | 55 2                    | 40 9                   | 1907 ... | 30 7              | 36 3                    | 26 0                   |
| 1891 ... | 37 0              | 41 8                    | 32 3                   | 1908 ... | 32 0              | 35 6                    | 30 5                   |
| 1901 ... | 26 9              | 27 8                    | 25 8                   | 1909 ... | 36 11             | 44 9                    | 31 4                   |
| 1902 ... | 28 1              | 31 8                    | 24 10                  | 1910 ... | 31 8              | 33 9                    | 29 0                   |
| 1903 ... | 26 9              | 30 3                    | 24 11                  | 1911 ... | 31 8              | 33 4                    | 30 0                   |
| 1904 ... | 28 4              | 30 6                    | 26 3                   | 1912 ... | 34 9              | 39 2                    | 29 10                  |

(ii.) *Australian and other Wheat.* Generally speaking, Australian wheat shews a grain of bright clear texture, rich in gluten, and of fine milling quality. Its excellence is attested by the high price which it realises in the home markets. The statement below shews, for the last five years, the average value per Imperial quarter of the wheat imported into the United Kingdom from the chief producing countries:—

**AVERAGE PRICE OF FOREIGN WHEAT IMPORTED INTO THE UNITED KINGDOM,  
1908 TO 1912.**

| Country.          | Average Price per Imperial Quarter. |       |       |       |       | Country.          | Average Price per Imperial Quarter. |       |       |       |       |

In the next table will be found a statement of the export values of Australian wheat during each of the last ten years:—

**EXPORT VALUES OF AUSTRALIAN WHEAT, 1903 to 1912.**

| Particulars.     | 1903.   | 1904.   | 1905.   | 1906.   | 1907.   | 1908.   | 1909.   | 1910.   | 1911.   | 1912.    |
|------------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|----------|
| Price per bushel | 3s. 1d. | 3s. 2d. | 3s. 5d. | 3s. 3d. | 3s. 4d. | 4s. 1d. | 4s. 2d. | 4s. 2d. | 3s. 6d. | 3s. 11d. |

The export values here shewn are the average declared values for the successive years at the several ports of shipment in the Commonwealth.

**5. Imports and Exports of Wheat and Flour.**—(i.) *Quantities.* The table hereunder shews the imports, exports, and net exports of wheat and flour during 1901 and 1908 to 1912. For the sake of convenience flour has been expressed at its equivalent in wheat, one ton of flour being taken as equal to 50 bushels of grain. During 1903 the Commonwealth imports of wheat and flour were equivalent to 12,607,940 bushels of wheat. This importation was necessitated by the failure of the crop in the preceding season. In ordinary seasons the import of wheat and flour is negligible. During the past five years the export has ranged between 20,867,538 bushels in 1908 and 63,942,390 bushels in 1911, the net exports for that period averaging 43,717,000 bushels.

**IMPORTS AND EXPORTS OF WHEAT AND FLOUR, COMMONWEALTH,**

1901 AND 1908 TO 1912.

| Year. | Imports. |                         |          | Exports.   |                         |            | Net Exports. |
|-------|----------|-------------------------|----------|------------|-------------------------|------------|--------------|
|       | Wheat.   | Flour.                  | Total.   | Wheat.     | Flour.                  | Total.     |              |
|       | Bushels  | Eq. Bshls. <sup>1</sup> | Bushels. | Bushels    | Eq. Bshls. <sup>1</sup> | Bushels.   | Bushels.     |
| 1901  | 22,992   | 302,550                 | 325,542  | 20,260,058 | 4,840,700               | 25,100,758 | 24,775,216   |
| 1908  | 142      | 8,900                   | 9,042    | 15,027,388 | 5,840,150               | 20,867,538 | 20,858,496   |
| 1909  | 128      | 4,000                   | 4,128    | 31,549,498 | 6,498,450               | 38,047,948 | 38,043,820   |
| 1910  | 325      | 8,600                   | 8,925    | 47,761,895 | 6,997,300               | 54,759,195 | 54,750,270   |
| 1911  | 113      | 12,150                  | 12,263   | 55,147,840 | 8,794,550               | 63,942,390 | 63,930,127   |
| 1912  | 1,483    | 7,300                   | 8,783    | 32,604,248 | 3,404,700               | 41,008,948 | 41,000,165   |

1. Equivalent in bushels of wheat.

(ii.) *Destination of Exported Breadstuffs.* In the next two tables will be found the principal countries to which the Commonwealth exported wheat and flour during each

year of the period 1908-12. The countries are as shewn in the Australian Customs returns, but owing to the fact that wheat ships are frequently instructed to call for orders at various ports, the countries in which these ports are cannot be properly considered as the ultimate destination of the whole of the wheat said to be exported to them.

| Japan ...                  | 1       | 337     | 815     | 269     | 404     | 1,826                 |
| Other Countries ...        | 7,418   | 5,845   | 6,519   | 16,230  | 18,752  | 54,764                |
| Total ...                  | 116,803 | 129,969 | 139,946 | 175,891 | 150,085 | 712,694               |

During the five years under review the export of wheat to the United Kingdom totalled 135,143,167 bushels, or about 74 per cent. of the total export for the period. On the other hand, the export of flour to the United Kingdom aggregated only 129,018 tons, or about 18 per cent. of the total export. During the five years the heaviest exports of flour have been to South Africa, the United Kingdom, Java, Portuguese East Africa, the Philippine Islands, the Straits Settlements, and New Zealand.

(iii.) *Exports of Wheat and Flour.* From the foregoing returns it will be seen that the quantity of Australian wheat exported in the form of flour during the past five years represents, on the average, slightly over 16 per cent. of the total equivalent in wheat exported as wheat or flour from the Commonwealth. One cause of this, and probably the chief one, is the fact that Australian wheats are in considerable demand with the English millers for mixing purposes, while the Australian flour has not, up to the present, received that consideration from the English bakers which its admitted qualities undoubtedly merit. Steps which have recently been taken to bring these qualities before the British public may possibly have the effect of increasing the proportion of wheat exported in the form of flour.

A point of some interest in connection with the export of wheat, and one which bears also on the proportions of wheat and flour exports just referred to, is that concerning the quantity of phosphoric acid which this export has the effect of removing from the Commonwealth, and the necessity which exists for the return to the soil of this substance in some form.

According to an estimate furnished by the chemist to the New South Wales Department of Agriculture (F. B. Guthrie, Esq., F.C.S., etc.), the proportions of milled product from a bushel (60 lbs.) of wheat are, approximately, 42 lbs. of flour, 9 lbs. of bran, and 9 lbs. of pollard, while the percentage of phosphoric acid contained in these products is as follows:—

|                |  |
|----------------|--|
| Flour ... ..   | 0.32 per cent., or 0.13 lbs. per bushel. |
| Bran ... ..    | 3.00           "       0.27       "      |
| Pollard ... .. | 0.90           "       0.08       "      |

The total amount of phosphoric acid contained in a bushel of wheat is, therefore, 0.48 lbs., of which 0.13 lbs. is in the flour and 0.35 lbs. in the offal.

During the past ten years the net exports from the Commonwealth of wheat and its milled products have amounted to 291,542,756 bushels of wheat, 1,234,131 tons of flour, and 5,592,443 bushels of bran, pollard, and sharps. On the basis of the figures quoted above this export would contain no less than 150,000,000 lbs. of phosphoric acid, the value of which as a fertiliser would be about £930,000.

(iv.) *Local Consumption of Wheat.* The estimated consumption of wheat as human food and for seed purposes in the Commonwealth during the past eight years is given in the following tables:—

#### WHEAT USED FOR HUMAN CONSUMPTION IN THE COMMONWEALTH.

| Year.                 | Flour Milled. | Net Exports of Flour. |                          | Net Quantity Available for Home Consumption. |                               | Net Quantity Available per Head of Population. |                               |
|-----------------------|---------------|-----------------------|--------------------------|--|-------------------------------|--|-------------------------------|

In addition to the above there is to be taken into consideration grain fed to poultry and other live stock. This, doubtless, varies in quantity from year to year according to the prices current for wheat, and other causes. No data is available on which to base an estimate of actual quantity so consumed. The flour available for human consumption necessarily fluctuates from year to year coincident with stocks being heavy or light. In 1907 the flour available per head of population, after deducting net exports from quantity milled, shewed a substantial increase over the average for the previous two years, this, however, being counterbalanced for by a decline in the following year. The average quantity of flour consumed per annum for the eight years under consideration was 0.112 tons per head of population, this, when expressed in equivalent terms in wheat, representing 5.6 bushels. The estimates of quantity of grain used for seed purposes have been based on data supplied by the Agricultural Departments of the several States, giving average quantities of seed used per acre for wheat sown either for grain, hay or green fodder. The average annual quantity thus used during the eight years was 1.7 bushels per head of population, and 0.947 bushels per acre sown.

6. **Value of the Wheat Crop.**—The estimated value of the wheat crop in each State and in the Commonwealth during the season 1912-13 is shewn below :—

## § 5. Oats.

1. **Progress of Cultivation.**—Oats comes next in importance to wheat amongst the grain crops cultivated last season, but while wheat grown for grain accounted for over 56 per cent., oats represented only 6 $\frac{3}{4}$  per cent. of the area under crop in the Commonwealth. The progress of cultivation of oats since 1860 is shewn in the table hereunder, and more fully in the graphs hereinafter:—

## CULTIVATION OF OATS, 1860-1 to 1912-13.

| 1911-12 | 1,152,827 | 4,585,326 | 5,783    | 1,349,480 | 961,385   | 1,504,633 | 2,337      | 9,561,771  |
| 1912-13 | 1,669,259 | 8,323,639 | 82,420   | 1,673,508 | 2,105,812 | 2,257,258 | 4,816      | 16,116,712 |

The principal oat-growing State of the Commonwealth is Victoria. During the past five seasons it has produced about 58 per cent. of the total quantity of oats grown in the Commonwealth; Tasmania, New South Wales, South Australia, and Western Australia come next in order of importance. In New South Wales and Tasmania, the highest production of oats for any season was that of 1909-10, while Victoria experienced a maximum yield in 1903-4, and Queensland, South Australia and Western Australia in 1912-13. For the Commonwealth as a whole the record yield was that of 17,541,210 bushels in the season 1903-4, while the yields of 16,248,857 and 16,116,712 for 1908-9 and 1912-13 respectively, rank second and third.

3. **Average Yield.**—The average yield per acre of the oat crop of the Commonwealth varies considerably in the different States, being highest in Tasmania and lowest in South Australia. Particulars as to average yield in each of the seasons 1901-2 and 1908-9 to 1912-13, and also for the decennium, are given in the succeeding table:—

## AVERAGE YIELD OF OATS PER ACRE.

| Season.                | N.S.W.   | Victoria. | Q'land.  | S. Aust. | W. Aust. | Tas.     | Fed. Terr. | C'wealth. |
|------------------------|----------|-----------|----------|----------|----------|----------|------------|-----------|
|                        | Bushels. | Bushels.  | Bushels. | Bushels. | Bushels. | Bushels. | Bush'ls    | Bushels   |
| 1901-2                 | 21.31    | 20.43     | 27.50    | 13.54    | 16.78    | 31.48    | ...        | 21.22     |
| 1908-9                 | 18.70    | 26.50     | 21.60    | 16.31    | 12.43    | 34.35    | ...        | 24.03     |
| 1909-10                | 24.14    | 20.60     | 17.93    | 14.17    | 17.02    | 32.93    | ...        | 21.10     |
| 1910-11                | 21.83    | 24.70     | 19.89    | 14.63    | 12.54    | 32.30    | ...        | 22.80     |
| 1911-12                | 16.25    | 15.17     | 10.38    | 12.51    | 12.41    | 26.13    | 13.99      | 15.50     |
| 1912-13                | 19.64    | 18.95     | 19.48    | 10.76    | 16.50    | 36.15    | 24.57      | 18.43     |
| Average for 10 Seasons | 19.83    | 21.67     | 20.06    | 12.55    | 14.90    | 30.82    | 19.71      | 20.75     |

The smallest average yield per acre for the Commonwealth for the past ten-year period was that experienced in the season 1907-8, being 14.29, while the largest was that of the season 1903-4, amounting to 28.25 bushels per acre.

4. **Relation to Population.**—The State in which oat production occupies the most important position in relation to population is Tasmania, the yield for that State representing for 1912-13 about 11½ bushels per head, as compared with 3½ bushels per head for the Commonwealth as a whole. Particulars for the seasons 1901-2 and 1908-9 to 1912-13 are furnished in the succeeding table :—

## OAT PRODUCTION PER 1000 OF POPULATION.

| Season. | N.S.W.   | Victoria. | Q'land.  | S. Aust. | W. Aust. | Tas.     | Federal Territory. | C'wealth |

| 1912-13 | 939      | 6,029     | 129      | 3,891    | 6,879    | 11,446   | 2,482              | 3,405    |

5. **Value of Oat Crop.**—The estimated value of the oat crop of the several States of the Commonwealth for the season 1912-13 is as follows :—

## VALUE OF OAT CROP,\* 1912-13.

| Particulars.    | N.S.W.   | Victoria.  | Q'land. | S. Aust. | W. Aust. | Tas.     | Fed. Terr. | C'wealth.  |
|-----------------|----------|------------|---------|----------|----------|----------|------------|------------|
| Aggregate value | £250,389 | £1,014,443 | £17,514 | £167,351 | £236,904 | £263,347 | £722       | £1,950,670 |
| Value per acre  | £2/8/11  | £2/6/2     | £4/2/9  | £1/1/6   | £1/17/1  | £4/4/4   | £3/13/8    | £2/4/7     |

\* Exclusive of the value of straw.

6. **Imports and Exports.**—The production of oats in the Commonwealth has not yet reached such a stage as to admit of a regular export trade in this cereal; in fact in certain years the imports have exceeded the exports, notably in 1903, 1906, 1908, and 1912. The quantities and values of oats imported into and exported from the Commonwealth during the years 1901 and 1908 to 1912 are given hereunder :—

## COMMONWEALTH IMPORT AND EXPORT OF OATS, 1901 and 1908 to 1912.

| Year. | Imports.  |         | Exports.  |         | Net Exports. |         |
|-------|-----------|---------|-----------|---------|--------------|---------|
|       | Quantity. | Value.  | Quantity. | Value.  | Quantity.    | Value.  |
|       | Bushels.  | £       | Bushels.  | £       | Bushels.     | £       |
| 1901  | 1,526,599 | 153,674 | 2,874,334 | 285,347 | 1,347,735    | 131,673 |
| 1908  | 1,401,870 | 206,283 | 67,058    | 10,594  | 1,334,812    | 195,689 |
| 1909  | 320,543   | 32,607  | 339,258   | 35,375  | 18,715       | 2,768   |
| 1910  | 19,510    | 2,232   | 129,490   | 14,893  | 109,980      | 12,661  |
| 1911  | 4,522     | 639     | 391,465   | 46,493  | 386,943      | 45,854  |
| 1912  | 2,939,325 | 398,114 | 106,275   | 14,688  | 2,833,050    | 383,426 |

Note. — signifies net imports.

The principal countries from which the Commonwealth imports of oats have been obtained are the Dominion of New Zealand and the South African colonies, while the principal countries to which oats were exported during the period under review were the South African colonies in the earlier, and the United Kingdom, the Philippine Islands, and India in the later years.

7. **Oatmeal, etc.**—Importations of oatmeal, etc., into the Commonwealth take place principally from the United Kingdom, the United States, and Canada. The total importations of oatmeal, wheatmeal, and rolled oats during 1912 amounted to 759,072 lbs., and represented a value of £9509.

8. **Comparison with other Countries.**—A comparison of the Australian production of oats with that of the leading oat-producing countries of the world, is furnished in the following table:—

## PRODUCTION OF OATS IN VARIOUS COUNTRIES, 1911.

| Country.           | Quantity of Oats produced | Country.      | Quantity of Oats produced | Country.              | Quantity of Oats produced. |
|--------------------|---------------------------|---------------|---------------------------|-----------------------|----------------------------|
|                    | Bushels                   |               | Bushels.                  |                       | Bushels                    |
| United States ...  | 894,264,000               | Hungary ...   | 78,505,888                | Rumania ...           | 25,411,728                 |
| Russian Empire ... | 716,516,032               | Sweden ...    | 61,501,000                | New Zealand ...       | 19,663,056                 |
| Germany ...        | 435,380,480               | Argentina ... | 56,738,872                | Netherlands ...       | 17,176,056                 |
| Canada ...         | 303,548,168               | Denmark ...   | 39,644,536                | Bulgaria ...          | 16,771,504                 |
| France ...         | 295,043,096               | Belgium ...   | 33,921,816                | Algeria ...           | 9,918,520                  |
| United Kingdom ... | 162,933,336               | Italy ...     | 33,609,872                | <b>Australia*</b> ... | <b>9,561,771</b>           |
| Austria ...        | 130,966,040               | Spain ...     | 27,773,744                | Norway ...            | 8,475,576                  |

\* 1912—16,116,712 bushels.

9. **Comparison of Yields.**—The average yield per acre of oats in Australia is a somewhat low one compared with the results obtained in other countries, where the cultivation of this cereal is more extensively carried on. Arranging the countries contained in the foregoing table, with the exception of Denmark, Sweden and Norway, for which particulars are not available, according to the magnitude of the average yield of oats for the year 1911, the results are as follows:—

## YIELD OF OATS PER ACRE, 1911.

| Country.             | Average per Acre. | Country.       | Average per Acre. | Country.              | Average per Acre. |
|----------------------|-------------------|----------------|-------------------|-----------------------|-------------------|
|                      | Bushels.          |                | Bushels.          |                       | Bushels.          |
| Belgium ...          | 56.06             | Canada ...     | 32.87             | United States ...     | 23.68             |

## § 6. Maize.

1. **States Growing Maize.**—The only States in which maize is at all extensively grown for grain are those of New South Wales and Queensland, the area so cropped in these two States during the season 1912-13 being 294,658 acres, or nearly 94 per cent. of the total for the Commonwealth. Of the balance, Victoria contributed 19,986 acres, South Australia 176 acres, Western Australia 25 acres, and the Northern Territory 35 acres. The climate of Tasmania prevents the growing of maize for grain in that State. In South Australia prior to 1908 particulars concerning maize had not been specially asked for on the form used in the collection of agricultural statistics. In all the States maize is grown to a greater or less extent as green forage, particularly in connection with the dairying industry.

2. **Area under Maize.**—The area devoted to the growing of maize for grain in each State, from 1875 onwards, is given in the following table, and the actual fluctuations from year to year are shewn more fully on the graph hereinafter.

The total area under maize in the Commonwealth exceeded 300,000 acres for the first time in the season 1890-1, and although it fluctuated somewhat during the succeeding seventeen years, it may be considered to have remained at about that figure. The greatest divergence during the period occurred in 1903-4, when a record total of 371,906 acres was harvested. For 1908-9 and the two following seasons a continuous increase in the area devoted to maize was in evidence, and the total of 414,914 acres for 1910-11 is the highest ever attained. The unfavourable weather conditions during 1911-12 resulted in the acreage under maize for that season being reduced by 74,849 acres as compared with its predecessor; the 1912-13 season shewed a further slight decline.

**AREA UNDER MAIZE, 1875-6 to 1912-3.**

| Season. | N.S.W.  | Victoria. | Queensland. | South Aust. | W. Aust. | N. T.  | Fed. Terr. | C'wealth. |

\* Particulars for years prior to 1907-8 not available.

3. **Total Yield.**—The average yield per acre of this cereal for the season 1912-13 was not so high as that obtaining for some of the previous years, but compared favourably with the average for the decade, being only 1.22 bushels below the decennium average. The 1910-11 crop was a record one, and exceeded 13,000,000 bushels. The average annual production of maize during the last decade was 9,420,770 bushels. Particulars concerning the yield from 1875 onwards are as hereunder:—

#### MAIZE CROP, 1875-6 to 1912-13.

| Average for 10 Seasons | 30.14    | 51.60     | 21.79    | †13.63   | 12.88    | ‡30.81   | 13.83      | 27.75    |

\* Particulars not available. † Average for 6 seasons. ‡ Average for 3 seasons.  
 ¶ Average for 2 Seasons.

The extraordinarily high average yield obtained in Victoria is due, in large measure, to the fact that the area under maize in that State is comparatively small and is situated in districts that are peculiarly suited to the production of this grain. The yield in New South Wales is appreciably higher than that obtained in Queensland.

5. **Value of Maize Crop.**—The value of the Commonwealth maize crop for the season 1912-13 has been estimated at £1,745,998, made up as follows:—

#### VALUE OF MAIZE CROP, 1912-13.

| Particulars.    | N.S.W.   | Victoria. | Q'land. | S. Aust. | W. Aust. | N. T.   | Federal Terr. | C'wealth. |
|-----------------|----------|-----------|---------|----------|----------|---------|---------------|-----------|
|                 | £        | £         | £       | £        | £        | £       | £             | £         |
| Aggregate value | 979,619  | 134,119   | 631,093 | 526      | 112      | 350     | 179           | 1,745,998 |
| Value per acre  | £5/10/11 | £6/14/3   | £5/7/0  | £2/19/9  | £4/9/7   | £10/0/0 | £3/3/11       | £5/10/11  |

6. **Relation to Population.**—During the past ten seasons the Commonwealth production of maize has ranged between  $1\frac{3}{4}$  bushels per head of population in 1912-3 and 3 bushels per head in 1910-11. The production in Queensland, the State in which the maize yield per head of population is highest, ranged during the same period between  $3\frac{3}{4}$  bushels per head in 1903-4 and  $7\frac{1}{2}$  bushels per head in 1910-11. Details for the several States for the seasons 1901-2 and 1908-9 to 1912-13 are as follows:—

**MAIZE PRODUCTION PER 1000 OF POPULATION, 1901-2 and 1908-9 to 1912-13.**

\* Particulars not available.

7. **Australian and Foreign Maize Production.**—The following table gives the production of maize in Australia and in the leading maize producing countries of the world. The figures shew that of the total production the United States of America was responsible for 73 per cent.

**PRODUCTION OF MAIZE IN VARIOUS COUNTRIES, 1911.**

| Country.               | Production of Maize. | Country.              | Production of Maize. |
|------------------------|----------------------|-----------------------|----------------------|
|                        | Bushels.             |                       | Bushels.             |
| United States ...      | 2,454,528,000        | Bulgaria ...          | 53,911,424           |

\* 1912, 8,356,158 bushels.

8. **Comparison of Yields.**—The average yield per acre of maize in the Commonwealth of  $26\frac{1}{2}$  bushels may be regarded as highly satisfactory when compared with that of other maize producing countries. Canada, Bulgaria, Egypt, and Argentine Republic are the only countries shewing a higher average. The remaining countries shewn in the following table had average yields per acre ranging from  $15\frac{1}{2}$  to  $23\frac{1}{2}$  bushels.

**AVERAGE YIELD OF MAIZE IN VARIOUS COUNTRIES, 1911.**

| Country.                     | Average yield per acre. | Country.           | Average yield per acre. |

| United States of America ... | 23.19                   |                    |                         |

\* 1912, 26.53 bushels.

9. **Oversea Imports and Exports.**—Except in the years 1902, 1903 and 1912, when many of the maize crops failed, the Commonwealth oversea trade in maize has been practically insignificant. In the first of the years mentioned nearly two million, and in each of the latter two years considerably more than a million bushels were imported. In 1908 and 1909 also, owing to the small harvests of seasons 1907-8 and 1908-9, the imports of maize were largely in excess of the exports. Details of imports and exports for 1901 and the past five years are as follows:—

**COMMONWEALTH IMPORTS AND EXPORTS OF MAIZE, 1901 and 1908 to 1912.**

| Year.    | Imports.  |         | Exports.  |        | Net Imports. |         |
|----------|-----------|---------|-----------|--------|--------------|---------|
|          | Quantity. | Value.  | Quantity. | Value. | Quantity.    | Value   |
|          | Bushels.  | £       | Bushels.  | £      | Bushels.     | £       |
| 1901 ... | 188,423   | 24,764  | 533       | 75     | 187,890      | 24,689  |
| 1908 ... | 271,723   | 49,291  | 2,018     | 444    | 269,705      | 48,847  |
| 1909 ... | 628,063   | 104,367 | 5,054     | 999    | 623,009      | 103,368 |
| 1910 ... | 133,730   | 19,554  | 12,557    | 1,904  | 121,173      | 17,650  |
| 1911 ... | 31,764    | 4,925   | 19,914    | 3,438  | 11,850       | 1,487   |
| 1912 ... | 1,133,755 | 218,233 | 37,968    | 8,402  | 1,095,787    | 209,831 |

The principal countries to which maize has been exported from the Commonwealth are South Africa, New Zealand, and China, while the principal countries from which importations have taken place are the United States, the Pacific Islands, South Africa, and Java.

10. **Prepared Maize.**—A fairly large quantity of corn-flour is imported annually into the Commonwealth, the principal countries of supply being the United Kingdom and the United States. During the year 1912 these importations amounted to 437,635 lbs., and represented a value of £6738.

11. **Price of Maize.**—The average wholesale price of maize in the Sydney market is given in the following table for each of the years 1903 to 1912:—

**AVERAGE PRICE OF MAIZE PER BUSHEL, 1903 to 1912.**

| Particulars.                | 1903. | 1904. | 1905. | 1906. | 1907. | 1908. | 1909. | 1910. | 1911. | 1912. |

**§ 7. Barley.**

1. **Area under Barley.**—The area devoted to barley in the Commonwealth has fluctuated very considerably, though with a tendency to increase during the past few years. The principal barley-growing State is Victoria, which, for the season 1912-13, accounted for 39½ per cent. of the Commonwealth area devoted to this crop; South Australia was next in importance with a percentage of 38 per cent.; the remaining 22½ per cent. being represented by New South Wales, Queensland, Tasmania and Western Australia in the order named. The figures here given relate to the areas harvested for grain; only small areas are cropped for hay, while more considerable quantities are cut for green forage. These, however, are not included in this sub-section. The area under barley for grain in the several States from 1875 onwards is shewn in the following table:—

## COMMONWEALTH AREA UNDER BARLEY, 1875-6 to 1912-13.

| Season. | N.S.W. | Victoria. | Q'land. | Sth. Aust. | W. Aust. | Tasmania. | C'wealth. |
|---------|--------|-----------|---------|------------|----------|-----------|-----------|
|         | Acres. | Acres.    | Acres.  | Acres.     | Acres.   | Acres.    | Acres     |
| 1875-6  | 4,817  | 31,568    | 613     | 13,969     | 5,014    | 5,989     | 61,920    |
| 1880-1  | 8,056  | 68,630    | 1,499   | 13,074     | 6,363    | 8,297     | 105,919   |
| 1885-6  | 5,298  | 74,112    | 406     | 16,493     | 6,178    | 6,833     | 109,320   |
| 1890-1  | 4,937  | 87,751    | 584     | 14,472     | 5,322    | 4,376     | 117,442   |
| 1895-6  | 7,590  | 78,438    | 721     | 14,184     | 1,932    | 6,178     | 109,043   |
| 1900-1  | 9,435  | 58,853    | 7,533   | 15,352     | 2,536    | 4,502     | 98,211    |
| 1905-6  | 9,519  | 40,938    | 5,201   | 26,250     | 3,665    | 5,372     | 90,945    |
| 1910-11 | 7,082  | 52,687    | 5,578   | 34,473     | 3,369    | 5,235     | 103,424   |
| 1911-12 | 10,803 | 53,541    | 1,634   | 40,743     | 3,664    | 6,081     | 116,466   |
| 1912-13 | 16,909 | 71,631    | 9,447   | 68,964     | 5,626    | 8,802     | *181,387  |

\* Including 1 acre Northern and 7 acres Federal Territory.

2. **Malting and other Barley.**—In recent years the statistics of all the States have distinguished between “malting” and “other” barley. Particulars for the Commonwealth for 1912-13 season are as follows:—

## AREA UNDER MALTING AND OTHER BARLEY, 1912-13.

| Particulars.   | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | North. Ter. | Fed. Ter. | C'wealth. |
|----------------|--------|-----------|---------|----------|----------|-------|-------------|-----------|-----------|
|                | Acres. | Acres     | Acres   | Acres.   | Acres    | Acres | Acres.      | Acres.    | Acres.    |
| Malting barley | 13,189 | 52,311    | 7,400   | 52,769   | 2,384    | 7,824 | 1           | 2         | 135,880   |
| Other barley   | 3,720  | 19,320    | 2,047   | 16,195   | 3,242    | 978   | ...         | 5         | 45,507    |
| Total ...      | 16,909 | 71,631    | 9,447   | 68,964   | 5,626    | 8,802 | 1           | 7         | 181,387   |

It will be seen that, taking the Commonwealth as a whole, about 75 per cent. of the area devoted to this grain in 1912-13 was cropped with malting barley. The proportion varies considerably in the several States.

3. **Total Yield.**—The total production of barley in the Commonwealth for the season 1912-13 amounted to 3,859,116 bushels, exceeding the yield of the previous season by 1,802,280 bushels. Particulars concerning the yields of the several States from 1875 onwards are as follows:—

## COMMONWEALTH BARLEY CROP, 1875-6 to 1912-13.

| Season. | N.S.W.   | Victoria. | Q'land.  | Sth. Aust. | W. Aust. | Tasmania. | C'wealth.  |
|---------|----------|-----------|----------|------------|----------|-----------|------------|
|         | Bushels. | Bushels.  | Bushels. | Bushels.   | Bushels. | Bushels.  | Bushels.   |
| 1875-6  | 98,576   | 700,665   | 12,260   | 197,315    | 70,196   | 165,357   | 1,244,369  |
| 1880-1  | 163,395  | 1,068,830 | 31,433   | 151,886    | 89,082   | 169,156   | 1,673,782  |
| 1885-6  | 85,606   | 1,302,854 | 9,826    | 218,334    | 89,581   | 176,466   | 1,882,667  |
| 1890-1  | 81,383   | 1,571,599 | 12,673   | 175,583    | 85,451   | 99,842    | 2,026,531  |
| 1895-6  | 96,119   | 715,592   | 7,756    | 140,391    | 18,691   | 138,833   | 1,117,382  |
| 1900-1  | 114,228  | 1,215,478 | 127,144  | 211,102    | 29,189   | 116,911   | 1,814,052  |
| 1905-6  | 111,266  | 1,062,139 | 61,816   | 505,916    | 49,497   | 106,042   | 1,896,676  |
| 1910-11 | 82,005   | 1,340,387 | 83,621   | 544,471    | 33,566   | 142,318   | 2,226,368  |
| 1911-12 | 129,008  | 1,024,584 | 15,369   | 702,855    | 37,011   | 148,009   | 2,056,836  |
| 1912-13 | 289,562  | 1,744,527 | 146,847  | 1,318,734  | 93,418   | 265,903   | *3,859,116 |

\* Including 120 bushels, Federal Territory.

4. **Value of Barley Crop.**—The estimated value of the total barley crop of the Commonwealth for the season 1911-12 was £483,151, while that for 1912-13 was £765,643. The extent to which the several States have contributed to the total is shewn in the following table:—

**VALUE OF BARLEY CROP,\* 1912-13.**

| Particulars.    | N.S.W.  | Victoria. | Q'land. | Sth. Aust. | W. Aust. | Tas.    | Fed. Terr. | C'wealth. |
|-----------------|---------|-----------|---------|------------|----------|---------|------------|-----------|
| Total value ... | £68,349 | £365,634  | £33,040 | £232,794   | £16,703  | £49,099 | £24        | £765,643  |
| Value per acre  | £4/0/11 | £5/2/1    | £3/9/11 | £3/7/6     | £2/19/4  | £5/11/7 | £3/8/7     | £4/4/5    |

\* Exclusive of the value of straw.

5. **Relation to Population.**—During the seasons embraced in the following table, the quantity of barley produced in the Commonwealth has averaged about half a bushel per head of population. For the season 1912-13 the production ranged from about 3 bushels per head in South Australia to one-sixth of a bushel in New South Wales. Details for the period are as follows:—

**BARLEY PRODUCTION PER 1000 OF POPULATION, 1901-2 and 1908-9 to 1912-13.**

| Season.     | N.S.W.   | Victoria. | Q'land.  | S. Aust. | W. Aust. | Tas.     | C'wealth. |
|-------------|----------|-----------|----------|----------|----------|----------|-----------|
|             | Bushels. | Bushels.  | Bushels. | Bushels. | Bushels. | Bushels. | Bushels.  |
| 1901-2 ...  | 75       | 573       | 547      | 677      | 179      | 956      | 397       |
| 1908-9 ...  | 107      | 1,209     | 247      | 2,140    | 287      | 827      | 679       |
| 1909-10 ... | 169      | 801       | 335      | 1,760    | 383      | 796      | 563       |
| 1910-11 ... | 50       | 1,002     | 140      | 1,338    | 121      | 734      | 503       |
| 1911-12 ... | 78       | 771       | 25       | 1,709    | 129      | 778      | 458       |
| 1912-13 ... | 163      | 1,264     | 231      | 3,066    | 305      | 1,348    | 815       |

6. **Commonwealth Imports and Exports.**—The Commonwealth oversea trade in barley is not extensive, and in most years the imports exceed the exports. In 1902, 1903, and 1912, somewhat extensive importations of barley from the United States and New Zealand took place, owing to the shortage in local supply resulting from the severe droughts of those periods. In 1904, the excellent crop of the season 1903-4 furnished the material for a heavy exportation to Japan, the total exported thither during that year being 551,821 bushels. In 1909 also a fairly heavy export took place, mainly to the United Kingdom. Particulars of the Commonwealth oversea imports and exports of barley for the years 1901 and 1908 to 1912 are contained in the following table:—

**COMMONWEALTH IMPORTS AND EXPORTS OF BARLEY, 1901 and 1908 to 1912.**

| Year.    | Imports.  |         | Exports.  |        | Net Exports. |          |
|----------|-----------|---------|-----------|--------|--------------|----------|
|          | Quantity. | Value.  | Quantity. | Value. | Quantity.    | Value.   |
|          | Bushels.  | £       | Bushels.  | £      | Bushels.     | £        |
| 1901 ... | 55,508    | 7,208   | 17,474    | 1,942  | — 38,034     | — 5,266  |

Note. — signifies net imports.

Only in three years during the period embraced in the above table have the Commonwealth exports of barley exceeded in value the imports, viz., in 1904, 1905, and 1909. During the last ten years the total importations amounted to 2,848,963 bushels, valued at £580,319, and the total exports to 1,109,324 bushels, valued at £142,021, giving a net importation of 1,739,639 bushels in quantity and £438,298 in value.

In addition to the above, which relates to the unprepared grain, there is a small importation into the Commonwealth of pearl and Scotch barley, mainly from the United Kingdom and Japan. The total imported during 1912 amounted to only 8377 lbs. in weight, with a value of £102.

From time to time a considerable export trade in Australian pearl and Scotch barley has been carried on, mainly with the United Kingdom and New Zealand, the total exports for 1909 reaching 1,155,346 lbs., valued at £3573, and for 1910, 119,337 lbs., valued at £510. During 1911 and 1912, however, the exports were only 588 lbs., valued at £8, and 712 lbs., valued at £10, respectively.

**7. Commonwealth Imports and Exports of Malt.**—The importations of malt into the Commonwealth are fairly extensive, the bulk of the supply being obtained from the United Kingdom, Austria-Hungary, and Germany, but principally from the United Kingdom. Details of imports and exports for the years 1901 and 1908 to 1912 are given hereunder:—

#### COMMONWEALTH IMPORTS AND EXPORTS OF MALT, 1901 and 1908 to 1912.

| Year.       | Imports.  |         | Exports.  |        | Net Imports. |         |

**8. Comparison with other Countries.**—In comparison with the barley production of other countries of the world, that of Australia appears very small indeed. Particulars for some of the leading countries for the year 1911 are as follow, the Australian figures being added for the sake of comparison:—

#### PRODUCTION OF BARLEY IN VARIOUS COUNTRIES, 1911.

| Country.           | Production of Barley. | Country.              | Production of Barley. |
|--------------------|-----------------------|-----------------------|-----------------------|
|                    | Bushels.              |                       | Bushels.              |
| Russian Empire ... | 417,797,784           | Denmark ...           | 20,205,128            |

| Rumania ...        | 25,348,752            | New Zealand† ...      | 1,253,064             |

\* 1912 : 3,859,116 bushels. † 1912 : 1,377,610 bushels.

9. **Average Yield.**—The average yield per acre of barley varies considerably in the different States, being as a rule highest in Tasmania and Victoria, and lowest in Western Australia and New South Wales. Details for each State for 1901-2 and the past five seasons, and also for the decennium, are given in the following table :—

**AVERAGE YIELD PER ACRE OF BARLEY, 1901-2 and 1908-9 to 1912-13.**

| Season.                    | N.S.W.   | Victoria. | Q'land.  | Sth. Aust. | West Aust. | Tas.     | C'wealth. |

## § 8. Other Grain and Pulse Crops.

In addition to the grain crops already specified, the only grain and pulse crops at all extensively grown in the Commonwealth are beans, peas and rye. The total area under the two former for the season 1912-13 was 40,382 acres, giving a total yield of 847,633 bushels, or an average of 20.99 bushels per acre, being 1.64 over the average yield for the decennium ended 1912-13, which was 19.35 bushels per acre. The States in which the greatest area is devoted to beans and peas are Tasmania, Victoria and South Australia. The total area under rye in the Commonwealth during the season 1912-13 was 7179 acres, yielding 96,007 bushels, and giving an average of 13.37, this being above the average for the past ten seasons, which is 12.63 bushels per acre. Nearly 44 per cent. of the rye grown during the season was produced in New South Wales, 21 per cent. in Tasmania, and 18 per cent. in Victoria. In addition to these grain crops a small area of rice has for some years been cultivated in Queensland and the Northern Territory. The results obtained, however, have not up to the present been very satisfactory. Should rice-growing ever be seriously taken up in Australia, it is probable that large tracts of country in the northern parts of Western Australia and in the Northern Territory will be found well suited to its cultivation.

### § 9. Potatoes.

1. **Area.**—The principal potato-growing State of the Commonwealth as regards area is Victoria; Tasmania prior to 1909-10 usually ranking second and New South Wales third; the relative positions of these two States have, however, been reversed during the last four seasons. The lower figures for Tasmania relating to 1909-10 and onwards may mainly be attributed to the prevalence of the Irish potato blight in that State; New South Wales, on the other hand, has increased her acreage under this crop from 26,301 acres in 1908-9 to 43,079 in 1911-12, and 34,093 in 1912-13. The area devoted to this crop in the Commonwealth, which has fluctuated somewhat, reached its highest point in the season 1910-11, with a total of 151,515 acres.

The area under potatoes in each State from 1890 onwards is given hereunder :—

#### COMMONWEALTH AREA UNDER POTATOES, 1890-1 to 1912-13.

| Season.     | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.   | Fed. Terr. | C'wealth. |
|-------------|--------|-----------|---------|----------|----------|--------|------------|-----------|
|             | Acres. | Acres.    | Acres.  | Acres.   | Acres.   | Acres. | Acres      | Acres.    |
| 1890-1 ...  | 19,406 | 53,818    | 6,270   | 6,626    | 511      | 20,133 | ...        | 106,764   |
| 1895-6 ...  | 24,722 | 43,895    | 9,240   | 6,448    | 668      | 19,247 | ...        | 104,220   |
| 1900-1 ...  | 29,408 | 38,477    | 11,060  | 6,628    | 1,794    | 23,068 | ...        | 110,435   |
| 1905-6 ...  | 26,374 | 44,670    | 7,170   | 9,540    | 2,145    | 28,634 | ...        | 118,533   |
| 1910-11 ... | 44,452 | 62,904    | 8,326   | 7,812    | 1,791    | 26,230 | ...        | 151,515   |
| 1911-12 ... | 43,079 | 47,692    | 7,688   | 7,412    | 2,705    | 21,818 | 69         | 130,463   |
| 1912-13 ... | 34,093 | 47,575    | 8,822   | 8,581    | 5,175    | 24,612 | 31         | 128,889   |

2. **Total Yield.**—For the season 1912-13, Victoria's production represented about 45½ per cent. of the total for the Commonwealth, New South Wales and Tasmania coming next in order with 22 and 17½ per cent. respectively. The total Commonwealth production for the season 1906-7, viz., 507,153 tons, was the highest ever attained, the yield which most nearly approached it being 449,383 tons in 1903-4. Details as to production in the several States during the period from 1890 onwards are as follows :—

#### COMMONWEALTH PRODUCTION OF POTATOES, 1890-1 to 1912-13.

| Season.     | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.   | Fed. Terr. | C'wealth. |
|-------------|---------|-----------|---------|----------|----------|--------|------------|-----------|
|             | Tons.   | Tons.     | Tons.   | Tons.    | Tons.    | Tons.  | Tons.      | Tons.     |
| 1890-1 ...  | 52,791  | 204,155   | 13,112  | 23,963   | 1,900    | 73,158 | ...        | 369,079   |
| 1895-6 ...  | 56,179  | 117,238   | 19,027  | 18,412   | 2,290    | 81,423 | ...        | 294,569   |
| 1900-1 ...  | 63,253  | 123,126   | 20,014  | 14,566   | 4,896    | 93,862 | ...        | 319,657   |
| 1905-6 ...  | 50,386  | 115,352   | 11,308  | 20,328   | 6,297    | 64,606 | ...        | 268,277   |
| 1910-11 ... | 121,033 | 163,312   | 15,632  | 23,920   | 5,864    | 70,090 | ...        | 399,851   |
| 1911-12 ... | 75,040  | 119,092   | 13,087  | 22,668   | 9,312    | 62,164 | 126        | 301,489   |
| 1912-13 ... | 91,600  | 191,112   | 16,386  | 33,078   | 13,558   | 72,565 | 42         | 418,341   |

3. **Average Yield per Acre.**—The suitability of the soil, climate, and general conditions of Tasmania for potato growing is evidenced by the high yields per acre which are almost invariably obtained in the island State, the average yield during the past ten seasons being 3¾ tons per acre. The lowest average yield is that obtained in Queensland

with an average of a little under two tons for the same period. Particulars for each State for the seasons 1901-2 and 1908-9 to 1912-13, and also for the past decennium, are given hereunder :—

#### AVERAGE YIELD OF POTATOES, 1901-2 and 1908-9 to 1912-13.

| Season.                | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | Federal Terr. | C'wealth. |

| Average for 10 Seasons | 2.43   | 2.85      | 1.88    | 2.73     | 2.92     | 3.76  | ...           | 2.88      |

4. **Value of Potato Crop.**—The estimated value of the potato crop of each State for the season 1912-13 is furnished in the following table, together with the value per acre :—

#### VALUE OF POTATO CROP, 1912-13.

| Particulars.       | N.S.W.   | Victoria. | Q'land   | S. Aust. | W. Aust. | Tas.      | Federal Territory. | C'wealth.  |
|--------------------|----------|-----------|----------|----------|----------|-----------|--------------------|------------|
| Tot. value         | £415,784 | £764,448  | £204,825 | £244,856 | £111,515 | £435,390  | £211               | £2,177,029 |
| Value per acre ... | £12/3/11 | £16/1/4   | £23/5/4  | £28/10/8 | £21/11/0 | £17/13/10 | £6/16/1            | £16/17/10  |

5. **Relation to Population.**—The average production of potatoes per annum per head of the population of the Commonwealth for the past ten seasons has been approximately 201 lbs. In Tasmania, where this crop is of far greater importance in relation to population than is the case in any other State, the production per head in 1906-7 was nearly a ton, and in 1911-12 about 6½ cwt. Details for the seasons 1901-2 and 1908-9 to 1912-13 are as follow :—

#### POTATO PRODUCTION PER 1000 POPULATION.

| Season. | N.S.W. | Victoria. | Q'land. | Sth. Aust. | W. Aust. | Tas.  | Federal Terr. | C'wealth. |
|---------|--------|-----------|---------|------------|----------|-------|---------------|-----------|
|         | Tons.  | Tons.     | Tons.   | Tons.      | Tons.    | Tons. | Tons.         | Tons.     |
| 1901-2  | 28     | 104       | 44      | 42         | 30       | 655   | ...           | 84        |
| 1908-9  | 46     | 122       | 21      | 56         | 26       | 634   | ...           | 91        |
| 1909-10 | 62     | 137       | 23      | 47         | 22       | 382   | ...           | 90        |
| 1910-11 | 93     | 125       | 26      | 59         | 21       | 362   | ...           | 90        |
| 1911-12 | 45     | 90        | 21      | 55         | 32       | 327   | 69            | 67        |
| 1912-13 | 52     | 138       | 26      | 77         | 44       | 368   | 22            | 88        |

6. **Commonwealth Imports and Exports.**—Under normal conditions there is usually a fairly large export trade in potatoes carried on by the Commonwealth, principally with New Zealand, the Pacific Islands, and the Philippine Islands. Thus, during 1907, out of a total export of 17,842 tons, 13,346 tons went to New Zealand, 2102 tons to the Pacific

Islands, and 2112 tons to the Philippine Islands. On the other hand, when in 1902, 1903, and 1912, the droughts of those periods had brought about a shortage in some of the States, importations from New Zealand took place to the extent of 11,471 tons and 2279 tons in the former years, and 17,732 tons in the latter year. The quantities and values of the Commonwealth oversea imports and exports of potatoes for 1901 and the past five years are contained in the following table:—

## COMMONWEALTH IMPORTS AND EXPORTS OF POTATOES, 1901 and 1908 to 1912

| Year.    | Imports.  |         | Exports.  |        | Net Exports. |           |
|----------|-----------|---------|-----------|--------|--------------|-----------|
|          | Quantity. | Value.  | Quantity. | Value. | Quantity.    | Value.    |
|          | Tons.     | £       | Tons.     | £      | Tons.        | £         |
| 1901 ... | 17,655    | 86,067  | 6,028     | 45,485 | — 11,627     | — 40,582  |
| 1908 ... | 129       | 1,112   | 3,375     | 18,560 | 3,246        | 17,448    |

| 1912 ... | 18,151    | 163,249 | 1,619     | 15,331 | — 16,532     | — 147,918 |

Note. — signifies net imports.

7. **Comparison with Other Countries.**—The following table will furnish means for comparing the potato crop of Australia for 1911 with those of some of the leading potato-producing countries of the world for the same year:—

## POTATO CROPS OF VARIOUS COUNTRIES, 1911.

| Country.           | Yield.     | Country.         | Yield.    |
|--------------------|------------|------------------|-----------|
|                    | Tons.      |                  | Tons.     |
| Germany ...        | 33,821,782 | Italy ...        | 1,665,004 |
| Russian Empire ... | 31,403,068 | Canada ...       | 1,650,575 |
| France ...         | 12,569,422 | Sweden ...       | 1,276,041 |
| Austria ...        | 11,418,481 | Denmark ...      | 710,418   |
| United Kingdom ... | 7,520,168  | Japan (1909) ... | 589,376   |
| United States ...  | 7,318,000  | Norway ...       | 533,412   |
| Hungary ...        | 4,926,338  | Australia* ...   | 301,489   |
| Netherlands ...    | 2,506,760  | New Zealand ...  | 144,912   |
| Belgium (1909) ... | 2,419,648  | Luxemburg ...    | 125,640   |

\* 1912, 418,341 tons.

## § 10. Other Root and Tuber Crops.

1. **Nature and Extent.**—Root crops, other than potatoes, are not extensively grown in Australia, the total area devoted to them for the season 1912-13 being only 17,767 acres. The principal of these crops are onions, mangolds, turnips, and "sweet potatoes" (*Batatas edulis*). Of these, onions are most largely grown in Victoria, mangolds in Tasmania and Victoria, turnips in Tasmania, and sweet potatoes in Queensland. The total area under onions in the Commonwealth during the season 1912-13 was 5636 acres, giving a total yield of 31,947 tons, and averaging 5.67 tons per acre. The area devoted in 1912-13 to root crops other than potatoes and onions, viz., 12,131 acres, yielded 93,154 tons, and gave an average of 7.68 tons per acre. The areas and yields here given are exclusive of the production of "market gardens," a reference to which will be made later.

**2. Commonwealth Imports and Exports.**—The only root crop, other than potatoes, in which any considerable oversea trade is carried on by the Commonwealth is that of onions. During the year 1912 oversea imports of onions amounted to 3763 tons, obtained principally from Japan, the United States, and New Zealand, of which total 2747 tons went to New South Wales and 837 tons to Queensland. For the same year the exports of onions totalled 3572 tons, the principal countries to which they were exported being the Philippine Islands, the Pacific Islands, and the United States of America.

## § 11. Hay.

**1. Nature and Extent.**—As already stated, the most important crop of the Commonwealth is that of wheat grown for grain. Next to this in importance is the hay crop, which for the season 1912-13 represented nearly 25 per cent. of the area under crop in the Commonwealth. In most European countries the hay crop consists almost entirely of meadow and other grasses, whilst in Australia a very large proportion of the area under hay comprises cereal crops, mainly wheat and oats. A considerable quantity of lucerne hay is also made, particularly in New South Wales and Queensland. The area under hay of all kinds in the several States from 1860 onwards is given hereunder :—

AREA UNDER HAY, 1860-1 to 1912-13.

| Season. | N.S.W.  | Victoria. | Q'land. | Sth. Aust. | W. Aust. | Tas.   | N. T.  | Fed. Terr. | C'wealth.  |

| 1895-6  | 319,296 | 464,482   | 28,609  | 362,972    | 63,804   | 54,748 | ...    | ...        | 1,293,911  |
| 1900-1  | 466,236 | 502,105   | 42,497  | 341,330    | 104,254  | 61,541 | ...    | ...        | 1,517,963  |
| 1905-6  | 438,036 | 591,771   | 37,425  | 317,924    | 124,906  | 64,350 | ...    | ...        | 1,574,412. |
| 1910-11 | 638,577 | 832,669   | 98,558  | 440,177    | 175,432  | 72,992 | ...    | ...        | 2,258,405  |
| 1911-12 | 651,866 | 860,205   | 61,299  | 521,182    | 344,032  | 77,466 | 18     | 2,220      | 2,518,288  |
| 1912-13 | 944,725 | 1,203,728 | 87,643  | 647,069    | 231,690  | 99,839 | 10     | 2,337      | 3,217,041  |

It will be seen from this table that in all the States marked fluctuations occur in the area devoted to the hay crop from year to year. These fluctuations are due to various causes, the principal being the variations in the relative prices of grain and hay, and the favourableness or otherwise of the season for a grain crop. Thus crops originally sown for grain are frequently cut for hay owing to the improved price of that commodity, or owing to the fact that the outlook for the due development of the grain is not a satisfactory one. On the other hand, improved grain prices or the prospect of a heavy yield will frequently cause crops originally intended for hay to be left for grain. The area under hay in the Commonwealth for the season 1912-13 was the highest on record, and exceeded that of the previous year by 698,753 acres.

**2. Kinds of Hay.**—Particulars concerning the kind of crop cut for hay are furnished in the returns prepared by five of the States: no information is available in the case of Tasmania.

Details for the past five seasons are given in the following table:—

**KINDS OF HAY GROWN, 1908-9 to 1912-13.**

| Kind of Hay Crop.         | 1908-9.        | 1909-10.       | 1910-11.       | 1911-12.       | 1912-13.         |

It will be seen that wheat is the principal hay crop in New South Wales, South Australia, and Western Australia, oats in Victoria, and lucerne in Queensland.

**3. Total Yield.**—The Commonwealth hay crop for the season 1912-13 amounted to 3,955,311 tons, or 37.91 per cent. more than that produced in the previous season, and represented the largest ever harvested in the Commonwealth, the highest previous records being that of 3,153,196 tons for the season 1909-10, and 3,175,887 for

1910-11. For many years past the State of Victoria has been the largest hay producer in the Commonwealth, and in the season 1912-13 accounted for nearly 40 per cent. of the total production. The total yields of the several States from 1860 onwards are given hereunder:—

COMMONWEALTH HAY CROP, 1860-1 to 1912-13.

| 1912-13 | 1,105,350        | 1,572,933 | 119,867      | 714,766          | 255,751            | 183,709   | 10    | 2,925     | 3,955,311     |

4. Value of Hay Crop.—The following table furnishes particulars concerning the total value and the value per acre of the hay crop of the several States of the Commonwealth for the season 1912-13:—

VALUE OF HAY CROP, 1912-13.

| Particulars.    | New South Wales. | Victoria.  | Queens-land. | South Aust. | Western Aust. | Tasmania. | N. T.  | Fed. Ter. | Commonwealth. |
|-----------------|------------------|------------|--------------|-------------|---------------|-----------|--------|-----------|---------------|
| Total value ... | £4,045,458       | £4,561,506 | £704,281     | £2,180,036  | £1,072,549    | £549,237  | £80    | £12,887   | £13,126,034   |
| Value per acre  | £4/5/8           | £3/15/9    | £8/0/9       | £3/7/5      | £4/12/7       | £5/10/0   | £8/0/0 | £5/10/3   | £4/1/7        |

5. Average Yield per Acre.—The States of the Commonwealth in which the highest average yields per acre have been obtained are those of Tasmania and Queensland, these being also the States in which the smallest areas are devoted to this crop. For the past ten seasons the lowest yield for the Commonwealth as a whole was that of 19 cwt. per acre in 1907-8, and the highest that of 31 cwt. in 1903-4. The average per decennium was 25 cwt. Particulars for the several States for the seasons 1901-2 and 1908-9 to 1912-13, and also for the decennium, are given hereunder:—

AVERAGE YIELD OF HAY PER ACRE, 1901-2 and 1908-9 to 1912-13.

| Season.                | N.S.W. | Vic.  | Q'land. | S. Aus. | W. Aus. | Tas.  | N. T. | Fed. Terr. | Com'wealth. |
|------------------------|--------|-------|---------|---------|---------|-------|-------|------------|-------------|

| Average for 10 seasons | 1.18   | 1.37  | 1.50    | 1.25    | 1.02    | 1.54  | ...   | ...        | 1.27        |

6. **Relation to Population.**—During the past ten Seasons the Commonwealth hay production per head of population has varied between 7 cwt. in 1904-5 and  $16\frac{3}{4}$  cwt. in 1912-13; averaging about  $12\frac{1}{2}$  cwt. per head for the period. The State in which the hay production per head of population is highest is South Australia. Details for the seasons 1901-2 and 1908-9 to 1912-13 are given hereunder :—

#### HAY PRODUCTION PER 1000 OF POPULATION.

| Season.     | N.S.W. | Vict. | Q'nd. | S. Aust. | W. Aust. | Tas.  | N. T. | Fed. Ter. | C'with. |
|-------------|--------|-------|-------|----------|----------|-------|-------|-----------|---------|
|             | Tons.  | Tons. | Tons. | Tons.    | Tons.    | Tons. | Tons. | Tons.     | Tons.   |
| 1901-2 ...  | 339    | 231   | 241   | 964      | 463      | 624   | ...   | ...       | 529     |
| 1908-9 ...  | 467    | 1,132 | 167   | 1,532    | 655      | 717   | ...   | ...       | 741     |
| 1909-10 ... | 608    | 929   | 168   | 1,462    | 735      | 615   | ...   | ...       | 729     |
| 1910-11 ... | 513    | 993   | 253   | 1,463    | 648      | 594   | ...   | ...       | 718     |
| 1911-12 ... | 440    | 777   | 154   | 1,472    | 1,045    | 566   | 12    | 899       | 639     |
| 1912-13 ... | 622    | 1,139 | 188   | 1,662    | 835      | 932   | 3     | 1,508     | 836     |

7. **Oversea Imports and Exports.**—Under normal conditions hay, whether whole or in the form of chaff, is somewhat bulky for oversea trade, and consequently does not in such circumstances figure largely amongst the imports and exports of the Commonwealth. In 1901 and 1902, however, the exceptional demand which was created by the South African war brought about a fairly large export of hay and chaff to Natal and Cape Colony. These colonies also took a considerable quantity of Australian compressed fodder. During the year 1904, when the war between Japan and Russia was being carried on, the exports of compressed fodder to Hong Kong were valued at £42,759 and those to Japan at £23,608. The total value of the hay and chaff exported during 1901 was £406,455, as compared with £25,343 only in 1912, while the exports of compressed and other fodder, which amounted in value to £142,472 in 1904, had shrunk to £27,630 in 1912.

During 1912 the principal consignees of the hay and chaff exported from the Commonwealth were India, the Straits Settlements, and Ceylon, while the principal countries to which compressed fodder was exported were the Philippine Islands, Ceylon, and the Straits Settlements.

Imports of hay and chaff into the Commonwealth are usually unimportant, and for the year 1912 totalled 700 tons, valued at £3706, obtained from New Zealand.

8. **Hay Production in Other Countries.**—As already noted, the hay crops of most European countries consist of grasses of various kinds, amongst which clover, lucerne, sainfoin and rye grass occupy a prominent place. The statistics of hay production in these countries are not prepared on a uniform basis, and consequently any attempt to furnish an extensive comparison of the production of hay in the various countries would probably be misleading. It may be noted, however, that in the United Kingdom the production of hay from clover, sainfoin, etc., was for the year 1912 represented by 4,385,235 tons from 2,895,477 acres, while from permanent grasses a yield of 9,638,987 tons of hay was obtained from 6,678,642 acres, giving a total of 14,024,222 tons from 9,574,119 acres, or about  $29\frac{1}{4}$  cwt. per acre.

## § 12. Green Forage.

1. **Nature and Extent.**—In all the States of the Commonwealth a considerable area is devoted to the production of green forage, mainly in connection with the dairying industry. The total area so cropped during the season 1912-13 was 427,756 acres, which was 3316 acres more than the corresponding area for 1911-12. Of this total the New South Wales area represented about 36 per cent., that in Queensland 31½ per cent., while that in Victoria amounted to 19½ per cent. of the total. The principal crops cut for green forage are maize, sorghum, oats, barley, rye, rape, and lucerne, while small quantities of sugar-cane also are so used. Particulars concerning the area under green forage in the several States from 1890 onwards are furnished in the following table:—

AREA UNDER GREEN FORAGE, 1890-1 to 1912-13.

| Season. | N.S.W.  | Vic.   | Q'land. | S. Aust. | W. Aust. | Tas.   | N. T.  | Fed. Terr. | C'wealth. |
|---------|---------|--------|---------|----------|----------|--------|--------|------------|-----------|
|         | Acres.  | Acres. | Acres.  | Acres.   | Acres.   | Acres. | Acres. | Acres.     | Acres.    |
| 1890-1  | 37,473  | 10,091 | 9,546   | 7,849    | 161      | 1,497  | ...    | ...        | 66,117    |
| 1895-6  | 66,833  | 25,939 | 19,552  | 7,309    | 430      | 1,883  | ...    | ...        | 121,946   |
| 1900-1  | 78,144  | 18,975 | 41,445  | 13,136   | 1,024    | 3,749  | ...    | ...        | 156,473   |
| 1905-6  | 95,058  | 34,041 | 66,183  | 23,842   | 1,873    | 4,882  | ...    | ...        | 225,879   |
| 1910-11 | 179,382 | 71,826 | 89,667  | 20,728   | 4,545    | 8,695  | 19     | ...        | 374,862   |
| 1911-12 | 211,693 | 75,177 | 93,049  | 33,673   | 5,021    | 5,627  | 19     | 181        | 424,440   |
| 1912-13 | 154,272 | 84,460 | 135,354 | 39,954   | 7,339    | 6,304  | 60     | 13         | 427,756   |

2. **Value of Green Forage Crops.**—The value of these crops is variously estimated in the several States, and the Commonwealth total for the season 1912-13 may be taken approximately as £1,424,000, or about £3 6s. per acre.

3. **Relation to Population.**—Particulars concerning the area under green forage per 1000 of the population of the Commonwealth and the several States for the seasons 1901-2 and 1908-9 to 1912-13 are given hereunder:—

AREA UNDER GREEN FORAGE PER 1000 OF POPULATION.

| Season. | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.   | N. T.  | Fed. Terr. | C'wealth. |
|---------|--------|-----------|---------|----------|----------|--------|--------|------------|-----------|
|         | Acres. | Acres.    | Acres.  | Acres.   | Acres.   | Acres. | Acres. | Acres.     | Acres.    |
| 1901-2  | 82     | 27        | 79      | 38       | 8        | 24     | ...    | ...        | 54        |
| 1908-9  | 151    | 50        | 157     | 42       | 19       | 33     | ...    | ...        | 98        |
| 1909-10 | 74     | 44        | 174     | 44       | 23       | 35     | ...    | ...        | 71        |
| 1910-11 | 109    | 55        | 150     | 51       | 16       | 45     | 6      | ...        | 85        |
| 1911-12 | 128    | 57        | 151     | 82       | 18       | 30     | 6      | 102        | 95        |
| 1912-13 | 87     | 61        | 213     | 93       | 24       | 32     | 17     | 7          | 90        |

## § 13. Sugar-Cane.

1. **Area.**—Sugar-cane is grown for sugar-making purposes in only two of the States of the Commonwealth, viz., Queensland and New South Wales, and much more extensively in the former than the latter. Thus of the total area of 155,567 acres under sugar-cane in the Commonwealth for the season 1912-13 there were 141,652 acres, or about 91 per cent., in Queensland. Sugar-cane growing appears to have been started in the Commonwealth in or about 1862, as the earliest statistical record of sugar-cane as a crop is that which credits Queensland with an area of twenty acres for the season 1862-3. In the following season the New South Wales records shew that an area of two acres was devoted to the crop in the mother State. The area under cane in New South Wales

reached its maximum in 1895-6 with a total of 32,927 acres. It then fell continuously to 1902-3, when it was lower than for any previous season since 1889-90. From 1902-3 to 1906-7 it remained practically stationary; from that time it gradually fell to 13,763 acres in 1910-11, the lowest area under sugar-cane since 1882-3. Since then a slight upward tendency has been in evidence. In Queensland, on the other hand, although fluctuations in area are in evidence throughout, the general trend has been one of satisfactory increase, the area under cane for the season 1910-11 being the highest on record, that for 1912-13 being the next highest and that for 1905-6 only a little short of it. In 1907-8 the area in Queensland declined to 126,810 acres, and in 1908-9 still further to 123,902 acres, but there was a marked increase in 1909-10, while in 1910-11 there was a further increase, when it rose to 141,779 acres. Owing to unfavourable climatic conditions the area under cane for 1911-12 shewed a falling off of 11,403 acres, or a reduction of about 8 per cent.; the 1912-13 figures, however, again shewed an increase, and were virtually the same as those for 1910-11. The area under sugar-cane in the Commonwealth from 1865 is given in the following table:—

AREA UNDER SUGAR-CANE, 1865-6 to 1912-13.

| Season. | N.S.W. | Queensland. | C'wealth. | Season. | N.S.W. | Queensland. | C'wealth. |
|---------|--------|-------------|-----------|---------|--------|-------------|-----------|
|         | Acres. | Acres.      | Acres.    |         | Acres. | Acres.      | Acres.    |
| 1865-6  | 141    | 450         | 591       | 1900-1  | 22,114 | 108,535     | 130,649   |
| 1870-1  | 4,082  | 6,342       | 10,424    | 1908-9  | 16,981 | 123,902     | 140,883   |
| 1875-6  | 6,454  | 13,459      | 19,913    | 1909-10 | 14,083 | 128,178     | 142,261   |
| 1880-1  | 10,971 | 20,224      | 31,195    | 1910-11 | 13,763 | 141,779     | 155,542   |
| 1885-6  | 16,419 | 59,186      | 75,605    | 1911-12 | 13,907 | 130,376     | 144,283   |
| 1890-1  | 20,446 | 50,922      | 71,368    | 1912-13 | 13,914 | 141,652     | *155,567  |
| 1895-6  | 32,927 | 77,247      | 110,174   |         |        |             |           |

\* Including 1 acre Northern Territory.

**2. Productive and Unproductive Cane.**—The areas given in the preceding table represent the total area on which sugar-cane was grown during the seasons specified for purposes other than green forage. The whole area, however, was not in any case cut for crushing during that season, there being always a considerable amount of "stand over" cane, as well as a small quantity required for plants. In the season 1912-13 the New South Wales total comprised 6137 acres of productive and 7777 acres of unproductive cane, while in the case of Queensland the productive cane amounted to 78,142 acres and the unproductive to 63,510 acres.

**3. Yield of Cane.**—Queensland statistics of the production of sugar-cane are not available for dates prior to the season 1897-8. In that season the total for the Commonwealth was 1,073,883 tons, as against 2,000,758 tons for the record season 1910-11. The average yield per acre of productive cane is much higher in New South Wales than in Queensland, the average during the last decade being 22.83 tons for the former and 15.60 for the latter State. During the six seasons 1901-2 to 1906-7 in the case of New South Wales the yield remained practically constant at about 21 tons per acre. In 1907-8 the yield in New South Wales was so excellent that, notwithstanding the comparative smallness of the area cultivated, the aggregate amount of cane produced was the largest in that State since 1898-9. In 1909-10, on the other hand, owing mainly to the decline in area of productive cane, the total yield amounted to only 131,081 tons, the lowest for the State since 1888. In 1910-11 there was a further decline in the acreage of productive cane; the yield of over 28½ tons per acre, however, was so excellent that the production exceeded that of the previous season by 29,230 tons of cane. The yield per acre for 1911-12 was approximately the same as for the previous year, but owing to the falling off in the acreage cropped, a decline to the extent of 12,512 tons was in evidence in regard to the quantity of cane produced. The area of productive cane for 1912-13 shewed an increase of 893 acres, the yield, however, was 6885 tons below that of the previous season, the average

tons per acre being 22.96 for 1912-13 as against 28.18 for 1911-12. In Queensland the average yield per acre for 1910-11 was by far the highest recorded for that State, viz., 19.45 tons, while that for 1912-13 was 12.72, being 2.88 below the average in that State for the last ten years. Particulars relative to the total and average yields of the Commonwealth sugar crops for the seasons 1901-2 and 1908-9 to 1912-13 are as follows:—

#### YIELD OF SUGAR-CANE, 1901-2 and 1908-9 to 1912-13.

| Season.     | Total Yield of Cane. |             |            | Average Yield per Acre of Productive Cane. |             |           |

| 1912-13 ... | 140,914              | 994,212     | 1,135,141* | 22.96                                      | 12.72       | 13.47     |

\* Including 15 tons Northern Territory.

A preliminary estimate for Queensland for the season 1913-14 states that the prospects are extremely favourable. The acreage cut for crushing will probably prove to be in the neighbourhood of 103,000 acres, the estimated yield of which is 2,065,144 tons of cane, an increase of 1,070,932 tons over the previous year's returns. The sugar production is expected to be a record, the estimated yield being 241,496 tons of raw sugar.

4. **Relation to Population.**—The sugar-cane production of the Commonwealth during the past five seasons has averaged about 7 cwt. per head of population. In Queensland, the principal sugar-producing State, the production of cane per head has ranged between  $1\frac{1}{2}$  tons in 1912-13 and 3 tons in 1910-11. Details for the period 1908-9 to 1912-13 are as follows:—

#### SUGAR PRODUCTION PER 1000 OF POPULATION.

| State.              | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |
|---------------------|---------|----------|----------|----------|----------|
|                     | Tons.   | Tons     | Tons     | Tons     | Tons.    |
| New South Wales ... | 93      | 81       | 98       | 89       | 79       |
| Queensland ...      | 2,573   | 2,014    | 3,072    | 2,498    | 1,562    |
| Commonwealth ...    | 373     | 299      | 452      | 375      | 240      |

5. **Quality of Cane.**—The quantity of cane required to produce a ton of sugar varies considerably not only with the district in which the cane is grown but also with the season. In Queensland, for instance, during the seasons 1902-3 to 1906-7 the sugar content of the cane crushed continuously diminished, so that while in 1902-3 the quantity of cane used in producing a ton of sugar was 8.38 tons, in the season 1906-7 the quantity required was 9.38 tons, the production in the former case being approximately 12 per cent. and in the latter  $10\frac{1}{2}$  per cent. of the weight of cane crushed. For the season 1907-8, the cane was of much better quality, and the quantity required to produce a ton of sugar was only 8.84 tons, the sugar content representing in this case somewhat more than  $11\frac{1}{2}$  per cent. of the weight of cane crushed. In 1908-9, owing in large measure to the effect of frosts, the quantity of cane required to produce one ton of sugar was increased to 9.49 tons, the sugar thus representing only about  $10\frac{1}{2}$  per cent. of the weight of cane crushed, while in 1909-10 only 8.65 tons of cane were required to each ton of sugar, the sugar representing about  $11\frac{1}{2}$  per cent. of the weight of cane crushed. The especially favourable weather existing throughout 1910 resulted in a very high average quantity of cane per acre being obtained, while the moisture which caused this led to a slight diminution in the saccharine density as compared with the previous year.

During 1910-11 and the two following seasons the quantity of cane required to produce one ton of sugar was 8.73, 8.85, and 8.79 tons in the order named, the sugar produced representing about 11½ per cent. of the weight of cane crushed in each of those years, while the average quantity of sugar obtained per acre crushed was 2.23 tons in 1910, 1.81 in 1911, and 1.45 in 1912. It should be noted that in 1901-2 no less than 9.76 tons of cane were needed to produce a ton of sugar. It may be remarked in this connection that the systematic study of the beet in Germany shewed that by suitable culture its sugar content might be greatly increased, and this is by no means impossible in the case of sugar-cane.

**6. Sugar Bounties.**—The provision of bounties or similar aids to the sugar-growers of the Commonwealth early occupied the attention of the Commonwealth Parliament, the object in view being that of assisting the industry, whilst at the same time diminishing the employment of coloured labour in connection therewith. An account of the various Acts in connection with sugar bounties and sugar excise tariffs will be found on pages 394 to 396 of the previous issue of the Year Book. In 1912 the Sugar Excise Repeal Act and the Sugar Bounty Abolition Act were passed by the Federal Parliament, conditionally on the Queensland Parliament approving of legislation prohibiting the employment of coloured labour in connection with the industry. The State Sugar Cultivation Act, the Sugar Growers Act, and the Sugar Growers' Employees Act, of 1913, having been approved of, the 1912 Federal Acts, which repeal all previous enactments in regard to excise on sugar and bounty on cane, came into force by proclamation in July, 1913.

**7. Beet Sugar.**—During the past few years an effort has been made to revive the sugar-beet industry in Victoria. During 1910-11 £554 was paid as bounty on 1847 tons of beet, £2244 on 7481 tons during 1911-12, and £1667 on 6207 tons during 1912-13.

**8. Cost of Bounties.**—The amounts paid by the Commonwealth Government in sugar bounties and the expenses in connection therewith during the period 1908-9 to 1912-13 are shewn in the following table:—

**SUGAR BOUNTIES AND EXPENSES, 1908-9 to 1912-13.**

| Particulars. | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |

|              | 483,706 | 407,777  | 637,624  | *        | *        |

\* Not available.

**9. Collection of Sugar Excise.**—The table hereunder contains particulars concerning the net amount of excise duty on sugar collected in respect of the several States for the years 1901-2 and 1908-9 to 1912-13. In this table refunds and drawbacks have been deducted and the requisite adjustment has been made between the States:—

**SUGAR EXCISE, 1901-2 and 1908-9 to 1912-13.**

| 1910-11 ... | 17,936                  | 892              | 18,828 | 191,406                 | 15,776           | 207,182 | 209,942                 | 16,668           | 226,610 |
| 1911-12 ... | 16,412                  | 887              | 17,299 | 160,091                 | 10,371           | 170,462 | 176,503                 | 11,258           | 187,761 |
| 1912-13 ... | 16,483                  | 240              | 16,723 | 106,088                 | 6,453            | 112,541 | 122,571                 | 6,693            | 129,264 |

During the period under review the proportion of sugar produced by coloured labour declined from 68 per cent. of the total for 1902-3 to 5 per cent. of the total for 1912-13. The sugar production of 1913-14 is expected to be a record, the estimated yield being 241,496 tons of raw sugar.

11. **Imports and Exports of Sugar.**—Notwithstanding the increase in the production of sugar in evidence in the Commonwealth during recent years, Australia's over-sea import trade in cane sugar remained fairly extensive until 1906, the principal countries engaged in supplying this commodity being Java, Mauritius, and Fiji. In 1907 the exports of sugar exceeded the imports for the first time, the value of the net exports being £166,121. In 1908 the imports exceeded the exports by 4811 tons in quantity and £37,080 in value; while in the following year the excess of imports over exports was 91,647 tons, value £1,004,308. In 1910 and 1911 the net imports fell in quantity to 27,424 tons and 25,945 tons respectively, the corresponding values being £297,958 and £283,518. During 1912-13 the net imports amounted to 96,224 tons, being the highest recorded during the period under review. The principal countries to which sugar is exported are South African Union, the Pacific Islands, the United Kingdom, and Portuguese East Africa, but the bulk of the sugar exported from the Commonwealth is not of Australian origin, but merely a re-export of sugar produced elsewhere. Thus of 2257 tons exported during 1912, only 90 tons were of Australian origin. The sugar so re-exported comes mainly from Fiji, Java, and Mauritius. Particulars concerning the imports and exports of cane sugar for 1901 and the past five years are as follow :—

**IMPORTS AND EXPORTS OF CANE SUGAR, 1901 and 1908 to 1912.**

## § 14. Vineyards.

1. **Nature and Extent.**—The introduction of the vine into Australia has been set down by different investigators as at various dates, the years 1815 and 1828 being principally favoured. It would seem, however, that the vine was really brought out with the First Fleet, which initiated the colonisation of Australia, in 1788, and that consequently the Australian vine is as old as Australian settlement. As already mentioned a report of Governor Hunter's gives the area under vines in 1797 as 8 acres. From New South Wales the vine spread to Victoria and South Australia, and these States have now far outstripped the mother State in the area which they have devoted to its cultivation. In Queensland and Western Australia also, vine-growing has been carried on for many years, but in neither State has the industry progressed with the rapidity attained in Victoria and South Australia. In Tasmania the climate is not favourable to the growth of grapes. The purposes for which grapes are grown in Australia are three in number, viz.—(i.) for wine-making, (ii.) for table use, (iii.) for drying. The total area under vines in the several States from 1860 onwards is given in the following table:—

COMMONWEALTH VINEYARDS, 1860-1 to 1912-13.

| Season. | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania.                           | C'wealth. |
|---------|--------|-----------|---------|----------|----------|-------------------------------------|-----------|
|         | Acres. | Acres.    | Acres   | Acres.   | Acres    | There are no vineyards in Tasmania. | Acres.    |
| 1860-1  | 1,584  | 1,138     | —       | 3,180    | 335      |                                     | 6,237     |
| 1865-6  | 2,126  | 4,078     | 110     | 6,629    | 634      |                                     | 13,577    |
| 1870-1  | 4,504  | 5,466     | 416     | 6,131    | 710      |                                     | 17,227    |
| 1875-6  | 4,459  | 5,081     | 376     | 4,972    | 675      |                                     | 15,563    |
| 1880-1  | 4,800  | 4,980     | 739     | 4,337    | 659      |                                     | 15,515    |
| 1885-6  | 5,247  | 9,775     | 1,483   | 5,142    | 624      |                                     | 22,271    |
| 1890-1  | 8,044  | 20,686    | 1,981   | 9,535    | 1,024    |                                     | 41,270    |
| 1895-6  | 7,519  | 30,275    | 2,021   | 17,604   | 2,217    |                                     | 59,636    |
| 1900-1  | 8,441  | 30,634    | 2,019   | 20,158   | 3,325    |                                     | 64,577    |
| 1905-6  | 8,754  | 26,402    | 2,044   | 23,603   | 3,541    |                                     | 64,344    |
| 1910-11 | 8,321  | 23,412    | 1,634   | 22,952   | 2,795    |                                     | 59,114    |
| 1911-12 | 8,231  | 24,193    | 1,371   | 23,986   | 2,821    |                                     | 60,602    |
| 1912-13 | 8,163  | 24,579    | 1,428   | 25,208   | 3,010    |                                     | 62,388    |

The area devoted to vines in the Commonwealth attained its highest point in the season 1904-5, when a total of 65,673 acres was reached. Each of the five following seasons shewed a diminution, the area in 1909-10 being reduced to 58,151 acres; this decline was in evidence in all the States. An increase took place in each of the three succeeding seasons, the total Commonwealth area under vines amounting to 62,388 acres in 1912-13.

The wine-growing industry in Australia, more particularly in Victoria and New South Wales, received a severe check on account of various outbreaks of phylloxera which took place in different parts of these States. With a view to its eradication extensive uprooting of vineyards in the infested areas was undertaken, while further planting within such areas, except with phylloxera-resisting vines, was prohibited.

In the States of Victoria, Queensland, South Australia, and Western Australia satisfactory increases in the area under vines were recorded in 1912-13, while in New South Wales a small decrease was shewn.

**2. Wine Production.**—The production of wine in Australia has not increased as rapidly as the suitability of soil and general favourableness of conditions would appear to warrant. The cause of this is probably twofold, being in the first place due to the fact that the Australians are not a wine-drinking people and consequently do not provide a local market for this product, and in the second to the fact that the new and comparatively unknown wines of Australia find it difficult to establish a footing in the markets of the old world, owing to the competition of well-known brands. Active steps are being taken in various ways to bring the Australian wines under notice, and it may be confidently expected that when their qualities are duly recognised the wine production of Australia will exhibit a rapid development. Particulars concerning the quantity of wine produced in the several States during 1901-2 and the past five seasons are contained in the table given hereunder:—

**AUSTRALIAN WINE PRODUCTION, 1901-2 and 1908-9 to 1912-13.**

| Season.     | New South Wales. | Victoria. | Queensland. | South Australia. | Western Australia. | Tasmania.                          | Commonwealth. |
|-------------|------------------|-----------|-------------|------------------|--------------------|------------------------------------|---------------|
|             | Gallons.         | Gallons.  | Gallons.    | Gallons.         | Gallons.           | No production of wine in Tasmania. | Gallons.      |
| 1901-2 ...  | 868,479          | 1,981,475 | 148,835     | 2,681,563        | 185,735            |                                    | 5,816,087     |
| 1908-9 ...  | 736,262          | 1,437,106 | 77,698      | 3,132,247        | 132,488            |                                    | 5,515,801     |
| 1909-10 ... | 808,870          | 991,941   | 91,410      | 2,569,797        | 140,559            |                                    | 4,602,577     |
| 1910-11 ... | 805,600          | 1,362,420 | 74,306      | 3,470,058        | 153,665            |                                    | 5,866,049     |
| 1911-12 ... | 850,210          | 983,423   | 57,358      | 2,921,597        | 162,559            |                                    | 4,975,147     |
| 1912-13 ... | 719,100          | 1,206,111 | 54,627      | 3,974,838        | 149,132            |                                    | 6,103,808.    |

**3. Relation to Population.**—In relation to population the area of the vineyards of the several States exhibits a well-marked decline during the first eight seasons under review, the Commonwealth total having fallen during the period from 17 to 13 acres per 1000 of the population; during the past four seasons, however, the relation has remained stationary. Details for the period are furnished in the succeeding table:—

**AREA OF VINEYARDS PER 1000 OF POPULATION.**

| Season.     | N.S.W. | Victoria. | Q'land. | Sth. Aust. | W. Aust. | Tas    | C'wealth |
|-------------|--------|-----------|---------|------------|----------|--------|----------|
|             | Acres. | Acres.    | Acres.  | Acres.     | Acres.   | Acres. | Acres.   |
| 1901-2 ...  | 6      | 24        | 4       | 58         | 19       | ...    | 17       |
| 1908-9 ...  | 5      | 20        | 3       | 57         | 12       | ...    | 14       |
| 1909-10 ... | 5      | 18        | 3       | 57         | 11       | ...    | 13       |
| 1910-11 ... | 5      | 18        | 3       | 56         | 10       | ...    | 13       |
| 1911-12 ... | 5      | 18        | 2       | 57         | 10       | ...    | 13       |
| 1912-13 ... | 5      | 18        | 2       | 59         | 10       | ...    | 13       |

**4. Imports and Exports.**—During the past ten years the importations of wine into the Commonwealth have exhibited a marked fluctuation, declining continuously in value from £161,945 in 1901 to £96,870 in 1904, then increasing continuously to £133,114 in 1908 and decreasing again in 1909 to £116,021, and again increasing in the two following years; the 1912 importations, valued at £169,207, exhibited a slight decrease as compared with the previous year. The principal countries of origin of wine imported into Australia are France, Spain, Portugal, and Germany, the greater portion of the sparkling wines coming from France and of still wines from Spain and Portugal. Particulars relative to the importations of wine into the Commonwealth during 1901 and the past five years are given hereunder:—

## COMMONWEALTH IMPORTS OF WINE, 1901 and 1908 to 1912.

| Year. | Quantity.  |          |          | Value.     |        |         |
|-------|------------|----------|----------|------------|--------|---------|
|       | Sparkling. | Other.   | Total.   | Sparkling. | Other. | Total.  |
|       | Gallons.   | Gallons. | Gallons. | £          | £      | £       |
| 1901  | 55,341     | 165,472  | 220,813  | 104,700    | 57,245 | 161,945 |
| 1908  | 56,806     | 68,252   | 125,058  | 106,108    | 27,006 | 133,114 |
| 1909  | 47,669     | 60,946   | 108,615  | 91,046     | 24,975 | 116,021 |
| 1910  | 50,932     | 70,903   | 121,835  | 97,296     | 29,106 | 126,402 |
| 1911  | 78,115     | 75,446   | 153,561  | 153,561    | 31,363 | 184,924 |
| 1912  | 67,851     | 85,874   | 153,725  | 132,830    | 36,377 | 169,207 |

The principal countries to which wine is exported from Australia are the United Kingdom and New Zealand, a small but fairly regular export trade being also carried on with India, Ceylon, Fiji, and the South Sea Islands. Details concerning the exports of wine from Australia during 1901 and the past five years are given in the following table:—

## COMMONWEALTH EXPORTS OF WINE, 1901 and 1908 to 1912.

| Year. | Quantity.  |           |           | Value.     |         |         |
|-------|------------|-----------|-----------|------------|---------|---------|
|       | Sparkling. | Other.    | Total.    | Sparkling. | Other.  | Total.  |
|       | Gallons.   | Gallons.  | Gallons.  | £          | £       | £       |
| 1901  | 2,936      | 863,147   | 866,083   | 6,972      | 122,751 | 129,723 |
| 1908  | 2,824      | 728,421   | 731,245   | 4,541      | 98,333  | 102,874 |
| 1909  | 2,649      | 974,413   | 977,062   | 4,455      | 121,116 | 125,571 |
| 1910  | 2,830      | 949,033   | 951,913   | 5,340      | 123,593 | 128,933 |
| 1911  | 2,343      | 1,097,624 | 1,099,967 | 4,126      | 147,608 | 151,734 |
| 1912  | 2,467      | 784,371   | 786,838   | 4,803      | 116,327 | 121,130 |

The sparkling wine included in the foregoing table consists mainly of foreign wine re-exported.

5. **Other Viticultural Products.**—In addition to grapes for wine-making purposes, large quantities are grown in all the States for table use, while, particularly in Victoria and South Australia, the drying of raisins and currants is also carried on. The quantities of table grapes grown in the several States during 1901-2 and the past five seasons are as follows:—

## TABLE GRAPES, 1901-2 and 1908-9 to 1912-13.

| Season. | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania. | C'wealth. |
|---------|--------|-----------|---------|----------|----------|-----------|-----------|
|         | Tons   | Tons.     | Tons.   | Tons.    | Tons.    | Tons      | Tons.     |
| 1901-2  | 3,475  | 5,110     | 750*    | 2,800*   | 1,100*   | ...       | 13,235    |
| 1908-9  | 3,150  | 3,018     | 1,336   | 3,214    | 1,982    | ...       | 12,700    |
| 1909-10 | 4,181  | 3,189     | 1,520   | 2,496    | 3,928    | ...       | 15,314    |
| 1910-11 | 3,914  | 2,913     | 1,254   | 2,531    | 3,200    | ...       | 13,812    |
| 1911-12 | 4,223  | 3,102     | 973     | 2,123    | 3,506    | ...       | 13,927    |
| 1912-13 | 3,893  | 2,624     | 1,046   | 2,194    | 1,891    | ...       | 11,648    |

\* Estimated.

Statistics of the quantities of raisins and currants dried are available for a series of years for Victoria and South Australia, and are as follows for 1901-2 and the past five seasons:—

## RAISINS AND CURRANTS DRIED, 1901-2 and 1908-9 to 1912-13.

| Season.        | Raisins.   |                 | Currants. |                 |
|----------------|------------|-----------------|-----------|-----------------|
|                | Victoria.  | Sth. Australia. | Victoria. | Sth. Australia. |
|                | lbs.       | lbs.            | lbs.      | lbs.            |
| 1901-2 ... ..  | 3,083,665  | 822,080         | 285,157   | 382,256         |
| 1908-9 ... ..  | 7,788,032  | 3,136,784       | 1,336,048 | 2,738,288       |
| 1909-10 ... .. | 9,076,928  | 3,114,496       | 3,069,696 | 4,037,824       |
| 1910-11 ... .. | 8,883,616  | 3,891,440       | 2,956,128 | 4,509,232       |
| 1911-12 ... .. | 11,527,488 | 3,880,912       | 5,240,368 | 5,229,840       |
| 1912-13 ... .. | 12,283,824 | 3,947,776       | 5,413,744 | 5,847,296       |

In New South Wales, Queensland, and Western Australia also small quantities of raisins and currants are dried, but until recently no statistics were collected. The quantity so produced in New South Wales amounted to 100,912 lbs. in 1907-8, 160,720 lbs. in 1908-9, 165,984 lbs. in 1909-10, 297,472 lbs. in 1910-11, 429,968 lbs. in 1911-12, and 494,704 in 1912-13. In Western Australia 176,400 lbs. were dried during 1912-13. For Queensland there are no particulars available.

## § 15. Orchards and Fruit Gardens.

1. **Nature and Extent.**—Fruit-growing has made rapid progress in the Commonwealth during recent years, the area devoted thereto having increased in the past ten years by no less than 56,936 acres. The States in which the increase was most marked were:—Tasmania, 17,900 acres; Victoria, 12,731 acres; Western Australia, 12,668 acres; and South Australia, 6529 acres. During the same period the Queensland fruit-growing area increased 5738 acres, while that in New South Wales exhibited a slight increase of 1310 acres. The increased areas in Tasmania and Western Australia are mainly due to extensive plantings of apple trees with a view to the possibilities of the London market for fresh fruit. The total area devoted to orchards and fruit gardens in the several States is given hereunder:—

## COMMONWEALTH ORCHARDS AND FRUIT GARDENS, 1901-2 and 1908-9 to 1912-13.

| Season.   | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.   | N.T.   | Fed. Terr. | C'wealth. |
|-----------|--------|-----------|---------|----------|----------|--------|--------|------------|-----------|
|           | Acres. | Acres.    | Acres.  | Acres.   | Acres.   | Acres. | Acres. | Acres.     | Acres.    |
| 1901-2... | 48,448 | 50,055    | 14,396  | 16,315   | 6,076    | 11,485 | ...    | ...        | 146,775   |
| 1908-9... | 45,880 | 54,946    | 14,104  | 20,855   | 15,016   | 20,757 | ...    | ...        | 171,558   |
| 1909-10   | 45,892 | 56,108    | 15,360  | 21,760   | 15,609   | 24,069 | ...    | ...        | 178,798   |
| 1910-11   | 47,533 | 57,375    | 15,153  | 22,410   | 16,738   | 25,934 | 13     | ...        | 185,156   |
| 1911-12   | 48,385 | 59,985    | 16,817  | 23,214   | 18,194   | 27,868 | 13     | 48         | 194,524   |
| 1912-13   | 49,329 | 63,209    | 18,556  | 23,905   | 19,540   | 30,575 | ...    | 60         | 205,174   |

The varieties of fruit grown differ materially in various parts of the several States, and range between such fruits as the pineapple, paw-paw, mango, and guava of the tropics, and the strawberry, the raspberry, and the currant of the colder parts of the

temperate zone. The principal varieties grown in Victoria are the apple, plum, peach, apricot, cherry, and pear. In New South Wales citrus fruits (orange, lemon, etc.) occupy the leading position, although apples, pears, peaches, plums, and apricots are also extensively grown. In Queensland the banana, the orange, the pineapple, the apple, the peach, the mango, and the plum are the varieties most largely grown. In South Australia, in addition to the apple, pear, peach, apricot, plum, orange, and lemon, the almond and the olive are also largely grown. In Western Australia the apple, orange, peach, pear, plum, fig, and apricot are the sorts chiefly grown, while in Tasmania, although the apple represents four-fifths of the area in that State devoted to fruit-growing, small fruits, such as the currant, raspberry, and gooseberry, are very extensively grown, and the balance of the area is mainly occupied with the pear, plum, apricot, peach, and cherry. The following table gives the acreage under the principal kinds of fruit grown, and the quantity and value of fruit produced. With the exception of Tasmania the acreages shewn are exclusive of young trees not yet bearing. The acreages for each kind of fruit in Victoria is not available :—

**PARTICULARS OF THE PRINCIPAL KINDS OF FRUIT GROWN IN THE SEVERAL  
STATES OF THE COMMONWEALTH DURING THE SEASON 1912-13.**

(a) Including Federal Territory. (b) Bushels. (c) Separate figures not available. (d) Excluding Tasmania. (e) Including nectarines and peaches. (f) Including unproductive area in Tasmania.

**2. Relation to Population.**—In relation to population the orchards and fruit gardens of the Commonwealth have exhibited an increase during the seasons under review, more than compensating for the decline which was experienced in the case of vineyards. Taking the two in conjunction, the relative area under vineyards and orchards has, during the period, remained practically stationary at about 55 acres per 1000 of population. Details for 1901-2 and the past five seasons are as follow :—

#### AREA OF ORCHARDS AND FRUIT GARDENS PER 1000 OF POPULATION.

| Season.   | N.S.W. | Victoria. | Q'land. | Sth. Aust. | W. Aust. | Tas.   | N.T.   | Fed. Terr. | C'wealth. |

**3. Commonwealth Imports and Exports.**—A very considerable fruit trade, both import and export, is carried on by the Commonwealth with overseas countries, the major portion of the importations consisting of dried fruits, while the bulk of the exports is made up of fresh fruits. Amongst the imports the principal dried fruits are currants, dates, sultanas, and raisins, and the principal fresh fruits bananas, oranges, lemons, and apples. The currants imported are mainly of Greek origin, the dates of Arabian, Persian, and Turkish, the raisins mainly of Spanish, and the sultanas of Turkish origin. Of the fresh fruits imported during 1912 the bananas were chiefly from Fiji, the oranges and lemons from Italy, and the apples from the United States and Canada. The dried fruits imported during the year were valued at £81,913, and the fresh at £217,796. In 1907 a very marked development in the trade in Australian dried fruits took place, the total export for the year being valued at £76,872, of which £71,506 represented Australian fruits and £5366 re-exports of foreign fruits. In 1908 the total export of dried fruits from Australia was valued at £35,359, of which £33,111 represented Australian fruits, and £2248 re-exports of foreign fruits. There was a further decline in 1909, when the total value of exports was only £13,013, made up of £11,826 of Australian produce, and £1187 of re-exports. There was a small increase in the total exports in 1910 and 1911, the exports for the latter year amounting to £23,900; 1912 experienced a further and more substantial increase, the value of dried fruits exported in that year being £48,012; of this sum £46,491 represented Australian produce, and the balance of £1521 re-exports of foreign fruits. The principal consignees of Australian dried fruits exported were United Kingdom and New Zealand. The fresh fruits exported during the year were valued at £163,306, and consisted mainly of apples. These were all of Australian origin with the exception of re-exports valued at £809. The principal countries to which these were sent were the United Kingdom, Germany, New Zealand, Brazil, United States of America, and India. The value of the net imports of dried fruits for the year 1912 was £33,901, whilst in the case of fresh fruits, the value of the net exports was £250,510, the largest net export value yet recorded.

Particulars concerning the overseas imports and exports of dried fruits for 1901 and the last five years are as follows :—

**COMMONWEALTH OVERSEA IMPORTS AND EXPORTS OF DRIED FRUITS,  
1901 AND 1908 TO 1912.**

\* Not available.

**4. Jams and Jellies.**—A small overseas trade in jams and jellies is carried on by the Commonwealth, the value of the imports for the year 1912 amounting to £13,081, and of the exports to £23,089. The country of origin of the bulk of the importations is the United Kingdom, while the destinations of the exports are principally South Africa, Ceylon, Philippine Islands and Fiji. Particulars relative to imports and exports for 1901 and the last five years are as follow :—

**COMMONWEALTH OVERSEA TRADE IN JAMS AND JELLIES, 1901 and 1908 to 1912.**

| Year.    | Oversea Imports. |        | Oversea Exports. |        | Net Exports. |        |

| 1911 ... | 322,487          | 8,304  | 1,288,729        | 20,896 | 966,242      | 12,592 |
| 1912 ... | 476,504          | 13,081 | 1,429,333        | 23,089 | 952,834      | 10,008 |

**5. Preserved Fruit.**—Details concerning the quantities and values of preserved fruit imported into and exported from the Commonwealth cannot readily be obtained, owing to the fact that in the Customs returns particulars concerning fruit and vegetables are in certain cases combined. The total value of fruit and vegetables, other than fresh fruits, dried fruits, potatoes, and onions, imported into Australia during 1912 was £57,856, and the corresponding value of exports was £37,825.

## § 16. Minor Crops.

1. **Nature and Extent.**—In addition to the leading crops which in the foregoing pages have been dealt with in some detail, there are many others which, owing either to their nature or to the fact that their cultivation has advanced but little beyond the experimental stage, do not occupy so prominent a position. Some of the more important of these are those which may be classed under the heads of Market Gardens, Pumpkins and Melons, Turnips, Mangolds, Nurseries, Grass Seed, Tobacco, Hops, and Millet, while the possibilities of cotton-growing in the tropical portions of the Commonwealth have in recent years received considerable attention, although the industry cannot yet be said to have assumed definite shape. The total area in the Commonwealth during the season 1912-13 devoted to minor crops was 72,703 acres, of which market gardens accounted for 30,676 acres.

2. **Market Gardens.**—Under this head are included all areas on which are grown mixed vegetables for sale. Where considerable areas are devoted to the production of one vegetable, such for instance as the potato, the onion, the melon, the tomato, etc., these crops are usually not included with market gardens, but are shewn either under some specific head, or under some such general head as "Other Root Crops," or "All other Crops." The area under market gardens in the several States of the Commonwealth during 1901-2 and each of the last five seasons is given in the table hereunder:—

**COMMONWEALTH MARKET GARDENS, 1901-2 and 1908-9 to 1912-13.**

\* Included with South Australia prior to 1910-11.

In all the States the area for 1908-9 was in excess of that for 1901-2 with the exception of South Australia, where the falling-off is more apparent than real, being in large part due to a change in the classification of crops introduced in connection with the new system of collection which came into force for 1907-8. It is believed that the figures given for the earlier years are considerably in excess of the truth. During the past five seasons there has been very little variation in the total area of market gardens in any of the States; Victoria shews the largest increase, viz., 1135 acres.

3. **Grass Seed.**—The total area under this crop during 1912-13 was 7347 acres, of which 3028 acres were in Tasmania, 2429 acres in Victoria, 1845 acres in Queensland, and 45 acres in South Australia. The total yield for 1912-13 was 81,617 bushels, or 24.72 bushels per acre.

4. **Tobacco.**—The tobacco-growing industry is one which has experienced marked fluctuations in Australia and which once promised to occupy an important place amongst the agricultural industries of the Commonwealth. Thus, as early as the season 1888-9 the area under this crop amounted to as much as 6641 acres, of which 4833 were in New South Wales, 1685 in Victoria, and 123 in Queensland. This promise

of prosperity was, however, not fulfilled, and after numerous fluctuations, in the course of which the Victorian area rose in 1895 to over 2000 acres, and that in Queensland to over 1000 acres, the total area under tobacco for the season 1912-13 was only 2745 acres, distributed as follows:—New South Wales, 1914 acres; Victoria, 138 acres; and Queensland, 692 acres. This decline in production appears to have been due to the comparatively small demand which existed in Australia for the locally-produced leaf, and to the fact that the cost of production and preparation in the Commonwealth prevented the Australian leaf from obtaining a footing in the outside markets. Probably under more favourable circumstances, and with greater attention given to the production of leaf of the best quality only, the industry is one which will eventually assume considerable proportions. In all the States in which its cultivation has been tried the soil and climate appear to be very suitable for the growth of the plant, and the enormous importations of tobacco in its various forms into the Commonwealth furnish an indication of the extensive local market which exists for an article grown and prepared in such a manner as to meet with the requirements of consumers. The value of the net importations of tobacco into the Commonwealth during the year 1912 amounted to £914,439, comprising unmanufactured tobacco (£610,420), cigars (£163,898), cigarettes (£50,932), manufactured tobacco (£88,165), and snuff (£1024).

**5. Pumpkins and Melons.**—The total area under this crop in the Commonwealth during 1912-13 was 13,662 acres, of which 4174 acres were in New South Wales, 2632 acres in Victoria, 6122 acres in Queensland, and 731 acres in Western Australia; the production for the first three named was 14,961, 24,392 and 17,645 tons respectively; the quantity produced in Western Australia is not available.

**6. Hops.**—Hop-growing in the Commonwealth is practically confined to Tasmania and some of the cooler districts of Victoria, the total area for the season 1912-13 being 1383 acres, of which 1247 acres were in Tasmania, and 131 acres in Victoria; a small area of 5 acres was also grown in South Australia. The Tasmanian area, though still small, has increased rapidly during the past nine years, the total for the seasons 1901-2 being only 599 acres. On the other hand, the Victorian area, which in 1901-2 was 307 acres, has diminished to 131 acres in 1912-13. The cultivation of hops was much more extensive in Victoria some thirty years ago than at present, the area devoted to this crop in 1883-4 being no less than 1758 acres. During the year 1912 the net importations of hops into the Commonwealth represented a weight of 1,077,261 lbs. and a value of £87,022. The total value of the net importations of hops into Australia during the past ten years amounted to £540,764, thus indicating the existence of a regular and extensive local demand.

**7. Millet.**—Millet appears in the statistical records of three of the Commonwealth States. The total area devoted thereto in 1912-13 was 2693 acres, of which 1828 acres were in New South Wales, 474 in Victoria, and 391 in Queensland. The particulars here given relate to millet grown for grain and fibre. That grown for green forage is dealt with in the section relating thereto.

**8. Nurseries.**—In all the States somewhat extensive areas are devoted to nurseries for raising plants, trees, etc., but statistics concerning the area so occupied for flowers, fruit trees, etc., are not available, and so far as they relate to forestry are given elsewhere.

**9. Cotton.**—Cotton-growing on a small scale has been tried in Queensland, but so far without very marked success; 441 acres were devoted to this crop in 1912-13, giving a yield of 150,414 lbs. of seed cotton, valued at £3760. Hopes are entertained that with the invention of a mechanical device for the picking of the cotton the industry will become firmly established, since the soil and conditions appear eminently suitable for the growth of this crop. Small areas in the Northern Territory have also been planted with

cotton, and 15 acres were under cultivation in 1912-13. The tropical portions of Western Australia have also long been regarded as suitable for its cultivation.

10. **Coffee.**—Queensland is the only State of the Commonwealth in which coffee-growing has been at all extensively tried, and here the results have up to the present time been far from satisfactory. The total area devoted to this crop reached its highest point in the season 1901-2, when an area of 547 acres was recorded. Since then the area continuously declined to 1906-7, when it was as low as 256 acres. During the season 1907-8 an improvement occurred and the total reached was 304 acres, succeeded by a fall to 285 acres in 1908-9, 200 acres in 1910-11, 198 acres in 1911-12, and 196 acres in 1912-13. In the last-mentioned season the yield amounted to 131,928 lbs., valued at £4947.

11. **Other Crops.**—Miscellaneous small crops are grown in the several States, amongst which may be mentioned tomatoes, rhubarb, artichokes, arrowroot, chicory, and flowers.

### § 17. Bounties on Agricultural Products.

1. **General.**—The Bounties Act of 1907 passed by the Federal Parliament in order to encourage the manufacture and production of certain articles in the Commonwealth, includes among the number of items on which bonuses are payable, several agricultural products. The most important of these, viz., sugar, has been referred to on page 339 of this publication. Minor products of the soil on which these bounties are payable are as set out in the following table :—

#### AGRICULTURAL PRODUCTS (OTHER THAN SUGAR) ON WHICH BOUNTIES ARE PAYABLE.

| Article.   | Period dating from 1st July, 1907, during or in respect of which Bounty may be paid. | Rates of Bounty.     | Maximum amounts which may be assigned in any one year. |
|--|--|----------------------|--|
| Cotton, ginned ... ..  | 8 years  | 10 % on market value | £ 6,000  |
| Fibres—  |  |                      |  |
| New Zealand flax ... ..  | 10 "   | 10 " "               | 3,000  |
| Flax and hemp ... ..   | 5 "  | 10 " "               | 8,000  |
| Jute ... ..  | 5 "  | 20 " "               | 9,000  |
| Sisal hemp ... ..  | 10 "   | 10 " "               | 3,000  |
| Oil materials supplied to an oil factory for the manufacture of oil—                         |  |                      |  |
| Cottonseed ... ..  | 8 "  | 10 " "               | 1,000  |
| Linseed (flax seed) ... ..   | 5 "  | 10 " "               | 5,000  |
| Rice, uncleaned ... ..   | 5 "  | 20s. per ton         | 1,000  |
| Coffee, raw, as prescribed ... ..  | 8 "  | 1d. per lb.          | 1,500  |
| Tobacco leaf for the manufacture of cigars, high grade, of a quality to be prescribed ... .. | 5 "  | 2d. "                | 4,000  |
| Fruits—  |  |                      |  |
| Dates (dried) ... ..   | 15 "   | 1d. "                | 1,000  |
| Dried (except currants and raisins) or candied, and exported                                 | 5 "  | 10 % on market value | 6,000  |

\* Any unexpended amount assigned in any year is available for the years following.

Although the rate of bonus on the several articles, is, as shewn above, fairly liberal, the bounties have not been availed of to any great extent, as will be seen from the following table, which gives particulars as to the quantity of the articles raised and the amounts paid as bounties in respect thereof for the five financial years ended 1912-13 :—

**PARTICULARS OF BOUNTIES PAID ON AGRICULTURAL PRODUCTS (OTHER THAN SUGAR), 1908-9 to 1912-13.**

| Article.   | Quantity produced on which Bounties were paid. |          |          |          |          | Amount paid as Bounties. |          |          |          |          |

| Oil materials supplied to an oil factory for the manufacture of oil—                       |  |          |          |          |          |                          |          |          |          |          |
| Cottonseed ... ..lbs.  | 36,491   | 45,610   | 96,312   | ...      | 84,479   | 12                       | 10       | 22       | ...      | 13       |
| Linseed (flax seed) cwt.   | 36   | ...      | ...      | ...      | 100      | 6                        | ...      | ...      | ...      | 9        |
| Coffee, raw, as prescribed lbs.  | 53,365   | 28,134   | 26,825   | 16,269   | 30,053   | 222                      | 117      | 112      | 68       | 125      |
| Tobacco leaf for the manufacture of cigars, high grade, of a quality to be prescribed lbs. | 14,538   | 33,093   | 10,902   | 9,258    | 25,820   | 121                      | 276      | 90       | 78       | 215      |
| Fruits—  |  |          |          |          |          |                          |          |          |          |          |
| Dried (except currants and raisins) or candied, & exported lbs.                            | 12,096   | 23,932   | 454,075  | 636,452  | 168,001  | 28                       | 104      | 940      | 1,734    | 576      |

During the year 1912-13 the total amount paid in respect of cotton, cotton seed, and coffee was claimed by the State of Queensland. Victoria collected £327, South Australia £160, and Tasmania £89 of the fruit bonus, while £195 of the bounty paid for tobacco leaf was paid to Queensland, the remaining £9 being earned in New South Wales. Victoria claimed the total amount paid for flax and hemp.

No bounties have yet been paid on New Zealand flax, jute, uncleaned rice or dates.

## § 18. Fertilisers.

**1. General.**—In the early days of settlement and cultivation in the Commonwealth, scientific cultivation was in a much less developed state than it is to-day. The early farmers were neither under the necessity, nor were they as a rule aware of the need, of supplying the constituents to the soil demanded by each class of crop. The widely-divergent character of the soils in the Commonwealth, their degeneration by repeated cropping, the limitations of climatic conditions, the difficulties of following any desired order of rotation of crops, all rendered it necessary to give attention to artificial manuring. The introduction of the modern seed-drill, acting also as a fertiliser distributor, has greatly facilitated the use of artificial manures, and much land formerly regarded as useless for cultivation has now been made available. There is reason to believe that this feature will be even more strikingly characteristic of the future.

**2. Fertilisers Acts.**—In order to protect the interests of users of artificial manures legislation has been passed in each of the States, regulating the sale and preventing the adulteration of fertilisers. A list of these Acts and their main features will be found in the previous issue of the Year Book (pages 406 and 407).

**3. Imports.**—The local production of artificial manures has assumed large proportions during the last few years, though considerable quantities are still imported.

The importation of fertilisers has increased nearly 200 per cent. since 1901. The chief items, both as regards quantity and value, are those relating to phosphates, a fertiliser which has proved itself to be very suitable for the growing of cereals in Australian

soils. The greatest quantity of the manufactured superphosphates imported from any one country during 1912 was obtained from Japan, whence came over 52½ per cent. of the total imported, while the United Kingdom contributed over 36 per cent., Germany 6½ per cent., and the Netherlands 4½ per cent., the balance being imported from Belgium and France. Ocean Island, with 76 per cent., was the principal contributor of rock phosphates; of the balance about 13 per cent. was obtained from Christmas Island, and 11 per cent. from the Caroline Islands. Guano is imported chiefly from Ocean Island, one of the South Sea group, and in lesser quantities from Malden Island and Peru, while the East Indies had practically a monopoly of the bone-dust trade with the Commonwealth during 1912.

The imports of artificial manures during the last five years is shewn in the following table. It will be noticed that the quantity of rock phosphates imported during that period has shewn a steady increase. The imports were particularly large during 1910 and 1912. The figures for the manufactured superphosphates shewed an increase of about 50 per cent. during 1910, those for 1911 shew a further increase of some 5 per cent., while those for 1912 shew a decrease of 23 per cent. as compared with those of the previous year.

#### COMMONWEALTH IMPORTS OF FERTILISERS, 1908 to 1912.

| Fertiliser.         |      |  | 1908.     | 1909.     | 1910.     | 1911.     | 1912.     |
|---------------------|------|--|-----------|-----------|-----------|-----------|-----------|
| Bonedust ... ..     | Cwt. |  | 74,657    | 71,959    | 12,740    | 4,164     | 8,769     |
|                     | £    |  | 18,088    | 17,632    | 3,294     | 1,086     | 2,309     |

| Total ... {          |      |  | 512,015 | 552,558 | 650,936 | 606,325 | 533,487 |
|                      |      |  | 140,334 | 139,991 | 167,340 | 167,499 | 175,686 |

5. **Statistics of Use of Fertilisers.**—The statistics available in connection with the use of manures in the Commonwealth for a series of years refer to New South Wales, Victoria, South Australia, and Western Australia; those for Tasmania were collected for the first time for 1911-12. Particulars concerning the first-mentioned State are given hereunder:—

#### FERTILISERS USED IN NEW SOUTH WALES, 1908-9 to 1912-13.

| Season.     | Total Area of Crops. | Area Manured. |                                   | Manure Used.                 |             |
|-------------|----------------------|---------------|-----------------------------------|------------------------------|-------------|
|             |                      | Aggregate.    | Percentage to Total Area of Crop. | Natural (Stable-yard, etc.). | Artificial. |
|             | Acres.               | Acres.        | %                                 | Loads.                       | Tons.       |
| 1908-9 ...  | 2,717,085            | 509,262       | 18.74                             | 216,078                      | 15,545      |

| 1912-13 ... | 3,737,085            | 1,642,078     | 43.94                             | 170,312                      | 38,918      |

Particulars for Victoria for 1901-2 and the past five seasons are as follows:—

#### FERTILISERS USED IN VICTORIA, 1901-2 and 1908-9 to 1912-13.

| Season.     | Total Area of Crops. | Farmers Using Manure. | Area Manured. |                                   | Manure Used.                 |             |
|-------------|----------------------|-----------------------|---------------|-----------------------------------|------------------------------|-------------|
|             |                      |                       | Aggregate.    | Percentage to Total Area of Crop. | Natural (Stable-yard, etc.). | Artificial. |
|             | Acres.               | No.                   | Acres.        | %                                 | Tons.                        | Tons.       |
| 1901-2 ...  | 2,965,681            | 11,439                | 556,777       | 18.77                             | 153,611                      | 23,535      |
| 1908-9 ...  | 3,461,761            | 24,437                | 2,053,987     | 59.33                             | 235,492                      | 64,715      |
| 1909-10 ... | 3,658,535            | 26,690                | 2,407,331     | 65.80                             | 197,446                      | 77,579      |
| 1910-11 ... | 3,952,070            | 27,845                | 2,714,854     | 68.69                             | 203,884                      | 86,316      |
| 1911-12 ... | 3,640,241            | 26,159                | 2,676,408     | 73.52                             | 205,739                      | 82,581      |
| 1912-13 ... | 4,079,356            | 29,524                | 3,029,418     | 74.26                             | 222,253                      | 94,010      |

The figures relating to the use of fertilisers in South Australia are shewn in the table below:—

#### FERTILISERS USED IN SOUTH AUSTRALIA, 1908-9 to 1912-13.

| Season.     | Total Area of Crops. | Area Manured. |                                   | Manure Used.                 |             |
|-------------|----------------------|---------------|-----------------------------------|------------------------------|-------------|
|             |                      | Aggregate.    | Percentage to Total Area of Crop. | Natural (Stable-yard, etc.). | Artificial. |
|             | Acres.               | Acres.        | %                                 | Loads.                       | Tons.       |
| 1908-9 ...  | 2,321,812            | 1,712,394     | 73.75                             | 120,648                      | 64,842      |
| 1909-10 ... | 2,530,301            | 2,031,832     | 80.30                             | 133,935                      | 76,413      |
| 1910-11 ... | 2,746,334            | 2,235,578     | 81.40                             | 129,918                      | 81,899      |
| 1911-12 ... | 2,965,338            | 2,511,130     | 84.68                             | 134,503                      | 87,475      |
| 1912-13 ... | 3,062,998            | 2,603,136     | 84.99                             | 111,434                      | 91,607      |

Corresponding particulars relative to Western Australia for the seasons 1908-9 to 1912-13 are given in the following table, and furnish interesting evidence of the rapid extension of the use of manures in that State:—

## FERTILISERS USED IN WESTERN AUSTRALIA, 1908-9 to 1912-13.

| Season.    | Total Area of Crops. | Area Manured. |                                    | Manure Used.                 |             |
|------------|----------------------|---------------|------------------------------------|------------------------------|-------------|
|            |                      | Aggregate.    | Percentage to Total Area of Crops. | Natural (Stable-yard, etc.). | Artificial. |
|            | Acres.               | Acres.        | %                                  | Loads.                       | Tons.       |
| 1908-9 ... | 585,339              | 493,545       | 84.32                              | 61,834                       | 21,358      |
| 1909-10... | 722,086              | 608,870       | 84.32                              | 67,263                       | 24,654      |
| 1910-11... | 855,024              | 773,561       | 90.47                              | 62,229                       | 33,194      |
| 1911-12... | 1,072,653            | 992,463       | 92.52                              | 51,600                       | 43,843      |
| 1912-13... | 1,199,991            | 1,120,334     | 93.36                              | 55,085                       | 47,563      |

Statistics relating to the use of manures in Tasmania were collected for the first time in 1911-12, particulars for the past two seasons are as follows:—

## FERTILISERS USED IN TASMANIA, 1911-12 and 1912-13.

| Season.     | Total Area of Crops. | Area Manured. |                                    | Manure Used.                |             |
|-------------|----------------------|---------------|------------------------------------|-----------------------------|-------------|
|             |                      | Aggregate.    | Percentage to Total Area of Crops. | Natural (Stableyard, etc.). | Artificial. |
|             | Acres.               | Acres.        | %                                  | Tons.                       | Tons.       |
| 1911-12 ... | 270,000              | 129,914       | 48.12                              | 25,792                      | 8,750       |
| 1912-13 ... | 286,065              | 137,653       | 48.12                              | 27,328                      | 9,272       |

A marked increase in the proportion of cropped land treated with manure is in evidence in all of the States for which returns are available. Thus, in New South Wales the area of manured land represented in 1908-9 only 18 $\frac{1}{2}$  per cent. of the area under crop, as against nearly 44 per cent. in 1912-13. Similarly, in Victoria the percentage increased from 18 $\frac{1}{2}$  per cent. in 1901-2 to 59 $\frac{1}{2}$  per cent. in 1908-9 and to 74 $\frac{1}{2}$  per cent. in 1912-13, in South Australia from 73 $\frac{1}{2}$  per cent. in 1908-9 to over 85 per cent. in 1912-13, and in Western Australia from 64 per cent. in 1904-5 to 93 $\frac{1}{2}$  per cent. in 1912-13.

**6. Local Production of Fertilisers.**—Statistics relative to the local production of fertilisers are very incomplete, and detailed returns for fertiliser factories other than bone mills are not available. The number of firms engaged in the manufacture of artificial manures in the Commonwealth at latest available date was 87, made up as follows:—New South Wales, 14; Victoria, 32; Queensland, 13; South Australia, 20; Western Australia, 6; and Tasmania, 2. If, however, approximately complete returns of the quantities of fertilisers used in the various States could be given, a comparison with the importations would give valuable information, but, as already mentioned, such particulars are only available for four of the States prior to 1911-12, and even then do not furnish the whole of the information necessary.

**7. Benefits Derived from the Use of Fertilisers.**—There is little doubt that the increased and increasing use throughout the Commonwealth of fertilisers, natural and artificial, combined with the greater attention being devoted to fallowing and to the combination of sheep-farming with agriculture, is having the effect of improving the

prospects of those dependent for a livelihood on the products of the soil. Reference has previously been made to the loss to the soil of phosphoric acid which the Commonwealth export of wheat and its milled products involves, and the necessity which thus arises for returning this ingredient in some form. Similarly, other staple products exported impose their respective tolls upon the soil of the Commonwealth, and the increased use of fertilisers furnishes evidence that producers are alive to the necessity for making good the deficiency so arising.

## § 19. Ensilage.

**1. Value to Stockowners.**—The use of ensilage as a substitute for green fodder during periods of drought or spells of dry weather, or for winter use, is less extensive in Australia than the circumstances would appear to warrant. There is, however, a growing disposition on the part of dairy farmers to make silos on their holdings, as they find that dairy cattle eat ensilage greedily, and that by its means the output of milk, both in regard to quantity and quality, may be kept up long after the supply of ordinary green food is exhausted. Sheepbreeders are also recognising the fact that during protracted periods of dry weather the silo enables them to keep their stock in good condition, and that lambing can take place satisfactorily. Ensilage thus obviates the expense of travelling or trucking sheep for hundreds of miles to get beyond the drought area, or the equally costly and even ruinous alternative of providing chaff for food at high prices and costly freight. In the rearing of lambs for the London market, ensilage appears to be destined to play an important part, as the lambs thrive upon it much better than upon dry food. By the judicious economising of the surplus growth of green food with the use of the silo, farmers and squatters can carry more stock on their holdings than they otherwise would be justified in doing. Not only is the great waste of superabundant food thus avoided, but it becomes possible to change into a succulent and nutritious food much growth that in any other state would not be eaten by stock. Thus such vegetation as marsh mallows, thistles, weeds of all sorts, and even the swamp reed *Arundo phragmites*, which grows in great quantities in lagoons, billabongs, and swamps, are all eaten with avidity when offered to stock in the form of ensilage. The pit and stack silos are rapidly being superseded by those built of red gum and hardwood or concrete. This is found to a great extent to obviate the loss sustained by mould, at the same time reducing the risk of fire. The silos vary in capacity from forty to 130 tons. A portable silo made of iron, which has been devised, is made in sections of such size and weight as to admit of ready handling. These silos can be increased in diameter or height by the addition of further sections.

**2. Government Assistance in the Production of Ensilage.**—The Government of Victoria, recognising the fact that defective methods of making ensilage have often been adopted, leading to partial or total failure, have for some years been making special efforts to educate the farming community in this respect, so that mistakes may be avoided and the conditions essential for the production of good ensilage may be better appreciated. These conditions vary with the climate and with the locality. The Government also undertakes the erection of silos on very liberal terms, repayment extending over a series of years. Experts supervise the erection of the silos, and give practical lessons as to packing them, etc. The New South Wales Government have, by giving advice in the "Agricultural Gazette" and by the issue of special bulletins, taken steps towards the education of the farmers. Silos have also been erected on the various experimental farms with a view to demonstrating the value of ensilage. No financial assistance is, however, given in New South Wales in this connection.

**3. Quantity Made.**—Particulars concerning the number of silos and the quantity of ensilage made in the several States of the Commonwealth in the seasons 1908-9 to 1912-13 are furnished in the table given hereunder:—

## COMMONWEALTH ENSILAGE-MAKING, 1908-9 to 1912-13.

| State or Territory.   | 1908-9.    |                | 1909-10.   |                | 1910-11.   |                | 1911-12.   |                | 1912-13.   |                |
|-----------------------|------------|----------------|------------|----------------|------------|----------------|------------|----------------|------------|----------------|
|                       | *Holdings. | Ensilage Made. | *Holdings. | Ensilage Made. | *Holdings. | Ensilage Made. | *Holdings. | Ensilage Made. | *Holdings. | Ensilage Made. |

| Commonwealth ...      | 880        | 54,027         | 1,063      | 70,344         | 918        | 64,406         | 672        | 47,581         | 561        | 43,655         |

\* No. of holdings on which ensilage was made.

Since the drought of 1902-3 greater attention has been paid to ensilage than was previously the case, and during the four seasons ended 1909-10 a continuous and fairly rapid increase was in evidence in all the States, both in the number of holdings on which ensilage was made, and in the quantity produced. The seasons for 1911-12 and 1912-13 shew a falling-off in all the States. The reduction cannot be accepted as an indication of a lessening of appreciation of the benefits of ensilage, but rather of the fact that stocks had not been drawn upon to any great extent during the previous seasons.

## § 20. Agricultural Colleges and Experimental Farms.

1. **Introduction.**—It has been thought preferable to refer to what may be called the effort in the direction of agricultural education in this section rather than under the heading of education.

In most of the States agricultural colleges and experimental farms have been established with a view to promoting agriculture and to establishing improved and more scientific systems of stock-breeding and dairying. In these colleges and on some of the farms provision is made for the accommodation of pupils, to whom both practical and theoretical instruction is given by experts in various branches of agriculture. Analyses of soils and fertilisers are made, manures are tested, and elementary veterinary science, etc., is taught, while general experimental work is carried on with cereal and other crops, not merely for the purpose of shewing that it is practicable to produce certain crops in a given place, but also to shew how it is possible to make farming pay best in that locality. Opportunities are afforded for practice in general agricultural work, and instruction is given in the conservation of fodder, in cheese and butter making; in the management, breeding, and preparation for the market of live stock; in the eradication of pests and weeds; and in carpenters', blacksmiths', and other trades.

Travelling expert lecturers are sent to the various agricultural and dairying centres, and there is a wide distribution of periodical agricultural gazettes and bulletins on matters of importance at special seasons.

2. **Particulars of Agricultural Colleges and Experimental Farms.**—In the tables given below particulars of agricultural colleges and experimental farms in the several States of the Commonwealth in 1912-13 are shewn. Tasmania is the only State in which such colleges or farms are not established.

GRAPHS SHEWING THE AREA UNDER THE PRINCIPAL CROPS IN THE COMMONWEALTH FROM 1860-1 TO 1911-12.

(See pages—for wheat, 310; oats, 315; maize, 321; barley, 324; hay, 332; sugar-cane, 337; and vineyards, 341.)

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year while the vertical height represents a number of acres, varying with the nature of the crop in accordance with the scale given on the left-hand of the diagram. The height of each graph above the base line denotes, for the crop to which it relates, the total area under cultivation in the Commonwealth during the successive seasons.

GRAPHS SHEWING THE PRODUCTION OF THE PRINCIPAL CROPS IN THE COMMONWEALTH FROM 1860-1 TO 1911-12.

(See pages—for wheat, 311; oats, 318; maize, 322; barley, 325; and hay, 333.)

**EXPLANATION OF GRAPHS.**—In this diagram a separate base line is provided for each of the crops dealt with. In each instance the base of a small square represents an interval of one year the vertical height of such square representing in the case of the wheat graph, 10,000,000 bushels; oats, 2,000,000 bushels; barley, 500,000 bushels; maize, 2,000,000 bushels; and hay, 500,000 tons. The height of each graph above its base line denotes the aggregate yield in the Commonwealth of that particular crop during the successive seasons.

**PARTICULARS OF AGRICULTURAL COLLEGES AND EXPERIMENTAL FARMS IN THE SEVERAL STATES OF THE COMMONWEALTH DURING THE SEASON 1912-13.**

(a) There are no Agricultural Colleges or Experimental Farms in Tasmania.

**3. New South Wales.**—In order to meet the demand for agricultural training, and for the purpose of conducting experiments in various branches of agriculture and of disseminating agricultural knowledge, an agricultural college and farm and sixteen experimental farms are now established by the New South Wales Government. Theoretical instruction in agriculture, with practical illustrations, forms part of the curriculum of the Sydney Technical College. The School of Agriculture in the Sydney

University, which has been established for three years, is doing very satisfactory work. At the Hurlstone Continuation College there is a special course in both theoretical and practical agriculture for teachers. Instruction in "nature knowledge" is given in the State primary schools, many of which have their own experimental plots. As a means of further encouraging the study of agriculture the Department of Public Instruction has a travelling inspector in agriculture, whose duty it is to visit the country and metropolitan schools, lecturing on the value, necessity, and advantages of agricultural knowledge, and giving practical demonstrations wherever practicable.

4. **Victoria.**—In 1884, the Agricultural Colleges Act, passed to make provision for the establishment of agricultural colleges and experimental farms in Victoria, provided for the permanent reservation from sale of 150,000 acres of Crown lands by way of endowment of agricultural colleges and experimental farms, which, together with other lands reserved as sites for such institutions prior to the passing of the Act, are vested in three trustees appointed by the Governor. Provision was made for the appointment of a Council of Agricultural Education, consisting of eleven members, five of whom are elected by the members of the Agricultural Societies of the State, five are nominated by the Governor, whilst the Secretary for Agriculture is also a member of the Council and its Treasurer. Two agricultural colleges and five experimental farms, orchards and vineyards were in existence in different parts of the State during 1912-13. There are five Agricultural High Schools under the control of the Education Department, while elementary experimental agriculture is taught at many of the State primary schools. Instruction in agriculture is also given at the technical schools at Melbourne and Bairnsdale.

5. **Queensland.**—Organised experimental agriculture in Queensland dates from the establishment of the Department of Agriculture and Stock, but such work as has been done in connection with stock-breeding, other than that carried on by private individuals, has been of later birth, and has been confined to dairy stock and draught horses. Agriculture in Queensland in the early nineties was upon the well-defined lines of the other States, so that the knowledge to be gained as to what could be profitably adapted to Queensland, with its varied climate and rainfall, covered a wide field. Instructors were appointed conversant with the different lines of agriculture, of which grain cultivation, dairying, fruit-growing, tobacco cultivation, and tropical agriculture, such as sugar, rubber, and spices, are the most important. This has been followed by the establishment of an agricultural college, of farms in the temperate parts of the State, and of nurseries in the tropical parts. With wheaten grain a system of experiments has been carried out for some years with the distinctive object of evolving a type of wheat adapted for Queensland, and as far as possible resistant to the attacks of rust. In dairying, a commencement was made by despatching to the different farming centres properly equipped travelling dairies with the latest appliances. The export of Queensland dairy produce has arisen through this effort. No travelling dairies are, however, now employed. A fruit farm has been established, at which fruits suitable for or likely to adapt themselves to the Queensland climate and conditions have been experimented with during a series of years. To cope with the insect and fungus pests to which such fruits are peculiarly susceptible, careful inspection is made of fruits in the markets and for export, and every effort is put forth to prevent the introduction of fresh diseases and to exterminate those which are already within the State.

6. **South Australia.**—To this State belongs the honour of starting the first experimental farm in the Commonwealth. As far back as the year 1879 a resolution was passed by the local Parliament in favour of the establishment of a School of Agriculture, with an experimental farm, under the charge of a professor of agriculture. Active operations in this connection were commenced in 1882, when the first series of plots of wheat were sown at Roseworthy. Experimental work, chiefly directed towards improving

the wheat yield, has been developed along three main lines, viz.: (a) the improvement of varieties of wheat, (b) the improvement of methods of cultivation, and (c) the use of manures. The Central Agricultural Bureau, established at Adelaide under the control of an Advisory Board, has an extensive membership distributed throughout the agricultural districts of the State. It assists farmers by the dissemination of knowledge; by helping to introduce new economic plants; by improving the breed of stock; and it acts as a means of keeping the Agricultural Department in touch with the producers. The branches of the bureau hold meetings at regular intervals in their several districts, ideas and methods as regards practical subjects are interchanged, and discussions are held on matters of general interest to agriculturists.

7. **Western Australia.**—A considerable amount of developmental work has been done of late years towards the promulgation of agricultural knowledge on the State farms at Chapman and Narrrogin, and, more recently still, on the experimental farms at Brunswick and Nangeenan.

8. **Tasmania.**—In Tasmania there is a Council of Agriculture consisting of eleven members, whose duties are to collect and publish information of every kind calculated to prove beneficial to agriculturists, such as suitableness of various districts for growth or production of animal and vegetable products, information respecting plants, methods of cultivation, breeding and feeding animals, and how best to improve the same: to prevent as far as possible the introduction and spread of diseases and pests, and to publish bulletins, abstracts, and reports containing all such information as may be desirable. Other matters embrace the employment of experts in any branch of agricultural science, distribution of plants and seeds for experiment, and the establishment of local boards of agriculture in different parts of the State. Lectures are given by the experts from time to time, and useful information and knowledge is diffused by means of the monthly gazette published by the Council, and also by means of special bulletins. There are no agricultural colleges or experimental farms, and practically no agricultural teaching is given in the elementary schools.

## § 21. Government Loans to Farmers.

1. **Introduction.**—All the Australian States have established systems under which financial aid is rendered to agriculturists by the Government. The principle upon which such aid is founded was probably first practically applied in Germany, viz., in the year 1770, when the *Landschaften Bank* was created. The establishment of the *Crédit Foncier* nearly a century later in France was a creation of a similar character. This latter institution was designed to enable house and land owners to raise money on mortgage at a low rate of interest, with facility for repayment by an annuity including redemption of the capital. It dates from 1852, but the mortgage bank known as the *Caisse Hypothécaire*, which, after a struggling existence, was finally liquidated in 1846, was based essentially on the same principle. Over the operations of the *Crédit Foncier*, created under governmental patronage and invested with such special privileges as to virtually constitute it a monopoly, the Government exercised a direct control, viz., by appointing its governor and its two deputy-governors. The *Crédit Foncier* was empowered to lend money only on a first mortgage, and to the amount of one-half of the estimated value of houses and farms, and one-third that of vineyards, woods, and other plantations, and the commission charged could not exceed six-tenths per cent. The system developed and adopted in the Commonwealth, with the object of assisting farmers to make improvements or to develop or utilise the agricultural or pastoral resources of the land, is analogous. Particulars of advances made under the Closer Settlement and similar Acts are dealt with in the section on Closer Settlement. (See page 243.)

2. **Aggregate of Transactions in each State, 1909 to 1913.**—The subjoined table gives aggregate of transactions in reference to advances to farmers in each State during the past five years.

**STATE GOVERNMENT ADVANCES DEPARTMENTS.—AGGREGATE OF LOANS TO FARMERS, 1909 to 1913 (a).**

(a) Compiled from figures furnished by the Government Savings Bank of Victoria. (b) For years ended 31st December prior. (c) Balance after deduction of special principal payments in advances. (d) Includes loans to farmers and other producers and to local bodies on the security of their own rates. (e) Including profits in connection with House and Shop loans. (f) Not available. (g) Exclusive of Western Australia.

3. **Particulars of Transactions in each State.**—An account of the initial legislation in each State in reference to advances to settlers, subsequent legislation, security on which, and objects for which, advances were made, amount of advances and repayments up to the end of 1911-12, etc., will be found in previous issues of the Year Book (see No. 6, pages 417-25).

4. **Transactions in each State, 1912-13.**—The following tables gives particulars of applications received and granted, and amounts advanced and repaid during 1912-13:—

**PARTICULARS OF TRANSACTIONS OF STATE GOVERNMENT ADVANCES TO FARMERS DURING THE YEAR 1912-13.**

(a) Year ended 31st March, 1913.

(b) Year ended 30th June, 1913.

(c) Not available.

(i.) *New South Wales Closer Settlement Promotion Act 1910.* In 1910 an Act was passed in New South Wales whereby intending settlers might acquire by direct purchase from the owner, areas of private land suitable for closer settlement, under the same

conditions, regarding residence, the payment of purchase money etc. as apply to settlement purchases under the Closer Settlement Acts. The purchasers are financed to the extent of 95 per cent. of the purchase money, provided that such does not exceed the bank's valuation of the properties. It is anticipated that a considerable amount of business will be done under this Act which will materially expand the operations of advances to farmers in this State. The following table will shew the business transacted up to the end of 1912 :—

**TRANSACTIONS UNDER THE CLOSER SETTLEMENT PROMOTION ACT  
IN NEW SOUTH WALES.**

| Applications.   | Estates. | Farms. | Prices<br>agreed upon<br>by Vendors<br>and<br>Purchasers. |
|---|----------|--------|---|
|   |          |        | £   |
| Cases settled and surrender arranged since inception of Act | 46       | 341    | 742,370   |
| „ reported on but not yet settled ... ..                    | 36       | 256    | 585,682   |
| „ awaiting inspection and report ... ..                     | 27       | 125    | 267,655   |
| „ inspection not yet authorised ... ..                      | 17       | 70     | 144,369   |
| „ refused since inception of Act ... ..                     | 41       | 150    | 213,958   |
| Total cases submitted up to end of 1912 ... ..              | 167      | 942    | 1,954,034   |

The number of estates submitted during the year to bank by the Lands Department was 108, comprising 538 farms, the purchase price asked being £1,168,427.

(ii.) *Particulars of Transactions of Agricultural Bank of Western Australia, 1908 to 1912.* The following table gives particulars of transactions of the Agricultural Bank for each year from 1908 to 1912 inclusive :—

**TRANSACTIONS OF AGRICULTURAL BANK, WESTERN AUSTRALIA, 1908 to 1912.  
AMOUNTS ADVANCED FOR WHICH IMPROVEMENTS HAVE BEEN EFFECTED.**

\* Including £4321 for orchards.

† Including £6300 in 1910, £8611 in 1911, and £12,180 in 1912 for poison and blackboy grubbing.

5. **Particulars Respecting Agricultural and Stock Departments.**—On pages 364 to 369 will be found particulars respecting agricultural and stock departments of the several States of the Commonwealth as on 30th June, 1913. The main features of organisations are set out under their respective headings, and will be found to embrace such items as the number on staffs, expenditure, facilities for agricultural education and work undertaken in agricultural colleges, technical schools and experimental farms, orchards and vineyards. The nature of lectures given by experts, and other forms of agricultural instruction, the extent of distribution of plants, and the special steps taken by departments for distribution of information amongst agriculturists, and with a view to improving the markets for the products of the States, are also given.

| III. <i>Expenditure 1912-13</i>                                 | £273,916   |           |                      |                             | £154,858.  |                   |                     |          | £100,857.  |
| IV. <i>Facilities for Agricultural Education—</i>               | Hawkesbury. Hurlstone<br>Continuance School (Dep't.<br>of Public Instruction).   |           |                      |                             | Dookie. Longerenong.   |                   |                     |          | Gatton.  |
| (i.) <i>Agricultural Colleges.</i>                              |  |           |                      |                             |  |                   |                     |          |  |
| (ii.) <i>Technical Schools at which Agriculture is taught.</i>  | Farm Schools at Wagga<br>and Bathurst. Apprentice<br>Schools at Cowra, Glen In-<br>nes, Wollongbar, Grafton<br>and Yanco.  |           |                      |                             | Working Men's College,<br>Melbourne. Gordon College,<br>Geelong.   |                   |                     |          | At present agriculture is<br>not taught in any of the Tech-<br>nical Colleges, but at various<br>Colleges classes are conduc-<br>ted in milk and cream testing,<br>veterinary science, wool<br>classing and sorting, sheep<br>and wool training and sugar<br>chemistry.  |
| (iii.) <i>Experimental Farms, Orchards and Vineyards.</i>       | Hawkesbury Agricultural<br>College. Experimental Farms<br>at Wagga Wagga, Bathurst,<br>Wollongbar, Glen Innes,<br>Cowra, Grafton, Coonamble,<br>Berry, Yanco, Pera Bore. De-<br>monstration Farms at Nyn-<br>gan, Temora, Condobolin<br>and Dural. Viticultural Sta-<br>tions at Howlong and Ray-<br>mond Terrace. |           |                      |                             | Dookie and Longerenong<br>Agricultural Colleges, Werri-<br>bee Central Research Farm,<br>Rutherglen Viticultural Sta-<br>tion, Wyuna Irrigation<br>Farm, Burnley Horticultural<br>Gardens, Bamawm Experi-<br>mental Farm.  |                   |                     |          | State Farms Warwick,<br>Emerald, Rockhampton, Ro-<br>ma, Atherton. State Nursery<br>Cairns and Sugar Experiment<br>Station, Mackay.  |
| <i>Nature and extent of—</i>                                    |  |           |                      |                             |  |                   |                     |          |  |
| (i.) <i>Agricultural Teaching given in Primary Schools.</i>     | Elementary principles of<br>agriculture taught in most<br>of the schools. Experimental<br>plots in many schools. A<br>travelling instructor in agri-<br>culture gives lessons and<br>lectures.   |           |                      |                             | Elementary agriculture is<br>taught in a large number of<br>rural elementary schools,<br>and the numbers are steadily<br>increasing. The subject is<br>taken in 700 schools, as<br>against 600 at the beginning<br>of the year. The work is<br>largely experimental, and<br>deals with the properties of<br>soils, the growing of common<br>crops and the principles of<br>manuring. |                   |                     |          | Since the beginning of 1910<br>the teaching of agriculture<br>has found a place in a large<br>number of Primary schools,<br>especially in agricultural<br>centres. It is placed amongst<br>the science subjects to be<br>taught, and is to some extent<br>optional. The branches<br>dealt with are (a) tree-<br>planting, (b) flower and<br>vegetable gardening, (c)<br>farm work, including ex-<br>perimental work with maize,<br>wheat, potatoes, bananas,<br>pineapples, hay and fodder<br>crops, grasses, manuring,<br>watering and the conserva-<br>tion of soil moisture; or-<br>chard work—pruning, bud-<br>ding, grafting, etc., and dairy<br>work—fodders and feeding,<br>milk and cream testing. |

## OF THE SEVERAL STATES OF THE COMMONWEALTH.

| SOUTH AUSTRALIA.  |                   |                     | WESTERN AUSTRALIA.   |                   |                | TASMANIA.   |                          |
|---|-------------------|---------------------|--|-------------------|----------------|---|--------------------------|
| Minister of Agriculture and Irrigation.   |                   |                     | Minister for Agriculture and Industries.   |                   |                | Minister of Agriculture.  |                          |
| Agricultural Branch.  | Stock and Brands. | Produce Department. | Agricultural.  | Stock and Brands. | Miscellaneous. | Agricultural Branch.  | Stock and Brands Branch. |

| 128   | 24                | 179                 | 110  | 14                | 174            | 16  | 7                        |
| £125,019.   |                   |                     | £87,122.   |                   |                | £9472.  |                          |
| Roseworthy  |                   |                     | Nil.   |                   |                | Nil. (One at present under construction.)   |                          |
| Adelaide School of Mines.   |                   |                     | Perth Technical School, Perth Modern School, Kalgoorlie School of Mines, University of Western Australia.  |                   |                | Nil.  |                          |
| Farms—Roseworthy, Kybybolite, Turretfield, Booboorowie, Veitch's Well. Poultry Station—Parafield. Vineyard—Roseworthy. Orchards—Adelaide and Coromandel Valley. Experimental plots at 16 centres. |                   |                     | Nangeenan, Narrogin, Chapman, Brunswick and Denmark.   |                   |                | State Farm at Deloraine, and experimental plots in privately-owned orchards under supervision of the Fruit Expert.                            |                          |
| No systematic agricultural teaching in primary schools. Experimental elementary agriculture taken up by individual teachers—result satisfactory. Work optional, but not widespread.               |                   |                     | The teaching of systematic agriculture is not undertaken in Primary schools. Nature study is general, and in many cases includes much that may be termed elementary agriculture. The life histories of various kinds of plants and the principles of cultivation are studied in the school gardens or in experimental plots. Many simple experiments are carried on in connection with cereals and to a less extent with fodder plants and vegetables. An officer is employed specially for the organisation of such work, and his advice can always be had by teachers. Many suggestions are given through the monthly "Circular" which the Department sends to all teachers. |                   |                | Most schools have flower and vegetable plots, but the subject of agriculture is taught with little system and only to a very moderate extent. |                          |

## PARTICULARS RESPECTING AGRICULTURAL AND STOCK DEPARTMENTS

| MAIN FEATURES OF ORGANISATION.                                       | NEW SOUTH WALES.  | VICTORIA.  | QUEENSLAND.   |
|--|---|--|---|
| (ii.) Agricultural Teaching given in Technical Schools.              | Instruction in agricultural principles, climate and rainfall, clearing, building, etc.; draining, irrigation, crops, and manures, dairying, sheep and wool, and wool classing, orcharding, pig and poultry breeding, etc.   | Agricultural chemistry, woolclassing and Poultry breeding.   | Botany, agriculture, sugar, chemistry, scientific baking and milling, dairying, milk and cream testing, plant pathology and economic entomology, horticulture, veterinary science, wool classing and sorting, swine husbandry, poultry farming.   |
| (iii.) Work undertaken in Agricultural Colleges.                     | Instruction of students, complete course three years, in practical and theoretical agriculture, chemistry, botany, entomology, veterinary science, dairying, sheep and wool, wool classing, orcharding, pig and poultry breeding, etc. During the college vacation in June a short course is held for farmers.                                | Complete course in practical and theoretical agriculture extending over three years.   | Practical and theoretical agriculture, pre-eminence being given to the former. The curriculum includes botany, elementary science and physics, dairying, gardening, elementary chemistry, veterinary science, horticulture, stock breeding, bacteriology and agricultural chemistry.  |
| (iv.) Work undertaken on Experimental Farms, Orchards and Vineyards. | Instruction of students—the full course is two years—in practical and theoretical agriculture, similar to but less theoretical than at the Hawkesbury College. Producing and harvesting crops, carrying out experiments in methods of cultivation, manuring, etc. Irrigation at Yanco.  | Experiments in methods of cultivation, manuring, stock breeding, improving cereals by selection and cross fertilisation, testing of fodder plants.                                   | Experimental and acclimatisation work, stock breeding, hybridisation, object lessons in cultivation, orchard work, etc. Pupils are taken at some of the farms.  |
| (v.) Instruction given by Travelling Diaries, etc.                   | Nil.  | None now employed. Demonstrations in cheese making given by experts, also practical instruction in fruit preserving, drying, etc., flax manufacture, poultry dressing, etc.          | Nil.  |
| (vi.) Lectures given by experts.                                     | Agricultural, dairy, fruit, sheep and wool, viticultural and other experts and inspectors visit the different districts under the auspices of the Agricultural Bureau and Societies and give lectures. They also give practical demonstrations in the field. The Veterinary Surgeons of the Department also give lectures and demonstrations. | Agricultural classes, free lectures and practical demonstrations given by departmental experts throughout the State under the auspices of local agricultural and other associations. | Lectures, illustrated by lantern slides, are given by the Departmental Technical Instructors on all agricultural, horticultural and pastoral subjects. The local Agricultural, Horticultural, or Pastoral Society provides the hall, attends to advertising, etc. These lectures are free to all.   |
| (vii.) Other forms of Agricultural Instruction.                      | The publication of the Agricultural Gazette monthly, which is issued free to farmers. Reprints of special articles in the Gazette are issued as pamphlets. Bulletins on special branches of agriculture, dairying, fruit growing, and stock, etc., are also issued.   | Issue of monthly "Journal of Agriculture" and Bulletins.   | Monthly issue of Agricultural Journal and pamphlets on given subjects. Practical demonstrations in the field by the technical instructors on the erection of silos, stacks, pruning, budding and cultivating, correct methods of inoculating cattle, applying insecticides and fungicides, the use of explosives in farming. The establishment of experimental plots on private lands for practically demonstrating improved methods of cultivating, manuring, etc. Inspectors travel the country and give advice to settlers. Displays at Shows illustrative of the agricultural, horticultural and pastoral possibilities of the State. |

## OF THE SEVERAL STATES OF THE COMMONWEALTH—Continued.

| SOUTH AUSTRALIA.   | WESTERN AUSTRALIA.   | TASMANIA.  |
|--|--|--|
| Lectures and agricultural practical work, viticulture, fruit culture, botany lectures in conjunction with School of Mines and also by Horticultural Instructor.  | Classes in such subjects as fruit-growing and wool classing are held in the Technical Schools at Perth and Fremantle.  | Nil.   |
| The training of young men in the practice of science of agriculture, viticulture, dairying and stock. Experimental and research work.  | There are no Agricultural Colleges.  | At the State Farm, Deloraine, students will be taken in 1914. The work will comprise all branches of agriculture and the growing of all fruits and crops suitable to the soil and climate. |
| Experimental work in manuring, irrigation, rotation of crops, stock rearing, breeding and selection of cereals. General cultural work of farm, orchard and vineyard.                                       | Practical agriculture and orcharding are taught without any of the scientific aspects.   |  |
| Nil.   | The Agricultural Commissioner for the South-west lectures on and advises on this subject.  | A dairy school is held yearly in different centres.  |
| Lectures and practical demonstrations are given by the departmental experts in various parts of the State. Special series of veterinary lectures and demonstrations and the classing and handling of wool. | Lectures are given by the dairy expert, fruit expert, irrigation and stock experts, botanist and pathologist, potato expert and poultry expert in their special work, and the Commissioner for the Wheat Belt on general agriculture, mixed farming and stock affecting the wheat growing portion of the State, and questions affecting the use and registration of fertilisers. | On dairying, pig and poultry raising, fruit pruning, horticulture, forestry, stock raising, veterinary work and general agriculture.   |
| Nil.   | Apart from the experiments carried out at State Farms, pruning demonstrations are given, individual holdings are visited and advice given on irrigation, and all questions on which the technical and professional staff is employed.  | Practical instruction by experts in dairying, orcharding, farming, and poultry raising.  |

## PARTICULARS RESPECTING AGRICULTURAL AND STOCK DEPARTMENTS

| MAIN FEATURES OF ORGANISATION.   | NEW SOUTH WALES.   | VICTORIA.   | QUEENSLAND.   |
|--|--|---|---|
| V. <i>General work of Department—</i><br>(i.) Extent to which distribution of plants is carried out by Department and General Regulations governing such distribution. | Small packets of seeds are distributed for experimental purposes to farmers on condition that reports are forwarded to the Department in due course. | Select-bred seed wheat, oats and barleys are grown for ultimate distribution among farmers. These are sold in small parcels to farmers at market rates.   | The distribution of seeds and plants is not free, excepting in the case of seeds new to the country and that have not been cultivated here before. Surplus seeds and plants produced by the Agricultural Colleges and State Farms are sold at market values. Trees for shade purposes for public institutions are supplied free of charge. State School gardens are supplied free with both seed and trees.   |
| (ii.) No. of inspectors employed—<br>(a) Fruit and Orchard Inspectors ...<br>(b) Stock Inspectors ...<br>(c) Rabbit Inspectors ...<br>(d) Other Inspectors ...         | 43<br>60<br>43<br>45   | 19<br>15<br>67<br>67  | 21<br>56<br>3<br>50   |
| (iii.) Acts under which the Prevention of diseases in stock and plants and the eradication of noxious animals, insects and weeds are carried out.                      | Pastures Protection Act.<br>Stock Act.<br>Stock (Tick) Act.<br>Vine and Vegetation Act.<br>Fruit Pests Act.  | Vegetation Diseases Act.<br>Stock Diseases Act.<br>Vermin Destruction Act.<br>Milk and Dairy Supervision Act.<br>Bees Act.<br>Sheep Dipping Act.<br>Thistle Act.  | Diseases in Plants Act.<br>Diseases in Stock Act.<br>Marsupial Act.<br>Diseases in Sheep Act.<br>Local Authorities Act.<br>Prickly Pear Destruction Act.<br>Rabbit Boards Acts.   |
| (iv.) Special features of Entomological or other work of the Department.   |  | Economic entomology, vegetable pathology, botany and biology lectures to farmers, horticulturists, etc. on fungus, insect and other pests, and the means adopted for their eradication and prevention. Field experiments with fungicides and insecticides, etc. Cultivation of pure yeasts for wine making, bacteriology of soils, etc. | The features of entomological work in Queensland are varied, as might be expected in a country where the range of climatic conditions is so great that every known product on the world's market can be grown. It cannot therefore be said that there are any special features to be mentioned. The same may be said of other work of the Department, but the main directions are in wool, sugar, meat export, dairying, fruit growing, grain growing and stock breeding. |
| (v.) Special steps taken by Department for distribution of information—<br>(a) Amongst the agriculturists of the State.  | Distribution of Agricultural Gazette, Bulletins and pamphlets.   | "Journal of Department of Agriculture," Annual Reports, also publications on special subjects. The Departmental exhibit is forwarded for inspection at Agricultural Shows.  | The distribution of the "Queensland Agricultural Journal" and pamphlets, lectures, object lessons at farms and Agricultural College. About 75% of those who pass through the Agricultural College follow rural pursuits, and in themselves are a valuable means of distributing information.  |
| (b) With a view to improving the market for the State's product.   | An Agent-General in London and Commercial Agents in the East and America. Samples are sent to the Agent-General for exhibition purposes.             | Agent-General is supplied with samples of produce, etc., which are exhibited in Great Britain. Cool storage provided by Government to assist export trade. Daily quotations of wheat in London published in press. Fruit cool stores erected by Government.   | By close inspection of exports and by collecting and distributing information from markets where business is likely to be profitable.   |

## OF THE SEVERAL STATES OF THE COMMONWEALTH—Continued.

| SOUTH AUSTRALIA.  | WESTERN AUSTRALIA.  | TASMANIA.  |
|---|---|--|
| <p>Special varieties of cereals and fodder crops are distributed free, chiefly from the Agricultural Bureaux. Large quantities of selected cereals are raised at the various farms for sale.</p>  | <p>A seed bureau is established at headquarters, from which varieties of farm and garden seeds are distributed to settlers for experimental purposes, and with the object of encouraging the use of those varieties of cereals, etc., which have been proved by the experts concerned to be the best adapted to the varying conditions prevailing throughout the State.</p> | <p>Seeds are distributed to schools and to members of the Boards of Agriculture, and forest trees to public bodies for planting in public places.</p>  |
| <p>16<br/>14<br/>...</p>  | <p>15<br/>10<br/>8<br/>...</p>  | <p>Appointed by Local Authorities.<br/>13</p>  |
| <p>The Vine, Fruit and Vegetable Protection Acts.<br/>Insecticides Acts.<br/>Phylloxera Act.<br/>Stock Diseases Act.<br/>Brands Act.<br/>Noxious animals and weeds come under the local governing bodies and not under the Agricultural Department.</p>   | <p>Stock Disease Act 1895.<br/>Insects Pests Amendment 1898.<br/>Noxious Weeds Act 1904.<br/>Vermin Boards Act 1909.<br/>Rabbit Act 1902.</p>   | <p>State Act.<br/>Contagious Diseases Cattle Act.<br/>Importation Diseases Cattle Act.<br/>Scab Act.<br/>Rabbit Destruction Act.<br/>Codlin Moth Act.<br/>California Thistle Act.<br/>Vegetation Diseases Act.</p> |
| <p>Work confined to economic phases of entomology and vegetable pathology aims at identifying and instructing horticulturists how to detect different insects and fungi, and to apply best remedies for prevention; tests conducted with fungicides and insecticides and uses demonstrated.</p>   | <p>Beneficial parasites of a predaceous nature are distributed. Laboratory investigations made in diseases affecting plants, fruits, etc. Soil and water analyses made. Bacteriological investigation into stock diseases performed. Tubercular testing of dairy cattle, inoculation against tuberculosis and glanders in imported stock undertaken.</p>                    | <p>Work largely of a practical nature.</p>   |
| <p>Agricultural Bureaux with 155 branches, established; the latter meet at intervals, and matters relating to agriculture discussed. "Journal of Department of Agriculture" published monthly. Special bulletins and pamphlets on agriculture and other matters published at intervals. Departmental library open to those interested.</p>  | <p>Pamphlets are issued by the Department on questions of particular importance to agriculturists, such as dairying, irrigation, fruit culture, production of cereals, poultry raising, destruction of vermin, production of fodder crops, etc. These are kept up to date and reissued from time to time.</p>   | <p>Information given to public press. Publication of pamphlets. Issue of Agricultural Gazette. Communications to Boards of Agriculture.</p>  |
| <p>South Australian exhibits are forwarded to various shows in Great Britain; daily quotations of wheat in London published in Sth. Aust. press. Produce of all kinds shipped to London and elsewhere, trial shipments of any classes of produce for which there is likely to be an opening in Europe are forwarded to the Trade Commissioner, who make it a special feature of his work to place these to the best advantage and also to investigate and report on the possibilities of extending markets.</p> | <p>This work is performed by the Colonial Secretary and Agent-General's office. Much has been done in a very practical way in sending abroad samples of our produce with a view of exploiting fresh markets.</p>  | <p>Mainly in the hands of private persons. Samples of produce of various kinds are forwarded to the Agent-General for exhibition.</p>  |

## § 22. Graphical Representation of Crops.

1. **Areas of Principal Crops.**—A graphical representation of the areas in the Commonwealth devoted to each of the leading crops from 1860 to the present time is furnished on page 357.

(i.) *Wheat.* In the case of wheat, the Commonwealth's principal crop, the graph indicates that the fifty-three seasons under review divide themselves naturally into five distinct periods, three of moderate and fluctuating increases, and two of extremely rapid increases. Thus, between the seasons 1860-1 and 1875-6, a moderate rate of increase was in evidence, the area increasing from 640,000 to 1,420,000 acres. During the five succeeding seasons a very rapid increase took place, the total in 1880-1 amounting to over 3,000,000 acres. For fifteen years thereafter the increase in area was not large, and in two seasons, viz., 1885-6 and 1890-1, marked decreases were experienced. The total increase for the fifteen years was about 700,000 acres, the total for 1895-6 being rather more than 3,750,000 acres. The succeeding five years witnessed a rapid increase in area to a total of more than 5,600,000 acres, followed by a further period of marked fluctuations; this latter period, however, contained the four seasons of maximum wheat-cropping, viz., that of 1909-10, when an area of 6,586,000 acres was so cropped, that of 1910-11, when the area amounted to 7,372,456 acres, that of 1911-12, when 7,427,834 acres, and that of 1912-13 when 7,339,651 acres were cropped.

(ii.) *Hay.* Hay-growing, which, next to the growing of wheat for grain, is the most important branch of agriculture in the Commonwealth, will be seen from the graph to have fluctuated very considerably from year to year during the period under review, these fluctuations being due in the main to seasonal variations and to variations in the relative prices of grain and hay crops. It will be seen that the features of the graphs are a moderate increase from 1860-1 to 1875-6, a fairly rapid increase from 1875-6 to 1882-3, moderate increase thence to 1896-7, succeeded by marked fluctuations from this point onwards with, on the whole, a moderate rate of increase until 1908-9 when 2,453,000 acres were attained, succeeded by a decline in 1909-10 to 2,228,000 acres, and a slight increase in 1910-11 to 2,258,000 acres, a further increase in 1911-12, and another substantial increase in 1912-13, when the maximum of 3,217,041 acres was attained.

(iii.) *Oats.* The graph relating to oats exhibits extremely marked fluctuations from year to year in the area devoted to this crop, the general tendency, however, being one of increase, especially during the period 1892-3 to 1896-7. During the four seasons following 1905-6 the area under oats increased rapidly to 698,000 acres in 1909-10, the succeeding two years experiencing a slight falling off, when areas of 677,000 and 617,000 acres were so cropped during 1910-11 and 1911-12 respectively; the 1912-13 season, however, experienced a heavy increase, attaining a maximum of 874,284 acres.

(iv.) *Maize.* The graph relating to maize indicates that the area devoted thereto in Australia, although somewhat fluctuating, increased with fair rapidity until the season 1896-7, since when it has varied above and below the point then reached, on the whole remaining practically stationary up to 1909-10. The maximum area under maize, prior to 1910-11, viz., 372,000 acres, was attained in the season 1903-4; in 1910-11 this record was exceeded by 43,000 acres; a falling off occurred in 1911-12, and again in 1912-13, the area under crop for the latter season being 315,000 acres.

(v.) *Sugar-Cane*. In the case of sugar-cane the graph shows a fairly rapid rate of increase to 1874-5, followed by a period of five years during which the area increased but slowly. From 1879-80, however, the sugar-cane area rose rapidly until in 1884-5 a total of more than 75,000 acres was reached. Then followed a period of diminished cultivation, and it was not until 1892-3 that so high a total was again attained. After this the area rose rapidly to 136,000 acres in 1898-9, but during the next five years a decline took place, the area for 1903-4 being 132,000 acres. The season of maximum area, viz., 156,000 acres, was 1905-6. A marked decline in area was in evidence during the four following seasons; in the years 1910-11 and 1912-13, however, the former maximum was again attained, although a slight falling off took place in the intermediate season, 1911-12, to the extent of 11,000 acres.

(vi.) *Barley*. The Commonwealth barley crop has exhibited from time to time very marked fluctuations in area. The graph representing this crop shows consequently a very irregular line. The total has, on the whole, increased but slightly since 1880, rapid increases in certain years being succeeded by equally rapid decreases in subsequent years. The maximum area under barley, viz., 181,000 acres, was attained in the season 1912-13.

(vii.) *Vines*. The graph relating to area under vines, from 1872-3 onwards, indicates that there were two periods of very slow increase, one from 1872-3 to 1881-2, the other from 1893-4 to 1904-5. Between these, viz., from 1881-2 to 1893-4, a moderate rate of increase of area was experienced, the total for the Commonwealth advancing during that time from 14,600 acres to 57,400 acres, while from 1904-5 to 1909-10 the area fluctuated considerably, the general tendency evidencing a fairly consistent diminution. During the past three seasons, however, an upward tendency has been in evidence. The season of maximum area under vineyards was 1904-5, with a total of about 65,700 acres.

2. **Production.**—The diagram on page 358 furnishes a graphical representation of the aggregate yields from 1860-1 to 1912-13 of five of the principal crops of the Commonwealth.

(i.) *Wheat*. This graph brings out clearly the fact that while on the whole the production of wheat in the Commonwealth is increasing with fair rapidity, the fluctuations in the total quantity produced have been more marked in recent than in earlier years. Thus, since the year 1890 there have been four seasons of extremely low output, viz., in 1891-2, 1895-6, 1896-7, and 1902-3, with aggregate yields respectively of 25,700,000 bushels, 18,300,000 bushels, 20,900,000 and 12,400,000 bushels. On the other hand there have been six seasons in which the total production was exceptionally high. These will be seen from the graph to have been the seasons 1893-4, 1900-1, 1903-4, 1909-10, 1910-11, and 1912-13, the total yields for which were 37,100,000 bushels, 48,400,000 bushels, 74,100,000 bushels, 90,400,000 bushels, 95,100,000 bushels, and 92,000,000 bushels respectively. Each of these yields, with the exception of 1912-13, represented at the date of its attainment the maximum Australian wheat crop, that for 1910-11 being the highest yet reached.

(ii.) *Oats*. From 1860-1 to 1880-1 the oat crop of the Commonwealth, although exhibiting from year to year fluctuations more or less marked, gave no indications of a tendency to increase with the advance in population. This is well shewn in the diagram, by the persistence with which the graph for this period adheres to the line denoting 4,000,000 bushels, the yield for 1880-1 being actually lower than that for 1860-1. From this latter season to 1894-5 the variation was on a somewhat higher level, and is shewn in the diagram to have been in the vicinity of the line representing 6,000,000 bushels. From this point onwards a tendency to more rapid increase in production is in evidence,

obscured somewhat by extensive fluctuations corresponding to those referred to above in the case of wheat. Thus in 1895-6 and 1902-3 the total yields were only 4,400,000 and 7,800,000 bushels respectively, while in 1900-1 and 1903-4 aggregates respectively of 12,000,000 and 17,500,000 bushels were reached, this latter being the maximum oat crop of the Commonwealth. The 1912-13 crop was the highest for four seasons, and has only been exceeded on two occasions, viz., in 1903-4 and 1908-9.

(iii.) *Barley.* The Australian barley crop will be seen from the graph to have fluctuated very considerably throughout, these variations being due rather to fluctuations in the area sown than to adverse seasons. From 1879-80 to 1902-3 the curve rises above and falls below the line representing 1,500,000 bushels. For more recent years the graph bears the evidence of an increasing, though still fluctuating, output. The maximum barley crop of the Commonwealth was that of 3,860,000 bushels in 1912-13, thus exceeding the next highest record, viz., 1908-9, by 985,000 bushels.

(iv.) *Maize.* The maize graph indicates a rapid increase in output from 1860-1 to 1869-70, followed by a moderate increase from the latter season to 1886-7, and a further rapid increase to 1891-2. From the last-mentioned season onwards the production has fluctuated considerably, but little increase has, on the whole, been experienced, the total for 1891-2 being 9,262,000 bushels, as compared with 10,771,000 bushels for 1909-10, the maximum Australian maize crop up to that date; this was exceeded in the following season, when the production of maize amounted to 13,044,000 bushels. The maize yields for 1911-12 and 1912-13 were considerably lower than that for the year immediately preceding them.

(v.) *Hay.* The graph relating to the Commonwealth output of hay indicated a fairly continuous increase in production from the season 1860-1, when the total stood at 340,000 tons, to that of 1887-8, when it reached 1,330,000 tons. In subsequent years marked fluctuations have been in evidence, but the tendency has, on the whole, been one of increase. The maximum hay crop of the Commonwealth was that of the season 1912-13, when the total production reached 3,955,000 tons.

## SECTION IX.

## FARMYARD AND DAIRY PRODUCTION.

## § 1. Introductory.

1. **General.**—The introduction of cattle into Australia, and the early history of the dairying industry are referred to in some detail in previous issues of this work (see Official Year Book No. 6, pp. 430 *et seq.*). It may here be noted that the original stock has been crossed with specially imported stud cattle, while further judicious crossing of strains has resulted in an increased and improved milk supply. In Australia, dairy cattle thrive in the open throughout the year, local climatic conditions demanding no protection other than tree plantations for shelter, and rugging in the coldest weather. Indigenous and imported grasses furnish food during the greater part of the year, and winter fodder, when necessary, is given to the cattle in the fields. With the adoption of scientific methods in the treatment of animals and pasturage and in the process of manufacture, coupled with effective State supervision, the industry has shewn rapid expansion.

2. **Official Supervision of Industry.**—Dairy experts, under the supervision of the various State Agricultural Departments, give instruction in approved methods of production, and inspect animals, buildings, and marketable produce. A high standard of cleanliness, both of *personnel* and *matériel*, prevails. Financial assistance of a temporary nature is also given, advances made being generally repaid with promptitude.

The export trade is regulated by the terms of the Commonwealth Commerce Act 1905 and regulations thereunder. The provisions of this Act are set out in detail in Official Year Book No. 6, pp. 431-2. It will be sufficient to note here that true trade description, etc., must be marked on all produce intended for export, while official inspection ensures the maintenance of purity and quality. Upon request of the exporter the goods are certificated by the inspector.

3. **Mixed Farming.**—Dairying is not now, as formerly, wholly confined to farmers, since many graziers in a large way of business have lately given it their attention. In non-coastal regions it is generally carried on in conjunction with agriculture and sheep-raising, sufficient fodder being grown to carry the cattle through the winter months. Local wants are thus met, and in many places remote from the metropolis well-equipped factories have been established.

4. **Factory System.**—Cream separation and butter-making are often carried on together under the co-operative system. The creation of large central butter factories, supplied by numerous separating establishments or "creameries," has resulted in a considerable reduction in the cost of manufacture, since improved appliances, such as refrigerators, may be profitably worked at the larger establishments. The product is also of a more uniform quality. The number of farmers who adhere to hand processes is rapidly diminishing. Formerly the average quantity of milk used per pound of hand-made butter was about 3 gallons, but separator butter requires only about  $2\frac{1}{2}$  gallons.

5. **Butter and Cheese Factories.**—The establishments in the Commonwealth where the manufacture of butter, cheese, and condensed milk was carried on, numbered 530 in 1912. These were distributed as regards the various States as follows:—New South Wales, 176; Victoria, 197; Queensland, 81; South Australia, 48; Western Australia, 3; Tasmania, 25.

## § 2. Milk, Butter, and Cheese.

1. **Dairy Herds.**—Since the drought year 1902 there has been a general increase in the number of dairy cows. In New South Wales, Victoria, South Australia proper, and Tasmania—as will be seen from the table of cattle and dairy cattle given below—the proportion of dairy cattle to all cattle is high. In Queensland, the Northern Territory, and Western Australia there is a greatly preponderating number of other cattle, dairying not being firmly established in the tropical regions of the Continent. In southern Queensland, however, the industry has developed remarkably during the last decade. In the tables which follow in this section, the returns for the Northern Territory and the Federal Territory are, unless shewn separately, included in South Australia and New South Wales respectively, the dairy products from the newly-acquired Commonwealth territories being small:—

**CATTLE AND DAIRY CATTLE, COMMONWEALTH, 1908 to 1912.**

| State.             |     |            | 1908.      | 1909.      | 1910.      | 1911.      | 1912.      |

|                    | ... | Dairy Cows | 1,839,398  | 1,906,174  | 2,064,599  | 2,120,469  | 2,086,885  |

\* Included under New South Wales.

2. **Milk.**—The annual quantity of milk produced per dairy cow varies greatly with locality and season, probably reaching as high as 500 gallons, but averaging for the whole of Australia, for all dairy cows and for all seasons, something under 300 gallons per annum. The best yields over a series of years appear to be in Victoria, New South Wales, South Australia, and Tasmania, while Western Australia is below Queensland. In the following table the annual average yields per cow for the last five years are taken from the number of dairy cows which were, during any part of the year, milking. The average given is considerably below that for cows which were yielding during the greater part of the year. It will be seen that the highest averages obtain in those States which have adopted more scientific methods of dairying, such as systematic breeding, culling of herds, milk testing, etc.

## PRODUCTION OF MILK, COMMONWEALTH, 1908 to 1912.

\* Including figures for Federal Territory, which in 1911 were 1192 dairy cows; 153,090 gallons of milk averaging 128 gallons per cow; and in 1912, 742 dairy cows; 106,647 gallons of milk, averaging 144 gallons per cow. † Estimated. ‡ Exclusive of Northern Territory.

3. **Butter and Cheese.**—The butter output shews, in general, a tolerably steady increase since the drought year 1902, the most marked development being in Queensland. The production of butter reached its highest figures in 1911, the highest previous yields being in 1910 and 1906. The year 1910 marks the highest cheese production, the return being somewhat better than those for 1912 and 1911. In both butter and cheese a decrease took place in some of the States in 1907 and 1908, due to the dryness of the season. There was a recovery in 1909. For the five years from 1908 to 1912 the figures are:—

## PRODUCTION OF BUTTER AND CHEESE, COMMONWEALTH, 1908 to 1912.

| State.                | 1908.       | 1909.       | 1910.       | 1911.       | 1912.       |
|-----------------------|-------------|-------------|-------------|-------------|-------------|
| BUTTER.               |             |             |             |             |             |
| New South Wales* ...  | 61,380,876  | 62,865,608  | 76,624,830  | 83,204,568  | 76,609,528  |
| Victoria ...          | 48,461,398  | 55,166,555  | 70,603,787  | 86,500,474  | 67,655,834  |
| Queensland ...        | 23,838,357  | 24,592,711  | 31,258,333  | 27,858,535  | 30,307,339  |
| South Australia ...   | 8,130,560   | 8,482,168   | 10,717,486  | 9,694,666   | 8,394,557   |
| Western Australia ... | 365,593     | 414,453     | 641,491     | 498,047     | 448,799     |
| Tasmania† ...         | 3,140,573   | 2,751,757   | 3,365,982   | 3,817,455   | 3,778,104   |
| Commonwealth ...      | 145,317,357 | 154,273,252 | 193,211,909 | 211,573,745 | 187,194,161 |
| CHEESE.               |             |             |             |             |             |
| New South Wales ...   | 4,763,360   | 4,775,268   | 5,191,089   | 5,460,652   | 5,454,685   |
| Victoria ...          | 4,328,644   | 5,025,834   | 4,530,893   | 4,549,843   | 4,176,778   |
| Queensland ...        | 3,199,510   | 3,662,497   | 4,146,661   | 3,718,257   | 3,947,615   |
| South Australia ...   | 1,556,894   | 1,578,378   | 1,796,281   | 1,526,930   | 1,958,027   |
| Western Australia ... | 980         | 1,570       | 3,306       | 900         | ...         |
| Tasmania† ...         | 910,400     | 731,290     | 868,781     | 630,130     | 623,386     |
| Commonwealth ...      | 14,759,788  | 15,774,837  | 16,537,011  | 15,886,712  | 16,160,491  |

\* Including Federal Territory, where 27,630 lbs. of butter were produced in 1911; and 16,561 lbs. in 1912. † Estimated.

4. **Concentrated Milk.**—"Condensed" or "concentrated" milk denotes milk the bulk of which is reduced by evaporation, no sweetening agent being added. When a sweetening agent is added it is called "preserved" milk. Small quantities of such milk were made prior to 1911, in which year the output for the Commonwealth was nearly doubled. In 1912 there was a further notable increase, the figures for Victoria for these years shewing a marked expansion. There is still a considerable import of milk, as will be seen from the tables hereunder; but in 1912, for the first time, the balance of trade was in favour of exports. No condensed or concentrated milk is made in South Australia, Western Australia, or Tasmania. In New South Wales, Victoria, and Queensland the following quantities are returned for the last five years:—

#### CONDENSED AND CONCENTRATED MILK MADE, 1908 to 1912.

| Year.       | N.S.W.    | Victoria.  | Queensland | Commonwealth. |
|-------------|-----------|------------|------------|---------------|
|             | lbs.      | lbs.       | lbs        | lbs.          |
| 1908 ... .. | 2,399,673 | 3,308,854  | 3,935,024  | 9,643,551     |
| 1909 ... .. | 2,400,687 | 3,487,312  | 7,038,202  | 12,926,201    |
| 1910 ... .. | 1,940,481 | 2,707,110  | 7,843,670  | 12,491,261    |
| 1911 ... .. | 3,058,497 | 13,697,691 | 6,227,519  | 22,983,707    |
| 1912 ... .. | 3,636,519 | 18,500,011 | 7,923,381  | 30,059,911    |

5. **Oversea Trade in Milk, Butter, and Cheese.**—The tables following give the imports, exports, and net exports or imports of butter, cheese, and milk. In each of the five years exports of butter exceeded imports; in three the cheese import was heavier than the export; and this was the case in all except the last year with milk.

#### IMPORTS, EXPORTS, AND NET IMPORTS OF BUTTER, CHEESE AND MILK, COMMONWEALTH, 1908 to 1912.

##### IMPORTS.

| Products.   | 1908.     | 1909.     | 1910.     | 1911.     | 1912.     |
|---|-----------|-----------|-----------|-----------|-----------|

##### NET EXPORTS.<sup>2</sup>

|   |            |            |            |             |            |
|---|------------|------------|------------|-------------|------------|
| Butter ... .. lbs.                                | 51,165,485 | 55,620,876 | 87,856,456 | 101,699,529 | 66,640,914 |
| " " " " " £                                       | 2,385,082  | 2,398,541  | 3,949,238  | 4,636,281   | 3,340,653  |
| Cheese ... .. lbs.                                | 413,219    | 164,027    | 618,428    | 840,472     | 297,825    |
| " " " " " £                                       | 15,196     | 8,949      | 8,406      | 12,782      | 14,228     |
| Milk—concentrated and preserved <sup>1</sup> lbs. | 8,835,517  | 7,078,411  | 8,025,524  | 2,905,794   | 606,232    |
| " " " " " £                                       | 173,181    | 137,884    | 125,008    | 52,288      | 11,927     |

1. See definition above.

2. — signifies net imports.

6. **Local Consumption of Butter and Cheese.**—The total production of butter and cheese, with the net export or import subtracted or added, gives approximately the consumption in the Commonwealth. In the period considered hereunder, 1910 and 1911 were the years in which the local supply of cheese was adequate:—

**BUTTER AND CHEESE LOCALLY CONSUMED, 1908 to 1912.**

| Product. |                                     | 1908.      | 1909.      | 1910        | 1911.       | 1912.       |
|----------|-------------------------------------|------------|------------|-------------|-------------|-------------|
|          |                                     | lbs.       | lbs.       | lbs.        | lbs.        | lbs.        |
| Butter   | ... Total ...                       | 94,151,872 | 98,652,376 | 105,569,150 | 109,874,216 | 120,500,247 |
| "        | ... Per head of mean population ... | 22.4       | 23.1       | 24.2        | 24.5        | 25.9        |
| Cheese   | ... Total ...                       | 15,173,007 | 15,938,864 | 15,918,853  | 15,046,240  | 16,458,316  |
| "        | ... Per head of mean population ... | 3.6        | 3.8        | 3.7         | 3.4         | 3.5         |

The consumption in 1912 averaged 25.9 lbs. of butter and 3.5 lbs. of cheese per head of mean population, an amount probably unsurpassed anywhere. The consumption of butter and cheese in the United Kingdom is given as about 20 lbs. per head.

**§ 3. Pigs, Bacon, etc.**

1. **Pigs.**—Great attention has been paid, both privately and by the various State Governments, to the improvement of marketable qualities in pigs. The number of pigs in the Commonwealth from 1908 to 1912 is shewn below:—

**NUMBER OF PIGS, COMMONWEALTH, 1908 to 1912.**

| State.                 | 1908.   | 1909.   | 1910.     | 1911.     | 1912.   |
|------------------------|---------|---------|-----------|-----------|---------|
| New South Wales ...    | 215,822 | 237,849 | 321,632   | 370,700   | 293,450 |
| Victoria ...           | 179,358 | 217,921 | 333,281   | 348,069   | 240,072 |
| Queensland ...         | 124,749 | 124,803 | 152,212   | 173,902   | 143,695 |
| South Australia ...    | 78,454  | 80,410  | 96,386    | 93,130    | 69,832  |
| Western Australia ...  | 46,652  | 47,062  | 57,628    | 55,635    | 47,351  |
| Tasmania ...           | 47,945  | 55,705  | 63,715    | 67,392    | 49,152  |
| Northern Territory ... | 2,711   | 1,387   | 996       | 1,500     | 1,500   |
| Federal Territory ...  | †       | †       | †         | 393       | 203     |
| Commonwealth ...       | 695,691 | 765,137 | 1,025,850 | 1,110,721 | 845,255 |

† Included in New South Wales.

Prior to 1911 the number of pigs was highest in 1904, when for the first time it was over a million; prior to 1899 it had never reached 900,000. That year, the two immediately following, and 1904, 1905, 1910 and 1911 mark the highest totals. An examination of the returns shews remarkable fluctuations. There was a general decrease in 1906 and the two following years. Recovery began in 1909, and continued through 1910 and 1911; but 1912 shews a heavy fall. The number of pigs per head of population, and the number per square mile, will be found in the tables of live stock, pages 275 and 276.

2. **Bacon and Ham.**—From 1905 to 1908 the production of bacon and ham in the Commonwealth shewed little annual variation. In 1909 there was a considerable falling-off, but large increases in the last three years. It will be noticed from the table above that the number of pigs in Australia in 1908 was much below the average.

**PRODUCTION OF BACON AND HAM, COMMONWEALTH, 1908 to 1912.**

| State.                | 1908.      | 1909.      | 1910.      | 1911.      | 1912.      |
|-----------------------|------------|------------|------------|------------|------------|
|                       | lbs.       | lbs.       | lbs.       | lbs.       | lbs.       |
| New South Wales* ...  | 9,488,299  | 9,931,377  | 12,620,067 | 16,102,827 | 16,526,876 |
| Victoria ...          | 14,411,401 | 13,620,485 | 16,438,837 | 19,546,772 | 20,043,706 |

IMPORTS, EXPORTS, AND NET EXPORTS OF BACON AND HAM, FROZEN PORK, PIGS, AND LARD, COMMONWEALTH, 1908 to 1912—Continued.

| Particulars.            | 1908.   | 1909.     | 1910.     | 1911.     | 1912.     |
|-------------------------|---------|-----------|-----------|-----------|-----------|
| LARD.                   |         |           |           |           |           |
| Imports ... .. lbs.     | 313,060 | 358,213   | 198,897   | 387,626   | 794,961   |
| " ... .. £              | 7,681   | 9,148     | 5,573     | 9,870     | 22,096    |
| Exports ... .. lbs.     | 511,774 | 1,618,995 | 3,112,190 | 3,399,386 | 2,092,422 |
| " ... .. £              | 10,906  | 28,948    | 62,664    | 57,861    | 37,063    |
| Net Exports ... .. lbs. | 198,714 | 1,260,782 | 2,913,293 | 3,011,760 | 1,297,461 |
| " ... .. £              | 3,225   | 19,800    | 57,091    | 47,991    | 14,967    |

From 1901 to 1903 there was a considerable net import of bacon and ham, but for the following years there was a large net export. The local production of frozen pork and lard was for each of the years shewn more than sufficient for the local demand. The net export of pig products was considerably greater in 1910 and 1911 than in previous years, but there was a decline in 1912.

4. **Local Consumption of Bacon and Ham.**—From 1904 to 1912 the production of bacon and ham was sufficient to meet the local demand, and there was a surplus for export, but in 1901, 1902, and 1903 this was otherwise, and considerable quantities were imported.

BACON AND HAM LOCALLY CONSUMED, 1908 to 1912.

| Consumption.                    | 1908.      | 1909.      | 1910.      | 1911.      | 1912.      |

\* Including Federal Territory, where there was produced 106,647 gallons of milk; also 16,561 lbs. of butter on farms; also 15,196 lbs. of bacon and hams (on farms). † Estimated. ‡ Including 70,000 gallons estimated for Northern Territory.

## § 4. Poultry Farming.

1. **Development of the Industry.**—Poultry stocks are usually maintained by farmers and furnish a considerable addition to the annual agricultural or dairying returns. During recent years the poultry industry has assumed an independent position among rural industries. It is also carried on in conjunction with pig farming. Special poultry farms have been instituted for scientific breeding. Poultry experts engaged by the States Governments give lectures and instruction. Poultry for consumption is extensively reared, and the egg-producing qualities of the birds have also been greatly improved by careful breeding. Co-operative egg collecting circles have been formed in some districts; eggs are also delivered with the milk and cream to the local butter factories and thence forwarded to market.

2. **Production of Poultry.**—Figures for the yield of poultry products are difficult to obtain. The following values are returned :—

## ESTIMATED VALUE OF POULTRY AND EGGS, COMMONWEALTH, 1908-9 to 1912-13.

| Year.       | N.S.W.     | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania. | C'wealth.  |
|-------------|------------|-----------|---------|----------|----------|-----------|------------|
|             | £          | £         | £       | £        | £        | £         | £          |
| 1908-9 ...  | 1,202,000  | 1,547,000 | *       | 399,349  | 133,544  | *         | 3,281,893† |
| 1909-10 ... | 1,309,000  | 1,570,000 | 185,000 | 431,575  | 160,562  | *         | 3,656,137‡ |
| 1910-11 ... | 1,170,000  | 1,592,000 | 204,000 | 496,311  | 168,251  | 227,000   | 3,857,562  |
| 1911-12 ... | 1,200,000§ | 1,618,500 | 195,000 | 533,941  | 175,890  | 230,000   | 3,953,331  |
| 1912-13 ... | 1,434,000§ | 1,825,010 | 188,000 | 541,489  | 183,689  | 230,000   | 4,402,188  |

\* Not available. † Excluding Queensland and Tasmania. ‡ Excluding Tasmania.

§ Including Federal Territory, where the estimated value was £1800 in 1911-12; and £1880 in 1912-13.

**3. Oversea Trade in Poultry Products.**—The imports and exports of eggs shew a considerable balance on the side of imports in each of the years 1901 to 1906 and in 1909, 1910, 1911 and 1912. In 1907 the export greatly exceeded the import, and in 1908 the imports were greater in quantity, but less in value, than the exports. The figures for frozen poultry indicate a considerable oversea export.

**IMPORTS, EXPORTS, AND NET EXPORTS OF EGGS AND LIVE AND FROZEN POULTRY, COMMONWEALTH, 1908 to 1912.**

1. — signifies net imports.

2. Quantity not available.

## § 5. Bee Farming.

**1. The Bee-farming Industry.**—Bee farming, like poultry farming, has ordinarily been an adjunct to agricultural or dairying industries, and can hardly yet be said to have been organised as a distinct industry. The annual returns of honey from the hives range between 20 lbs. and 60 lbs. per hive.

The value of the export of honey from Australia was only £3361 in 1908, £2675 in 1909, £2439 in 1910, £4414 in 1911, and £1924 in 1912. It is believed that this export could be considerably increased. Australian honey exhibited in the Franco-British Exhibition in London in 1908, obtained the highest award, thus evidencing the purity of its flavour.

**2. Production of Honey and Beeswax.**—The particulars of honey production are as given below:—

## NUMBER OF HIVES AND PRODUCTION OF HONEY AND BEESWAX, 1909 to 1913.

| State.              | Bee Hives. |                |          | Honey Produced. |         | Beeswax Produced. |        |

## § 8. British Imports of Dairy Products.

1. Value of Britain's Imports of Dairy Products.—Great Britain has paid annually since 1908, considerably more than £20,000,000 for imported butter, the value of the imports in 1908, 1909, 1910, 1911 and 1912, being £24,081,000, £22,425,000, £24,493,000, £24,600,000 and £24,354,000 respectively; for imported cheese the amounts in the years

named were respectively £6,684,000, £6,830,000, £6,810,000, £7,140,000 and £7,414,000; for bacon and ham, £17,565,000, £16,914,000, £15,918,000, £17,391,000 and £17,276,000 respectively; and for pork, £1,660,000, £1,336,000, £1,500,000, £1,413,000 and £1,101,000 respectively.

2. **Butter.**—Australia in 1911 stood second, and in 1912 third, in the value of butter imported into the United Kingdom; but the import of other Australian dairy products was inconsiderable.

#### IMPORT OF BUTTER INTO THE UNITED KINGDOM, 1912.

| Country from which Imported. | Quantity. | Value.     | Country from which Imported. | Quantity. | Value.     |
|------------------------------|-----------|------------|------------------------------|-----------|------------|
|                              | Cwt.      | £          |                              | Cwt.      | £          |
| Denmark ...                  | 1,618,048 | 10,356,001 | Argentine Republic           | 67,244    | 396,964    |
| Russia ...                   | 688,650   | 3,656,742  | Norway... ..                 | 30,634    | 192,183    |
| Australia...                 | 549,396   | 3,225,886  | United States ...            | 2,596     | 15,250     |
| New Zealand                  | 349,012   | 2,148,192  | Other Countries              | 9,197     | 48,014     |
| Sweden ...                   | 335,014   | 2,113,871  |                              |           |            |
| France ...                   | 246,652   | 1,559,452  |                              |           |            |
| Netherlands                  | 113,716   | 641,638    | Total ...                    | 4,005,159 | 24,354,193 |

In October, 1907, a falling-off of imports of Australian butter into Great Britain was noticed, with the result that, three months later, there was a heavy shortage, accompanied by rapidly rising prices, until a limit was reached with 156s. per cwt., the highest recorded for Australasian butter. After a short period of high values in February, 1908, prices steadied at 116s., and then gradually fell to 104s. in the middle of May, when European grass-fed butter was ready for the British market. In January, 1910, the average price was 111s. After a fall in 1911, 134s. was reached in the middle of January, 1912. These high values were followed by a rapid decline. Prices in London during the last five years have been considerably higher than the average of any previous year since the Australian export trade was instituted twenty years ago. A marked approach to Danish values has lately been made in the prices of Australian butter.

3. **Cheese.**—The value of the British cheese import in 1912 was £7,414,000, of which nearly four and a half million pounds' worth was received from Canada. Small experimental shipments from Australia were made in 1908 and following years, a fair price being realised. In 1911, the value of the import from Australia was £37,000; but in 1912 it was under £5000.

4. **Bacon and Ham.**—Of a total import of bacon and ham valued in 1912 at £17,276,000, Great Britain received goods to the value of £7,839,000 from Denmark; £7,340,000 from the United States; and £1,407,000 from Canada. The British import from Australia was small, but experimental shipments have been made during recent years.

5. **Pork.**—The total value of British imports of pork (including refrigerated, frozen and salted) was £1,101,000 in 1912. Of this the value of Australian produce was *nil*, whilst from the Netherlands pork valued at £706,000 was imported into Great Britain.

6. **Other Products.**—There is practically no British import from Australia of honey, beeswax, poultry, game, lard, or eggs, but frozen rabbits to the value of £395,000 were received from the Commonwealth in 1912.

### § 9. Graphical Representation of Dairy Production.

Two graphs shewing respectively the increase in dairy production and in the exports of butter will be found on page 306.

## SECTION X.

## FORESTS, FORESTRY, AND FORESTAL PRODUCTS.

## § 1. The Forests of Australia.

1. **Extent of Forests.**—Although no definite survey of forest lands has been made on a uniform basis for the different States of Australia, the following table gives the results of careful estimates made for each State :—

## FOREST RESERVES AND FOREST AREAS, STATE AND COMMONWEALTH, 1912.

| State.              | Specially Reserved for Timber. | Total Forest Area. | Percentage of State Area. |               | Percentage of Commonwealth Area. |               |

| Western Australia   | 12,227,612                     | 20,400,000†        | 1.96                      | 3.27          | 0.64                             | 1.07          |
| Tasmania ...        | ‡1,000,000                     | 11,000,000         | 5.95                      | 65.56         | 0.05                             | 0.58          |
| Commonwealth        | 29,182,592                     | 102,000,000        | —                         | —             | 1.53                             | 5.35          |

\* Inclusive of 6730 acres within the Federal area. † S.W. division only ‡ Approximate.

The actual area of wooded land is probably in all cases much greater than shewn above. For example, that of Western Australia is estimated at 97,900,000 acres; Queensland has probably 143,000,000 acres; and Victoria has a considerable extent of "Mallee" country not included in the above estimate. The basis of estimation for each State in any case cannot be regarded as quite identical. Considerable areas not included as forest lands possess timber of local value.

In each of the States areas have been set apart as State forests and "timber reserves," in some cases the reservation being made in perpetuity, in others for a definite period; in others again the reservation may be cancelled at any time.

The absolute and relative forest areas of Australia and other countries, to the latest available date, are shewn in the table on the next page.

## RELATIVE AREAS OF FOREST LANDS, AUSTRALIA AND OTHER COUNTRIES.

2. **Distribution of Timber.**—The characteristics of the forest areas are given in some detail for each State in the Official Year Book No. 6, pp. 446-9. The more conspicuous timber regions of Australia as a whole are the eastern and southern portions, including Tasmania, and, again, the south-western portion northwards and eastwards from Cape Leeuwin. In regard to distribution, on the eastern side of the continent the largest timber is found on the crests and coastal slopes of the mountain ranges, but in the south-west, in addition to the vegetation between mountains and sea, a large area of forest stretches inland from the coastal ranges. The hills encircling Adelaide and Yorke and Eyre Peninsulas also bear good forest. The Kimberley district is timbered, and in the Northern Territory and round the shores of the Gulf of Carpentaria there are considerable forest areas. But in the interior of the continent, and in the coastal regions of West and North-West Australia, (except in the case of the districts named), and along the shores of the Great Australian Bight and Encounter Bay, there is little forest. The interior of the continent is thinly timbered.

## § 2. Forestry.

1. **Objects.**—Economic forestry, aiming at the conservation of forestal wealth by safeguarding forests against inconsiderate destruction, and by the suitable re-afforestation of denuded areas, is essential to the preservation of industries dependent upon an adequate supply of timber, and to the perpetuation of a necessary form of national wealth. Though in Australia large areas of virgin forests still remain, the inroads made by timber-getters, by agriculturists, and by pastoralists—who have destroyed large areas by “ring-barking”—are considerable; and it is not unlikely that climatological changes are caused thereby. It is stated that beneficial consequences follow on the planting of trees on denuded lands, or along eroding coasts, and that a forest covering tends to beneficially regulate the effects of rainfall.

Successful planting of exotics in various parts of the Commonwealth has demonstrated that the Australian climate is suitable for the cultivation of a large number of the most valuable and beautiful of the world's timber trees.

2. **Forestry Departments.**—Each State of the Commonwealth, excepting Tasmania, has organised a separate forestry department or branch of service specially charged with forestal matters. Forest improvement work is carried on, areas of young forest being cleaned up by the felling and removal of stunted, diseased and suppressed growth, the

burning of debris and the making of fire breaks. Provision is made for effective patrols in forest districts, to check the ravages caused by fires, often, it is believed, caused through carelessness. The following table gives a comparative indication of the attention paid to the subject, the particulars being those for 1912:—

### STATE FORESTRY DEPARTMENTS, 1912.

**3. Sylvicultural Nurseries and Plantations.**—The growing recognition of the necessity for systematic sylviculture has led to the creation in most of the States of a number of sylvicultural nurseries and plantations. The locality of these establishments, together with a brief statement of their activities, is given in previous issues of the Year Book. (Reference may be made to Official Year Book No. 6, pp. 451-3.) The details for 1912 are as follow:—

## SYLVICULTURAL NURSERIES AND PLANTATIONS, 1912.

| Particulars.   | New South Wales.* | Victoria. | Q'land. | South Australia. | Western Australia. | Tasmania. |
|--|-------------------|-----------|---------|------------------|--------------------|-----------|
| Expenditure on plantations and upkeep of sylvicultural nurseries     | £3,993            | £11,380   | nil     | £19,041          | £1,316             | £250      |
| No. of persons engaged in nurseries                                  | 16                | 32        | nil     | 20               | 4                  | 2         |
| No. of sylvicultural nurseries ...                                   | 1                 | 3         | nil     | 7                | 1                  | 1         |
| Area of sylvicultural nurseries ...                                  | 128 ac.           | 54 ac.    | nil     | 7 ac.            | 17 ac.             | 8 ac.     |

| Area of forest plantations ...                                       | 195 ac.           | 19070 ac. | 310 ac. | 9684 ac.         | 700 ac.            | ...       |
| Extent of public distribution of trees or number of trees issued ... | 70,000            | 40,000    | †       | 280,000          | 68,000             | 5000      |

\* A small nursery has also been established at Acton, Federal Territory.

† There are no forest nurseries issuing trees in Queensland, but a small number of economic and ornamental trees are issued by the Department of Agriculture.

4. **Instruction in Scientific Forestry.**—Forestry schools have been established in which, while general scientific instruction is imparted, special attention is paid to forestry. In the classes, theoretical forestry, botany, geology, physics, land surveying, etc., are taught; while in outside work trainees receive practical instruction in the preparation of seed-beds, seed-sowing, propagation, planting out, pruning, the general care and improvement of plantations and natural forests, and the employment of timber to the best advantage. The desire is to give the prospective forester a thorough training in all branches of the work. Courses of lectures are given at various centres, and at some of the higher technical schools, members of the forest staffs are afforded opportunities of qualifying in special subjects.

5. **Forest Congresses.**—An Australian Interstate Conference on Forestry was held at Sydney in November, 1911. Many of the recommendations which the conference approved have been carried out. An International Forest Congress was held at Paris in June, 1913, when Professor Percy Groom, of South Kensington Imperial College, represented the Commonwealth Government. The papers and reports dealt chiefly with the threatened shortage of timber, and the measures necessary to avert the danger.

### § 3. Commercial Uses of Principal Australian Timbers.

The uses of the more important of Australian timbers are many and various, and are indicated in previous issues of this work (see Official Year Book No. 6, pp. 454-6).

As aids in the development of Commonwealth industries, the Government is experimenting with Australian woods for rifle stocks, telephone switch boards, etc. It has also made available a sum of money for the seasoning and storing of Australian timber. Timber seasoning depôts have also been established by States Governments at the principal centres, and from these contractors may obtain timber at scheduled rates. Other timber seasoning works have been established by private enterprise.

### § 4. Forestal Industries and Production.

1. **Timber.**—Estimates of the quantity and value of timber cut and sawn have been prepared by the States Forestry Departments, and are as follows:—

**QUANTITIES OF LOCAL TIMBER SAWN OR HEWN IN EACH STATE OF THE  
COMMONWEALTH DURING THE YEARS 1908 to 1912.**

| State.                   | 1908.       | 1909.       | 1910.       | 1911.       | 1912.       |
|--------------------------|-------------|-------------|-------------|-------------|-------------|
|                          | sup. feet.  | sup. feet.  | sup. feet.  | sup. feet.  | sup. feet.  |
| New South Wales ... ..   | 123,152,000 | 134,070,000 | 138,845,000 | 142,358,000 | 162,604,000 |
| Victoria ... ..          | 54,602,000  | 50,000,000  | 51,000,000  | 53,000,000  | 66,000,000  |
| Queensland ... ..        | 100,760,000 | 108,391,000 | 116,438,000 | 138,896,000 | 163,828,000 |
| South Australia ... ..   | 436,000     | 240,500     | 210,000     | 217,000     | 183,000     |
| Western Australia ... .. | 165,766,000 | 171,825,000 | 174,528,000 | 191,114,000 | 217,696,000 |
| Tasmania... ..           | 44,335,000  | 45,035,000  | 54,933,000  | 66,061,000  | 63,243,000  |
| Commonwealth ... ..      | 489,051,000 | 509,561,500 | 535,954,000 | 591,646,000 | 667,554,000 |

2. **Other Forest Produce.**—No satisfactory estimates of the total value of forest production are available. Large returns are credited to firewood, but these are subject to a wide range of uncertainty.

**§ 5. Oversea Trade.**

1. **Imports.**—The quantity and value of timber imports during the four years 1909 to 1912 inclusive are shewn according to countries of origin in the following tables:—

**IMPORTS OF DRESSED TIMBER, COMMONWEALTH, 1909 to 1912.**

| Country of Origin.          | Quantity.* |            |            |            | Value.  |         |         |         |

## SECTION XI.

## FISHERIES AND PISCICULTURE.

## § 1. Commercial Fisheries.

1. **Fish Stocks.**—Australasia possesses an abundant and varied fish fauna, which embraces both tropical and temperate varieties and includes destructive as well as edible species. In rivers and lakes both indigenous and imported varieties thrive. The latter have been introduced and acclimatised for industrial and sporting purposes by Governments and angling societies. Exploitation of the fishing areas—for some classes of fish for the whole year, for others during the breeding season only, or until a certain size is attained—is, where necessary, expressly forbidden; proclaimed localities are closed against net-fishing, and a minimum size of mesh for nets is sometimes fixed. The sea-fishermen in some districts have made regulations in their own interests for the purpose of controlling the market supply, and these they rigorously observe.

2. **Economic Fisheries.**—Although Australia's food fishes are abundant, the development of the industry has been slow. It has been authoritatively stated that the marine fisheries, properly fostered, will develop into an industry of national importance. Local catches of lake and river fishes furnish, in the aggregate, a not inconsiderable amount of food supply.

3. **Distribution of Supplies.**—Present methods of distribution impose serious difficulties on the development of fishing generally, since there is a wide divergence between the price paid by the consumer and the return received by the producer. States and municipalities are interesting themselves in the direction of more economic distribution. Good markets are assured in the chief cities for regular deliveries of fresh fish.

4. **Oyster Fisheries.**—Natural oyster beds, whose ample product is of excellent quality, exist on the foreshores in the shallow waters of inlets and estuaries in several parts of Australia. By husbanding the natural crop, and by judicious transplanting, the oyster output has been very materially augmented, and it is believed that there is a great future for the industry. The areas are leased by the Government to private persons, lengths of foreshore being taken up and profitably exploited. In New South Wales and Queensland particularly, the industry has developed; and small yields have been obtained in South Australia and Victoria.

5. **Pearl-shelling.**—Pearl-shelling is carried on in the tropical districts of Queensland, the Northern Territory, and Western Australia. The pearl oyster inhabits the northern and western coasts from Cape York to Shark Bay, a length of shore of over 2000 miles. The shells are marketed in considerable quantities, and pearls are also obtained in Queensland and Western Australia. The fishing is generally conducted with the aid of diving apparatus, in water varying from four to twenty fathoms in depth.

In Queensland and Northern Territory the bêche-de-mer industry is carried on, and tortoiseshell is obtained on the coasts. Experiments have been made in cultivating the pearl oyster on suitable banks. In October, 1911, a pearl weighing 178 grains, and valued at £3000, was obtained at Broome. Further details regarding pearl-shelling are given in *Official Year Book*, No. 6, p. 463.

The system of licensing boats and men engaged in the pearling industry restricts, in the States where it is in force, indiscriminate exploiting of the areas, and returns a small revenue.

Poaching in Australian territorial waters has long been rife, particularly on the north-west coast, and measures have recently been taken to check it.

In accordance with the "White Australia" policy, it has been determined that the employment of coloured labour in the pearl-shelling industry shall be restricted, and ultimately cease altogether. After 31st December, 1913, permits to indent Asiatics for the pearling fleet cease, and all divers and tenders employed upon the luggers must be white men. Experienced divers from England have been engaged. It is believed that practical difficulties which may arise in the transition period will be overcome. In March, 1912, the Commonwealth Government appointed a Royal Commission to inquire into the pearling industry generally, and particularly as regards its labour problems. The Commission commenced its work at Cairns, Queensland, on 30th April, 1912. Evidence of a valuable nature has been taken in various centres; a progress report was presented in October, 1913; and minutes of evidence, appendices, etc., were published in December, 1913.

## § 2. Fisheries Statistics.

1. *Estimates for the Commonwealth.*—The returns given below have been furnished by the State departments. Estimates and approximations, where shewn, are official. The data do not generally lend themselves to presentation on a uniform scheme, but the principal facts have been compiled as far as possible for the Commonwealth.

## § 3. Oversea Trade in Fish.

That the development of the fishing industry in Australia leaves much to be desired is evident from the fact that the import of preserved fish into the Commonwealth is very large. The figures for the trade are as follows:—

## IMPORTS OF FISH, COMMONWEALTH, 1908 to 1912.

| Classification.                        |         | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|--|---------|---------|---------|---------|---------|---------|
| Fresh (oysters) ...                    | { cwt.  | 9,702   | 10,580  | 9,640   | 7,152   | 8,765   |
|  | £       | 4,381   | 4,989   | 4,805   | 3,462   | 5,279   |
| Fresh, or preserved by cold process... | { cwt.  | 19,311  | 11,355  | 11,248  | 20,455  | 25,673  |

| Fish, fresh, smoked, or preserved by cold process | { cwt. | 394    | 994    | 912    | 248    | 137    |
|   | £      | 1,230  | 2,896  | 1,963  | 1,026  | 436    |
| Preserved in tins, dried, salted, etc.            | { cwt. | 7,006  | 6,746  | 5,346  | 6,891  | 38,268 |
|   | £      | 23,299 | 15,556 | 17,532 | 23,185 | 35,827 |
| Total ...   | { cwt. | 7,400  | 7,740  | 6,258  | 7,139  | 38,405 |
|   | £      | 24,529 | 18,452 | 19,495 | 24,211 | 36,263 |

Although a considerable development has taken place lately in the fish preserving industry, there is for the Commonwealth an excess of imports over exports amounting approximately to £485,000 in 1908, £450,000 in 1909, £540,000 in 1910, £545,000 in 1911, and £745,000 in 1912.

The exports of pearlshell and tortoiseshell are given hereunder for the five years 1908-12:—

## EXPORTS OF PEARLSHELL AND TORTOISESHELL, 1908 to 1912.

|                   | £      | 250,904 | 250,291 | 322,184 | 330,003 | 524,281 |
| Tortoiseshell ... | { lbs. | 5,310   | 3,207   | 1,742   | 1,693   | 5,170   |
|                   | £      | 2,783   | 1,557   | 823     | 964     | 3,454   |

## § 4. Development of the Fishing Industry.

**1. Transport and Marketing.**—For many years the question of securing to the consumer a regular supply of wholesome fish at a moderate price has been under consideration. Where quick transport by rail or steamer is not provided, the catch of fish in tropical or sub-tropical waters can only be locally consumed, since speedy marketing is essential. Adequate refrigerating apparatus on railway waggons and coasting steamers and quick transport to centres of population might, however, alter the economic condition in a satisfactory direction. In the temperate regions there are adequate supplies close to the principal ports—a fact which is of considerable advantage, since short trips mean marketing of the produce in good condition, and less sea risks are incurred. At the present time the natural wealth of Australia in fish is exploited only to a very slight extent.
